Mr. JOHNSON of Texas. Mr. President, the distinguished minority leader informs me that a Senator desires to offer an amendment to the mutual security bill, but that he will not be able to be here until about 5:30 this evening. I do not anticipate that we will have the third reading of the bill before 5:30, but I should like to have all Senators on notice that if the Senator is in the Chamber and offers his amendment, and if we can conclude with the bill and go to a third reading this evening, we would like to do so.

REPORT ON REVIEW OF SELECTED COMMERCIAL AIR SHIPMENTS OF HOUSEHOLD GOODS OF MILITARY PERSONNEL

Mr. BYRD of Virginia. Mr. President, as chairman of the Joint Committee on Reduction of Nonessential Federal Expenditures I am in receipt of a "Review of Selected Commercial Air Shipments of Household Goods of Military Personnel" by the Comptroller General of the United States.

This audit review was forwarded by the Comptroller General of the United States, the Honorable Joseph Campbell, under a letter dated April 25, 1960.

I ask unanimous consent to have this letter from the Comptroller General published in the RECORD as part of these remarks, along with a copy of a statement by me relative to the review.

There being no objection, the letter and statement were ordered to be printed in the RECORD, as follows:

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, April 25, 1960.

HON. HARRY F. BYRD,
Chairman, Joint Committee on Reduction of Nonessential Federal Expenditures, Congress of the United States.

DEAR MR. CHAIRMAN: Enclosed for the use of your committee is a copy of our report to the Congress on review of selected commercial air shipments of household goods of military personnel.

The report discloses that unnecessary costs were incurred as a result of shipping household goods of transferred military personnel to and from oversea points by commercial air transportation. We found that air transportation was used in cases where adequate surface transportation was available at much lower cost. A review of 13 expensive shipments of household goods by commercial air at a total cost of $125,470 disclosed that shipment by surface transportation was feasible and would have cost only about $23,000 or about $102,000 less than the cost of shipment by commercial air. For example, household goods were shipped by commercial air from Texas to Pakistan at a cost of $14,830, whereas

they could have been shipped by surface transportation for only about $1,750. In this instance, they would have arrived in Pakistan by ship one week earlier than by air. Also, we noted that air shipments included a piano, a model ship, and a sled. Such items are obviously not essential to the health or well-being of the transferred personnel or for the prevention of undue hardship. Where items are considered desirable rather than essential, we believe that shipment should be by surface transportation unless there are cogent reasons justifying air shipment.

We are recommending to the Secretary of Defense that specific instructions be incorporated into the Joint Travel Regulations limiting the use of commercial air for shipment of household goods.

Sincerely yours,

JOSEPH CAMPBELL,
Comptroller General of the United States.

STATEMENT BY SENATOR BYRD OF VIRGINIA

The Comptroller General of the United States, Hon. Joseph Campbell, has advised me that military services have been shipping household goods of uniformed personnel overseas by commercial airline at a cost five times as great as charges for available and adequate surface transportation.

The Comptroller General's statement was based on audit of 13 sample Army and Air Force cases in which commercial air transportation charges totaled $125,470 as compared with surface transportation costs which would have totaled $22,984 if that means of transportation had been used.

In one case the Comptroller General found that a $14,830 commercial air transport shipment from Fort Sam Houston, Tex., to Karachi, Pakistan, could have been sent by surface transport for $1,750, and that it would have arrived a week earlier.

The cost of these 13 shipments of household goods ranged from $2,700 to $21,700 each. And in the course of the audits the Comptroller General found that the Government had been charged $48,979.19 for one $5,216.19 shipment and the Army disbursing officer's arithmetic had not caught the error.

This overpayment case involved the shipment of 2,947 pounds of household goods originating in Vancouver Barracks, Wash., U.S.A., by commercial air transportation from Portland, Oreg., to New York via Flying Tiger Airlines, Inc.; from New York to London via Pan American Airways; from London to Khartoum, Sudan, via Hunting Clan Air Transport, Inc.; and from Khartoum to Asmara, Eritrea, via Sudan Airways. The Comptroller General is seeking to recover the $43,763 overpayment from Sudan Airways.

Although itemized listings of the air shipments were not generally available, the audits did disclose nonessential shipments by commercial air freight, such as a sled to France in the month of May, a piano to Spain, and a model ship from France to the United States.

The Comptroller General could find no reason to regard shipment of such items at premium rates as essential to the health and well-being of transferred personnel, and asserted the belief "that shipment should be by less expensive surface transportation unless there are cogent reasons, which are fully documented, justifying air shipment."

A copy of the Comptroller General's audit review of these cases was forwarded to me today as chairman of the Joint Committee on Reduction of Nonessential Federal Expenditures, and I shall take the matter up with the Senate Armed Services Committee.

The report points out that under military regulations and the Career Compensation Act of 1949, "household effects of members of the uniformed services may be shipped without regard to the comparative costs of the various modes of transportation," and under present practice determination is made by the local military transportation officers.

AID FOR THE ELDERLY

Mr. HUMPHREY. Mr. President, the Midwest Democratic Conference held recently in Detroit adopted an excellent statement on the welfare of elderly people. This statement was sponsored by Mrs. Geri Joseph, chairwoman of the Democratic Farmer Labor Party in Minnesota. I ask unanimous consent that the statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows.

GOALS FOR AMERICA—POLICY STATEMENT, DEMOCRATIC MIDWEST CONFERENCE, DETROIT, MICH., MARCH 26, 1960

HUMAN WELFARE: AGING

The Democratic Party has a long record of achievements in aiding older citizens of the United States, particularly since the passage of the Social Security Act of 1935. Now the problems of the elderly are assuming new forms, and we recognize the leadership of Senators MCNAMARA and HILL, Representatives FOGARTY, FORAND, and WIER, in seeking to provide legislation that will help solve these problems.

There are about 16 million Americans over the age of 65 years, 9 percent of the population, and this number is mounting both absolutely and relative to the total population. An increasing proportion of elderly persons are physically vigorous as they enter old age. At the same time, medical advances have all but wiped out the acute, infectious diseases as causes of death. When elderly persons become seriously ill today, they are increasingly likely to acquire one of the chronic illnesses—mainly diseases of the heart or the arteries, cancer, or mental illness. A great need here is for preventive and diagnostic health services.

Once acquired, the chronic illnesses require long periods of hospitalization or home nursing care. Thus, they require relatively heavy expenditures to treat and to maintain the patient while under treatment, whereas the older infectious diseases formerly carried off their victims with relatively few costs for medical care. Few older persons have accumulated savings sufficient to pay for their treatment and care if they get one of the chronic diseases, their current income is generally very low if they are retired, and the costs of medical care are mounting. To avoid placing half the population of older persons on even more costly old age assistance, the principal of compulsory insurance from the earliest working years—through the social security system—is the only sensible solution.

Due to increasing geographical mobility caused by the requirements of modern industry, and to the contemporary popularity of the smaller sized residence, adult offspring of today are much less likely than formerly able to move into their parents' home or to have space for their parents in their own apartments or homes. Thus, more and more, older persons or couples are required to live by themselves. Thus, they are less likely to be cared for personally by their adult children when they become ill, and it costs more to have others care for them. There is a growing need for nursing homes, convalescent homes, and chronic illness wards in hospitals.

The traditional manner of caring for seriously ill persons is to place them in hospitals. But many chronically ill elderly persons do not need the extensive and expensive care provided by hospitals. Similarly, the traditional manner of caring for indigent aged persons who cannot fully take care of themselves is to put them in institutions—"old people's homes." Recent studies have shown that cheaper and more effective care can be provided in the older person's own home, if part-time homemakers' and nursing services can be provided.

Architects and other constructors of houses have learned about the special housing needs of older persons: handrails, substitution of graded ramps for steps, bathtubs that are easy to get in and out of, and so on. Studies of the social needs of older people show that they do best when they live with other older people in independent units with certain common facilities, but not completely isolated from younger people. Both public and private housing constructors long neglected the physical and social requirements of older people, and so there is a great need today for the stimulation of construction that will take into account these needs.

The increasing likelihood today that persons reaching the age of 65 will be physically fit and vigorous means that there is less reason for retirement from jobs at that age. Compulsory retirement policies now in existence often reflect the earlier situation. There still may be good reason today for some people to retire at 65 years, but there is little reason why the retirement should be compulsory for all people. Government can do little about this, except for its own employees, of course, but the social security system should avoid penalizing people who want to work after the age of 65 and are better off doing so.

Another carryover from the past is the widespread belief that older persons are not efficient or are otherwise not desirable as workers. This belief encompasses workers from the age of 40 onward, and not only those past 65 years. Studies show that, for most lines of work, older workers are fully as capable as younger workers, and that in matters of responsibility and stability on the job are often more desirable. Laws for the protection of older workers generally are actions for the States rather than for the Federal Government. On the other hand, the Federal Government does use Executive orders to prohibit discrimination by employers with Federal contracts and subcontracts, and orders could be extended to prohibit discrimination against older workers by such employers. If the Executive fails to issue such an order, Congress can require nondiscrimination by statute.

Some of the unemployment among older people today is due to technological displacement, largely due to automation, and this will be increasingly significant in the near future. It often pays industries to retrain their younger workers for the new jobs required by automated production, and some younger workers will find it advantageous to get the new training at their own expense. But the expense of retraining can seem prohibitive, either to the employer or to the older worker, when the worker has only 10–20 more years for the job. Unless the Government helps to provide retraining, especially for jobs that younger workers are less likely to go into, industrial workers will increasingly find themselves on the occupational rubbish heap at the age of 45 or 50.

The Senate Subcommittee on Problems of the Aged and Aging, headed by Senator PAT MCNAMARA, of Michigan, has discovered that there are critical shortages of trained labor in the area of health and community services, jobs in which older part-time workers would be especially suitable if they were properly selected and trained. At present, there are practically no vocational training programs for persons over 65 years, and the labor shortages in these special fields con-

tinue because there is no recruiting and training programs to meet their needs.

The McNamara subcommittee finds that at least half of the older people in the country today do not have enough income to afford decent housing, proper nutrition, adequate medical care, or necessary recreation. Clearly, there is need for a rise in the payments under old-age insurance and old-age assistance, and if inflation continues, a system of maintaining a constant purchasing power for these payments.

Modern life also tends to create social isolation for older persons. Geographic mobility, urban anonymity, the decline of the extended family system (in which relatives kept close touch with each other), all tend to make it less likely that older people will be acquainted with other people of similar age and interests. Further, the concentration on work in past generations to the relative exclusion of hobbies and social participation make many older people, especially those in the lower income classes, less prepared to participate in constructive leisure time activities when they are retired. Many private associations around the country—led by older persons or by younger ones—have recognized the problem and have developed numerous Senior Citizens Clubs, Golden Age Clubs, and the like. Still, only a small proportion of the elderly have been reached, and these mainly in large cities, while the great bulk of those over 65 years remain lonely and at a loss as to what to do with their leisure time. A demonstration project in five rural counties of Minnesota shows what a magnificent response whole communities show when a trained community organizer helps them to start recreational, housing, and educational programs for the aging. Such projects ought to be stimulated in all the States, on a temporary basis until the local communities and organizations become aware of the problem and know what concretely to do about it, and the Federal Government could provide short-term grants for this purpose, the total cost of which would be quite low.

There is evidence that a growing number of Americans, old and young alike, are becoming aware of the widespread character of these new or expanded problems facing the aging and are in favor of doing something about them. Not all the problems can be solved, and even some of those that can be solved will require the actions of individuals and private groups. But Government has an important role to play, and the Democratic Party has an obligation to formulate and support recommendations for legislative and administrative action to ease the plight of the 16 million citizens over 65 years and the 49 million over 45 years.

To help meet the needs of the older population, the Democratic advisory council (in a policy statement adopted December 6, 1959), recommended:

1. A substantial increase in social security benefits, with at least a 30-percent increase over the current minimum payment of $33 a month.

2. Provision, through the social security system, of benefits to cover the increasing costs of adequate health care for retired beneficiaries and eligible dependents.

3. Revision of the OASI "retirement test" to allow part-time work to supplement regular OASI benefits up to an amount necessary to maintain a decent standard of living.

4. The blanketing into the social security system of all persons in covered occupations who are already retired.

5. The outlawing of age discrimination in employment in all Federal contracts.

6. Expansion of public preventive health programs to all persons over 60.

7. Appropriation and use of the full amount authorized by the Housing Act of 1959 for housing for the elderly, and a continuing program of construction stimulated by the Federal Government.

8. Creation of an older persons office in the executive branch.

The McNamara committee has formulated additional recommendations:

1. The establishment of a senior citizens service training program for the purpose of recruiting and training willing and able older persons to serve in specified community activities, the personnel for which are otherwise in short supply.

2. It recommends that the Congress consider adoption of a program of financial assistance to nursing homes which meet the minimum standards for medical and restorative services. The Department of Health, Education, and Welfare should be requested to develop a suggested plan and formula for this assistance program.

To this list, the Midwest Democratic Conference would add the following recommendations for action by the Federal Government:

1. Making funds available to the States, to be matched by funds provided by the States, for the purpose of hiring persons trained in community organization, whose task it would be to work with community groups and voluntary associations to stimulate local recreational, educational, and welfare programs for the benefit of the aging.

2. Making funds available to the States, to be matched by funds provided by the States, for the purpose of encouraging the States to develop specific demonstration projects for the benefit of the aging. Such demonstration projects—to be approved by appropriate units of the Federal Government—might include such things as surveys of the needs of the aging, geriatrics clinics, model housing for elderly persons with low income, model nursing homes for incapacitated elderly persons, homemaker and housecall services, local recreational and education facilities.

3. Explore ways of providing occupational retraining for workers 40–65 years of age displaced by automation and other innovations.

THE DULUTH HARBOR—A SOUND INVESTMENT

Mr. HUMPHREY. Mr. President, one of the most exciting and important economic developments in the State of Minnesota is the progress of the port of Duluth in preparing its facilities to make use of the great St. Lawrence Seaway.

A very fine article discussing this effort appeared in the Minneapolis Tribune of April 10, 1960, an article by Richard Saunders of the Minneapolis Tribune staff.

I ask unanimous consent, Mr. President, to have printed at this point in the RECORD the article by Mr. Saunders.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Minneapolis Tribune, Apr. 10, 1960]

DULUTH AWAITS NEXT ROUND IN BATTLE TO BE WORLD PORT—TAXPAYERS' INVESTMENT AT STAKE

(By Richard Saunders)

DULUTH, MINN.—Scrawled on a blackboard in Supt. Anthony F. Rico's office in the sprawling public marine terminal on Rice's Point are three chalked notes. They read:

"*Trans-Michigan*—Due April 24.

"*Trans-Erie*—May 24.

"*Clemens Sartori*—May 1."

These are the tentative arrival dates of the first three foreign ships carrying general cargo that are scheduled to call at Duluth-Superior in 1960, the second season of ocean shipping through the deepened St. Lawrence Seaway.

The number of regular visits by these and other freighters like them in the next few years will go far to determine the outcome of valiant battle being waged to establish this harbor as a major center of world commerce.

Every taxpaying Minnesotan has a stake in the final result, because the $10 million Arthur M. Clure terminal was built with State, county, and city funds.

From the seaway port authority of Duluth's ninth floor headquarters in the Alworth Building, the battle lines extend westward to the Pacific coast, south to the gulf coast and eastward through Washington and New York to Europe and the Middle East.

The authority's aim: to knock down the barriers of decades-old shipping habits, discriminatory rates, and practices and ignorance that block the development of this infant seaport located 1,500 miles from the sea.

"We're making slow but steady progress," said Robert Tomich, port traffic manager, last week. "But this is a tremendous task and we still have a long way to go."

In its baptismal year, the twin ports exported 86 million bushels of grain and imported or exported 17,000 tons of general cargo. This was twice as much grain and one-third as much cargo as predicted before the season opened.

Optimism was running high in shipping circles last week that grain exports in 1960 will rise to between 100 and 150 million bushels and that packaged freight will hit the 1959 estimate of 50,000 tons.

"By any standard, a tripling in general cargo shipments in 1 year would be an outstanding achievement," another port spokesman declared.

Last year, 22 foreign freighters put in here, bringing 11,681 tons of steel, ferrosilicon, machinery, woodpulp, glass, coffee, twine, liquor, beer, rugs, automobiles, and oatmeal to upper Midwest customers.

They departed with 4,700 tons of bentonite clay, machinery, dried milk, flour, honey, and tinplate, destined mainly for northern Europe.

The export tonnage was a far cry from the 750,000 tons of goods which, surveys indicate, move overseas through Lake Michigan, gulf and Atlantic ports from Duluth-Superior's 11-State trade area in an 8-month season.

Much of this total could move through Duluth at savings of 40 to 50 cents a hundred pounds over Milwaukee and Chicago," explained Tomich.

Robert T. Smith, port director, Tomich and others have worked all winter to correct the eight chief inequities they feel keep Duluth at a disadvantage. The box score: two down and six to go.

In February three of the eight railroads serving the port—the Milwaukee Road, Chicago and North Western and Soo Line—agreed to raise from 2 to 7 days the free time the railroads will allow cars to stand without charge to the shipper.

The other roads are objecting because they don't want to tie up grain cars during the harvest season.

The second victory came when the railroads agreed to eliminate a ruling that favored west bank Lake Michigan ports in the absorption of car loading and unloading costs.

Still to be won, however, are skirmishes over land transportation rates which now favor coastal ports against inland ports, Government discrimination against lake ports in routing Federal aid exports of agricultural products, the Maritime Commission's refusals to include Duluth as a regular port of call in all subsidy contracts with American lines and over an arbitrary 10-cent-a-ton penalty levied by conference line ships on general cargo carried on Lake Superior.

The port says it has received inquiries or requests for terminal charges of fruit, meat, and dairy products, lumber products, lubricating oils, machinery, seeds, peas, potatoes, bagged flour, vegetable oils, and meal for export in 1960.

But, no matter how great the saving, none of these shipments will move through the twin ports unless the shipper can be guaranteed quick and efficient service to the destination point.

On the other hand, no shipowner will spend an extra $600 to $1,200 a day (in the case of a foreign vessel) to come to Duluth and find no cargo waiting for him.

Well aware of this dilemma, the port and the Minneapolis Area Chamber of Commerce have been conducting a winter-long Operation General Cargo campaign to induce area shippers to try the twin ports.

Meanwhile, the port authority and shipping agents are seeking to arrange regular monthly sailings by five foreign lines serving the United Kingdom, northern Europe, the Mediterranean, the Caribbean, and South America.

As of last week, regular sailing schedules had been issued by the German Poseidon Lines, the port's lone steady service last year, and the English Manchester Liners, Ltd.

A third previously announced service, by the Greek Hellenic Lines, had not been firmed up.

Two other foreign companies that sent ships on an "if traffic justifies" basis last year may return this year under the same conditions, Tomich said. This includes Hamburg-Chicago Lines, whose *Clemens Sartori* is due to arrive May 1 with 300 tons of baling twine, glassware, and iron, and Bristol City Liners.

The *Trans-Michigan* and the *Trans-Erie* are Poseidon vessels.

The two American ship lines which attempted to establish Great Lakes service last year lost a total of $1,500,000 in the process. Tomich does not expect to see Grace Line or American Export Lines in Lake Superior this year.

(The international shipping season on the seaway is expected to open April 15 if ice conditions permit, 3 days earlier than in 1959. The first foreign vessel, a grain ship, is due in Duluth-Superior April 21, 2 weeks ahead of the *Ramon de Larrinaga's* May 3 arrival last year.)

Meanwhile, the port has been bustling with activity in anticipation of increasing the estimated $2 million windfall of wages, purchases, and services left here in connection with the introduction of foreign commerce last year.

To speed grain handling, at least four of the port's 11 elevators and grain docks are being improved at a cost of more than $1 million. This comes on top of the $2½ million spent on dredging, spout raising and improved berthing areas in 1959.

Grain storage capacity has been increased to 70 million bushels with the conversion of a former Carnegie anthracite coal storage building into a 2½-million-bushel grain warehouse by Duluth Dock & Transport Co. The new firm has also built a warehouse to store 20,000 tons of salt.

Donovan Construction Co., St. Paul, has acquired a 45-acre site on Connor's Point in Superior for the possible construction of a grain elevator.

International Duluth Seaport Corp., a group of Canadian and English investors who have proposed an $80 to $100 million private terminal on a 135-acre site, expects to gain clear title to the property in 20 or 30 days, a spokesman said.

The corporation plans a board meeting in Duluth in early May to plan its next step.

The port authority is considering construction of a $400,000 5,000-ton tank farm for storing animal and vegetable fats, oils and greases.

Cargill, Inc., which has a 2,400,000-bushel grain elevator in Superior, is negotiating to operate the 4-million bushel Norris Grain Co. elevators in Duluth.

The Fraser-Nelson shipyard in Superior, booming all winter with major repairs on several domestic iron ore carriers, may find repeat business during the summer from foreign hulls damaged during trips through the lakes en route to the twin ports.

At least two new steamship agencies and three new stevedoring companies have opened offices in Duluth, increasing the former total to eight and the latter to 14.

The Minnesota State grain inspector's office will add 25 more men to its 100-man staff to handle an expected increase in grain shipments. One Federal and one State entomologist will be employed to inspect cargo holds for insects.

The Federal Immigration and Naturalization Service and the U.S. Collector's Office have hired three additional men.

Several new harbor services are planned, including a water taxi to ferry pilots and inspectors out to foreign vessels anchored offshore, a garbage collection boat and a third excursion ship for sightseers.

Steamship agencies, busy lining up ships to pick up grain stored in the port's 11 elevators, report charters are running slightly behind to about even with last year's record-breaking rate.

Agents hunting for packaged cargo, their job immeasurably more difficult because of tradition-bound shippers' habits and unsettled freight rates, are generally optimistic.

One of the new agents, Brendan P. O'Callahan, New York, said he has "firm commitments on 200 to 300 tons of general cargo for export" from May 1 to October 1 and has "tentative commitments on 20,000 to 30,000 additional tons."

O'Callahan, who brands the Duluth facilities as "the most flexible of any of the 250 world ports I've seen in 26 years in the shipping business," is confident the harbor will become a major foreign trade center in 3 to 5 years.

But he echoes a belief widely held in shipping circles here that that day will not come until the port gets wider support from upper Midwest shippers and the public.

PUBLIC AND PRIVATE COOPERATION TO SOLVE THE REFUGEE PROBLEM

Mr. HUMPHREY. Mr. President, it is the great strength of our American assistance operations abroad that they are a practical combination of public and private assistance. The direct generosity of individual Americans to those who are hungry and homeless in other nations amounts to millions of dollars a year channeled through more than 35 voluntary agencies.

The esteemed Monsignor Edward E. Swanstrom, chairman of the American Council of Voluntary Agencies for Foreign Service, and himself director of Catholic Relief Services, has called attention in a statement signed by the council's executive committee to the special obligations of our Nation for both public and private efforts in World Refugee Year.

The council comments that "the voluntary agencies take pride in the spirit which has prevailed—note the results—and are challenged by the vast area of critical needs still to be met."

Among these needs the council asks full use by the administration of the $10 million World Refugee Year Fund authorization and refugee admission legislation providing for admission of certain "difficult to resettle" persons. Both these proposals are goals which I wholeheartedly endorse.

Mr. President, I ask unanimous consent that the letter from Monsignor Swanstrom and the members of the council executive committee and the council's statement be printed in the RECORD.

There being no objection, the matters were ordered to be printed in the RECORD, as follows:

AMERICAN COUNCIL OF VOLUNTARY AGENCIES FOR FOREIGN SERVICE, INC.,
New York, N.Y., April 22, 1960.

Hon. HUBERT H. HUMPHREY,
The Senate Foreign Relations Committee,
Senate Office Building, Washington, D.C.

DEAR SENATOR HUMPHREY: The American Council of Voluntary Agencies for Foreign Service has expressed the belief that you will be interested to receive the attached statement "The Refugee Problem—Concerning Both Sectors, the Public and the Private."

On behalf of the American Council the officers appreciate this opportunity to transmit this report to you for your information and for such use as you see fit.

Moses A. Leavitt, honorary chairman, American Jewish Joint Distribution Committee, Inc.

The Right Reverend Monsignor Edward E. Swanstrom, chairman, Catholic Relief Services—National Catholic Welfare Conference, Inc.

Vice chairmen: Dr. John S. Badeau, Near East Foundation; J. N. Byler, Mennonite Central Committee, Inc.; Bernard A. Confer, Luther World Relief, Inc.; Richard W. Reuter, Cooperative for American Relief Everywhere, Inc. (CARE); Louis W. Schneider, American Friends Service Committee, Inc.; Dr. R. Norris Wilson, Church World Service, Inc.

James P. Rice, secretary, United Hias Service, Inc.

Abram G. Becker, treasurer, Cooperative for American Relief Everywhere, Inc. (CARE).

Sincerely yours,
EDWARD E. SWANSTROM,
Chairman.

THE REFUGEE PROBLEM CONCERNING BOTH SECTORS—THE PUBLIC AND THE PRIVATE

A short time ago the member agencies of the American Council of Voluntary Agencies for Foreign Service undertook a review of their operational activities in the area of need and underprivilege abroad. Their findings are summarized in a formal statement delivered before the Straus committee[1] engaged in a study of the role of the American private sector abroad. In conclusion the statement expresses a concern of the 39-member agencies of the American Council, as follows:

"During the 20th century it is impossible to escape from the fact that there exists a struggle for the minds and souls of men. This struggle may be conducted by words and by every means of propaganda, and it may also be conducted by deeds and by example. The voluntary sector, besides promoting peace and an abiding sense of brotherhood through programs of cooperation to meet human need, performs a basic service to truth which is deeply significant to the whole future development and ultimate goals of American foreign policy.

"The American voluntary agencies have been particularly active in mass and indi-

[1] Javits amendment to the Mutual Security Act of 1958, sec. 205(j)(2).

vidual migration and resettlement of peoples displaced by war's aftermath, calamity or political oppression. In the past decade, some 600,000 such persons have been resettled in the United States of America through sponsorship secured by voluntary agencies. The American economy was aided, but the resettlement movement was not a device to satisfy the labor market; it was a human response to human need—with great social and economic advantage to the labor market. This corporate work of rescue has not only saved individual and family lives, but has been of service to the economy of such overpopulated countries as Austria and Italy. Postwar sponsored migration has demonstrated the continuing awareness of America as a haven for the oppressed and has thus supported and dramatized the position of the United States in the world. But even more, this activity of the American voluntary agencies has inspired and become an integral part of worldwide endeavor of counterpart agencies thus adding immeasurably to the total achievement of the American voluntary agencies. A number of worldwide voluntary associations have helped to resettle substantial numbers of persons in other countries as well as in the United States of America. These world programs for refugees relying substantially for financial support on voluntary American gifts, are a vital part of the contribution that American voluntary agencies are making to the broader goals of our foreign policy."

No one familiar with the needs of refugees can fail to recognize the American leadership which has been exerted since the end of World War II. Indeed the determination to express our humanitarian concern is reflected in continued American private and governmental action, even as the aspect of the refugee problem has changed with the passage of 15 years of postwar history.

These 15 years have brought action through a variety of concerned organizations—governmental, such as the Displaced Persons Commission and the U.S. escapee program; intergovernmental, such as the Intergovernmental Committee for European Migration; international, such as the United Nations Relief and Rehabilitation Administration, the International Refugee Organization, the United Nations Korean Reconstruction Agency, the United Nations Relief and Works Agency for Palestine Refugees, and the Office of the United Nations High Commissioner for Refugees; and private, voluntary organizations sectarian and nonsectarian such as those which constitute the membership of the American Council of Voluntary Agencies.

Through a series of legislative enactments pertaining to immigration and laws relating to the uses of American agricultural products and through the development of specific programs and organizations, the historic concern of the American people for others has been demonstrated. Through the joint action of the public and private sectors millions have been fed and clothed. The movement of many hundreds of thousands of displaced persons throughout the free world by the International Refugee Organization was facilitated by American governmental support and voluntary agency ability to arrange necessary sponsorship and to accept placement responsibilities. Since 1952, through a series of bilateral contracts and cooperative arrangements, the voluntary agencies have made operational and other resources available to the important programs of the existing governmental, intergovernmental, and international organizations. The voluntary agencies take pride in the spirit which has prevailed; we note the results and we are challenged by the vast area of critical needs still to be met.

Currently appealing to their constituencies throughout the country, during World Refugee Year, voluntary agencies, members of the American Council, deeply concerned with refugee needs seek a goal well over the amounts annually subscribed in campaigns of previous years; the target approximates $65 million and indicates a $15 million increase over the average annual expenditures of $50 million for refugee services since the year 1945.

In keeping with a basic policy of the American private effort, voluntarily contributed funds are expended for assistance to refugees directly by the agencies themselves and/or through cooperating voluntary agencies in oversea countries. It is important to note, therefore, that these funds do not appear as part of any governmental, intergovernmental, or international income record as is the practice in some countries where voluntary contributions are sought by public, tax-supported bodies.

The American Council is acutely aware of a vast additional resource that can never be fully measured. Through the uncounted contributed hours of unnamed volunteers serving member agencies across the breadth of our land, many thousands of uprooted human beings have felt the impact of an American ideal and again found friends, home life and independence. Hundreds of thousands of tons of serviceable used clothing and other supplies, collected for distribution wherever there was need, are yet another evidence that our people are a compassionate people and generous. The agencies gratefully acknowledge the vast and diversified contributions of their constitutents. Theirs is a role that is not and can never be reflected in simple statistics.

The American Council of Voluntary Agencies has deep concern regarding the importance of a strong support by our Government of the World Refugee Year effort. Aware that Congress recommended the sum of $10 million from the President's Emergency Fund for this purpose, it is hoped that our Government will take full advantage of this. Legislation for refugee immigration to the United States including provision for a proportion of the "difficult to resettle" persons as our share of the responsibility is a move toward solution of this problem, has been recommended by the agencies of the council, aware as they are of the endeavors of other countries in this respect and convinced of this country's capacity to constructively absorb such persons.

It is generally recognized that the refugee problems are too vast and the condition too fluid to be solved in a single World Refugee Year. On the other hand, the concentrated focus of a community of nations on this global problem is fraught with unlimited importance.

We acknowledge with satisfaction the continuing American governmental support of the U.S. escapee program, the Intergovernmental Committee for European Migration, the Office of the United Nations High Commissioner for Refugees and the United Nations Relief and Works Agency for Palestine Refugees, recognizing it as essential to the successful resolution of the refugee problem. We are convinced that American concern can be best expressed through the teamwork of the public and voluntary sectors. Firm in this resolve we must so act as to assure that no future historian will refer to the years of our time as "the century of the homeless man."

ARMED FORCES CHESS TOURNAMENT

Mr. HUMPHREY. Mr. President, I am extremely pleased to bring to the attention of my colleagues a notable event scheduled in the city of Washington during Armed Forces Week, May 15 to 20—the final chess tournament, the first of its kind and the first in an annual series, in which outstanding chess players from the armed services of the United States, will meet to play for the chess championship of the U.S. armed services.

The 12 servicemen who have emerged from preliminary competition, and have the distinction to compete in the national chess tournament are the following:

Edmund Czapski, major U.S. Air Force, Lincoln Air Force Base, Nebr.

Arthur W. Feuerstein, private, first class, U.S. Army, Seine Area Command, France.

Henry A. Giertych, Jr., captain, U.S. Air Force, Keesler Air Force Base, Miss.

Robert D. Grande, technical sergeant, U.S. Air Force, Bolling Air Force Base, District of Columbia.

John A. Hudson, first lieutenant, U.S. Air Force, Chennault Air Force Base, La.

George Krauss, Jr., staff sergeant, U.S. Air Force, Forbes Air Force Base, Kans.

Peter A. C. Leuthold, airman, first class, U.S. Air Force, Sembach Air Force Base, Germany.

Richard C. Moran, airman, first class, U.S. Air Force, Dreux Air Force Base, France.

Charles D. Mott, captain, U.S. Navy, Bureau of Naval Weapons, District of Columbia.

Michael N. Robinson, specialist, fourth class, U.S. Army, Fort Gordon, Ga.

Eugene Sobczyk, commander, U.S. Navy, Puget Sound Naval Shipyard, Wash.

Robert W. Walker, airman, third class, U.S. Air Force, Lowry Air Force Base, Colo.

This tournament does credit to the educational program of a national organization, the American Chess Foundation, and to the admirable administrative leadership of the Department of Defense.

The American Chess Foundation has the objective of encouraging the playing of chess as a national sport and pasttime for young and old; to develop the many possibilities of chess for the intellectual and scientific training on which American security and prosperity depend; and to cultivate a climate of public opinion and a widespread knowledge of the game, out of which there can emerge chess masters, capable as in the past of providing United States of America leadership in the international chess field. I wish to commend and encourage the officers and directors of the foundation in this worthy endeavor. Its officers and directors are:

Walter J. Fried, president.

Rosser Reeves, chairman of the board.

Thomas Emery, honorary chairman, committee of sponsors.

Jacques Coe, vice president.

Morris J. Kasper, treasurer.

Cecile B. Wertheim, secretary.

Cleveland Amory.

Mrs. Benjamin Kaplan.

Walter Liebman.

Lessing J. Rosenwald.

Edward W. Turner.

Sidney Wallach.

The Department of Defense, recognizing the importance of intellectual and cultural achievement of our military

personnel, cooperated fully in making it possible for thousands of men and women in the armed services to participate in area competitions.

United Service Organizations and member agencies also cooperated in bringing about the successful planning of this program.

The individual who started the ball rolling, Mr. Thomas Emery, of New York, a former marine and distinguished chess player of international reputation, set up the initial endowment through the American Chess Foundation to provide annual prizes for 12 competition finalists and an annual trophy for the service to which the winner belongs.

But I understand the competition could not have succeeded without the enthusiastic efforts of a special committee here in Washington headed by Col. John D. Matheson, retired, of Arlington, Va., and consisting of Col. E. B. Ely, Mr. Sidney Wallach, Dr. Eliot Hearst, Mr. I. S. Turover, Mr. Thomas Emery, and Sgt. Bob Karch.

Chess, although an ancient game, is still enthralling and is enjoyed and widely recognized abroad as a peaceable and stimulating intellectual pastime. I have long advocated educational projects calculated to stir the interest of Americans in intellectual and cultural pursuits, and I believe the playing of chess fits into this classification. It may even be considered a standard of appraisal of a nation's intellectual and cultural dispositions and achievements. I would like to see this view reciprocated in this country.

Some 20 years ago the United States was recognized internationally for its supremacy in chess, but other countries have since forged ahead, notably the U.S.S.R. This happened not because our people are less capable or less intellectually inclined, but rather because these countries through resources of finance and of public opinion, deliberately encouraged wide chess play and corresponding chess superiority. Since my visit to the Soviet Union, where chess playing is a highly honored activity, I have become more convinced than ever that we must stimulate greater interest and participation in this type of program in the United States.

We live in a time when training in logical and imaginative thinking is indispensable to our national survival and to our continuing prosperity. Chess can have an important role in such training, and at the same time offer valuable social benefits. It belongs in our guidance programs for youth, and in the social programs of our retired citizens as a gratifying activity. The game is an excellent means to channel public attention from socially destructive pursuits, by filling a void in available leisure time projects.

The support of American industrial leadership of this program of the American Chess Foundation, New York, a nonprofit group, would be a most productive and appropriate prospect.

I hope that the Congress will join me in this call to popularize and reward ability in chess among Americans for their own greater satisfaction and mental development, and for enhanced international appreciation of our intellectual and cultural potentials in all areas of human interest. It could well be that from among our chess experts we would find an important reserve of strategic and diplomatic protagonists for the international matches, which in this age of negotiation are a vital and much-used tool in the handling of crises, whether on national levels or on a person-to-person basis. Such equipment would, of course, increase our confidence and effectiveness in a wider variety of social, business, and political encounters with others, be they friend or foe.

RESALE OF CERTAIN VESSELS TO REPUBLIC OF CHINA

The PRESIDING OFFICER (Mr. BYRD of West Virginia in the chair) laid before the Senate a message from the House of Representatives announcing its disagreement to the amendments of the Senate to the bill (H.R. 8042) to authorize the Secretary of Commerce to resell four C1–SAY–1 type vessels to the Government of the Republic of China for use in Chinese trade in Far East and Near East waters exclusively, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. MAGNUSON. I move that the Senate insist upon its amendment, agree to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. MAGNUSON, Mr. BARTLETT, and Mr. SCHOEPPEL conferees on the part of the Senate.

POLICY STATEMENT BY MIDWEST DEMOCRATIC CONFERENCE

Mr. McCARTHY. Mr. President, the policy statement adopted by the Midwest Democratic Conference at its recent meeting in Detroit, Mich., is a pledge to vigorous leadership on several national issues.

The civil rights section was introduced and sponsored by Mrs. Geri Joseph, State chairwoman of the DFL party of Minnesota. It affirms the determination of midwestern Democrats to support action by the Federal Government to secure the civil rights of all citizens, and it singles out six areas in which Federal action is needed. I ask unanimous consent that the section on civil rights be printed in the RECORD.

There being no objection, the section on civil rights was ordered to be printed in the RECORD, as follows:

GOALS FOR AMERICA—POLICY STATEMENT, DEMOCRATIC MIDWEST CONFERENCE, DETROIT, MICH., MARCH 26, 1960

CIVIL RIGHTS

It is the clear responsibility of the Federal Government to secure full civil rights to all Americans. We believe that the protection of civil rights is a constitutional mandate and it is the duty of the President and the Congress to guarantee observance. The right to vote; to the equal protection of the law; to publicly protest grievances; to the security of the person, papers, and property, and freedom of assembly are among the attributes of individual citizenship that transcend State boundaries and that are not to be eroded or abridged by local custom or usage. At no time in our history has there been a more crucial need for the free exercise of these constitutional liberties by every American. Each level of government has this obligation in its own field of operation. Many civil rights problems require combined Federal, State, and local action for their effective solution. Any proper concept of States rights includes the imperative of States' responsibilities. Failure of any State to assume these responsibilities creates a mandate for Federal action.

In pursuing these goals we pledge the full use of the power and prestige of the executive branch of Government and of the Congress to uphold the Supreme Court and to:

1. Provide effective guarantees of the right to vote in local, State, and Federal elections.
2. Complete desegregation of public schools and all other tax-supported public facilities.
3. Eliminate discrimination in housing because of race, religion, or national origin.
4. Eliminate discrimination in employment opportunities and promotions.
5. Secure to all persons equal and nonsegregated access to commercial places of public accommodation.
6. Authorize the Attorney General to secure injunctions against any infringement or deprivation of constitutional rights on account of race, religion, or national origin.

Recent Democratic administrations initiated measures removing discrimination against racial, religious, and other national minorities. The Executive Order of 1941 established the Federal Fair Employment Practices Commission; the 1946 Executive Order created the Commission on Equality in the Armed Forces from which flowed the Executive Order of 1947 eliminating segregation in the Armed Forces; the Executive Order of 1947 establishing the Civil Rights Commission brought forth the historic blueprint "to secure these rights" on which has rested all subsequent civil rights advances.

Contrasted with these achievements the succeeding Republican President has resisted the use of his office to eliminate such discrimination, has questioned the constitutionality of measures advanced to achieve that purpose and has refused to invoke the authority of his office and that of the Attorney General to advance the school and other desegregation mandates of the Supreme Court.

We pledge to use every influence—moral, educational, and political—to eliminate under law all barriers to the individual enjoyment of all civil rights so that the dignity of citizenship shall become a reality in fact as well as in law. We recognize that this task requires forthright action in all sections of the Nation.

We pledge our Democratic Party to encourage the participation of all citizens throughout the party structure.

CONDITION OF MIGRATORY FARMWORKERS

Mr. McCARTHY. Mr. President, the condition of migratory farmworkers has long been one of the most serious problems in American life. They represent the most neglected and underprivileged group in American society, and the distance is increasing between their depressed standard of living and income and that of other groups in the Nation.

A. H. Raskin, writing in the New York Times magazine—April 24, 1960—has made a realistic summary of their problems and suggested some of the measures needed to improve their condition. As he states, these citizens are the "dis-

possessed ones." They do not have the elementary necessities which we assume to be part of the American way of life. Adequate housing, diet, medical attention, educational opportunity, and economic security—none of these are within reach of migratory workers.

Mr. President, the standard of living and wages of domestic migratory workers is related to the program of bringing in nearly 500,000 nationals from other nations for work on our big commercial farms. Congress should, I believe, consider most carefully the relationship between this program and the depressed condition of domestic migratory workers before any steps are taken to extend Public Law 78.

I ask unanimous consent that Mr. Raskin's article, "For 500,000—Still 'Tobacco Road'," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Apr. 24, 1960]

FOR 500,000—STILL "TOBACCO ROAD"

(By A. H. Raskin)

Bedraggled caravans are rumbling north from Florida, from Texas and from southern California. They carry the landless army of workers on the land—the half-million migratory farm laborers who harvest much of the Nation's food, yet are so completely outside the protection of laws enacted to guarantee a modicum of security for all other wage earners that they have become known as the "excluded" Americans.

"I been everywhere, and I got nowhere" is the migrant's lament. He follows the sun and the crops, an indigent in an affluent society. He travels over highways lined with deluxe motels, their neon signs boasting of good food and television in every room. But journey's end for him is likely to be a tarpaper shack, a chicken coop, a tent or a dilapidated barn.

He tends the rich soil, helping to produce such plenty that the Government pays his employers to stop planting, or buys their oversupply to swell Uncle Sam's hoard of surplus crops. Yet the migrant and his family are undernourished—a factor that contributes to making their disease rate double that of citizens with higher incomes and more stable jobs.

These are the dispossessed ones of a farm economy increasingly dominated by giant agricultural corporations; and they are even more subject to the dislocating impact of new technology than workers in our swiftly automating factories, offices, mines and distributing networks.

The migrants are sharecroppers evicted by the onrush of mechanization, tenant farmers unequipped for a shift to urban employment, members of minority groups—Negroes and Mexican-Americans—turned into nomads by the racial antagonisms that shut them out of opportunities for education and self-improvement. These are the discards of a rural revolution, the 1960 counterparts of the Okies and Arkies whose suffering was impressed on the public consciousness two decades ago by John Steinbeck's "The Grapes of Wrath."

No Federal minimum wage law sets a floor under their pay scales or a ceiling over their working hours. They share with the rest of the country's 2 million hired farmhands vulnerability to a chaotic wage structure that puts them further and further behind industrial pay standards each year. A half-century ago farmworkers earned two-thirds as much as factory workers. By the end of World War II the ratio had dropped to a little less than half. The present farm average of 80 cents an hour is barely a third the factory average of $2.29.

And even this fails to give a real measure of the farmworker's penury. For a man must live by the year, not by the hour. On that yardstick, the farm laborer is so much an alien to normal American standards that Protestant missionaries from 27 countries of Europe, Asia, and Africa seek assignment to migrant work camps. They explain that conditions there come closest to matching those they will have to contend with when they move on to stations in Nepal, Sierra Leone, Korea, and other areas of great want.

The migrant works when there is a crop to tend and that means, for all his traveling, an average of 1 day in 3 on a year-round basis. A freeze, a drought, or a blight may cut even this meager expectation by wiping out a harvest on which he counted for a month or more of work. The farmworker's average total earnings for 1958, the latest year for which Government records have been tabulated, came to $961, and $195 of this was derived from odd jobs he managed to find outside farming.

With their fathers' wages so far below the national average family income of $6,520 a year, the children of these wanderers are in bondage to the cycle of crops that shapes their lives. A boy is born "in the potatoes"; his baby sister dies "in the asparagus." By the time a youngster is 10, he is much more expert at cultivating the fields than at cultivating his mind. A Florida educator summed up the problem bluntly: "Beans are in competition with school in this country, and beans are winning out."

In the few States that even attempt to enforce child-labor prohibitions in agriculture, the need for extra family income is so strong that parents and children conspire to frustrate the inspectors. Their advent causes a quick spread across the fields of some such watchword as "Pick 'em clean, Joe." This is the signal for all the underage harvesters to flatten themselves among the vegetables until the intruders go away.

For the communities through which they pass, the education of the migrant children is an unwelcome and usually an unaccepted responsibility. The reasons are simple: school funds are limited, classes overcrowded, teachers overworked, a combination that evokes no enthusiasm over a large-scale influx of rootless strangers whose unorthodox upbringing and sketchy prior schooling complicate the task of assimilation.

Pilot projects in New York and several other States have demonstrated that the education problem can be met with encouraging results where the will to meet it exists. But hostility is still the predominant community attitude toward the migrant, not only in schools but in social and civic affairs.

It is only when disaster hits, in the form of fire, flood, or other destructive quirk of nature, that the community's heart opens to the agricultural wayfarer and engulfs him in a torrent of public and private benevolence. But the compassion passes with the emergency. The transient farmworker then finds himself again a voiceless, voteless outsider, wanted only so long as there is a crop to gather.

Now that the northward trek has begun, you can see him through the windows of a dilapidated bus, or sitting on an overturned bushel basket in the back of a truck, or crowded with his family and all their belongings in an automobile with threadbare tires. Or you will find him standing stolidly by the road while his crewleader tries to fix an ancient motor.

His route may carry him close to the launching pads that someday will start a man toward outer space, but his concern will be with the tarpaulin under which he huddles to avoid a pelting rain. His earthly goods are crammed into a galvanized washtub, a gunny sack, and a cardboard valise or two. A patchwork quilt, a guitar, a one-legged doll, a Bible, a pinup torn from a magazine—these symbolize gracious living for the migrant.

Visit his lodgings, and you are likely to feel yourself back with Jeeter Lester on "Tobacco Road." The dismaying part of this feeling is that what you see represents a substantial improvement over the conditions of a few years ago.

Yet for every tidy migrant camp, there remain a dozen in which a displaced person would find it hard to escape memories of his days in a concentration camp. Narrow cubicles to house a family of six, with a bed, a kerosene stove, and a stark electric bulb as the sole furnishings; stopped-up plumbing in the central sanitary units and a general atmosphere of filth and neglect are the hallmarks of these blue-sky slums.

A Catholic priest told a Senate subcommittee a few months ago that he visited a migrant family in Indiana one evening to bring two pairs of shoes for children who needed them to go to school. The family consisted of father, mother, and eight youngsters, packed into a cabin that measured 14 by 21 feet. As the priest was leaving, the eldest daughter asked whether the church could supply some baby clothes.

The priest said "Yes," and asked to see the baby. The girl's reply was that her mother was going to give birth that night. The mother was resting on the bed in the dim light at the rear of the cabin, and it was only then that the priest discovered she had been planning to deliver without medical assistance in the crowded room. He rushed her to South Bend, where she had the baby in a hospital less than 2 hours later.

Such stoicism is characteristic of the migrant. In a period of rising social restlessness, this most rootless of Americans shows little disposition to rebel or even to rail against his lot.

The chairman of the subcommittee investigating migrant problems, Senator HARRISON A. WILLIAMS of New Jersey, got an insight into how little it takes to make some migrants happy when he inspected a shack within sight of Princeton's spires. It was a tumbledown hut, with no table or chairs—merely a bed, a two-burner stove, and a board for pots and pans. But what made it home for the lady of the house was an orange crate set on end and covered with a strip of oil cloth, on which nestled her jam and condiments. "Since I got my shelf, everything is lovely," she told the Senator.

Perhaps the cruelest part of the migrant's plight is that much of his underemployment and depressed wage status stems from his involuntary competition with a group of workers even more deprived than he. This group is made up of the 450,000 Mexican nationals (known as braceros, from the Mexican word for strong-armed men) who are brought in each year to do contract labor on large farms in Texas, California and other Southwestern States.

They are a legalized version of the wetbacks who used to ford the Rio Grande until the exploitation to which they were subjected and their undercutting effect on the already abysmal standards of domestic farm labor forced a joint decision by the United States and Mexico to stop the illicit movement.

Now a panel of consultants appointed by Secretary of Labor Mitchell reports that abuses are ingrained in the program setup to prevent unfair competition between the American migrants and the Mexicans. Its conclusion is that wage levels have been forced down and domestic workers frozen out of jobs in regions dominated by what the AFL–CIO calls "imported colonialism."

The whole program functions like a transplant from "Alice in Wonderland." Its aim is to confine the employment of foreign

workers to crops deemed essential by Secretary of Agriculture Benson. But he declares no commodities nonessential, not even those the taxpayers are already being charged millions of dollars to store as surplus. The result is that 60 percent of the braceros work on crops in surplus supply.

The synthetic character of the "labor shortage" they come to relieve is best illustrated in Texas, which imported 225,000 Mexican nationals to work in its fields last year. The vacuum they filled was created in large measure by the departure of tens of thousands of Texans of Mexican extraction for migratory jobs at higher pay in Oregon, Washington, and the Midwest. Little wonder that Secretary Mitchell and many other experts have concluded that establishment of a Federal minimum wage for farmworkers is imperative.

The difficulty is in piercing the political and economic walls that have long blocked the extension to migrants of the same social benefits the rest of us take for granted. In a year when farm income is down 16 percent and farmers are vowing vengeance at the polls, few ranking Republicans or Democrats are eager to accept responsibility for raising farm-labor costs or otherwise antagonizing farm operators.

The growers contend that all the pressure for intensified regulation comes from do-gooders and know-nothings. They speak glowingly of the character-building effect of living and working together in family groups. They extol a calling that enables the migrant to indulge the same sunworshipping urge as the millionaire with a summer estate in the North and a winter retreat in the South. They rattle off the records of a laborer with three children under 16 who made $1,039.89 in a month picking strawberries or one with six children who made $613.30 in 2 weeks.

And in almost the same breath they complain that many migrants turn decent housing into pigsties, drink, fight and comport themselves at a jungle level of morality. They see no reason why they should be expected to pay an industrial wage to workers whom industry has rejected or bypassed, and they warn that pushing up costs not only will make food and cotton more expensive to the consumer but also will price the migrant out of the labor market and hasten his replacement by machines.

The champions of improved standards are less sure that higher farm wages will actually mean higher food prices. They rely on the increased incentive for investing in labor-saving equipment to step up productivity and thus neutralize much of the rise in the total labor bill. This expectation is heightened by the extent to which the rovers are concentrated in huge factories-in-the-field, rather than on the vanishing family farm.

The great bulk of all migrants and braceros work on 5 percent of the country's farms; the lower their pay scales, the tougher it is for the family farmer to compete with these "agribusinesses." Yet the front for most of the pleas to exempt farm laborers from protective legislation is provided by the hardships that would be inflicted on the very farmers who don't hire them.

The friends of the migrant are unimpressed with the suggestion that he is too barbaric to respect good housing. To argue that, having been born to squalor, he revels in its perpetuation is to repeat the classic defense of slum landlords in the "lung blocks" of the old East Side that it was pointless to give immigrant tenants bathtubs because they would merely use them to store coal.

Already scores of big farmers in all sections have discovered that decent housing is a potent lure for good workers. They come, they stay, and they sign up to come again next year. Church groups supply volunteers to teach the women the rudiments of homemaking.

The greatest problem for the instructors, accustomed to such comforts as refrigerators, washing machines, private bathrooms, telephones, rugs, and pictures on the wall, is to realize how distant these appurtenances of normal existence are from the special world of the migrant.

A carpentry teacher was blithely showing a group of youthful farm workers how to make bookends before it was brought home to him that they had neither books nor tables to put them on. An instructor in home nursing found she had lost her class after painstakingly telling them how to make their sick husbands or children feel better. "Use plenty of pillows, and be sure to brighten up the bed tray with a flower," was her tinkling advice.

Out of such experiences does come better understanding between the residents of nowhere and the communities they touch. But real acceptance has yet to be achieved. The wanderers remain orphans in a welfare state, as much in need of the sheltering arm of government as they were in 1951 when President Truman's Commission on Migratory Labor dubbed them "children of misfortune."

Ironically, one of the places they need protection most is to curb the rapacity of the unscrupulous among their own crew leaders and labor contractors. These are the middlemen who link migrant and grower in a hiring system more susceptible to rackets than the outlawed "shapeup" on the New York-New Jersey waterfront.

The crew leaders yank themselves out of the migrant stream by their own will to succeed. Too often their success is built on kickbacks, jacked-up prices for food and liquor, and a monopoly over gambling, prostitution, and marijuana. A recent report by the Oregon Bureau of Labor indicated that the four largest Spanish-speaking labor contractors in the West received direct fees totaling $8,625 to $17,250 a week from their 5,750 crew members. And this, it was emphasized, was only part of their take.

If any farm-labor bill goes through Congress this year, it will probably be one calling for the registration of crew leaders and the filing of reports intended to eradicate chiseling.

The discovery by the Williams subcommittee that at least half the 100,000 migrant children of school age are 1 to 4 years behind in scholastic attainment has prompted a bill to provide Federal funds for educating such youngsters in local schools. Companion measures would finance special courses to train grownups in the fundamentals of modern living and make available Government-insured loans to help substitute homes for hovels.

Whether these efforts can be meaningful without a frontal attack on low farm pay is conjectural. But the prospect of any real battle in Congress this year to extend the principles of the Fair Labor Standards Act to farm workers seems nil.

The only bit of social legislation that treats the migrant as a first-class citizen is the old-age insurance program of the Federal Social Security Act. And even here collection abuses by employers and crew leaders cheat many migrants out of their eligibility rights.

Migrants are almost total outsiders in unemployment insurance, and only in California, Ohio and Hawaii do they have the same safeguards under workmen's compensation as other workers. Residency laws bar them from public relief in most States and such commonplaces of industrial employment as paid vacations, holidays, sick leave, overtime and employer-financed pensions or welfare funds are unknown to them.

Farm organizations favor leaving it to the States to erect whatever new legal shields may be necessary. However, William L. Batt Jr., secretary of labor and industry in Pennsylvania, a State far ahead of most in developing a forceful labor code, says it will be 2005 or later before any kind of national protection emerges from State-by-State action.

Many experts believe that no real solution can be found until mechanization becomes so universal that the only seasonal farmworkers needed will be a relatively small force of mobile technicians enjoying the same high wages as the roving construction crews that build massive dams, hydroelectric plants and atomic energy installations.

But salutary as such a development may be in long-range terms, it points to a generation of migrationless migrants caught in a transitional squeeze that will make them largely public charges while they receive the retraining necessary to fit them for work in an urban setting.

Will such monumental problems be solved—both those that make the migrant's today so dark and those that shadow his tomorrow? This is the answer Secretary Mitchell gives:

"The migrant problem will not be ignored, nor can people be led to ignore it. Our community will find ways to solve it, and by community I mean the community of citizens that make up America, citizens with wisdom and compassion and good sense, and citizens who save their final censure for those who stand by and seem unable to find within their economy a place for conscience."

LOYALTY OATH PROVISION OF NATIONAL DEFENSE EDUCATION ACT OF 1958

Mr. THURMOND. Mr. President, one of the more unfortunate pieces of legislation which, in all probability, will be considered by the Senate in the waning days of the 86th Congress will be S. 2929. This bill proposes to remove the requirement under the National Defense Education Act of 1958 that each student must file an affidavit that he does not believe in or advocate the overthrow of the Government by force or violence.

Legislation of similar import was reported to the floor of the Senate at the last session. The Senate, in its good wisdom and with a display of sound judgment, recommitted this legislation to the committee from whence it had unfortunately come.

There have been many organizations and educational institutions which have taken positions on this proposed legislation. The stand taken recently by the National Daughters of the American Revolution should command the attention and consideration of each of us who will be faced with this issue at a later time this year. This organization is known for its promotion of the principles of Americanism and its fight for the preservation of the form of government which our Founding Fathers endeavored to establish.

Last week at the 69th Continental Congress of the National Daughters of the American Revolution there was passed a resolution supporting the loyalty oath provision of the National Defense Education Act. This action once again reemphasizes the sound principles which serve as a hallmark of this great organization. It was my pleasure on March 21 to insert in the CONGRESSIONAL RECORD an editorial from the Sumter Daily Item of Sumter, S.C., which commended this outstanding organization

for resolutions which it had adopted in its last continental congress. It is a pleasure for me to once again call the attention of my colleagues to the actions of this organization, which consistently deserve the study of all good Americans.

WILLIAM R. CONNOLE, VICE CHAIRMAN, FEDERAL POWER COMMISSION

Mr. PROXMIRE. Mr. President, the President of the United States, at his press conference today, reaffirmed his statement that he would not reappoint as Chairman of the Federal Power Commission, Mr. William R. Connole. I should like to read a brief item from this week's issue of Time magazine, entitled "The Price of Dissent":

THE PRICE OF DISSENT

The maverick on the Federal Power Commission is William R. Connole, 37, a Connecticut political independent. For the past 5 years Connole has built a reputation as a dissenter from his colleagues, a defender of the consumer by urging stricter regulation of natural gas prices. He was the lone dissenter in the precedent-setting C.A.T.C. case (Time, July 8, 1957), when the FPC allowed new field gas sales worth $1 billion without final approval of the rates. Connole's dissent was implictly endorsed by the U.S. Supreme Court when it criticized the FPC decision, upholding the contention of New York State's Public Service Commission that the failure to set firm rates did not sufficiently protect the consumer. Last week the White House confirmed reports that Dissenter Connole would not be reappointed when his term expires on June 22. His likely successor: Harold I. Baynton, now chief counsel to the Senate Commerce Committee.

Keen, combative, Connole is a Hartford lawyer who was appointed to the FPC in 1955 after serving as general counsel of the Connecticut Public Utilities Commission. When word got out that he was not to be reappointed, seven State public utility commissions protested. Unmoved, the White House said that the President decided not to reappoint Connole because he does not get along with the other Commissioners, has urged greater Federal control of gas than the administration believes is necessary. Explained a presidential aid: "There is no reason to keep a man in a job whose philosophy does not agree with that of the President."

I think this item from Time magazine is very appropriately entitled "The Price of Dissent." All Senators are well aware of the fact that the Federal Power Commission is supposed to be an independent agency, independent of the Executive as well as independent of Congress.

Before I comment further on this matter, I should like to read another brief article, which was published in last night's Washington Star.

The article is entitled "Mayors' Group Backs Connole," and reads as follows:

Some big city mayors have asked President Eisenhower to reappoint William R. Connole to the Federal Power Commission. They said Mr. Connole is the only Commissioner looking out for consumers of natural gas.

The United States Mayors' Committee on Natural Gas Legislation wired its appeal to Mr. Eisenhower yesterday. There have been unconfirmed reports that the President does not intend to reappoint Mr. Connole to the FPC when his 5-year term expires June 22.

Those unconfirmed reports were confirmed today by the President at his news conference.

Mayor Richardson Dilworth of Philadelphia, secretary of the group, said Mr. Connole was a "heroic exception" to what he called a do-nothing pattern of the other four Commissioners. Natural gas prices, he said, have risen almost seven times as fast as the average commodity in the past 6 years. The FPC regulates gas prices to consumers.

Mr. Dilworth protested any move to drop Mr. Connole, "the only member of the FPC from east of the Mississippi, the area in which most of the natural gas is consumed."

Mr. Connole, 37, who comes from Connecticut, was named to the $20,000-a-year job by Mr. Eisenhower in 1955.

Along with other Commissioners, including FPC Chairman Jerome Kuykendall, Mr. Connole has acknowledged private talks with a lawyer for a gas company that had a case pending before the FPC.

Mr. Connole and the others have denied any impropriety in their off-the-record talks with the attorney, Thomas G. Corcoran.

The White House has declined to confirm or deny the reports that Mr. Connole is on the way out and Mr. Connole himself has refused to talk about it. Congressional sources said, however, that he was told by the White House some time ago that he would not be reappointed.

I should like to call attention to one more quotation, and this from a very interesting source—Petroleum Week, for June 19, 1959. Petroleum Week is a publication which is not exactly a trade association journal, but it speaks, in some cases, for the oil industry. The article is entitled "Four Government Officials Hold the Keys to Depletion, Gas Regulation, Oil Prices." It comments on the fact that Mr. Connole is the key to whether this country will have any kind of regulation in the interest of gas consumers. The article reads, in part:

While some FPC members have dragged their feet on producer regulation since the U.S. Supreme Court's Phillips gas decision in 1954, Connole, since his appointment in 1955, has strived for an early and workable method of determining producer gas prices.

Because he insists that production costs are a vital factor in rate determination, and because he is FPC's strongest adherent of regulation, Connole has become something of an enemy in the view of many gas producers.

But he has the respect of those who disagree with his views. "He is smart, he works hard, and he does his homework," says one Washington gas industry representative.

That is what a representative of the gas industry said concerning a man as to whom the President said today he thought he could find a better man for the job. The oil industry representatives themselves admit that Mr. Connole, who has fought against them and for the consumer, is smart, that he works hard, and does his homework. The gas industry representative continued by saying:

When he takes a stand on a case, you can argue his theory but seldom his knowledge of the case.

The article states that Connole has outstanding qualifications, and continues:

Looking at FPC's problems, Connole sees initial gas prices in contracts in south Louisiana as the most important short-range difficulty. He wants FPC to start now to investigate producer rates, which rose from an average of 8 cents to 21 cents per thousand cubic feet, in 4 years. Connole says he doesn't know whether the prices are too high—or even too low—but he thinks a strong look is necessary.

Mr. President, this is the kind of man, a man with preeminent qualifications and ability, whom the President has decided not to reappoint.

Mr. Connole was a dissenter on the FPC, and the No. 1 defender of the consumer. In spite of the suggestion that he does not get along with the other commissioners, it appears that Mr. Connole has had the respect of much of the oil industry, even though he was a controversial figure, and they may not have liked some of his rulings.

Mr. President, apparently the only reason for dropping Mr. Connole from the Federal Power Commission is that he favors stricter control of the gas and oil industry than does the President. Although the President has a right to appoint the Commissioners, it seems a flagrant violation of the bipartisan principle on which these commissions are supposedly founded, when a Commissioner who was appointed as an independent, and who has given the public excellent service, is dropped because his views are not those of the President. In the Humphrey case, in the 1930's, the Supreme Court held that the President could not remove a member of one of the independent regulatory commissions just because the commissioner did not agree with the President's views in regard to how the commission should decide cases or conduct its business. It would seem to be a gross violation of the spirit of these commissions for the President to refuse, on such grounds of difference of opinion, to reappoint an able commissioner, and the only member of the commission who represents the interests of the consumers. This situation seems particularly unfortunate when we consider the fact that the President will be able to make a new appointment virtually on the eve of his leaving the office of President, and thus the appointment will carry over for a number of years into the term of the next President.

Mr. President, President Eisenhower has said he could find a better man to do this job. I ask, better for whom? For the consumers—I doubt it. For the big oil and gas boys—you bet your life.

As I have stated, the President has indicated that he will not reappoint the one and only member of the Federal Power Commission who is recognized as a fighting representative of the viewpoint of the consumers. This announcement comes after a sorry record of notorious acceptances of hospitality by the President's appointee to be the head of the Federal Communications Commission, and by the President's appointee to be the head of the Civil Aeronautics Board, and by some of the other Presidential appointees to the Federal Power Commission.

This situation should suggest, Mr. President, how tragically the "dice are loaded" against the consumers, by means of the operation of this administration.

We recall that Mr. Doerfer, the Chairman of the Federal Communications Commission, was entertained for 6 days on a yacht owned by the head of one of the companies which is subject to regulation by the Federal Communications Commission; and we recall that, more recently, Mr. Durfee was nominated by the President for membership on the Civil Aeronautics Board, and his nomination was confirmed by the Senate, after Mr. Durfee had accepted hospitality—which was paid for by some of the groups which that Commission is charged with regulating—at a Pinehurst golfing trip. We also recall that recently some of the other members of the Federal Power Commission accepted a free airplane trip from the big gas boys to the funeral of one of the members of that body.

Mr. President, how can the consumer possibly get a fair break in such a situation? Administration appointees are wined and dined by officials of the groups they are charged with regulating; but, despite that situation, those appointees are honored.

On the other hand, a Commissioner who has fought hard in the interests of the consumers is to be replaced, we understand; the President says he thinks he can find a better man.

Mr. President, I suggest that the Senate very carefully scrutinize the qualifications of any proposed successor of Mr. Connole. We should do this regardless of how excellent may be the senatorial contacts of the new appointee. That should be done pursuant to our recognition of the obligation of the Senate to see to it that the consumers of the country are represented by at least one member of the Commission who is willing to fight for their interests and, if not to serve on the Commission in the role of a successful champion for them, at least to serve there as an effective dissenter.

Mr. President, it has been with some reluctance that I have brought this matter to the attention of the Senate, because such a nomination does not come within the jurisdiction of any committee on which I serve, and therefore it is not a matter of immediate responsibility to me. However, I am deeply shocked by this situation, which even Time magazine—which is a very reluctant critic, at best, of President Eisenhower—has hit and hit hard, and when the mayors of various cities in the country have made their protest clear and emphatic, and when the public-utility commissioners have stated that they think Mr. Connole is a defender of the interests of the consuming public. This situation has developed at the very time when the general public is shocked by the notorious misbehavior of certain members of these Commissions who presumably are representing the public, but, in fact, are involved in a very unfortunate guest-host situation with the very persons and groups they are supposed to regulate. Mr. President, this is a classic example of gross disregard of the public interest in behalf of special interests. Anyone want to know why the price of gas, the cost of living goes up? Here is your answer.

PADRE ISLAND NATIONAL SEASHORE PARK BILL SHOULD BE PASSED IN THE FORM WHICH SECRETARY SEATON RECOMMENDS

Mr. YARBOROUGH. Mr. President, ever since introducing my original bill 2 years ago, I have believed and advocated that the proposed Padre Island National Seashore Park should be 100 miles long; that is, it should cover the entire portion of the 117-mile natural island beach not already lost through private development. A great many Texans and others support me in this position.

However, another group of Texans and other Americans who are interested in this exceptionally significant project favor retaining most of the island—about 70 miles of it—for private development, and setting aside only 50 miles, in the middle, for a national seashore park. This plan seems to me unworkable, principally for two reasons.

First, it would constitute a financial windfall to private promoters, because it would mean that the Government, with tax dollars, would build a 70-mile highway system from each end of the island, to provide access to the national seashore area in the middle of the island. Such a highway system would cost millions of tax dollars, and would serve to greatly enhance the price of seafront lots for the private developers.

Second, aside from the fact that the 50-mile area in the middle of the island would prove to be too small, in the years immediately ahead, a considerable portion of the middle part of the island is not the most desirable for use as a beach park because it is composed of mud flats instead of beautiful sand dunes.

A few days ago, Secretary of the Interior Fred Seaton wrote to the able and distinguished Senator from Montana [Mr. MURRAY] a letter advising the Committee on Interior and Insular Affairs that the Department of Interior urges the enactment of legislation to create Padre Park and similar seashore areas on Cape Cod and the Oregon Dunes. In his letter, Secretary Seaton followed the recommendation of National Park Advisory Board, and suggested that approximately 88 miles of this 117-mile-long island be set aside for the Padre Island National seashore area.

Mr. President, I submit that is a fair and reasonable compromise of the question of area. And in writing to the Senator from Montana, the chairman of the Committee on Interior and Insular Affairs, which is considering my bill, S. 4, to create a Padre Island seashore area, I have stated that I will consider it significant and constructive if the Congress establishes an 88-mile-long park on Padre Island. I am giving my full support and effort to getting a park of this size, although personally I would prefer to have the park be 100 miles long. But I regard the 88-mile section a substantial part of it.

At the same time, I hope that those who have favored the small 50-mile park in the middle of the island will likewise give some ground, and will agree to work for the establishment of the 88-mile park recommended by Secretary Seaton, and will help secure the enactment of such legislation at this session.

Mr. President, I ask unanimous consent to have printed in the body of the RECORD the text of my letter on this question to Senator MURRAY; and also the text of the proposed bill which Secretary Seaton favors, and which I am supporting as a substitute for my bill, S. 4.

On April 15, Secretary Seaton forwarded the substitute to the chairman of the Committee on Interior and Insular Affairs [Mr. MURRAY] and recommended enactment of the bill.

There being no objection, the letter and the proposed bill were ordered to be printed in the RECORD, as follows:

APRIL 23, 1960.

The Honorable JAMES E. MURRAY,
Chairman, Committee on Interior and Insular Affairs, U.S. Senate, Washington, D.C.

DEAR SENATOR MURRAY: I have reviewed, with great pleasure, Secretary of the Interior Fred Seaton's letter to you of April 15, endorsing legislation proposing national seashore areas at Cape Cod, Padre Island, and the Oregon Dunes. I am very gratified that the Department of Interior has joined the many who favor action on these proposals.

In studying the draft legislation proposed by the Department of Interior, I am somewhat disappointed that they did not recommend acquiring a full 100 miles of beach for the Padre Island area; however, I shall consider it a significant and constructive step if the recommended 88-mile length is authorized by the Congress. I think this recommended 88-mile length is the minimum length that should be considered. In other respects, I support the Department of Interior's recommended legislation as a substitute for my bill, S. 4, with perhaps minor changes to be revealed by additional study.

I hope that the Committee on Interior and Insular Affairs will soon take such favorable action as will enable Padre Island seashore area legislation to be enacted this session.

With best wishes, I am,
Sincerely,

RALPH W. YARBOROUGH.

SUGGESTED REVISION OF SEASHORE BILL

A bill to save and preserve, for the public use and benefit, a portion of the remaining undeveloped seashore of the United States, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to save and preserve, for purposes of public recreation, benefit, and inspiration, a portion of the diminishing seashore of the United States that remains undeveloped, the Secretary of the Interior is hereby authorized to take appropriate action in the public interest toward the establishment of three national seashores set forth in section 2 of this Act.

SEC. 2. (a) The area comprising that portion of the land and waters located in the towns of Provincetown, Truro, Wellfleet, Eastham, Orleans, and Chatham in the Commonwealth of Massachusetts, and described in subsection (b), is designated for establishment as Cape Cod National Seashore.

(b) The area referred to in subsection (a) is described as follows:

Beginning at a point in the Atlantic Ocean one-quarter of a mile due west of the mean low-water line of the Atlantic Ocean on Cape Cod at the westernmost extremity of Race Point, Provincetown, Massachusetts;

thence from the point of beginning along a line a quarter of a mile offshore of and parallel to the mean low-water line of the Atlantic Ocean, Cape Cod Bay, and Provincetown Harbor in generally southerly, easterly, and northerly directions rounding Long Point and then southwesterly to a point a quarter of a mile offshore of the mean low-water line on the harbor side of the dike depicted on the United States Geological Survey Provincetown quadrangle sheet (1949) crossing an arm of the Provincetown Harbor;

thence northerly, along a line a quarter of a mile offshore of and parallel to the low-water line at the dike to a point easterly of the point of intersection of the sand dike with the boundary of the Province Lands Reservation as depicted on the said Provincetown quadrangle sheet;

thence westerly to the said point of intersection of the dike and the Province Lands Reservation boundary;

thence along the boundaries of the Province Lands Reservation northwesterly, northeasterly, northerly, and easterly to the easternmost corner of the Reservation being near United States Route 6;

thence leaving the said easternmost corner along an extension of the southerly Reservation boundary line easterly to the northerly right-of-way line of United States Route 6;

thence along the northerly right-of-way line of United States Route 6 in a generally easterly direction crossing the Truro-Provincetown town line to and continuing in the town of Truro to a point four-tenths of a mile southeasterly of Highland Road;

thence leaving the northerly right-of-way line of United States Route 6 and running due east two-tenths of a mile;

thence turning and running in a southeasterly direction paralleling the general alinement of United States Route 6 and generally distant therefrom two-tenths of a mile crossing Pamet Road and continuing to a point three-tenths of a mile southerly thereof;

thence westerly to the intersection of Old County Road and Mill Pond Road;

thence southerly along the easterly right-of-way line of Old County Road to Fisher Road;

thence westerly along the southerly right-of-way line of Fisher Road to the right-of-way line of the New York, New Haven, and Hartford Railroad;

thence southerly along the easterly right-of-way line of the railroad for three-tenths of a mile;

thence due west to a point in Cape Cod Bay one-quarter of a mile distant from the mean low-water line;

thence turning and running along a line a quarter of a mile offshore of and parallel to the mean low-water line of Cape Cod Bay in a general southerly and easterly direction rounding Jeremy Point and thence in a general northerly direction along a line a quarter of a mile offshore of and parallel to the mean low-water line on the westerly side of Wellfleet Harbor to a point one-quarter of a mile due north of the mean low-water line at the eastern tip of Great Island as depicted on the United States Geological Survey Wellfleet quadrangle sheet (1949);

thence leaving Wellfleet Harbor and running three-tenths of a mile northwesterly to the top of a ridge between Herring River and the Chequesset Country Club as depicted on the said Wellfleet quadrangle sheet;

thence northeasterly along the said ridge continuing across Mill Creek on a straight line following in general a ridge and crossing the right-of-way of the New York, New Haven, and Hartford Railroad to a point two-tenths of a mile northeasterly thereof;

thence due north to a point three-tenths of a mile beyond the Bound Brook Island Road;

thence generally easterly following the southerly contour of a marsh, as depicted on the said Wellfleet quadrangle sheet crossing United States Route 6, and continuing to a point on the easterly right-of-way line of a power transmission line as depicted on the said Wellfleet quadrangle sheet;

thence in a general southerly direction along the said easterly right-of-way line of a power transmission line, crossing the Eastham-Wellfleet town line, to the intersection of said easterly right-of-way line with the easterly right-of-way of Nauset Road;

thence in a general southeasterly direction along said easterly right-of-way line of Nauset Road to the intersection of Nauset Road and Salt Pond Road;

thence crossing said Nauset Road and running along the easterly right-of-way line of said Salt Pond Road to its intersection with the southerly right-of-way line of Nauset Road;

thence westerly along the southerly right-of-way line of Nauset Road to its intersection with the easterly right-of-way line of United States Route 6;

thence southerly along the easterly right-of-way line of United States Route 6 to a point four-tenths of a mile southerly of the intersection of Locust Road and United States Route 6;

thence easterly to a point one-tenth of a mile from United States Route 6;

thence turning and running in a generally southerly direction paralleling the general alinement of United States Route 6 and generally distant therefrom one-tenth of a mile to a small stream approximately one-tenth of a mile beyond Governor Prence Road extended;

thence southeasterly along the stream and continuing to the Orleans-Eastham town line;

thence along the Orleans-Eastham town line to the southerly tip of Stony Island;

thence generally southerly in the town of Orleans to the easterly edge of the Nauset Harbor Channel as depicted on the United States Geological Survey Orleans quadrangle sheet (1946);

thence in a generally southerly direction along the said easterly edge of the Nauset Harbor Channel to a point due south of the southwesterly tip of Nauset Beach on the north side of the entrance to Nauset Harbor from the Atlantic Ocean as depicted on the said Orleans quadrangle sheet;

thence due south to the twenty-foot contour in Nauset Heights as delineated on the said Orleans quadrangle sheet;

thence generally southerly along the said twenty-foot contour to a point about one-tenth of a mile northerly of Beach Road;

thence southwesterly along a line intersecting Beach Road at a point two-tenths of a mile easterly of the so-called Nauset Road leading northerly to Nauset Heights;

thence southerly to the head of a tributary to Little Pleasant Bay at the northerly tip of Pochet Neck as depicted on the said Orleans quadrangle sheet;

thence generally southerly along the thread of channel of the said tributary passing westerly and southwesterly to Pochet Island and thence southwesterly into Little Pleasant Bay passing to westerly of the northerly tip of Sampson Island, the westerly tip of Money Head, and the southwesterly tip of Hog Island following in general the center line of Little Pleasant Bay to Pleasant Bay;

thence generally southeasterly in Pleasant Bay along a line passing midway between Sipson Island and Nauset Beach to a point on the Chatham-Orleans town line one-quarter of a mile westerly of the mean low-water line of Pleasant Bay on the westerly shore of Nauset Beach;

thence generally southerly in Pleasant Bay in the town of Chatham along a line a quarter of a mile offshore of and parallel to the said mean low-water line of Pleasant Bay on the westerly shore of Nauset Beach to a point a quarter of a mile south of the mean low-water line of the southern tip of Nauset Beach;

thence easterly rounding the southern tip of Nauset Beach along a line a quarter of a mile offshore of and parallel thereto;

thence generally northerly and northwesterly, and westerly along a line a quarter of a mile offshore of and parallel to the mean low-water line of the Atlantic Ocean on the easterly shore of Nauset Beach and and on to the outer cape to the point of beginning.

Also included in such area are lands located in the town of Chatham and more particularly described as follows:

Beginning at a point on the northwesterly corner of the boundary of Monomoy National Wildlife Refuge at the mean low-water line on the western shore of Morris Island;

thence generally southerly, westerly, southerly, easterly, and northerly along the exterior boundary line of said Monomoy National Wildlife Refuge to a point on the northeasterly corner of said refuge located on the mean low-water line on the eastern shore of Morris Island;

thence northerly, westerly, and southerly along the mean low-water line of Morris Island and Stage Island to the point of beginning.

(c) The area comprising the portion of the land and waters of Padre Island situated in the coastal waters that is described below is designated for establishment as the Padre Island National Seashore:

Beginning at a point one mile northerly of North Bird Island on the easterly line of the Intracoastal Waterway; thence due east to a point on Padre Island one mile west of the mean high water line of the Gulf of Mexico; thence southwesterly paralleling the said mean high water line of the Gulf of Mexico, a distance of about 3.5 miles; thence due east to the two-fathom line on the east side of Padre Island as depicted on U.S. Coast and Geodetic Survey Chart No. 1286; thence along the said two-fathom line on the east side of Padre Island as depicted on U.S. Coast and Geodetic Survey Charts Nos. 1286, 1287, and 1288 for a distance of approximately 85 miles; thence westerly crossing Padre Island to the easterly line of the Intracoaastal Waterway at a point northerly of Three Islands; thence northerly following the easterly line of the Intracoastal Waterway as indicated by channel markers in the Laguna Madre to the point of beginning.

(d) The area comprising the portion of the land and waters along the Oregon coast, and described in subsection (e), is designated for establishment as the Oregon Dunes National Seashore.

(e) The area referred to in subsection (d) is described as follows:

Township 18 south, range 12 west, beginning at the southeast corner of the southwest quarter of the southwest quarter of section 34;

Thence east to the southwest corner of the southeast quarter of the southeast quarter of the said section 34;

South to the southeast corner of the southwest quarter of the northeast quarter of section 10, township 19 south, range 12 west;

West to the southwest corner of the southeast quarter of the northwest quarter of the said section 10;

South to the northwest corner of the southwest quarter of the southeast quarter of section 15;

East to the point of intersection with the shoreline of Woahink Lake at elevation thirty-eight feet above sea level;

Following the said shoreline generally north and east to the intersection of the said

shoreline with the quarter section line of section 11;

East to the northeast corner of the southeast quarter of the said section 11;

South to the southeast corner of the said section;

East to the northeast corner of section 13;

South to the southeast corner of the said section 13;

East to the northeast corner of the northwest quarter of section 19, township 19 south, range 11 west;

South to the southeast corner of northwest quarter of the said section 19;

East to the northeast corner of the northwest quarter of the southeast quarter of the said section 19;

South to the southwest corner of the northeast quarter of the northeast quarter of section 31;

West to the northwest corner of the southwest quarter of the northeast quarter of the said section 31;

South to the southwest corner of the northeast quarter of section 7, township 20 south, range 12 west;

West to the southeast corner of the northwest quarter of section 12, township 20 north, range 12 west;

North to the northeast corner of the southeast quarter of the northwest quarter of section 12;

West to the west right-of-way of Southern Pacific Railway in section 11, township 20 south, range 12 west;

In a generally southerly and westerly direction along Southern Pacific Railway west right-of-way to the intersection with the line between section 11 and section 14;

West to the southeast corner of the southwest quarter of the southwest quarter of section 11;

North to the northeast corner of the northwest quarter of the southwest quarter of section 11;

West to the southeast corner of the northwest quarter of section 10;

North to the northeast corner of the southeast quarter of the northwest quarter of section 3;

West to the northwest corner of the southeast quarter of the northwest quarter of section 3;

North to the northeast corner of the northwest quarter of the northwest quarter of section 3;

West to the northwest corner of section 3;

South to the northwest corner of the southwest quarter of section 3;

West to the northwest corner of the southeast quarter of section 4;

South to the southwest corner of the southeast quarter of section 4;

West to the southwest corner of the southeast quarter of the southwest quarter of section 4;

South to the northeast corner of the northwest quarter of the southwest quarter of section 9;

West to the northwest corner of southwest quarter of section 9;

South along section lines to the point of intersection on the north bank of the Umpqua River with the mean low tide line at a point on a line between section 16 and section 17, township 21 south, range 12 west;

Following the said mean low tide line in a generally southerly and westerly direction to the intersection with the Pacific Ocean, section 1, township 22 south, range 13 west;

Due west 1,320 feet;

In a generally northerly direction paralleling the mean low tide line on the shore to a point due west of the said mean low tide line on the south bank of the mouth of the Siuslaw River;

East to the said mean low tide line on the south bank of the mouth of the Siuslaw River, section 16, township 18 south, range 12 west;

Following the said mean low tide line in a generally southerly and easterly direction to its intersection with a line due north of the point of beginning;

Due south to the point of beginning;

Beginning at a point where the line between ranges 12 west and 13 west (Willamette Meridian), in township 22 south, intersects the mean low tide line on the south shore of Winchester Bay at the mouth of the Umpqua River;

Thence following the said mean low tide line easterly and southerly along the said south shore of Winchester Bay and the west bank of Winchester Creek to its intersection with the west right-of-way boundary of United States Highway Numbered 101, township 22 south, range 12 west;

Following the said right-of-way boundary in a generally southerly direction to its intersection with the mean low waterline on the north bank of Tenmile Creek, in section 13, township 23 south, range 13 west;

Following the said mean low water line along the north bank of the said Tenmile Creek in a generally southwesterly direction to the mean low tide line of the Pacific Ocean at the mouth of the said Tenmile Creek;

Due west 1,320 feet;

In a generally northerly direction paralleling the said mean low tide line on the shore to a point due west of the said mean low tide line on the south bank of the mouth of the Umpqua River;

East to the said mean low tide line on the south bank of the mouth of the Umpqua River, in section 14, township 22 south, range 13 west;

Following the said mean low tide line in a generally northerly and easterly direction to the point of beginning.

(f) The Oregon Dunes National Seashore may be extended by Executive Order of the President at some future time by the addition of a separate unit known as Sea Lion Caves after consultation with and consideration of the recommendation of the Governor of the State of Oregon, said separate unit to include the land, water, and submerged land area in the vicinity of Sea Lion Caves, the exterior boundary limit of which is specifically described as follows:

Township 17 south, range 12 west, beginning at the northeast corner of section 4;

Thence east to the northeast corner of the northwest quarter of the northwest quarter of section 3;

South to the northeast corner of the northwest quarter of the southwest quarter of the said section 3;

East to the northeast corner of the southwest quarter of the said section 3;

South to the southeast corner of the southwest quarter of the said section 3;

West to the southwest corner of the said section 3;

Due west 3,960 feet;

Due north to a point due west of the point of beginning;

Due east to the point of beginning.

(g) If the Secretary of the Interior finds that any parcel within the Tahkenitch Lake unit is not being used in its entirety primarily for the growth and harvesting of timber on a sustained yield basis, he may, by publishing notice in the Federal Register, extend the boundaries of the Seashore to include said parcel. As used in this subsection, the phrase "parcel within the Tahkenitch Lake unit" means each ownership of land, water, and submerged land within the following described area:

Beginning at the northwest corner of section 13, township 20 south, range 12 west;

South to the southeast corner of section 23;

East to the northeast corner of the northwest quarter of the northwest quarter of section 25;

South to the southeast corner of the southwest quarter of the northwest quarter of the said section 25;

East to the northeast corner of the northwest quarter of the southeast quarter of the said section 25;

South to the southeast corner of the southwest quarter of the southeast quarter of the said section 25;

West to the southeast corner of the southwest quarter of the said section 25;

South to the southeast corner of the northwest quarter of section 36;

West to the southwest corner of the southeast quarter of the northwest quarter of the said section 36;

South to the southeast corner of the southwest quarter of the southwest quarter of the said section 36;

West to the northeast corner of the northwest quarter of the northeast quarter of section 2, township 21 south, range 12 west;

South to the southeast corner of the southwest quarter of the northeast quarter of the said section 2;

West to the southwest corner of the northeast quarter of the said section 2;

South to the southeast corner of the northeast quarter of the southwest quarter of the said section 2;

West to the southwest corner of the northwest quarter of the southwest quarter of the said section 2;

South to the southwest corner of the said section 2;

West to the northeast corner of the northwest quarter of the northeast quarter of section 10;

South to the southeast corner of the northwest quarter of the northeast quarter of the said section 10;

West to the northeast corner of the southwest quarter of the northwest quarter of the said section 10;

South to the southeast corner of the southwest quarter of the northwest quarter of the said section 10;

Due west to the point of intersection with the east right-of-way boundary of United States Highway Numbered 101;

Following the said right-of-way boundary in a generally westerly and northerly direction to the point of intersection with the section line between sections 4 and 5, township 21 south, range 12 west;

North to the northwest corner of the southwest quarter of section 9, township 20 south, range 12 west;

East to the northeast corner of the northwest quarter of the southwest quarter of section 9;

North to the southwest corner of the southeast quarter of the southwest quarter of section 4;

East to the southwest corner of the southeast quarter of section 4;

North to the northwest corner of the southeast quarter of section 4;

East to the northwest corner of the southwest quarter of section 3;

North to the northwest corner of section 3;

East to the northeast corner of the northwest quarter of the northwest quarter of section 3;

South to the northwest corner of the southeast quarter of the northwest quarter of section 3;

East to the northeast corner of the southeast quarter of the northwest quarter of section 3;

South to the southeast corner of the northwest quarter of section 10;

East to the northeast corner of the northwest quarter of the southwest quarter of section 11;

South to the southeast corner of the southwest quarter of the southwest quarter of section 11;

East to the point of beginning.

(h) Upon approval of extensions of the seashore as provided in subsections (f) and (g), the provisions of section 3 shall become applicable to the extensions.

SEC. 3. (a) The Secretary of the Interior (hereinafter referred to as the "Secretary") is authorized to acquire by donation, purchase with donated or appropriated funds, condemnation, transfer from any Federal agency, exchange, or otherwise, the land, waters, and other property, and improvements thereon and any interest therein, within the areas described in section 2 of this Act or which lie within the boundaries of a seashore as established under section 4 of this Act (hereinafter referred to as "such area"). Any property, or interest therein, owned by a State or political subdivision thereof may be acquired only with the concurrence of such owner. Notwithstanding any other provision of law, any Federal property located within such area may, with the concurrence of the agency having custody thereof, be transferred without consideration to the administrative jurisdiction of the Secretary for use by him in carrying out the provisions of this Act.

(b) The Secretary is authorized to pay for any acquisitions which he makes by purchase under this Act their fair market value, as determined by the Secretary, who may in his discretion base his determination on an independent appraisal obtained by him.

(c) In exercising his authority to acquire property by exchange, the Secretary may accept title to any non-Federal property located within such area and convey to the grantor of such property any federally owned property under the jurisdiction of the Secretary within such area. The properties so exchanged shall be approximately equal in fair market value, provided that the Secretary may accept cash from or pay cash to the grantor in such an exchange in order to equalize the values of the properties exchanged.

SEC. 4. (a) As soon as practicable after the date of enactment of this Act and following the acquisition by the Secretary of an acreage in each area described in section 2 of this Act, that is in the opinion of the Secretary efficiently administrable to carry out the purposes of this Act, the Secretary shall establish the area as a national seashore by the publication of notice thereof in the Federal Register.

(b) Such notice referred to in subsection (a) of this section shall contain a detailed description of the boundaries of the seashore which shall encompass an area as nearly as practicable identical to the area described in section 2 of this Act. The Secretary shall forthwith after the date of publication of such notice in the Federal Register (1) send a copy of such notice, together with a map showing such boundaries, by registered or certified mail to the Governor of the State and to the governing body of each of the political subdivisions involved; (2) cause a copy of such notice and map to be published in one or more newspapers which circulate in each of the localities; and (3) cause a certified copy of such notice, a copy of such map, and a copy of this Act to be recorded at the registry of deeds for the county involved.

SEC. 5. (a) Any owner or owners (hereinafter in this subsection referred to as "owner") of improved property on the date of its acquisition by the Secretary may, as a condition to such acquisition, retain the right of use and occupancy of his property for noncommercial residential purposes for a term not to exceed twenty-five years, or for a term ending at the death of such owner, the death of his spouse, or the day his last surviving child reaches the age of twenty-one, whichever is the latest. The owner shall elect the term to be reserved. In any case where such an owner retains a right of use and occupancy as herein provided, such right may during its existence be conveyed or leased, in whole, but not in part. The Secretary shall pay to the owner the fair market value of the property on the date of such acquisition less the fair market value on such date of the right retained by the owner.

(b) The Secretary's authority to acquire property by condemnation shall be suspended with respect to all improved property located in all of the towns referred to in section 2(a) of this Act for one year following the date of its enactment. Thereafter such authority shall be suspended with respect to all improved property in any of such towns during all times when such town shall have in force and applicable to all property under its jurisdiction and within the established seashore a duly adopted, valid zoning bylaw approved by the Secretary in accordance with the provisions of section 6 of this Act.

(c) The Secretary's authority to acquire property by condemnation shall be suspended with respect to any particular property in the area referred to in section 2(b) of this Act which is used for commercial or industrial purposes during any periods when such use is permitted by the Secretary and during the pendency of the first application for such permission made to the Secretary after the date of enactment of this Act provided such application is made not later than the date of establishment of the seashore.

(d) As used in this Act, the term "improved property" shall mean a private noncommercial dwelling, including the land on which it is situated, whose construction was begun before September 1, 1959, and structures accessory thereto (hereinafter in this subsection referred to as "dwelling"), together with such amount and locus of the property adjoining and in the same ownership as such dwelling as the Secretary designates to be reasonably necessary for the enjoyment of such dwelling for the sole purpose of noncommercial residential use and occupancy. In making such designation the Secretary shall take into account the manner of noncommercial residential use and occupancy in which the dwelling and such adjoining property has usually been enjoyed by its owner or occupant. The amount of such adjoining property to be so designated by the Secretary shall in no case be less than three acres in area, or all of such lesser amount as there may be, except that the Secretary may exclude from the amount of adjoining property so designated any beach or waters, together with so much of the land adjoining such beach or waters as the Secretary may deem necessary for public access thereto.

(e) When acquiring land, waters, or interests therein for the Padre Island National Seashore, the Secretary may permit a reservation by the grantor of all or any part of the minerals in such land or waters, with the right of occupation and use of so much of the surface of the land or waters as may be required for all purposes reasonably incident to the mining or removal of the minerals, under such regulations as may be prescribed by the Secretary.

SEC. 6. (a) As soon as practicable following the date of enactment of this Act and thereafter as may be required to achieve the purposes of subsection (b) of this section, the Secretary shall issue regulations specifying standards for approval by him of town zoning bylaws for purposes of section 5 of this Act. Any such bylaw which meets such standards shall be approved by the Secretary upon application made to him for such approval.

(b) Any zoning bylaw approved in accordance with subsection (a) of this section shall contribute to the effect of (1) prohibiting the commercial and industrial use, other than any commercial or industrial use which is permitted by the Secretary, of all property within the boundaries of the seashore which is situated within the town adopting such bylaw; and (2) promoting the preservation and development, in accordance with the purposes of section 1 of this Act, of the area comprising the seashore, by means of acreage, frontage, and setback requirements and other provisions which may be required by such regulations to be included in the zoning bylaw consistent with the laws of Massachusetts.

(c) No zoning bylaw shall be approved by the Secretary which (1) contains any provision which he may consider adverse to the preservation and development, in accordance with the purposes of section 1 of this Act, of the area comprising the seashore, or (2) fails to make provision for the Secretary to receive notice of any variance granted under and any exception made to the application of such bylaw, and notice of any amendment thereof.

(d) If any improved property, with respect to which the Secretary's authority to acquire by condemnation has been suspended in accordance with the provisions of this Act, is made the subject of a variance under or an exception to any zoning bylaw applicable to such improved property so as to exempt it from any applicable standards contained in regulations issued pursuant to this section, the Secretary may, in his discretion, at any time after the date when such exception is made terminate the suspension of his authority to acquire such improved property by condemnation.

SEC. 7. The Secretary shall furnish to any interested person requesting the same a certificate indicating with respect to any property located within the seashore as to which the Secretary's authority to acquire such property by condemnation has been suspended in accordance with the provisions of this Act, that such authority has been so suspended and the reasons therefor.

SEC. 8. (a) Except as otherwise provided in this Act, the property acquired by the Secretary under this Act shall be administered by the Secretary, subject to the provisions of the Act entitled "An Act to establish a National Park Service, and for other purposes", approved August 25, 1916 (39 Stat. 535); as amended and supplemented, and in accordance with other laws of general application relating to the national park system as defined by the Act of August 8, 1953 (67 Stat. 496); except that authority otherwise available to the Secretary for the conservation and management of natural resources may be utilized to the extent he finds such authority will further the purposes of this Act.

(b) (1) The Secretary shall develop for appropriate public uses such portions of Cape Cod National Seashore as he deems especially adaptable for such uses, including swimming, boating, sailing, hunting, fishing, appreciation of historic sites and structures and the natural features of the Cape, and other activities of similar nature. The Secretary may also provide for the public enjoyment and understanding of the unique, natural, historic and scientific features and shall establish such trails, observation points and exhibits and provide such services as may be desirable for the purpose. Except for such public use areas and developments and except for improved property therein, the Seashore shall be permanently reserved as a primitive wilderness and no development of the Seashore or plan for the convenience of visitors shall be undertaken by the Secretary which would be incompatible with the preservation of the unique flora and fauna or the physiographic conditions now prevailing in the area described in section 2 of this Act or with the preservation of such historic sites and structures as he may designate.

(2) In developing the Cape Cod National Seashore established pursuant to this Act the Secretary shall, so far as practicable consistent with the provisions of paragraph (1) of this subsection, provide recreational and other facilities for the public in such places and manner as he determines will not diminish for its owners or occupants the value or enjoyment of any improved property located within the park.

(c) Notwithstanding any other provision of this Act, land and waters now or hereafter included in any migratory bird refuge within the boundaries of the Cape Cod National Seashore shall continue as such refuge under applicable laws and regulations, but such lands and waters shall be a part of the park and shall be administered by the Secretary for recreational uses not inconsistent with the purposes of such refuge under such rules and regulations as the Secretary may prescribe. Nothing in this Act shall limit the power of the Secretary to acquire lands and waters for any migratory bird refuge.

(d) The Secretary may permit hunting and fishing, including shellfishing, on lands and waters under his jurisdiction within such areas of the Cape Cod National Seashore as he may prescribe. The Secretary shall consult with officials of the State and any political subdivision thereof who have jurisdiction of hunting and fishing, including shellfishing, prior to the issuance of any regulations by the Secretary, and the Secretary is authorized to enter into cooperative arrangements with such officials regarding such hunting and fishing, including shellfishing, as he may deem desirable, except that the Secretary shall leave the regulation of the taking of shellfish in the towns referred to in section 2(a) of this Act to such towns.

(e) The Secretary is authorized to enter into cooperative agreements with the State of Oregon regarding rules pertaining to hunting and fishing and management programs pertaining to fish, game, wildlife, and wild furbearing animals which will not materially impair the scenic, scientific, and recreational features of the Oregon Dunes National Seashore.

SEC. 9. (a) There is hereby established a Cape Cod National Seashore Advisory Commission (hereinafter referred to as the Commission). The Commission shall terminate ten years after the date the Seashore is established.

(b) The Commission shall be composed of nine members each appointed for a term of two years by the Secretary as follows:

(1) Six members to be appointed from recommendations made by each of the boards of selectmen of the towns referred to in the section 2(a) of this Act, one member from the recommendations made by each such board;

(2) Two members to be appointed from recommendations of the Governor of the Commonwealth of Massachusetts; and

(3) One member to be designated by the Secretary.

(c) The Secretary shall designate one member to be Chairman. Any vacancy in the Commission shall be filled in the same manner in which the original appointment was made.

(d) A member of the Commission shall serve without compensation as such. The Secretary is authorized to pay the expenses reasonably incurred by the Commission in carrying out its responsibilities under this Act upon vouchers signed by the Chairman.

(e) The Commission established by this section shall act and advise by affirmative vote of a majority of the members thereof.

(f) The Secretary shall, from time to time, consult with the members of the Commission with respect to matters relating to the development of Cape Cod National Seashore, and for that purpose shall consult with the members with respect to carrying out the provisions of section 5 and 6 of this Act.

(g) No permit for the commercial or industrial use of property located within the Seashore shall be issued by the Secretary without the advice of the Commission, and, after its termination, without the advice of the board of selectmen of the town affected, if such advice is submitted within a reasonable time.

SEC. 10. (a) The Secretary is authorized to permit the investigation for, and withdrawal of, ground water from the sand dunes and the conveyance thereof outside the boundary of the Oregon Dunes National Seashore for beneficial use, in accordance with the laws of the State of Oregon, and to permit the removal of surface water and the conveyance thereof outside the boundary of the seashore for beneficial use in accordance with the laws of the State of Oregon, when the welfare of the surrounding persons becomes dependent upon the use of such water: *Provided*, That the withdrawal and use of water for these purposes will not materially impair the senic, scientific, and recreational features of the seashore.

(b) The Secretary is authorized to permit the transportation and disposal of domestic and industrial wastes within or through the Oregon Dunes National Seashore in accordance with standards established by the State of Oregon: *Provided*, That such disposal does not materially impair the scenic, scientific, and recreational features of the seashore.

SEC. 11. The Secretary may conduct such sand dune stabilization and erosion control programs within the Oregon Dunes National Seashore as deemed necessary to insure the protection of man-made developments and the natural resources of the area, and he shall secure the advice of other Federal and State agencies to accomplish these purposes.

SEC. 12. No existing authority or responsibility of any Federal, State, or local governmental agency with respect to jurisdiction over and the construction, reconstruction, operation, and maintenance of any public highway shall be altered or affected by this Act or by the relocation of any such highway, but the Secretary may acquire jurisdiction over such highway by agreement with the administering agency pursuant to section 3 of this Act. In the event any such highway is relocated or reconstructed any increased cost attributable to the adoption of recommendations of the Secretary in any way therein shall be borne by funds available to him.

SEC. 13. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act, except that no more than $25,000,000 shall be appropriated for the acquisition of land and waters and improvements thereon, and interests therein, and incidental costs relating thereto, in accordance with the provisions of this Act.

SEC. 14. If any provision of this Act or the application of such provision to any person or circumstance is held invalid, the remainder of this Act, or the application of such provision to persons or circumstances other than those to which it is held invalid, shall not be affected thereby.

DEPARTMENT OF THE INTERIOR

Subject matter: Proposed legislation to establish 3 national seashores (Cape Cod, Padre Island, and Oregon Dunes National Seashores)

Estimated additional man-years of civilian employment and expenditures for the 1st 5 years of proposed new or expanded programs

	1st year	2d year	3d year	4th year	5th year

NUCLEAR TESTS AT THE SUMMIT

Mr. GORE. Mr. President, within a few days, President Eisenhower will depart for Paris, France, where he is to meet Prime Minister Macmillan, President de Gaulle, and Premier Khrushchev. Although there is no agenda for this conference, the Secretary of State and others have indicated a general assumption that disarmament in general and nuclear disarmament in particular will be discussed during the conference.

It is with a sense of seriousness and responsibility that I address the Senate on nuclear weapons tests policy, because I have been the majority party delegate-adviser to the conference from the Senate, because I am the only member of the majority party who is privileged to serve on both the Senate Foreign Relations Committee and the Joint Committee on Atomic Energy, because I am a member of the subcommittee on disarmament, and also because I have devoted a great deal of study to this problem. Constructive helpfulness with this complex subject, so fraught with danger, has been the earnest goal of my efforts.

Presumably, a discussion of nuclear disarmament at the summit conference will involve the proposal which President Eisenhower formally submitted to the Geneva Conference on February 11, 1960.

In the light of recent developments, including the testimony presented last week by a distinguished group of scientists to the Joint Committee on Atomic Energy, the technical foundation for the President's proposal of February 11 has been seriously questioned, if not weakened. Moreover, the insistence of General de Gaulle that the curbing of delivery systems take priority over test suspension threatens disagreement among the Western Powers.

Notwithstanding the limitations of technical and political feasibility, now more clearly recognized than before, the fact remains that the President of the United States formally submitted this proposal. Moreover, the conference, which has now proceeded for nearly 18 months, was proposed by President Eisenhower. American prestige is heavily invested. Our moral position and U.S. leadership in the family of nations are involved.

As I understand it, the U.S. proposal of February 11 is specifically made conditional upon the installation of an International Control Commission of the type envisaged by the 1958 Geneva Conference of Experts. The proposed organization and mechanism for detection would be worldwide, with agreed provisions for other nations to be brought within the terms of the treaty. Implicit in our proposal is insistence that the proposed Control Commission and its operations at various stages and levels be allowed to function freely, to the full extent of its technical capability.

As I understand the February 11 proposal, it is conditioned upon reaching satisfactory agreement with the Soviets on the composition of the proposed seven-nation Control Commission, the staffing of inspection teams and control stations, voting procedures within the Control Commission, fiscal arrangements and operations of the Commission and subdivisions thereof, scientific criteria deemed to justify an onsite inspection of a suspicious event, freedom of movement and access by inspection teams, and an agreement upon a formula relating to physical and scientific facts the number of annual veto-free onsite inspections.

Obviously, if inspection and control are to be effective, the composition and procedures of the governing Control Commission must be such as to avoid either direct or indirect veto of the Commission's action by any party. Unless the staffs of any Control Commission are truly international in character, they cannot be expected to perform impartially. If either a control station or an inspection team is dominated by nationals of the country in which the control post is located, we shall simply have a situation in which the nation is, in effect, inspecting itself.

As I further understand President Eisenhower's proposal, it would exclude from the proposed treaty nuclear weapons tests conducted in outer space which are beyond present technical capability of detection and all underground tests which do not produce a seismographic reading of 4.75 magnitude.

Viewed within the strict confines of consideration of nuclear weapons tests as an isolated issue, the President's proposal of February 11 is subject to serious question, indeed. But the issue cannot be viewed narrowly. It cannot be viewed solely in the context of weaponry. As I have said, the President has made the proposal. I am confident he did so in utmost good faith, and in so doing he is committed to the proposal. It must be viewed in the light of the various concessions which we have made as further evidence of our sincere desire to make progress in the direction of disarmament and peace and to improve the degree of trust and confidence existing among major world powers. Under all the circumstances, Mr. President, it is my opinion that a treaty negotiated within the terms of our February 11 proposal, as I understand it, will merit sympathetic and favorable consideration by the U.S. Senate. This, I concede, requires resolution of some doubts in the interest of unified U.S. policy and purpose at this crucial time.

I am concerned, however, that our proposal of February 11, may be regarded by some as a mere bargaining position, just as the Russian proposal of March 19 appears to represent a bargaining position from their point of view. I hope this is not the case. However, we must not bargain away the principle of adequate safeguards. If we should, in our zeal to reach an agreement, make additional concessions beyond those contained in the February 11 proposal, if we should, in other words, seek to negotiate an agreement lying somewhere between our proposal and that submitted by the Russians on March 19—which was nebulous indeed in actual, practical procedure—the result of such negotiation must necessarily be subjected to the most searching scrutiny by the U.S. Senate in the discharge of its constitutional responsibility relative to the ratification of treaties.

These sentiments and views have been expressed today out of concern for the firmness and the prestige of President Eisenhower's proposal on nuclear weapons tests. It is my view that every reasonable assurance of unity that is possible, within bounds of duty and conscience, including the resolution of some doubts in favor of support of the President at this particular time, is desirable, if not seriously needed.

Perhaps I shall be permitted to say that, in my view, President Eisenhower would be well advised to avoid involvement of this issue in partisan politics.

Mr. CLARK. Mr. President, will the Senator yield at that point?

Mr. GORE. I yield to the Senator from Pennsylvania.

Mr. CLARK. I am very happy to be on the floor when the Senator is making this splendid address. I should like to indicate my strong view in support of his position that a nuclear treaty is possible, is feasible; that we should give the President the benefit of the doubt; that further concessions are undesirable, but that we in the Senate will support, as the chairman of the Foreign Relations Committee said on the floor a little while ago, a good, sound treaty, because we know we have to take this menace of nuclear armament off the backs of the American people and see to it, if there is any way it can be done, that we and our children and grandchildren can live our lives out without the fear of nuclear fallout and without the fear of imminent destruction.

But I interrupted the Senator from Tennessee at this point because I particularly wanted to commend him for his assertion that President Eisenhower would be well advised to avoid involvement of this issue in partisan politics; and I view with something approaching alarm the Madison Avenue partisan statement that came out of Mr. Hagerty, at the White House, this morning suggesting that the Vice President would substitute for the President if the President felt he had to come back to this country in order to attend to his duties before the summit meeting had adjourned.

I particularly deplore the fact that this, in my judgment, slights the Secretary of State. I point out to my friend from Tennessee that during the 7 years and 4 months the Eisenhower administration has been in office there has never been a suggestion that anybody other than the Secretary of State should substitute for the President at a grave international conference.

I will ask my friend from Tennessee if it does not seem to him odd that this first insertion of the Vice President into our foreign affairs at the summit, where the lives and future safety of American citizens may well be involved, comes at

a time only 3 months before the Vice President of the United States is to become, so far as we can tell, the nominee of the Republican Party for President? Were it not for this timing, I do not have any doubt in my mind at all that we would not have had Mr. Hagerty's statement from the White House this morning. I should like to have my friend's comment on that matter.

Mr. GORE. Mr. President, I had not intended in this speech to comment upon this political episode, but since I have been requested to do so I shall express some brief views.

There has been a tendency in the administration to downgrade and to minimize the importance of this conference. A conference of the heads of state of the four great powers cannot in any realistic manner, as I see it, be viewed as unimportant or even relatively unimportant. I think it is of such supreme importance that a 2-day visit to Portugal could not possibly compare in importance with the presence of the President of the United States at the summit conference, if it is still under way.

Secondly, I would seriously doubt that General de Gaulle, Prime Minister Macmillan and Premier Khrushchev would care to continue a summit conference if the United States were represented by one without constitutional authority or responsibility.

It may well be that after the conference has proceeded for a few days problems will be referred to the foreign ministers. That practice has occurred heretofore. The Foreign Relations Committee of the Senate has been informed this is expected to be a brief conference. I believe it has been described as a conference of 2, 3, or perhaps 4 days.

I think I must agree with the senior Senator from Pennsylvania. I hope such a statement was not made by President Eisenhower, and I hope it was not made with his specific approval, for I feel it constitutes a "snub" to the Secretary of State. If the summit conference should be involved in partisan politics, I cannot believe the cause of peace would be served. I would seriously doubt our allies would appreciate it.

I believe that is the extent of the comment I care to make on this matter. I trust the summit conference and particularly the nuclear test issue, which is so vital and so dangerous, will not be involved in partisan politics.

Mr. COOPER. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Kentucky?

Mr. GORE. I yield.

Mr. COOPER. Mr. President, a few weeks ago the distinguished Senator from Tennessee made a very fine and searching speech on the Senate floor regarding the negotiations for the cessation of nuclear tests.

Mr. GORE. I thank the Senator.

Mr. COOPER. His speech provoked a 3-hour debate. It was a valuable speech and a valuable debate.

I am glad that the Senator is speaking again on this subject. His speech, as I understand it, is directed toward unifying the Senate, with the administration, regarding a nuclear treaty. I agree with what the Senator has said; I agree with him that we have gone about as far as we can in our proposals and should not make concessions. I commend the Senator. His speech is of great value.

If the Senator will permit me to make a further comment——

Mr. GORE. Before the Senator proceeds to another point, I should like to thank the Senator for his generosity. The able senior Senator from Kentucky not only did me the honor of listening to my more extended speech on this subject, but also he and I and our wives have engaged in earnest personal conversation on this subject. The senior Senator from Kentucky has knowledge that I have personally resolved doubts in favor of the position I have taken today, because I feel it is in the national interest to give the maximum degree of unified support to the President as he goes forth on this great mission.

Mr. COOPER. I am aware of the Senator's purpose. That is one of the reasons I commend the Senator. I know, as the Senator from Tennessee knows so well because of his work in this field, that there are areas of testing in space and underground where it would be very difficult to determine whether nuclear tests were conducted even though an agreement can be made.

In weighing the value of a treaty against these uncertainties, the Senator is saying, and I agree, we should favor such an agreement, if reasonable inspection is assured, to move away from the awful nuclear threat which confronts the world.

I observe my friend the senior Senator from Pennsylvania is present in the Chamber. If the Senator from Tennessee will permit, I should like to address myself to the subject which the Senator from Pennsylvania mentioned; that is, the statement made about the President and the Vice President.

First, I believe great significance has been placed upon the summit meeting by the President of the United States. We sometimes forget that it was the President of the United States who tendered the invitation to Mr. Khrushchev for the summit meeting. And as has been developed heretofore in debate, there have been thorough and careful preparations for the summit meeting. A recent evidence is the series of talks in which the President has been engaged with the heads of state of our allies.

I do not believe anyone doubts or questions the desire of the President to achieve favorable results at the summit meeting. Everyone understands the issues and the difficulties involved; yet there is great hope that results may come from the meeting—some decision that will move toward settlement of the issues between the allies and Soviet Russia, some relaxation of the tensions which could bring about war. Certainly this is the hope and the purpose of the President of the United States.

The Senator from Tennessee's speech is designed to remove partisanship at this time, and to bring about a higher degree of unity.

But I must say to my good friend from Pennsylvania [Mr. CLARK], who knows how much regard I have for him, that I do not believe any good purpose is served by ascribing to the President some kind of political motivation, if it is true that he said that in the event he could not attend all meetings of the summit conference, the Vice President would represent our country.

I have known Secretary of State Herter for 15 or 16 years. I share with other Members of the Senate a high regard for him. He is an able and dedicated Secretary of State, a man of courage and judgment. I am sure he will be at the summit; and I am sure that his advice and great influence will be used to the fullest.

I have no means of knowing whether or not Mr. Hagerty is correct as to what the President intends to do. But as far as I am concerned, I would think it well if the Vice President were also present. He is a man of great ability. He has demonstrated his ability to meet, on even terms, the Russian representatives, even Mr. Khrushchev with whom we must deal. I think it is wrong at this time to begin to ascribe political motivations to the President of the United States, upon questions which may well be the greatest we shall face this year. I say this with all regard for my friend from Pennsylvania, but I mean it.

Mr. CLARK. Mr. President, will the Senator from Tennessee yield in order that I may reply briefly to the Senator from Kentucky?

Mr. GORE. I yield.

Mr. CLARK. Let me say to my good friend from Kentucky, who knows the affection in which I hold him, that it was not I, and it was not the Senator from Tennessee, who brought partisan politics into the discussion of the summit meeting. It was Mr. James Hagerty, who issued a statement this morning. I did not charge the President of the United States with political motivation. I said—and the Senator from Tennessee joined me in the comment—that I hoped the President of the United States would repudiate this obvious and clear interjection of partisan politics into a matter from which it should be excluded.

I am as interested as is my friend from Kentucky in the unification of the country behind the President, in terms of the summit conference. I think the President has an obligation to keep politics out of this question. I am convinced that whoever made the statement from the White House this morning deliberately interjected partisan politics into it for purely partisan political advantage.

Mr. COOPER. Mr. President, I hold to my position. I do not know whether the President made the statement referred to or not; but if he did, I certainly would not ascribe to him any political motivation.

Mr. GORE. Mr. President, following the colloquy between my distinguished friends the senior Senator from Pennsylvania and the senior Senator from Kentucky, I again express the hope that neither the summit conference nor the current nuclear weapon test conference will become involved in partisan politics.

In expressing that hope, I am not charging that such a thing has happened. I must say, in all candor, however, that in the cloakrooms today the common interpretation of the announcement from the White House this morning is that the announcement was politically motivated.

That raises a question. The White House has no tongue. It is the inanimate residence of the President. Of course, the Presidency has become institutionalized. But there is really only one man who can be the spokesman of the White House. That is not Mr. Hagerty. It is the President of the United States; and I express serious doubt that President Eisenhower either made the statement referred to or authorized it, although, like the senior Senator from Kentucky, I do not know.

Unfortunately, the question of nuclear weapon tests was given partisan treatment in 1956.

It was then that Governor Stevenson suggested that the United States take the lead in curbing contamination of the world's atmosphere by seeking an international agreement for cessation of large hydrogen bomb tests. This suggestion, it is true, was made in the course of a political campaign. But it was a serious suggestion, as we can all now agree, seriously advanced. It was dismissed out of hand by President Eisenhower, who was then a candidate opposing Governor Stevenson, and who characterized it as a "theatrical gesture." Vice President NIXON, then wearing the "old" Nixon hat, said of it:

> If he [Stevenson] continues to pursue this coarse, the American people would be taking a fearful risk with their own security if they were to elect him President.

Less than 2 years later, President Eisenhower had reversed his position 180 degrees. It was on August 22, 1958, that the President proposed a conference between Great Britain, Russia, and the United States for the negotiation of a treaty to suspend nuclear weapons tests. I say this was a 180-degree reversal because the Stevenson proposal was rejected, not on grounds having to do with inspection and control of an agreement, but on the grounds that further testing of nuclear weapons was required in the interest of national security. As late as December 1957, the President still adhered to this position strongly and so stated in a letter to Prime Minister Nehru of India. It is a matter of fact that neither our own people nor the people of the world have been given the reasons for the President's complete change of mind.

This is not to say that the President made a mistake in reversing his position. Indeed, the basic decision to seek an agreement on this subject was correct. Even in doing so, though, the administration made a serious mistake in assuming that an international control system to monitor a comprehensive test ban agreement was then technically and politically feasible. This assumption was based upon the byproduct results of a single underground test explosion which had been conducted for an altogether different purpose.

It is strange to note that at the time the President made his proposal in which the assumption of technical feasibility of detection of a comprehensive test ban agreement was implicit, additional underground tests from which specific information was to be obtained were already scheduled. Nevertheless, the conference was called and our position was taken without waiting for this information to be properly analyzed. When the results of the U.S. Hardtack Series were analyzed, the technical facts and assumptions upon which our position had been taken were clearly shown to be unrealistic and incorrect.

From the first day of the Conference, which I attended, until now, the Russians have treated the Conference as an exercise in propaganda. It is my view that the administration has been quite remiss in its failure, after 18 months of negotiations, to pin the Russians down to the acceptance or rejection of an adequate system of inspection and control to verify observance of the provisions of a treaty, which President Eisenhower has repeatedly and rightly said is a necessary part of a treaty.

Upon my return from Geneva in November of 1958, I reported to President Eisenhower my belief that the Russians had two basic objectives: One, to prevent further nuclear weapons development through tests by the United States and, two, to outlaw the use of nuclear weapons. I reported further my view that Russia sought to achieve either or both of these goals without accepting any realistic system of inspection and detection within the Soviet Union.

Since November 1, 1958, we have given the Russians a de facto ban on all nuclear weapons tests without any inspection whatsoever. There are strong indications that this will continue. Meanwhile, we have no assurance that Russia is refraining from all tests.

The Russians, as I have said, have taken the fullest propaganda advantage of the Conference. Time after time they have reaped a harvest of political propaganda, anticipating and foxing us over and over again.

For the second time now, developments in science have revealed our assumption of the capability of detection techniques to be overly optimistic. The Russians are embarrassed not at all by such new scientific information. After all, they have only accepted inspection in principle. By them it is treated as an academic subject. They have steadfastly resisted agreement to permit even one single inspection team to make one single inspection in the Soviet Union, no matter how many suspicious events may occur.

But, Mr. President, even our mistakes have emphasized our sincerity and good faith. The mistakes are history. We cannot recall them. What we can do and what we must do is to take a realistic view of the situation which exists, undertaking to make the most of it while being sure that we do not make it worse.

I should like to close as I began. The President of the United States will soon cross the water's edge to represent all the American people at this important Conference. It is in the hope of strengthening his hand and encouraging firm adherence to his nuclear weapons test proposal of February 11 by all Western Powers that I have spoken.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. CLARK. I commend my friend from Tennessee on what I believe to be a most statesmanlike address. I should like to associate myself with his conclusions, particularly with his last paragraph, that the President of the United States should and ought to see to it that he does represent all the American people at this important Conference. I am confident that when he does so, all the American people will support him.

I notice that my friend has before him the joint communique issued after the Macmillan-Eisenhower conference a short time ago. I wonder if my friend is in accord with me, that there is nothing inconsistent in the splendid speech he has made with the joint communique issued by Mr. Macmillan and President Eisenhower at that time.

Mr. GORE. First, I thank my distinguished friend for his generosity. I do have before me the communique issued by Prime Minister Macmillan and President Eisenhower after their talks at Camp David.

In reply to the able Senator, I should like briefly to review the points made in the communique, which the Senator will recall was referred to on the floor of the Senate by me on the very day it was issued. I commended and applauded President Eisenhower and Prime Minister Macmillan upon steering the ship of negotiations back into the proper channel and putting first things first.

What is the first point in the communique? After the first two paragraphs, which are more or less a preface, this is stated:

> When the Geneva Conference began 17 months ago, there was reason to hope from the preliminary scientific discussions which had preceded it that there would be no insuperable technical or scientific difficulties in establishing an effective control system capable of detecting nuclear tests of all kinds.
>
> Subsequently, however, it appeared from further scientific research that in our present state of knowledge there are great technical problems involved in setting up a control system which would be effective in detecting underground nuclear tests below a certain size.

Mr. President, I submit that that is a review of the assumption of technical feasibility made by the administration in August 1958, which was rendered unrealistic by later tests and information. I believe the same point is made in my speech that was made in the communique. I am sure that the joint communique makes it much better. I read further from the communique:

> It is, however, the sincere hope of the President and the Prime Minister that an agreed program of coordinated scientific research, undertaken by the three countries, will lead in time to a solution of this problem.

I made such a proposal to the President in November 1958. It has now

been proposed to the Russians in Geneva, upon instructions to the British and American delegations by Prime Minister Macmillan and President Eisenhower. I am advised by the Department of State that it expects the Soviet reply within the week. I hope the reply will be favorable. This would be a constructive step. If, together, the nuclear powers could solve some of these technical problems of detection, it would not only promote the conclusion of a treaty, but would also promote mutual confidence between the powers.

I read further from the joint communique:

Meanwhile, the President and the Prime Minister believe that progress can be made toward their ultimate objective of a comprehensive agreement.

There is nothing in disagreement with my statement there. I continue to read:

They have agreed that much has been accomplished in these Geneva negotiations toward this objective.

They point out that in the effort to achieve an early realization of a treaty there are a number of important specific problems to be resolved. These include the questions of an adequate quota of on-site inspections, the composition of the control commission, control post staffing, and voting matters, as well as arrangements for peaceful purposes detonations.

I wish to call to the attention of the Senator the fact that after the conclusion of a treaty such as the joint communique describes, and after there is a joint program of research, and after definite means of detection are agreed to and in operation, then, and only then, according to the communique, is the moratorium to be considered and made operative.

Mr. CLARK. If I may interrupt the Senator, I should think not only after the treaty has been negotiated, but after it has been ratified by the Senate.

Mr. GORE. This is not made plain in the communique.

The Prime Minister and the President have agreed that as soon as this treaty has been signed—

I believe that does make it plain—

and arrangements made for a coordinated research program for the purpose of progressively improving control methods for events below a seismic magnitude of 4.75, they will be ready to institute a voluntary moratorium of agreed duration on nuclear weapons tests below that threshold, to be accomplished by unilateral declaration of each of the three powers.

I had not presumed to discuss the moratorium which it is proposed will be accomplished by Executive order of the President of the United States after the conclusion of a treaty, and after a joint program of scientific research on test detection is undertaken.

After all, the Senate does not consider an executive direction to an agency of the Government as it does a treaty. In my speech today, I have referred to—and I had intended to refer to—the terms of a treaty which, under the Constitution, must come to the Senate for ratification.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. CLARK. I agree with everything the Senator has said about the importance of separating a treaty from the executive act of a moratorium, but I wonder if the Senator would not agree with me that it might well be unwise for the President, acting in his executive capacity, to agree to a moratorium for a fixed period prior to the ratification of a treaty by the Senate.

I assume that a moratorium on a day-to-day or a month-to-month basis, pending ratification, might well be desirable; but I for one would hesitate to indicate that, in my individual judgment, it would be a matter of course for the Senate to ratify such a treaty in the face of an agreement on a moratorium for a fixed period of a substantial length of time.

Mr. GORE. Of course, a moratorium which is tied specifically to a treaty, although not an integral part of the treaty, would of necessity be considered by the Senate. To state it another way, the Senate would, of necessity, consider the treaty in light of such moratorium or other internationally agreed positions as might be closely related to it.

In this instance, it seems to me that we are talking of a hypothetical occurrence. The President and the Prime Minister have placed first things first: The conclusion of a treaty with adequate safeguards for those tests covered by the treaty; the initiation of a joint program to conduct experiments and research in developing means of detection; and then, after those things are concluded, the question of a moratorium would be in order. I hardly know how to discuss the subject, because we have not reached that stage yet.

Mr. CLARK. I agree with the Senator from Tennessee. I was intending only to throw out a possible caveat, which I will now make more specific by calling attention to the sentence in the United States-British statement which refers to an agreement, as soon as the treaty has been signed and arrangements made for a coordinated research program and continues that there would thereupon be a readiness to institute a voluntary moratorium, for an agreed duration, on nuclear weapons tests below that threshold. I could have wished that the communique had used the word "ratified" rather than "signed." I am still of the view that a unilateral declaration should not be in the first instance for a period or a duration longer than it could be anticipated it would take the Senate to deal with the ratification of a treaty.

Mr. GORE. I conclude by saying there is much merit to the position taken by the senior Senator from Pennsylvania. I shall not presume to reach a judgment upon a moratorium which has not been agreed upon. Much would depend upon the nature of the tests involved in a moratorium agreement; likewise the duration of a moratorium, the effect it might have upon the operation of the International Control Commission, and the effect it might have upon the treaty.

I shall, of necessity, as I am certain the senior Senator from Pennsylvania will do, reserve judgment upon this question, expressing faith that President Eisenhower and his administration will be prudent in this regard, as in others.

I yield the floor.

MUTUAL SECURITY ACT OF 1960

The Senate resumed the consideration of the bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes.

Mr. FULBRIGHT. Mr. President, I rise to discuss the action taken by the Committee on Foreign Relations on S. 3058, the Mutual Security Act of 1960.

I do not, it will be noticed, leap to my feet ablaze with excitement and enthusiasm. My eyes do not sparkle with happy anticipation. Instead, I rise with the restraining weight of a heavy responsibility and the duty unavoidably attached to my position as chairman of the Foreign Relations Committee pulling at my shoulders. Further, I do so in the oppressive knowledge that no one in the Senate has an assignment which is less likely to arouse the sympathetic interest of the American public.

I am well aware of the fact that the mutual security program is no more popular—or, to be accurate, no better understood—among the people of my State than it is in the Nation generally. How much more pleasant it would be for them and for me if their junior Senator were today reporting from committee a public works project easily seen as of immediate and direct benefit to Arkansas. How much more entertaining it would be if I were appearing on their television screens in the guise of St. George lustily belaboring the scaly elements of evil abroad in our land, or in a burst of patriotic fervor denouncing all those benighted "furriners" who have different ideas from ours about how to organize or manage their affairs.

Yet I can and do take the stoic's comfort to be derived from the performance of a stern but vital duty which is essential to the security and well-being of Arkansas, the Nation, and the entire free world.

I think my attitude is fully comprehensible to my colleagues. Perhaps it will be even more widely understood if I compare it with the average citizen's failure to become joyful over his life insurance policy. He does not pull out his policy ever so often and look at it with tender affection. In fact, his quarterly or annual payments may be a source of distress and bitter complaint. The family man, nevertheless, feels that to reduce or dispense with that policy would jeopardize that which is dearest to his heart, the security of his family.

Mr. President, I believe that the mutual security program is the insurance policy indispensable to this country as it carries out its international responsibilities.

I would admit that Mr. Average Citizen, while seldom enthusiastic about his personal insurance policy, might well be pleased and moved by the opportunity to attach clauses which would give him much better coverage at roughly the same cost. Many of my colleagues joined me in expressing the hope that

this year's mutual security program would come to us from President Eisenhower with just such clauses in evidence. Indeed, many of us in the last session worked hard, albeit unsuccessfully, to make the changes in the bill conceded to be necessary, even by high administration officials. We tried to give the program continuity and the ability to plan for the future. We tried to make efficient administration possible, but we failed—at least temporarily.

Unfortunately, the mutual security program for 1960 in many ways resembles a plate of warmed-over grits. In the near absence of initiative, originality, and long-term provisions in the bill before us—symptomatic of a tired administration, as well as of election year dictates—it is not surprising that the Foreign Relations Committee, rebuffed for its energetic pains last year, could not muster much fresh enthusiasm for what is essentially a holding operation.

At the same time, I would fully support the view that there is much nourishment in warmed-over grits, and that many would find them palatable and comforting if no more exciting fare were available.

Having, I hope, clarified my overall position, I should like now to recall briefly some of the arguments about the bill before us. My colleagues will be glad to know that I do not intend to give a long list of facts and figures and a point-by-point recital of committee actions and changes. These are fully described and justified in the excellent committee report on their desks. Instead, I want to make a few general observations about the basic nature of the mutual security bill.

With a slight amendment, let me recall a phrase of Plutarch's:

> It is a difficult task, O citizens, to make speeches to the [pocketbook], which has no ears.

I would add, "no eyes" either, for the justification of a foreign-aid program has been spelled out in detail in myriad publications for more than a decade. The arguments have been presented and wholeheartedly subscribed to by all our Presidents, Secretaries of State and Defense, Joint Chiefs of Staff, and other high officials. As was noted in the other body a few days ago, every declared presidential candidate at the present time, as well as the undeclared possibilities for the nomination, so far as I am aware, is fully committed to the importance of foreign aid. Yet each year it seems that the same fundamental arguments have to be presented to those who either fail to use their eyes and ears or refuse to believe them.

Why there should still be so little public understanding of the mutual security program is only a partial mystery. Frankly, I do not believe it unfair to assign some of the blame to the press and other information media. Very few newspapers around the country find it to their interest to pursue educational functions. Yet many are only too happy to seize on an isolated minor instance of waste or inefficiency and use it to imply that it typifies the whole foreign-aid program, which should therefore be abolished. This is rather like having the stockholders of a big corporation demand liquidation because 2 out of 100 employees in a certain category are not performing well. Then there is the classic case of the headlined big "scandal"—we had an instance of that last year—and the tiny admission of error on the next edition's back page. I would also add that few people seem to be aware of the continuing force of the mutual security provision which prohibits undue executive branch efforts to secure public understanding of the foreign-aid program here at home.

Whatever the reasons, the fact remains that there is little understanding, or there is misunderstanding, of the mutual security program in many areas of the national scene. I am not so naive as to think that an attempt to counter the usual criticisms with either argument or logic will go far toward converting convinced opponents of foreign aid. But neither am I so discouraged that I shall not try to stimulate interest in the committee report among those who have as yet refrained from taking a firm position.

Before passing on to what I would consider more important factors, let me give at least a hurried note to the charges and epithets traditionally hurled at the mutual security bill. There is always a sort of tragic Greek chorus ready to break into its moaning cries of "giveaway," inefficiency, blunders and baloney, waste and woe.

First, let us consider the "giveaway" charge. As in years past, my colleagues will find in the voluminous record of committee hearings testimony to the effect that roughly 80 percent of all mutual security funds are directly spent in the United States, and that over 500,000 jobs for American citizens have been created by the program. These estimates, made by nongovernmental experts in 1957, are still applicable and are unrefuted. But how much publicity is given and how much attention is paid to this evidence, and what is the response? One elected representative of the American people, when recently confronted with this information, figuratively folded his arms and stuck out his lower lip, and literally said "I do not believe it." There was no further argument, and there will be none now on that score. I do not mean to imply that this is the principal justification for this program, but it is on this one score.

Next, what about waste and inefficiency? It seems that even the strongest supporters of the mutual security program these days must go through a ritualistic ceremony of admitting and deploring the element of truth in these charges, pledging themselves anew to a crusade for improvement, and then stating somewhat ruefully that they will vote for the bill. I have considerable sympathy for this reaction, since I am far from believing that every project is equally essential and that the program now before us is the best that could be created. In fact, I know that it is not.

Yet I doubt that this defensiveness is actually necessary. I doubt that our constituents really see us or administration officials as playboys of the roaring twenties frantically scattering taxpayers' money to the winds. I doubt that we need constantly to protest that we do not condone ineptitude and careless handling of money. And I fear that by catering to the critics' obsession with an acknowledged small amount of waste, we invite at least two dangerous reactions: one, we allow attention to be diverted from really important deficiencies in the aid program; and, two, we misrepresent Americans as being more interested in the accounting process than in preserving national security and benefiting humanity.

If anyone does not have enough imagination to comprehend the difficulties and inevitable trial-and-error methods involved in an attempt to give a primitive jungle or desert country a chance to preserve its independence, then no words of mine will serve to impart that imagination. If anyone believes that his townsmen and neighbors, in serving our country overseas, through some mysterious alchemy lose all ideals and virtues, and become bumbling wastrels, then I can only commiserate with that person for his low opinion of his fellow men, and perhaps of himself. If anyone thinks that the pure application of American business methods will lift the foreign-aid program into a paradise of efficiency, I would ask him if he has never known of a fellow citizen who went out to buy a new automobile or television set, and found he had bought a "lemon." If anyone considers that the U.S. Congress has discovered the touchstone of inspired planning and absolute efficiency, let him take a windswept ride on one of our impressive new subway cars, with wheels designed for a dead-straight track, and let him listen to the reproaches of those wheels as they shudder and groan through a serpentine tunnel and grind themselves into dust. But I have not heard anyone advocate the abolition of the Senate merely because of that glaring instance of ineptitude.

The sad truth, Mr. President, is that human enterprises are no more perfectible than the imperfect humans who conceive of them and carry them out. This fact happily does not in the least deter mankind in its constant battle for what it believes is progress and a better world. It has not discouraged a campaign for improved administration of the mutual security program; indeed, our committee report, as well as that of the other body, cites marked improvements in the program.

However, insistence on an absolute can be carried to the point of causing barren destruction. Who can help but be emotionally stirred when a self-proclaimed supporter of the principle of mutual security rises to declaim righteously and to vote against the program so long as even $1 is wasted? Yet surely a more mature judgment would ask whether that $1 is to be saved by throwing the whole program overboard.

As I have suggested, more important drawbacks exist in the mutual security program and are of a character different from what the usual criticisms indicate. These drawbacks can generally be

classified under the charge of adopting short-term solutions for long-range problems. Each year we go through the same time-consuming and exhausting process of examining the program with a fine-tooth comb. And each year the resulting legislation becomes more complex and cumbersome as friend and foe alike hasten to add just those few more provisions that will really add up to a magical formula for preventing any waste whatsoever. In the process of detailed argument, the administration becomes more and more committed to stand by and carry out plans that events may prove to be ill adapted to meet and overcome rapidly shifting local situations.

Although few programs ever undertaken by any government at any time have been so carefully scrutinized and checked, congressional critics insist upon diverting our attention from the policy issues, which properly should be our main concern, to a narrow concentration upon administrative practices. The goal here seems to be to make us over into management experts rather than shapers of foreign policy. The committee has manfully struggled to elevate its work to the proper plane—especially with a view toward planning for the longer-range future—but has made little headway against administration timidity and congressional suspicions.

Now let us look at two interrelated arguments advanced even by those who have been counted among the advocates of the program in past years. I believe these arguments are worthy of being viewed more seriously and sympathetically.

First, there is the natural reaction of many of those who are sick and tired of being forced to spend weeks each year in tedious and unrewarded examination of a program that seems to bring us no closer to a lasting solution, who believe that certain portions of the program are deeply mired in a rut, and who are convinced that a new and fresh approach is imperative. This reaction can take the form of willingness to consider large punitive cuts and sweeping administrative changes in an attempt to compel a fundamental reconsideration of the program.

Perhaps an answer by analogy can be drawn from the soap-opera case of the disgruntled husband who, after nearly a decade of marriage, is demanding that his tired, almost slovenly wife either make herself over or go home to mother. Well, the lady has had a rough time of it over the past few years; she has borne children, washed and mended, slaved over the hot stove—burning several culinary efforts in the process—and has generally safeguarded the security and well-being of the home. Quite rightly, she feels she has done yeoman service and should not be expected to look exactly like the girl he married. With the best intentions, she just has not the strength to do all she should; surely matters will be different next year, when the children are older and there will be some part-time help. Now if friend husband thinks about the alternatives with a little clarity, he almost certainly will take a more understanding position. The real danger, however, is that some seductive charmer he might meet in the local tavern will turn him from the path of duty and good sense.

That charmer shows up in the second argument, which points to apparent or hoped-for changes in the world scene that might permit us to relax our overall efforts a bit, or at least to dispense with some of our very costly defense establishments and arrangements. My own view is that there has been no basic change in the cold war problem which justifies any letting down of our guard. Indeed, the Berlin situation is more than sufficient confirmation of that view.

My colleagues are aware that the committee last year, disturbed at the apparent scarcity of long-range foreign policy thinking and planning in the Government, arranged with private groups and institutions for a series of studies which would provide the basis for some fresh independent thought about the global scene. One of the best of these studies is the one prepared on the U.S.S.R. and Eastern Europe by a Columbia-Harvard research group. To place the bill before us in the proper context, I should like to quote the following excerpts from that report:

> The evidence seems to suggest that these internal changes (in the U.S.S.R.) are not likely, at least over the next decade or so, to lead to real normalization of Soviet relations with the rest of the world * * * the position of the Soviet leadership promises to remain strong and its commitment to Communist goals unimpaired.
>
> As a consequence, if present trends continue, a further increase of Soviet power and influence is to be expected.
>
> Dealing with the Soviet challenge should not become an exclusive preoccupation of American policy. While it is of vital importance that we steadily take the measure of the Soviet challenge, without becoming distracted by the day-to-day ups and downs of Soviet "atmospheric" changes, the central focus of our policy should be the political growth and economic improvement of the non-Communist world. This forward movement, inspired by a vision of democratic progress, is essential to the creation of a world environment favorable to the survival and development of free institutions. It is also the course of action most likely to lead to a modification of Soviet policies over the long run.
>
> It is vital that the United States not allow an imbalance of military power to develop in the Soviet favor, not only in the interest of the maintenance of peace but also in order to protect the non-Communist world against a process of piecemeal disintegration.
>
> It is necessary that the United States and its allies be prepared to use a range of instrumentalities—military, political, and economic—to insure against the further extension of Soviet power and influence.
>
> Coordinate with these measures, the United States should be continuously prepared to explore through negotiation the settlement of outstanding problems between the Soviet Union and the non-Communist world, without either undue expectations or sterile pessimism.
>
> Finally, there is the requirement on which all others depend: the development of a public understanding sufficiently informed and mature to be willing to support heavy costs and sacrifices without the stimulation of crises or bellicosity, without wild alternations between optimism and pessimism. This is the source of strength which would make it possible for a democratic society to preserve the essential qualities of its democratic life while it mounts the degree of mobilization necessary to deal with the mortal, and continuing, challenge of the Soviet system.

I do not believe that we shall find a better and more succinct appreciation of the world we face than the study which I have just quoted.

Now let us take one concrete example of the importance of supporting a mutual security program which will give our Government tools not only to deal with the Soviet challenge but also to support initiatives in the uncommitted areas of the world. I invite your careful attention to an article by Hamilton Fish Armstrong in the New York Times magagine of April 17 on the new African country of Guinea. Mr. Armstrong, the respected editor of Foreign Affairs, is extremely knowledgeable and no alarmist. Yet the picture he gives of the situation in Guinea fully bears out his article's title, "Disturbing Portent for Africa."

It is clear that, through the permissive inertia and mistakes of the West, the Soviet bloc has moved with great speed into a small West African country which it threatens to dominate and turn into a base for further operations in the area. Guinea now depends almost entirely on Soviet credits of $35 million and on bloc technicians for its future development. It has severed its ties with the French franc zone, and roughly 80 percent of its trade is with the Soviet bloc—whereas formerly an even greater percentage of trade was with the West. Mr. Armstrong does not suggest that President Toure is a Communist, nor does he question the sincerity of Toure's determination to keep Guinea neutral and uninterested in the cold war. However, as the article says:

> It is doubtful whether he and most of his ministers realize as yet just how tightly they are being caught in the spider's web.

After pointing out the implications for the rest of Africa if the Soviet-supported venture becomes a success in Guinean eyes, Mr. Armstrong in the following passage concludes that our Government is not organized to cope with such developments and strongly criticizes both Congress and the executive branch.

> The fact is that, although the American system of government serves us pretty well at home, it is completely helpless to deal with a whole series of situations confronting us around the world.
>
> Congress is unwilling to trust the executive with sufficient free funds to enable it to act promptly in critical situations. It refuses to appropriate ahead so that there can be long-term planning. When Government funds are available, they are swathed in red-tape.

Mr. President, I ask unanimous consent that the entire article be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Arkansas? The Chair hears none, and it is so ordered.

(See exhibit 1.)

Mr. FULBRIGHT. Mr. President, I happen to believe that Armstrong lets

the Executive off too easily—what is the President's contingency fund for, if not for emergencies?—but there is no doubt in my mind that he is right on the essentials.

I do not raise this as a plea for dramatic action with respect to Guinea; the time for emergency moves has given way to a need for careful appraisal accompanied with the readiness to act swiftly whenever appropriate. Rather I want to underline the necessity of supporting the mutual security program before us, minimal and cumbersome though it may be in some respects. We will not this year obtain the improvements a number of us wholeheartedly desire. Nevertheless, many of the tools are here if the Executive only chooses to use them, hopefully with vigor and courage.

Now, before concluding, I owe my colleagues at least a very brief résumé of committee action on S. 3058. First, let me remind Senators that the administration's request for $1.454 billion in its authorization bill leaves out of account the $2 billion requested for military assistance and $700 million for the Development Loan Fund. Authorization was provided last year by the Congress for these two categories. The committee did, however, limit military assistance, other than training, for Latin America to a ceiling $2 million below that proposed by the administration.

The bill as reported by the committee contains total authorizations of $1,425,500,000—a reduction of $29,400,000 in the administration's request. Most of the cut was made in defense support, a category that the committee has long believed should be reduced as quickly and stringently as considerations of military security will permit. Special assistance was cut by $8.5 million. Finally, $400,000 less than requested was earmarked for the U.N. High Commissioner for Refugees, because the committee considered that his program should be phased out, rather than shifted to a new group of refugees.

In an attempt to stimulate a solution to the Palestine refugee problem, Congress for 2 years has directed that a percentage of the authorized appropriation for the refugee program should be reserved for repatriation or resettlement. This proviso has had absolutely no effect. The committee therefore has proposed to repeal it, to provide for the return of $6.25 million in accumulated funds to the Treasury, and to direct the President to make specific recommendations next year for dealing with the problem. The net effect of the committee's action on this section is to reduce the administration request by $3 million.

While the bill contains little that is new, there are two or three provisions which should be noted here. The sense of Congress is expressed that the Development Loan Fund should assist savings and loan type institutions and guarantee private U.S. capital available for housing investments in Latin America. As requested by the administration, authority is provided to use funds for the Indus Basin development under the supervision of the International Bank and in accordance with the Bank's standards and procedures. Lastly, contained within the illustrative program for special assistance is a provision for a $20 million special program for tropical Africa. The committee welcomes this evidence of growing attention to the needs of Africa, and hopes that the program will be administered in such a way as to encourage greater regional integration.

Let me close by addressing exhortations to three groupings among my colleagues.

First, to those who intend to vote for S. 3058 in the belief that it is a good, sound bill and just what the doctor ordered, I pay my sincere respects with a somewhat wistful admiration for such consistency and faith.

To those who recognize that the doctor ordered it, but disagree with the nature of the prescription and want to change doctors, I would recommend the old La Guardia slogan, "patience and fortitude." I would also tentatively suggest that the medicine not be taken through clenched teeth for fear of spilling enough to require the administration of a supplemental dose.

Finally, to those who firmly believe that the mutual security bill is a monster to be slashed ruthlessly, I would invite them to look at page 25 of the printed hearings. They will find that the repository of all foreign policy wisdom—I am, of course, referring to the Bureau of the Budget—has already hacked some $750 million from the departmental requests with its "vorpal blade." Surely those colleagues will not wish to prevent the bleeding Jabberwock from staggering through one more year.

Now, Mr. President, a final word about the aid program in Korea. As reflected in the hearings and as stated in the committee's report, the Foreign Relations Committee was gravely concerned over the situation in Korea prior to the most recent and serious outbreak of rioting. It is to be hoped that the change in government in Korea will be accompanied by political reforms which will bring a greater measure of freedom and stability to that unhappy country.

I noticed in this afternoon's newspaper that the new Acting President, Huh, was quoted as saying, "I believe there is waste of American aid funds and improper management." That is not news to the committee, but I am glad to see the Acting President of Korea has now recognized it.

Again to quote the committee's report, there seems no generally acceptable alternative to continuing the aid program in Korea. On the other hand, the recent events in that country raise a question, which is of wider application, as to the long-term effectiveness of an aid program continued in the absence of an atmosphere of expanding basic freedoms. This is a question which I think should be looked into before another mutual security bill comes before the Senate.

Among other things, thought should be given to the provocative questions raised by Conlon Associates in their study on Asia prepared at the request of the Committee on Foreign Relations. These questions are:

1. What form of aid is most conducive to stimulating indigenous energies and capital formation?

2. To what extent should assistance be geared to long-range plans and what should be the American responsibility for checking the validity and progress of such plans?

3. What is the proper balance between military and economic aid, in terms of the security and welfare of Korea?

EXHIBIT I

[From the New York Times, Apr. 17, 1960]

DISTURBING PORTENT FOR AFRICA

(By Hamilton Fish Armstrong)

CONAKRY, GUINEA.—In a world preoccupied with summit conferences, the new nation of Guinea does not loom large, but developments there are—and should be—of great interest as an example of how Communist alertness can capitalize on Western errors and inertia. For the Soviet bloc is operating in Guinea. And if things progress as Moscow hopes and intends, Guinea can become a cancer that would affect the whole of west Africa.

Almost the only certain fact about the situation in Guinea today is that its economy is coming to be dominated more and more by the Soviet Union and its satellites. The Soviets have given the Government $35 million of credits on the easiest sort of terms. Part is being used to buy Russian sugar and cement, East German flour and matches, Czechoslovak cotton materials and shoes. The stock of French goods is drying up; the showrooms for French and American cars are bare, and Russian and Czech cars are taking their place.

Formerly, Guinea's foreign trade was more than 80 percent with the West. Now the proportions have been reversed—80 percent with the Soviet bloc, 20 percent with the West.

The Russian sugar is not very sweet, the East German flour makes tough bread, but all is cheap, and any resentment at the gradual deterioration in standards will come slowly and only from people of little influence. As a whole, the country is united behind President Sékou Touré and his policy of going it alone politically, come what may economically.

For the most part the Soviet credits are being used to finance an amazing variety of projects that will build up local pride and gratitude.

The airstrip at Conakry is being lengthened to 3 kilometers to take jets; already several Soviet-built Czech planes have landed here on practice flights, and soon one will be able to fly direct from Prague, via Zurich and Rabat, to Conakry (and before long on to Accra) on a frequent schedule. Guinea and Ghana have taken the first steps toward confederation; the ability to fly between Conakry and Accra several times a week in an hour and a half (at present it is a 6-hour flight once a week) will tend to cement what has so far been a rather artificial union.

The road to the airport is to be made into a four-lane modern highway. Fifty modern Hungarian buses are in service, a great popular convenience and delight. A polytechnic institute is to be built. At present there is no daily paper in Conakry (or indeed any regular periodical except a Government mimeographed news sheet); this lack will be remedied by a new East German printing plant. A shoe factory is also to be built. And there is to be a sports arena seating 25,000. Conakry is stuffed with the Communist engineers and technicians engaged on these undertakings; and as three new hotels also are planned, the number presumably will rapidly increase.

Each of these enterprises is needed and will bring applause. Each will put the Soviet Union out of pocket. But the overall bookkeeping, Moscow figures, will show a colossal profit. Would not $35 million be a cheap price to pay for a country?

President Touré was undoubtedly sincere when he said during his trip to the United States last November that he was determined to preserve Guinea's neutrality, and he has reiterated the same determination to me here vehemently. But he does not believe in exclusive dealings and is not interested in the ideologies of those who offer to help. Where there is need—and there is need for everything—he takes what is offered if he believes it is without strings. Taken one by one, the strings may seem slender, and Mr. Touré does not stop, perhaps, to consider their cumulative strength. As he said to me more than once, "Africa is in a hurry."

As an earnest of his neutrality, the President notes that he has not interfered with Western industrial enterprises, and says he will not do so. But these assurances are contradicted by reports that the Government plans soon to nationalize everything down to, but not including, local retail trade. This would presumably include Fria, the American-dominated consortium which has been developing Guinea's great bauxite resources. Several weeks ago, only a few months before it was to start exporting alumina, Fria discharged 3,000 workers, apparently in anticipation of nationalization.

In a defiant gesture toward France, and indeed toward the Western World, President Touré announced on March 1 that Guinea had cut itself off from the French franc zone and was issuing its own currency. Its backing, so far as is known, consists only of the bananas on the trees, the bauxite in the hills and the diamonds in the ground. Some Guineans call it monnaie des singes—monkey money.

Some of the President's colleagues may have intended that their rejection of France in principle would leave less and less of neutrality in practice as the country's commercial activity was more and more concentrated in the hands of the Soviet bloc and as more and more Czech and other technicians took over advisory and supervisory positions.

But probably Mr. Touré himself did not intend this, and it is doubtful whether he and most of his ministers realize as yet just how tightly they are being caught in the spider's web. "We were here before the French; the French put us in their Empire, but could not hold us. We are ourselves again, and will remain ourselves." It is a noble attitude, but hard for an inexperienced and needy little country to maintain in a modern world.

In fairness to Touré, it should be pointed out that once Guinea had opted for complete independence in September 1958, the French course of action, and the action, or rather nonaction, of the rest of the West, made the present result unavoidable. France, in effect, picked up her toys, smashed those she couldn't carry, and went home. Guinea was denuded of everything, from the uniforms off the backs of the police to the law books in the courts.

It is questionable whether Mr. Touré foresaw this. Maybe he naively thought that President de Gaulle was offering the former French colonies a real choice between independence and continued membership in the French community. Actually, it turned out to have been a dare—"Stay with us, or else." The or else proved to be shattering.

France asked her friends not to be hasty in recognizing the new Republic of Guinea. We complied. But what about the enemies? They were more astute. Recognition came instantly from the Soviet Union and all the satellite band, and by the time France brought herself to accept the situation in January 1959 and we and the British had done so, too, protocols with the Eastern bloc had already been signed and trade was under way.

The small arms for which the new Guinea Government first turned to us to maintain order, and which we refused, were at once given by Czechoslovakia. Now police in Czech uniforms and with Skoda side arms guard the airport and the ministries.

Has the free world made no countermove to block or even hamper this piecemeal Soviet conquest? None that can be noticed. The United States sent, from its agricultural surplus stores, 3,000 tons of flour and 5,000 tons of rice. The food was sold at low prices throughout the country, was recognized as having come from America and was appreciated. Unfortunately, the first installment of our rice arrived in Conakry the same day that the full amount of a 5,000-ton gift of Communist Chinese rice was received.

The Guinea Government has made English a second compulsory language in the schools. Since it has not enough teachers for this (or for any other branch of education) it asked us for some English teachers. We have managed to supply one. She is devoted and successful, but what is one when dozens are needed?

We shall open a USIS library in Conakry as soon as the books arrive (more than a year after we recognized the new Republic). We also have offered limited technical assistance, but with strings that the Guinea Government finds unacceptable—especially since it can get any amount of Communist technical assistance for the asking and without apparent conditions.

The fact is that, although the American system of government serves us pretty well at home, it is completely helpless to deal with a whole series of situations confronting us around the world. Guinea happens to be the latest striking example.

Congress is unwilling to trust the Executive with sufficient free funds to enable it to act promptly in critical situations. It refuses to appropriate ahead so that there can be long-term planning. When Government funds are available, they are swathed in redtape, one of the purposes of which is to insure the competitive position of American private business.

But what is the competitive position of American business in a country like Guinea today? Are American private firms supposed to compete on equal terms with the Soviet Government and the satellite governments who are prepared to take any necessary loss on each individual transaction in order to gain the ultimate prize?

In the absence of private initiative, what would our Government do? It might send out a task-force to investigate the local need, and as a result might propose aid agreements in line with congressional requirements. While this was going on, the Soviet Government would have sent the goods, the construction materials and the needed technicians.

What can we do? As our Government is organized (or disorganized) today, the answer is, "Nothing." This was a surprising discovery for President Touré when he visited the United States, and it has not ceased to surprise literate Guineans since.

The fact has also been noted in the neighboring states formerly associated with Guinea in French West Africa. Since De Gaulle so severely chastised Guinea for deserting France, he has realized the necessity of finding a new road to independence for those other states with French ties. In negotiations in Paris last month, the Mali Federation (Senegal and Sudan) achieved full sovereignty while remaining within the French Community. This new relationship will be the model for the Ivory Coast, Dahomey and the other republics that formerly constituted French West Africa.

There are wise and moderate leaders in several of the new republics—Félix Houphouet-Boigny in the Ivory Coast, for example, and Léopold Senghor in the Mali Federation. But though they are vigorous and sincere they belong to a political generation which will be increasingly on the defensive in the competition for African minds against nationalist leaders who have gone whole hog for political independence. If Sékou Touré succeeds in the tremendous gamble in which (perhaps to his surprise) he finds himself engaged, his example will be contagious, even though the cost has been to become increasingly dependent on the Communist bloc.

Moreover, Moscow's psychological appeal can be supported by force. Arms sent in from the Soviet bloc can be distributed, without anyone noticing, to extremists and revolutionaries throughout the region.

The colonial procedure of the European powers was to carve out separate regions: "Divide and conquer." The Soviet technique is the opposite. It aims to get control of individual leaders and the economies of individual states and to spread out from those beginnings: "Conquer and unite." We seem helpless to devise and operate any policy to meet the threat. Sometimes it seems that Washington isn't even looking.

Mr. FULBRIGHT. Mr. President, I desire to propound a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. FULBRIGHT. Is it now in order to act on the committee amendment?

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute.

Mr. LAUSCHE and Mr. AIKEN addressed the Chair.

Mr. FULBRIGHT. Mr. President, I merely wish to make the point that the question now is on agreeing to the committee amendment in the nature of a substitute.

The PRESIDING OFFICER. The Senator is correct.

Mr. FULBRIGHT. I will yield to the Senator from Ohio, if he wishes to have me yield for a question. I am ready to yield the floor.

Mr. AIKEN. Mr. President, I should like to propound a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. AIKEN. If the committee amendment in the nature of a substitute is agreed to, will the substitute be subject to amendment?

The PRESIDING OFFICER. The amendments have to be agreed to before the committee amendment is agreed to.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. AIKEN. I do not have the floor.

The PRESIDING OFFICER. The Senator from Arkansas has the floor.

Mr. FULBRIGHT. Mr. President, I will be glad to yield for a question. I am ready to yield the floor.

I yield to the Senator from Ohio for a question, if the Senator wishes to have me do so.

Mr. LAUSCHE. First, I wish the Senator from Arkansas would yield to me for a brief statement in connection with the speech of the Senator from Arkansas.

Mr. FULBRIGHT. I yield for that purpose.

Mr. LAUSCHE. I wish to join with the Senator from Arkansas in his statement that the fulfillment by the Foreign Relations Committee members of their responsibility to the country is a most difficult one.

By that I mean that it is a simple matter to be in the Senate and to make recommendations of such a nature as to bring acclaim and approval from the recipients of gifts which the Government makes, or the construction of projects that bring economic enrichment to local communities. On the other hand, it is a most difficult task to fearlessly and courageously perform a duty that is related to the security of the country, when the general citizenry is not adequately acquainted with the significance of what is being done.

I have no question that the Senator from Arkansas would gladly recommend to the Senate that the entire program be discontinued and the $4 billion saved if that course were compatible with the security of our Nation.

Mr. FULBRIGHT. The Senator is exactly correct.

Mr. LAUSCHE. I am quite certain that every other member of the Foreign Relations Committee would gladly and proudly come before the Senate and say, "Let us abandon the program," if that were feasible and in the interest of our Nation. But we know that it cannot be done, and for that reason I commend the Senator from Arkansas for the forthrightness and directness with which he has recommended to the Senate what its course should be for the protection of our Nation.

Mr. FULBRIGHT. I thank the Senator for his commendation.

Mr. LAUSCHE. Now I should like to ask the Senator a question. Will the Senator from Arkansas repeat what the advice has been of persons in the Federal Government in high echelon offices, since the end of World War II, concerning the advisability of carrying on the program of mutual security?

Mr. FULBRIGHT. I said in my statement that every President and every Secretary of State without exception—and all members of the Joint Chiefs of Staff—have recommended this program as being vital and indispensable to the security of this country.

I know that President Eisenhower, in his public statements—and he has said the same thing with greater vehemance privately—has said that this program is absolutely indispensable to the security of the country. He has felt that he must stress this program, because other programs in the field of domestic armament—for example, the supplying of planes for our own Air Force—have an appeal to many people. But this particular program has been subject to the misunderstanding to which the Senator has referred.

This is a bipartisan program. I know of nothing about it that could be considered remotely as being partisan. Republican Presidents and Secretaries of State, as well as Democratic Presidents and Secretaries of State, uniformly, have unanimously recommended this program as being indispensable to our security.

Mr. LAUSCHE. Then it is a fact, is it not, that President Truman and Secretary of State Acheson, both Democrats; President Eisenhower and Secretary of State Dulles, now deceased, as well as Mr. Herter, all Republicans; and members of the Joint Chiefs of Staff, both Republicans and Democrats, uniformly recommend the indispensability of this program for the protection of our country.

Mr. FULBRIGHT. The Senator is exactly correct. There is no question whatever about it. I could go further and name Vice President NIXON, and every Secretary of Defense, both Democratic and Republican, since World War II. They have all recommended this program. In fact, they have even recommended more. As I have said in my statement, the Bureau of the Budget has cut departmental recommendations already, before this proposal came before us, by $750 million.

Mr. LAUSCHE. Is it also fair to state that those persons having in their possession the most secret information and the most detailed knowledge of the problems confronting our country internationally, have recommended the continuance of this program?

Mr. FULBRIGHT. The Senator is absolutely correct.

Mr. LAUSCHE. I should like to ask a further question with respect to the economic good which comes to the workers of our country and our manufacturers. Do I correctly understand the Senator from Arkansas to state that, with respect to the things which we send abroad, there are 500,000 Americans employed?

Mr. FULBRIGHT. The best estimate we have had—and we have had such estimates on more than one occasion—is to the effect that of the vast amount of materials which are sent abroad, about 80 percent are purchased in this country, generating, it is believed, about 500,000 jobs. Practically all the purchases for military assistance, for which this year $2 billion is asked, with the exception of a small amount, are made in this country. Such purchases include hardware, tanks, airplanes, missiles, guns, munitions, ships, and other military weapons. They are purchased here. The manufacture of those materials creates the jobs to which I have referred.

Mr. LAUSCHE. With respect to the development of military personnel, does this program help us in having available in friendly countries, such as Taiwan, Korea, Turkey, and other countries, trained men for service in case of an emergency?

Mr. FULBRIGHT. The Senator is exactly correct. The Senator has described the situation very well.

There are two main categories. Not only is the program indispensable for the maintenance of our own troops in several of the countries the Senator has mentioned, together with some additional ones, but also it is even more important and more essential to the maintenance of the armies of our allies.

For example, the quite large Turkish Army could not possibly be supported by the economy of Turkey. For this program both military assistance and defense support are absolutely necessary if we are to have a Turkish Army in being, poised and ready to repel an invasion.

The truth of the matter is that during the period since the so-called cold war began, this has been our first line of defense, the main deterrent to any incursion by the Soviet bloc.

Mr. LAUSCHE. Will the Senator from Arkansas express his opinion as to what the comparative strength would be, reflected by the number of troops available among our allies, and those available in the Communist bloc, if the military personnel of Taiwan, Korea, Turkey, and other countries were eliminated, and the comparison were made merely on the basis of the troops which we have in the United States and those which the Communist bloc has?

Mr. FULBRIGHT. Unfortunately, I have not calculated that comparison. The figures are available. I do not have them at my fingertips at the moment. I know that in certain cases we have estimated the number of military personnel available. In Taiwan the number is about 600,000. Some 20 divisions are in Korea and another 20 in Turkey. Those are very substantial forces. They would not be in being at all without this program, and our forces would be so small as to be utterly useless.

Mr. LAUSCHE. Is it not a fact that even with the availability of those troops among our friendly allies, the aggregate number of military men among our allies is less than the number in the Communist bloc, and if we were to eliminate the nations which I have mentioned, the comparison would be frightening?

Mr. FULBRIGHT. Oh, yes, indeed; that point is absolutely clear. It would be completely overwhelming from the standpoint of personnel advantage of the Communist bloc if we did not have the personnel of our allies. There is no doubt about it at all.

Mr. LAUSCHE. Mr. President, will the Senator from Arkansas state what the Soviet has been doing in instances where it feels that conditions are right and that there is an opportunity for it to establish itself, as it did in Guinea? What has been its general policy around the world?

Mr. FULBRIGHT. In the last 2 or 3 years, there has been a clear, new trend developing of the Soviets moving into this field. One of their large programs has been in India, where they have built a million-ton steel mill, which has just been completed at a cost of $200 million.

Most of their assistance consists of loans on favorable terms. The terms are much lower in interest than we are providing, although they are short-term loans. Many of them run for 10 or 12 years. In India there is a very large program.

In Egypt, Aswan Dam, as you know, was turned down by us. The Russians have undertaken the first stage. Only a month or so ago they pledged themselves to the second stage. That is estimated to involve over $200 million.

Only recently, as we all know, Cuba has come into the picture. Perhaps that is the most recent example. The Russians have offered to the Cubans $100 million in credit and to purchase, over 5 years, I believe, a million tons of sugar every year.

They have gone into Indonesia recently. One story stated that the Russians offered a credit of $500 million. Finally it was agreed to offer $200 million in credit.

They offered a very large credit to Yugoslavia. However, they fell out about it, and that offer was withdrawn. That indicates clearly the political motives of these loans. Afghanistan has been mentioned. At one time the Russians gave Afghanistan a $100 million credit. I have already mentioned Guinea.

Mr. LAUSCHE. How about Ethiopia?

Mr. FULBRIGHT. The Russians are now in process of extending credit in Ethiopia. We have had testimony only recently of their moving in there. An Associated Press story answers the Senator's question much better, and for the RECORD, I should like to read it at this point. It reads:

SOVIET EXPORT TO RED CHINA TALLIED BY U.N.

UNITED NATIONS, N.Y.—A United Nations report has shown that in 4 years the Soviet Union shipped Communist China equipment for complete industrial plants valued officially at almost $750 million.

The U.N.'s "Yearbook of International Trade Statistics—1958" listed such shipments for 1955 through 1958 at 2,933 million rubles, or $733,375,000 at the official exchange rate of 4 rubles to the dollar.

That was well over half of Soviet exports of equipment for complete industrial plants to all countries for that 4-year period. The grand total was 4,952,600,000 rubles, or $1,238,150,000.

The Soviets exported such equipment valued at $175,125,000 to Poland, $51,825,000 to Bulgaria, $38,625,000 to Rumania, $11,775,000 to Czechoslovakia, $9,175,000 to Hungary, and $1,725,000 to the Egyptian region of the United Arab Republic.

The exports to Egypt rose steeply from negligible in 1955 to $25,000 in 1956, $475,000 in 1957, and $1,225,000 in 1958. To East Germany, they were $1,150,000 in 1956, $1,250,000 in 1957, and negligible the other 2 years.

The yearbook is rare among U.N. statistical publications in that it gives a picture of trade relations within the Communist world.

Within the sphere, it showed Communist China to be the Soviet Union's leading customer for petroleum products and the Soviet Union's chief supplier of minerals, wool, meat, vegetable oils, raw tobacco, and clothing.

It brought out that in 1958, the latest year covered, the Soviet Union had an unfavorable balance of trade with Communist China—that is, it did not sell China enough to pay for what it bought from China. The Soviet Union also had unfavorable balances with Bulgaria, Czechoslovakia, and East Germany—but favorable balances with Hungary, North Korea, Outer Mongolia, Poland, and Rumania.

In 1957, the Soviet Union's trade balance with the whole world was favorable. But in 1958, it turned unfavorable, partly because of bigger imports of such consumer goods as food and clothing.

Mr. LAUSCHE. Mr. President, is it not a fact that the Soviet has been picking its spots, and wherever it finds a break between the United States and other nations, and it believes the field is fertile, it steps in?

Mr. FULBRIGHT. Yes.

Mr. LAUSCHE. I am now speaking of Cuba and Guinea and Egypt and Ethiopia, and I believe there is one other nation.

Mr. FULBRIGHT. India.

Mr. LAUSCHE. Afghanistan has had much aid, too. There is also Red China, which has had much aid.

Mr. FULBRIGHT. That is correct.

Mr. LAUSCHE. It is on that basis that the Committee on Foreign Relations takes the identical position that all of the leading officials in both the Republican and Democratic Parties have taken in the last 15 years about what we need to do to secure our country.

Mr. FULBRIGHT. The Senator is absolutely correct. I appreciate very much his contribution.

Mr. GORE. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. GORE. I congratulate the Senator upon a very fine address and upon an even finer discharge of his responsibility in the highly important position which he occupies as chairman of the Foreign Relations Committee.

I have said on a number of occasions, and I wish to say again on the floor of the Senate, that the United States and the free world are very fortunate indeed that in this crucial time the able, courageous, brilliant, practical junior Senator from Arkansas occupies this position. I am particularly pleased and honored to serve on the committee of which he is chairman. I find his performance as chairman superb.

Mr. FULBRIGHT. Mr. President, I thank the Senator from Tennessee very much indeed for his gracious remarks.

The Senator from Tennessee has been very attentive on the committee. This is a very difficult time. Many of our members are candidates, and they are not always present. I appreciate very much indeed the assistance the Senator from Tennessee has given to the committee. He has made a fine contribution in many instances in the consideration of this very difficult subject. I certainly appreciate his assistance and his kind words.

I yield the floor.

The PRESIDING OFFICER (Mr. McGEE in the chair). The question is on agreeing to the committee amendment.

Mr. WILLIAMS of Delaware. Mr. President, I call up my amendment which is identified as "4-25-60-A." I offer it on behalf of myself and the Senator from Wisconsin [Mr. PROXMIRE].

The PRESIDING OFFICER. The clerk will state the amendment.

The Chief Clerk proceeded to state the amendment.

Mr. WILLIAMS of Delaware. Mr. President, the amendment has been printed and is already on the desk of each Senator; therefore, I ask that the amendment may be printed in the RECORD at this point and that its reading may be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment, ordered to be printed in the RECORD, is as follows:

On page 19, between lines 20 and 21, insert the following:

"(a) Section 502, which relates to use of foreign currency, is amended as follows:

"(1) Subsection (b) is amended as follows:

"'(i) Insert after the word "expended" in the proviso the words "and the amounts of dollar expenditures made from appropriated funds in connection with travel outside the United States".

"'(ii) Amend the second sentence to read as follows: "Within the first sixty days that Congress is in session in each calendar year, the chairman of each such committee shall prepare a consolidated report showing the total itemized expenditures during the preceding calendar year of the committee and each subcommittee thereof, and of each member and employee of such committee or subcommittee, and shall forward such consolidated report to the Committee on House Administration of the House of Representatives (if the committee be a committee of the House of Representatives or a joint committee whose funds are disbursed by the Clerk of the House) or to the Committee on Appropriations of the Senate (if the committee be a Senate committee or a joint committee whose funds are disbursed by the Secretary of the Senate).'"

On page 19, in lieu of lines 21 and 22, insert the following:

"(2) At the end of the section, add the following new subsection:".

Mr. WILLIAMS of Delaware. Mr. President, the amendment would change existing law to this extent: it would revise section 502(b) of the Mutual Security Act by inserting after the word "expended" in the proviso the words "and the amounts of dollar expenditures made from appropriated funds in connection with travel outside the United States."

In the second sentence it would strike out this language: "shall consolidate the reports of each member and employee of the committee and forward said consolidated report, showing the total itemized expenditures of the committee and each subcommittee thereof during the preceding calendar year."

In place of that language it would insert the following language: "shall prepare a consolidated report showing the total itemized expenditures during the preceding calendar year of the committee and each subcommittee thereof, and of each member and employee of such committee or subcommittee, and shall forward such consolidated report."

The remainder of that paragraph would remain as presently written. It is as follows: "to the Committee on House Administration of the House of Representatives (if the committee be a committee of the House of Representatives or a joint committee whose funds are disbursed by the Clerk of the House) or to the Committee on Appropriations of the Senate (if the committee be a Senate committee or a joint committee whose funds are disbursed by the Secretary of the Senate). Each such report submitted by each committee shall be published in the CONGRESSIONAL RECORD within 10 legislative days after receipt by the Committee on House Administration of the House or the Committee on Appropriations of the Senate."

My amendment would merely require the submission to Congress of the amount of the expenditures for publication in the CONGRESSIONAL RECORD as is presently done in the consolidated report, except that it would show an itemized breakdown of expenditures of each Member.

I have said many times that travel abroad by a congressional committee, or by individual Members of Congress, or by representatives of the executive branch can and does serve a very constructive purpose.

With our Government spending billions of dollars in foreign currencies under the various foreign assistance programs, it is important that Congress have a firsthand knowledge of how these programs are being administered, and it is only proper that those trips which are made on official business be paid for by the U.S. Government.

However, just as in the case of the expenditures of funds for any other purpose, the taxpayers, who pay these costs, are entitled to an accounting. Under the present law, this accounting is done by the chairman of the committee reporting in a lump sum the expenditures of the various subcommittees with no breakdown as to the expenditures by the individual Members nor any breakdown as to what the expenditures represent.

In the foreign travel, very often the expenses of the trip are financed partly by direct dollar expenditures and partly by counterpart funds. The counterpart funds represent foreign currencies held by the U.S. Government. In all cases, however, whether the expenditures be in the form of directly appropriated dollars or counterpart funds, they represent money belonging to the American taxpayers, and the expenditures thereof should be accurately accounted for.

I am confident that the vast majority of congressional travel has been conducted as efficiently as possible, and I again emphasize that I believe that much good has come from many of these trips.

We would, however, be unrealistic if we did not recognize that there have also been cases of abuse, and it is these cases, regardless of how isolated they may be, which give all official travel a "black eye."

Therefore, to eliminate this unjust criticism and to place greater emphasis on the responsibility to render an accounting for these expenditures, as well as to give the taxpayers their deserved protection, I am offering this amendment to S. 3058, the mutual security bill, wherein it would be provided that all expenditures by the individual members of the respective committees or staffs must be fully itemized and automatically published in the CONGRESSIONAL RECORD.

This is similar to the amendment which I cosponsored a couple of years ago with the distinguished junior Senator from Kentucky [Mr. MORTON], and which was approved at that time by the Senate but was later rejected in conference.

Congress very properly demands that the executive branch shall render an accurate public accounting of their appropriated funds, and when such accounting has not been readily available the Department at fault has been very severely criticized.

There has been incorporated in the comparable bill approved by the House of Representatives—that is, the mutual security bill passed last week by the House—a special provision requiring that the executive branch make available to the Comptroller General's auditors all records relating to the operations or expenditures under the Mutual Security Act.

Mr. FULBRIGHT. Mr. President, will the Senator yield for a question?

Mr. WILLIAMS of Delaware. I yield.

Mr. FULBRIGHT. Did the Senator say just now that Congress requires the executive branch to render a similar accounting of its travel expenses?

Mr. WILLIAMS of Delaware. In the bill passed by the House and which will be in conference, it requires the executive branch to make available its records for auditing by the Comptroller General.

Mr. FULBRIGHT. Is that accounting already required by law?

Mr. WILLIAMS of Delaware. That the executive branch render an accounting? Yes, but there has been some dispute between the General Accounting Office and the executive branch.

Mr. FULBRIGHT. Does the President render an itemized accounting? Has any mention been made of the cost of his recent trip to South America?

Mr. WILLIAMS of Delaware. The cost of the President's trips is not published, as the Senator knows, but I am sure the records are available if you request them.

Mr. FULBRIGHT. I understood the Senator from Delaware to say that it is.

Mr. WILLIAMS of Delaware. I said that the bill passed by the House contains an item which provides that the expenditures made by the executive branch under this program shall be subject to audit by the Comptroller General. That provision is in the bill passed by the House.

As I understand it, it is the law now that the expenses of the President are subject to audit by the Comptroller General. The expenditures of Members of Congress for foreign travel, however, are not subject to audit by the Comptroller General nor are they published. That is what I am trying to correct.

Mr. FULBRIGHT. They are not published?

Mr. WILLIAMS of Delaware. Expenditures of the executive branch are available if the Senator wants to get them and make them public.

Mr. FULBRIGHT. Is the Senator certain about that?

Mr. WILLIAMS of Delaware. I have never heard of anyone who wished to get them being turned down.

Mr. FULBRIGHT. Has the Senator ever requested them?

Mr. WILLIAMS of Delaware. No. Has the Senator from Arkansas?

Mr. FULBRIGHT. Has the Senator ever heard of anybody who requested them?

Mr. WILLIAMS of Delaware. The fact that no one has requested them does not mean that they would be denied to anyone who might wish to examine the reports or make them public. If the Senator from Arkansas desires to ascertain what the costs on any particular occasion are he should properly direct his request to the executive branch.

Mr. FULBRIGHT. The Senator said, I believe, that the members of the executive branch do just what he seeks to do by his amendment. I do not believe that is quite true.

Mr. WILLIAMS of Delaware. I said that members of the executive branch should be held accountable for all their expenditures. It is quite possible that at a later date I shall be discussing expenditures which have been made in the executive branch and which, in my opinion, have not been properly accounted for. That, however, has nothing to do with this proposal.

There already is a law which provides that the expenditures of the executive branch shall be accounted for and that the Comptroller General shall have the right to audit the accounts. It is true, there has been some dispute between the executive branch and the Comptroller General concerning this authority, but that dispute even is settled by language included in the bill passed by the House last week.

There is incorporated in the House bill a provision that the Comptroller General shall always have the right to audit these expenditures. I think that should be done. Those funds are public funds. Why should they not be audited? By the same token why should we not render an accounting of our expenditures for foreign travel?

Mr. FULBRIGHT. I am not saying they should not be. I simply want to get the record straight. Are the travel accounts of the Vice President published in the same way in which the Senator is asking that travel accounts of Senators be published?

Mr. WILLIAMS of Delaware. They are not as far as this section applies.

Mr. FULBRIGHT. Why not?

Mr. WILLIAMS of Delaware. Because section 502(b)——

Mr. FULBRIGHT. The Senator has said that the executive branch is subject to the same regulation as the legislative branch.

Mr. WILLIAMS of Delaware. If the record of expenditures of any trip is desired, it is my understanding that it can be obtained. As the Senator has admitted there is no one who has asked for that information and has been refused.

Section 502 of the Mutual Security Act specifically provides that expenditures of counterpart funds by Members of Congress need not be publicly accounted for, nor are they audited by the Comptroller General. This is the only instance I know of in which public funds can be spent by either Congress or the executive branch in which such a cloak of secrecy exists. I am trying to remove that cloak of secrecy.

If the Senator from Arkansas wants to amend another law correcting any other similar abuse that he might know of I shall support him.

Mr. FULBRIGHT. It is true that under existing law the information must be published in the CONGRESSIONAL RECORD. The only difference is that each individual amount is not published, just as the amounts spent by the President and the Vice President are not published. I think the Senator from Delaware, to be consistent, ought to require them to publish the individual accounts. The Senator is a great exponent of this principle. I would not undertake to rewrite his amendment. I am only raising the question of its consideration.

Mr. WILLIAMS of Delaware. Section 502(b) in no way refers to the executive branch.

Mr. FULBRIGHT. It does not refer to dollar expenditures, either.

Mr. WILLIAMS of Delaware. No, but my amendment does.

Mr. FULBRIGHT. This question should be raised, in my opinion, in connection with the legislative appropriation bill or some other bill. I have no objection to the principle of the amendment. I am personally willing to abide by it. I do not believe this bill is the proper vehicle to use for such an amendment. That is what I told the Senator in committee. The Mutual Security Act is not a proper instrument to reform practices of Senate committees. Why does he not put his amendment on an appropriation bill?

Mr. WILLIAMS of Delaware. The bill deals with section 502, and this is the most appropriate place.

Mr. FULBRIGHT. It goes beyond section 502.

Mr. WILLIAMS of Delaware. The amendment could not be offered to an appropriation bill, as the Senator from Arkansas well knows.

Mr. FULBRIGHT. Why not?

Mr. WILLIAMS of Delaware. Because it is legislation and would be subject to a point of order.

Mr. FULBRIGHT. Has there ever been an appropriation bill to come before the Senate which was not full of legislation?

Mr. WILLIAMS of Delaware. It takes a two-thirds vote to suspend the rules in order to get adopted on an appropriation bill an amendment containing legislation.

This procedure requires only a majority vote. I am offering the amendment where I believe I shall have the easiest opportunity to have it adopted.

In my opinion the very least we in Congress can do is to demonstrate to the executive branch by adopting the amendment, that we are willing to live by our own code. We are demanding—and as one Member of Congress, I shall continue to demand—that the executive branch make an accounting of that which they have spent. At a latter date, I shall discuss some of those expenditures.

This amendment, however, deals with the expenditure of money by Members of Congress. Let us settle that question first. As far as I know this is the only instance in which Congress has said money can be spent but no public accounting will be made. I think it is time we remove the cloak of secrecy from such expenditures.

The American taxpayers are entitled to an accounting of any spending of public funds. We must not overlook the fact that these foreign currencies, owned by our Government, really belong to the American taxpayers.

Once again I emphasize that in my opinion much good has come from some of the congressional travel abroad and that for these official trips the Government should pay the legitimate expenses of the traveling Members of Congress. The adoption of this amendment would merely require a public accounting of our official expenditures when we travel abroad.

The argument has been made that to keep a record of their expenditures would entail too much work for Members of Congress.

Existing law requires that the average taxpayer itemize on his tax return all expenses for which he claims tax deductions as business expenses. The same requirement applies to corporations. If it is not too burdensome for the taxpayers to keep records, it should not be too much trouble for Members of Congress. The very least the Members of Congress can do when they spend money which belongs to the taxpayers is to make a similar accounting.

Mr. President, I shall request a yea-and-nay vote on the question of agreeing to this amendment, but I do not believe that the number of Senators present at this time is sufficient to make possible the entering of an order for the yeas and nays. Therefore, I will be requesting a quorum call.

Mr. FULBRIGHT. Mr. President, will the Senator from Delaware yield?

The PRESIDING OFFICER (Mr. MCGEE in the chair). Does the Senator from Delaware yield to the Senator from Arkansas?

Mr. WILLIAMS of Delaware. I yield.

Mr. FULBRIGHT. I think the RECORD should be kept straight; so in that connection I ask unanimous consent to have section 502 of the existing Mutual Security Act printed at this point in the RECORD.

There being no objection, the section was ordered to be printed in the RECORD, as follows:

SEC. 502. USE OF FOREIGN CURRENCY.—(a) Notwithstanding section 1415 of the Supplemental Appropriation Act, 1953, or any other provision of law, proceeds of sales made under section 550 of the Mutual Security Act of 1951, as amended, shall remain available and shall be used for any purposes of this Act, giving particular regard to the following purposes—

(1) for providing military assistance to nations or mutual defense organizations eligible to receive assistance under this Act;

(2) for purchase of goods or services in friendly nations;

(3) for loans, under applicable provisions of this Act, to increase production of goods or services, including strategic materials, needed in any nation with which an agreement was negotiated, or in other friendly nations, with the authority to use currencies received in repayment for the purposes stated in this section or for deposit to the general account of the Treasury of the United States;

(4) for developing new markets on a mutually beneficial basis;

(5) for grants-in-aid to increase production for domestic needs in friendly countries; and

(6) for purchasing materials for United States stockpiles.

(b) Notwithstanding section 1415 of the Supplemental Appropriation Act, 1953, or any other provision of law, local currencies owned by the United States shall be made available to appropriate committees of the Congress engaged in carrying out their duties under section 136 of the Legislative Reorganization Act of 1946, as amended, and to the Joint Committee on Atomic Energy and the Joint Economic Committee and the Select Committees on Small Business of the Senate and House of Representatives for their local currency expenses: *Provided*, That each member or employee of any such committee shall make, to the chairman of such committee in accordance with regulations prescribed by such committee, an itemized report showing the amounts and dollar equivalent values of each such foreign currency expended, together with the purposes of the expenditure, including lodging, meals, transportation, and other purposes. Within the first sixty days that Congress is in session in each calendar year, the chairman of each such committee shall consolidate the reports of each member and employee of the committee and forward said consolidated report showing the total itemized expenditures of the committee and each subcommittee thereof during the preceding calendar year, to the Committee on House Administration of the House of Representatives (if the committee be a committee of the House of Representatives or a joint committee whose funds are disbursed by the Clerk of the House) or to the Committee on Appropriations of the Senate (if the committee be a Senate committee or a joint committee whose funds are disbursed by the Secretary of the Senate). Each such report submitted by each committee shall be published in the Congressional Record within ten legislative days after receipt by the Committee on House Administration of the House or the Committee on Appropriations of the Senate.

(c) Notwithstanding section 1415 of the Supplemental Appropriation Act, 1953, or any other provision of law, if the President finds that participation by the United States in an internationally financed program to preserve the great cultural monuments of the Upper Nile would promote the foreign policy of the United States he may, subject to the approval of the Congress, use or enter into agreements with friendly nations or organizations of nations to use, for this purpose, foreign currencies owned by the United States which have been generated under this Act or under the Agricultural Trade Development and Assistance Act of 1954, as amended, in the countries in which the program is to be carried out, but the value of foreign currencies so used shall not exceed an amount equal to 33⅓ per centum of the total cost of such program.

Mr. FULBRIGHT. Mr. President, I wish to make clear that the remarks of the Senator from Delaware may, erroneously, be interpreted by some as dealing with a matter of great secrecy. However, section 502 was included in the law last year, on the recommendation of the committee; and it requires that an itemized accounting be made of the total expenditures for all purposes.

I now read from subsection (b) of section 502:

Within the first sixty days that Congress is in session in each calendar year, the chair-

man of each such committee shall consolidate the reports of each member and employee of the committee and forward said consolidated report, showing the total itemized expenditures of the committee and each subcommittee thereof during the preceding calendar year, to the Committee on House Administration of the House of Representatives (if the committee be a committee of the House of Representatives or a joint committee whose funds are disbursed by the Clerk of the House) or to the Committee on Appropriations of the Senate (if the committee be a Senate committee or a joint committee whose funds are disbursed by the Secretary of the Senate).

That part of the law requires such reporting, and there is that reporting.

The remarks of the Senator from Delaware would seem to imply that some different procedure is followed in this case. But, as I have already pointed out, the procedure here is no different from the procedure followed by the executive branch. The President does not publish such information. He merely reports it to the Comptroller General. Similarly, we report the information to the committee.

Furthermore, many of the members of my committee who have made foreign trips have voluntarily published, in their reports to the Senate, an itemized account of their expenditures.

The Senator from Delaware has referred to expenditures by businessmen and to the income tax returns of businessmen. In their income-tax returns, they itemize those expenditures—just as Senators itemize these expenditures in their reports to the committee. But income tax returns are not published. So I think it unfair to suggest that there is any great amount of secrecy in this connection. The Senator from Delaware knows that the income-tax returns of businessmen are not published. The Finance Committee may examine the returns, under certain circumstances; but they are not made public.

All these accounts are furnished to the chairman of the committee, and are consolidated; and the totals are published in the RECORD. I do not see anything wrong with the existing practice. No one is trying to fool anyone.

Similarly, when the Vice President makes a trip abroad, he is not required to publish an itemized account of his expenditures. He reports them, just as we do.

I have no objection to the amendment, except that it should not be applied so narrowly. If such an amendment is to be adopted, it should apply all the way across the board, and should also apply to the President and to the Vice President.

Mr. WILLIAMS of Delaware. The only difference from existing law is that the itemized list furnished by the individual Members will, in turn, be submitted to the Congress rather than consolidated in one, overall return. That is the difference.

Mr. FULBRIGHT. That is correct.

Mr. WILLIAMS of Delaware. I have not said that the income tax returns of businessmen are published. I said the American businessmen have to keep and file the same records that this amendment would require of Members of Congress when they are spending public money. If this record keeping is not too burdensome for the taxpayers it will not hurt us.

Mr. FULBRIGHT. But all income tax returns are kept secret, in that they are not published. Is that not true?

Mr. WILLIAMS of Delaware. Yes; but the Government can examine the returns and can find fault with them if it wishes to do so.

On the other hand, when Members of Congress make foreign trips and, in that connection, spend money which belongs to the American taxpayers, why should such expenditures be kept under a cloak of secrecy? Why should we not render a public accounting?

Mr. FULBRIGHT. Then why does not the Senator from Delaware provide in the amendment that all income tax returns be published?

Mr. WILLIAMS of Delaware. Let us not be ridiculous, Mr. President. If the Senator from Arkansas is opposed to the amendment let him vote against it. He knows that this amendment does not even mention tax returns.

Mr. FULBRIGHT. But I think the Senator from Delaware is leaving an implication that is not warranted by the existing facts; and I believe the RECORD should be accurate and clear.

Mr. WILLIAMS of Delaware. So far as I know, no other branch of the Government is treated in the way that the Members of Congress voted to treat themselves when by means of a provision which was included in a former Mutual Security Act, it was provided that we could spend these foreign currencies and not have to render any public accounting.

Mr. FULBRIGHT. But in my opinion that is not so; I think that is an incorrect interpretation of what the law now provides.

Mr. WILLIAMS of Delaware. If the Senator from Arkansas believes that the law now provides for full disclosure, why should the Senator object to the adoption of this amendment?

Mr. FULBRIGHT. I am not objecting to it; I merely say there should be complete disclosure all across the board, if that is to be the procedure called for by the amendment.

Mr. BUTLER. Mr. President, will the Senator from Delaware yield to me?

Mr. WILLIAMS of Delaware. I yield.

Mr. BUTLER. Is there any different treatment if a congressional committee makes a foreign trip and, in that connection, uses funds which it obtains from the chairman of the committee? In the other case, the committee uses counterpart funds.

Mr. WILLIAMS of Delaware. Under this amendment there is no difference in the expenditures of dollars or foreign currencies.

Mr. BUTLER. Is there any difference now?

Mr. FULBRIGHT. No.

Mr. BUTLER. Then why does not every Member of Congress submit a statement of his dollar expenditures the minute he returns to the United States? But we have never done that.

Mr. WILLIAMS of Delaware. Several Members have submitted itemized reports to the Congress. This amendment will require them all to do so.

Mr. BUTLER. But does any rule require that that be done?

Mr. WILLIAMS of Delaware. No. Not under present law.

Mr. BUTLER. In other words, if a Member of Congress spends American dollars in paying his expenses on such a trip, when he returns to this country he informs his committee chairman of what he has spent; and the committee chairman sends that itemized account to the General Accounting Office, and it is there a public record. The same is true if counterpart funds are used. So I do not see the difference.

If there is to be a requirement that an itemized statement of the expenditures be made public, by stating it on the floor of the Senate, why not make a similar requirement in the case of American dollars that are spent by Senators in paying the expenditures required in connection with such trips?

Mr. WILLIAMS of Delaware. Under existing law both are treated alike, and the same is true under this amendment. Neither are made public under existing law.

Mr. BUTLER. But no one has ever said there was any secrecy in connection with the dollar expenditures made by a Senator who took such a trip. However, there seems to be a suggestion of some sort of mystery about the use of counterpart funds for such purposes.

I agree with the Senator from Arkansas; I think the public are entitled to have this information. But when a Senator, upon his return, submits a detailed account to the committee chairman, and when that account is available to every member of the committee, I think that constitutes sufficient accounting.

Mr. FULBRIGHT. That is in accordance with existing law.

Mr. WILLIAMS of Delaware. Existing law requires that that information be available to the committee chairman and presumably, to the other members of the committee, but to no one else. But existing law does not require that an audit of those expenditures be made by the Comptroller General. Nor are they available for public examination.

This amendment would require the publishing of these records. In other words it would require an accounting.

Even in an instance where the State Department might see a glaring abuse in the spending of these funds by a Member of Congress or a staff member it could not question it.

Mr. PROXMIRE. Mr. President, will the Senator from Delaware yield to me?

Mr. WILLIAMS of Delaware. I yield.

Mr. PROXMIRE. I wish to commend the Senator from Delaware for submitting the amendment. I believe it is an excellent one. Certainly it is time for the American people to have these facts.

Under the circumstances, I think the Members of Congress perhaps should be encouraged to travel abroad even more. But, at the same time, the American people have a perfect right to know where their tax funds are going.

I think the Senator from Delaware is performing a very valuable service by offering the amendment.

Mr. WILLIAMS of Delaware. I thank the Senator from Wisconsin.

Mr. LAUSCHE. Mr. President, will the Senator from Delaware yield to me?

Mr. WILLIAMS of Delaware. I yield.

Mr. LAUSCHE. I wish to associate myself with the amendment of the Senator from Delaware. I assume that the expenditures for the trips which have been made have been justified. If they have been justified, there should be no question about a willingness to submit open reports for examination by the public.

I find a difference between asking private enterprise, through its directors and officials, to submit reports—theirs is not public business—and asking a Senator or Representative who goes abroad as the agent of the American people to submit a report. The people are his principal, and the principal is entitled to have an accounting from his agent. It is, in effect, a position of trust, and that position requires an open disclosure of what expenditures have been made and how they have been justified while the agent is acting in behalf of his principal.

I think that we shall be serving ourselves and the people of the United States in letting them know that Senators have no qualms or fears about disclosing fully, in open daylight, what their activities have been and what their expenditures were when they made trips to foreign countries.

Mr. WILLIAMS of Delaware. I agree with the Senator from Ohio, and I thank him for his contribution. I point out again that four or five members of the Foreign Relations Committee, and perhaps other Members of the Senate whose activities have escaped my attention, have made an accounting similar to that which is proposed. All the comment I have seen in the press editorially was complimentary with respect to those trips and the accounting.

I think much good has been rendered by many of these trips. I support them. I think official trips should be financed by the U.S. Government.

As the Senator from Ohio has pointed out, when those trips are on official business the people are willing to pay for them, but they are entitled to an accounting. That is all we are asking in this amendment. This is public money we are spending. We are in an unjustifiable position when we criticize the executive branch of the Government for imposing a cloak of secrecy on their expenditures when we impose one on ourselves.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. WILEY. I am trying to ascertain if we can arrive at some kind of agreement. A few moments ago the Senator was about to suggest the absence of a quorum. I do not know whether we shall be able to secure a quorum.

The minority leader, the Senator from Illinois [Mr. DIRKSEN], has just come into the Chamber. I asked him to come. I wondered if we could go over until tomorrow morning at 12, with the understanding that at a certain hour the Senate would vote on the amendment. I wonder if such an arrangement is agreeable.

Mr. FULBRIGHT. Mr. President, if the Senator will yield, it is agreeable to me, if the Senator wants to make such a unanimous-consent request.

Mr. WILLIAMS of Delaware. Whether we vote tonight or go over until tomorrow does not make any difference to me.

Mr. FULBRIGHT. I cannot speak for the majority leader, but I do not suppose he has any objection.

Mr. DIRKSEN. Mr. President, I should like to direct attention to the fact that, among other things, we have a joint meeting scheduled for tomorrow. I made a suggestion that the Senate meet at 11 o'clock tomorrow morning, so action on the bill could be completed early in the day. If the Senator will bear with me for a moment, I think it is only appropriate to acquaint the majority leader with the situation.

Mr. WILLIAMS of Delaware. Perhaps we could get enough Senators in the Chamber to have the yeas and nays ordered.

Mr. President, if it is satisfactory, in order to avoid suggesting the absence of a quorum, I ask unanimous consent that the yeas and nays be ordered on this amendment.

Mr. WILEY. My only thought was whether a quorum could be obtained. The suggestion of the absence of a quorum would result in pulling Senators from here and yonder.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Delaware?

Mr. FULBRIGHT. Mr. President, is the request that the yeas and nays be considered as having been ordered?

Mr. WILLIAMS of Delaware. Yes.

The PRESIDING OFFICER. Is there objection to the request? The Chair hears none, and it is so ordered.

The yeas and nays were ordered.

Mr. WILLIAMS of Delaware. Mr. President, I will leave it to the leadership whether we should have a vote tonight or carry it over until tomorrow.

Mr. FULBRIGHT. Mr. President, if the Senator will yield to me for a moment, while he is inquiring, I wish to make clear my position. I think the existing law, insofar as the responsibilities of the Foreign Relations Committee are concerned, deals with foreign currencies. The Senator is quite correct; I have no objection to the Senator's effort to make this information public. I certainly have no personal interest in it, because I do not particularly like to travel. This provision may give me an excuse not to travel any further, because I prefer to stay at home.

The Senator is injecting the requirement in regard to dollars. This proposal does go beyond the present specifics that relate to the Foreign Relations Committee. It involves the Appropriations Committees and all the other committees which traditionally have used dollars. I do not object to the reports being made public. I only object to the Senator from Delaware using the instance he referred to as an example of itemized reporting, because it is not an appropriate example, since the reports are not published.

My only comment with regard to the President and Vice President is that those reports are not published, and the Senator is not proposing that they be published. I do not object to the President's spending what is necessary on these trips. It is perfectly proper. But I can see how it might not be very good public relations to have this information published, because, in the eyes of farmers and other persons who are having a hard time making a living, to read that $5 or $10 million were spent on a trip to South America might not be appreciated by them.

The discussions that were had did not primarily relate to the requirement of reporting. There is a requirement of reporting in the present law. If it is desired to provide that the Comptroller General be included in the examination, I am sure there is no objection. The real objection is the fact that persons who do not understand the requirements of going to a foreign country, and requiring the Committee on Foreign Relations to examine into and investigate foreign operations, especially in the military field, would never comprehend the need for it if that information were published on an individual basis.

Whether the amendment is adopted or not does not make any difference to me. I am perfectly willing to vote for the proposal but I was not willing to accept it in the committee because I thought it was the responsibility of the whole Senate to consider it, and the Members of this body ought to know what they were doing. This proposal will require that the itemized individual expenditures of every Member be published in the RECORD. I think this information will be used adversely in many instances, when individual Members should not be prejudiced in that way, because most of the trips are taken at the request of the Senate or interparliamentary groups or other authorities which are perfectly legitimate.

The press is likely to refer to any trip as a junket. They refer to every trip, no matter what the necessities are, as a junket, and that is the background against which this kind of publication will be announced.

Nevertheless, I am willing to vote for the amendment. I shall vote for it.

Mr. WILLIAMS of Delaware. Mr. President, I am not suggesting this amendment with the thought of holding any Member of Congress up to ridicule. I have said before, and I repeat, that I think it will serve a constructive purpose. I know of no better way to emphasize that the Senator from Arkansas is unduly alarmed than by pointing out that five, and perhaps six, members of the Foreign Relations Committee have already done what this amendment proposes be done by every Member of the Congress; namely, publish their expenditures of public funds; and not one of them has been criticized in the press so far as I have seen.

On the contrary, I have seen many comments in the press complimenting these Members of the Senate. I do not think the press is going to blow up out of proportion the fact that some Senator has taken an official trip where the trip is paid for by the Government and a proper accounting rendered. On the other hand, if in the accounting something turns up which cannot be justified to the taxpayers we may be criticized, and perhaps—only perhaps—there are some expenditures which deserve criticism.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Delaware. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD. I announce that the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ], the Senator from Colorado [Mr. CARROLL], the Senator from Delaware [Mr. FREAR], the Senator from Rhode Island [Mr. GREEN], the Senator from Alaska [Mr. GRUENING], the Senator from Arizona [Mr. HAYDEN], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Hawaii [Mr. LONG], the Senator from Louisiana [Mr. LONG], the Senator from Arkansas [Mr. MCCLELLAN], the Senator from Utah [Mr. MOSS], the Senator from Montana [Mr. MURRAY], the Senator from Georgia [Mr. RUSSELL], the Senator from Texas [Mr. YARBOROUGH], and the Senator from West Virginia [Mr. BYRD] are absent on official business.

I also announce that the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Oregon [Mr. MORSE], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

I further announce that, if present and voting, the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ], the Senator from West Virginia [Mr. BYRD], the Senator from Colorado [Mr. CARROLL], the Senator from Delaware [Mr. FREAR], the Senator from Rhode Island [Mr. GREEN], the Senator from Alaska [Mr. GRUENING], the Senator from Arizona [Mr. HAYDEN], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Hawaii [Mr. LONG], the Senator from Louisiana [Mr. LONG], the Senator from Arkansas [Mr. MCCLELLAN], the Senator from Oregon [Mr. MORSE], the Senator from Utah [Mr. MOSS], the Senator from Montana [Mr. MURRAY], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Georgia [Mr. RUSSELL], the Senator from Alabama [Mr. SPARKMAN], the Senator from Missouri [Mr. SYMINGTON], and the Senator from Texas [Mr. YARBOROUGH] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BEALL] and the Senator from Utah [Mr. BENNETT] are necessarily absent.

The Senator from New York [Mr. JAVITS] is absent by leave of the Senate to attend as Chairman of the Economic Committee a meeting of the NATO Parliamentarians Conference at Strasbourg, France.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are absent on official business as members of the Board of Visitors of the U.S. Military Academy.

The Senator from New Hampshire [Mr. BRIDGES], the Senator from North Dakota [Mr. BRUNSDALE], the Senator from Kansas [Mr. CARLSON], the Senator from Iowa [Mr. HICKENLOOPER], and the Senator from Kansas [Mr. SCHOEPPEL] are detained on official business.

If present and voting, the Senator from Utah [Mr. BENNETT], the Senator from Nebraska [Mr. HRUSKA], the Senator from New York [Mr. JAVITS], and the Senator from Kansas [Mr. SCHOEPPEL], would each vote "yea."

The result was announced—yeas 68, nays 0, as follows:

YEAS—68

So the amendment of Mr. WILLIAMS of Delaware was agreed to.

Mr. CASE of South Dakota. Mr. President, I desire to offer an amendment, to incorporate language in the bill, which appeared in the bill last year as it was reported to the Senate. It was adopted by the Senate, but it was not agreed to in conference. It is the so-called foreign language amendment, which would make it possible for teachers of foreign languages to receive scholarships which would be supported by counterpart funds.

I have shown the amendment to the Senator from Arkansas [Mr. FULBRIGHT]. It was his amendment last year. I thought it had merit last year, and I should like to see it included in the bill this year.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk proceeded to state the amendment.

Mr. CASE of South Dakota. Mr. President, it is a little lengthy to read. On my statement that it is a verbatim copy of the language which was included in the Senate bill last year, I suggest that it be not read and be printed in the RECORD at this point.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

On page 26 after line 8, insert the following:

"SEC. 607. Public Law 885, Eighty-fourth Congress (70 Stat. 890, 5 U.S.C. 170f–170t), which provides certain basic authority for the Department of State is amended by adding at the end thereof a new section reading as follows:

" 'SEC. 16. (a) The Secretary of State is authorized to make grants to individuals who are engaged in teaching any modern foreign language, in an elementary or secondary school or an institution of higher education. Such grants shall be for the purpose of enabling such individuals, during the summer period when their services as teachers are not required, to obtain in an area, region, or country in which the language they are teaching is commonly used, advanced training in such language and training in other fields needed for a full understanding of such area, region, or country. The Secretary shall consult with the Secretary of Health, Education, and Welfare with respect to the selection of individuals for grants under this section and the establishment of standards for their selection, and the Secretary of State may make arrangements for the performance by the Department of Health, Education, and Welfare of such functions under this section as may be mutually agreeable to the Secretary of State and Secretary of Health, Education, and Welfare.

" '(b) Notwithstanding section 1415 of the Supplemental Appropriation Act, 1953, or any other provision of law, the Secretary of State, in carrying out the provisions of this section may use currencies, or credits for currencies of any foreign government (1) held or available for expenditure by the United States and not required by law or agreement with such government to be expended or used for any other purpose, or (2) made available under the provisions of subsection (c) of this section.

" '(c) In order to make additional funds available for the purposes of this section the Secretary of State is authorized to enter into an executive agreement or agreements with any foreign government for the use of currencies, or credits for currencies, of such government deposited pursuant to agreements entered into under section 142(b) of the Mutual Security Act of 1954 or section 115(b)(6) of the Economic Cooperation Act of 1948, or any other Act and not required by agreement with such government to be expended or used for any other purposes.' "

Mr. FULBRIGHT. Mr. President, I have told the Senator from South Dakota that I am strongly in favor of the amendment and am willing to accept it.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from South Dakota [Mr. CASE].

The amendment was agreed to.

Mr. JOHNSON of Texas. Mr. President, I move that the Senate reconsider the vote by which the amendment was agreed to.

Mr. KUCHEL. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR ADJOURNMENT UNTIL 10 O'CLOCK A.M. TOMORROW

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that when the Senate concludes its business today, it stand in adjournment until 10 o'clock a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I remind the Senate that we shall have a joint session tomorrow. I hope we can have a relatively short morning hour and that we can then proceed to the consideration of any amendments that may be offered to the pending bill, with the hope that we can reach a vote on the passage of the bill sometime tomorrow. I should like to have all Members to be prepared for a yea-and-nay vote tomorrow.

MUTUAL SECURITY ACT OF 1960

The Senate resumed the consideration of the bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes.

Mr. DOUGLAS. Mr. President, on behalf of myself and the Senator from New York [Mr. KEATING], the Senator from Montana [Mr. MANSFIELD], the Senator from Oregon [Mr. MORSE], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Pennsylvania [Mr. SCOTT], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Pennsylvania [Mr. CLARK], the Senator from Hawaii [Mr. FONG], the Senator from Alaska [Mr. BARTLETT], the Senator from Michigan [Mr. HART], the Senator from Alaska [Mr. GRUENING], the Senator from Ohio [Mr. YOUNG], the Senator from North Dakota [Mr. BRUNSDALE], the Senator from New Jersey [Mr. CASE], the Senator from California [Mr. KUCHEL], the Senator from New Jersey [Mr. WILLIAMS], the Senator from Connecticut [Mr. DODD], and the Senator from Wisconsin [Mr. PROXMIRE], I desire to submit an amendment, which I ask to have printed and to lie on the table, and printed in the RECORD.

I should like to explain the effect of the amendment. It would include a statement of policy to reaffirm American support for freedom of navigation in international waterways, including the Suez Canal, opposition to economic warfare, including boycotts, blockades, and restrictions of the use of international waterways.

Its purpose is to express the will of Congress, but to be applied as the President may determine to be proper.

I may say that this statement of policy was recommended by the House Foreign Affairs Committee, was adopted by the House, and appears in the House bill. Unfortunately, it is not included in the bill being considered by the Senate.

The sponsors of the measure believe that the House committee makes it clear that this statement refers to the blockade of the Suez Canal. The amendment leaves the prime authority for the application of the policy in the hands of the President, but it lays down a clear statement of an important international principle which will reinforce the administration in its efforts to secure freedom of navigation through this all-important waterway, and to promote the cause of peace in the Middle East.

Mr. President, I believe I have already asked that the amendment be printed in the CONGRESSIONAL RECORD. Additional sponsors will have an opportunity to join in sponsoring the amendment during the session tomorrow. I ask that the amendment may be received and printed and lie on the table, and that the text of the amendment may be printed in the RECORD at this point.

The PRESIDING OFFICER. Without objection, the amendment will be received and printed, and will lie on the table; and, without objection, the amendment will be printed in the RECORD.

The amendment, ordered to be printed in the RECORD, is as follows:

On page 11, between lines 8 and 9, insert the following:

"STATEMENT OF POLICY

"SEC. 2. Section 2 of the Mutual Security Act of 1954, as amended, which is a statement of policy, is further amended by adding at the end thereof the following:

"'(f) It is the sense of the Congress that inasmuch as—

"'(1) the United States favors freedom of navigation in international waterways and economic cooperation between nations; and

"'(2) the purposes of this Act are negated and the peace of the world is endangered when nations which receive assistance under this Act wage economic warfare against other nations assisted under this Act, including such procedures as boycotts, blockades, and the restriction of the use of international waterways;

assistance under this Act and the Agricultural Trade Development and Assistance Act of 1954, as amended, shall be administered to give effect to these principles, and, in all negotiations between the United States and any foreign state arising as a result of funds appropriated under this Act or arising under the Agricultural Trade Development and Assistance Act of 1954, as amended, these principles shall be applied, as the President may determine, and he shall report on measures taken by the administration to insure their application.'"

THE ITEM VETO ON APPROPRIATION BILLS

Mr. WILLIAMS of Delaware. Mr. President, on February 3, 1959, the junior Senator from New York [Mr. KEATING] introduced Senate Joint Resolution 44, which proposes a constitutional amendment to give the President of the United States the power to disapprove specific and individual items in general appropriation bills.

The need for an item veto, which this amendment would provide, has long been recognized by many of us in the Congress as a necessary and important step forward in the constant battle to reduce or eliminate unneeded expenditures of public funds.

I was pleased to join with several other Senators in cosponsoring Senate Joint Resolution 44 with the Senator from New York. The junior Senator from New York has long been an advocate of the item veto, and sponsored similar legislation on several occasions when he served in the House of Representatives.

The Senator has recently written an excellent article citing both the great need and the advantages to be derived from the adoption of an item veto provision in our Constitution. The article first appeared in the Harvard Law Record of February 11, 1960, and was later reprinted in the Federal Bar News of April 1960. I commend it to all Senators as a fine statement of the need for this legislation, and request unanimous consent to have the article printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE ITEM VETO: A NEEDED REFORM

(By Senator KENNETH B. KEATING)

(The Honorable KENNETH B. KEATING received his LL.B. from the Harvard Law School in 1923. Since that time he has been in the practice of law in Rochester, N.Y. During World War II, he rose from major to brigadier general in the Army, serving in both the European and Asian theaters. He was a Member of the House of Representatives for the 80th through the 85th Congresses. In 1958 he was elected to the U.S. Senate as a Republican from New York. He presently serves in that capacity.)

For nearly a century the pros and cons of granting the President of the United States the authority to veto specific items in appropriation bills approved by Congress have been considered. While there have been sporadic bursts of interest in this subject, there has never been the consistent and sustained backing for this proposal that its potential importance justifies.

I am hopeful the present national concern about our fiscal stability, combined with the successful experience of our States in utilizing this valuable tool, will soon lead to affirmative action by Congress and the American people on the item veto. In my opinion, no step is longer overdue, no reform could reap greater benefits for individual taxpayers, and no single change in our governmental processes could save more money more wisely.

Article 1, section 7, of the Constitution provides that "every bill which shall have passed the House of Representatives and the Senate, shall, before it becomes a law, be presented to the President of the United States; if he approves he shall sign it, but if not he shall return it."

This veto power of the President, as it was written into the Constitution and as he must exercise it today, places a serious and unnecessary handicap on the Chief Executive. It is an "all or nothing at all" decision that confronts him each time a bill appears on his desk.

With regard to appropriation measures, this situation is especially unfortunate, and it is only in connection with money bills that the item veto has been seriously considered. It is not at all unusual for an appropriation bill to contain many separate items listing the goods or services or functions of the Government along with their costs. Yet the President, in spite of his experience and knowledge of the agencies which will receive and spend this money, and his overall budgetary responsibilities, is given no opportunity to exercise discretion on a selective basis.

At a time when the budget of the United States, even after it has been carefully prepared with the utmost savings in mind, is bound to be enormous, this situation is difficult to understand or justify. The President must accept the wasteful and extravagant items along with the useful and necessary ones, or he gets nothing by vetoing the entire bill.

The item veto, therefore, is not just some abstruse or trifling governmental device of

interest only to political scientists and constitutional lawyers. It should be the concern of every American citizen, who has a right to expect of his Government nothing less than the most efficient use of every dollar he contributes in taxes.

Adoption of the item veto by the Federal Government would not mean the introduction of some new and untried process into the Federal Government processes. On the contrary, the longtime use of this power in the American States constitutes one of the most persuasive arguments for its application at the national level.

The item veto first appeared in America during the Civil War in the Constitution of the Confederate States. Its record of adoption by the States following this conflict is most impressive. As new States entered the Union, and as older ones revised their constitutions, the item veto for the Governor became an established feature. With the admission of our newest States, Alaska and Hawaii, both of which provide for the item veto, the number of States with this provision now totals 42.

TRIBUTE

No State which has granted its Governor this power has ever subsequently withdrawn it. This is an impressive tribute to its practical value and a striking refutation to the arguments of those who fear its abuse.

The use of the item veto and the strong endorsement it has been given by many Governors constitute the most eloquent testimony to its real worth. Data presented at hearings before the House Judiciary Committee in 1957 on the item veto fully support this statement. For example, in Pennsylvania, where records have been kept with some care, appropriations were reduced by almost $166 million through item vetoes between 1931 and 1957. Another $133 million was cut out through vetoes of entire bills. The fact that the larger amount was removed through the selective type of veto is an interesting commentary on its usefulness.

These figures do not, of course, prove that the Governor was always right and the legislature always wrong. What they do show is the effect of having a second look, a second type of expertness, backed up with the power to act, at work in the appropriations process. They show the positive effects of vigorous application of this power.

As might be expected, the item veto has drawn much enthusiastic support from the Governors themselves. Former Governor Driscoll, of New Jersey, wrote: "Although the * * * item veto * * * will be sparingly used, the Governor attaches great significance to it." Former Governor of Illinois, Frank Lowden, said: "It has been helpful in keeping expenditures down." Former Governor Burnquist, of Minnesota, called the item veto "a very wise provision." The former Governors of Iowa, Indiana, Nevada, and North Carolina, States not conferring the right to veto items, expressed regret that this power was denied them. In the course of congressional hearings in 1954, every single Governor who responded answered "Yes" to the question: "In your opinion, has the item veto been a desirable feature of your State government?"

In a statement prepared for the 1957 hearings, Prof. Frank W. Prescott, who has written extensively on the item veto, concluded: "Upon the basis of State experience and in some of the larger cities which have the item veto, the writer would endorse the item veto in principle for the President of the United States."

Many other distinguished political scientists share these views. One of the greatest of them, Lord Bryce, in his classic study, "The American Commonwealth," wrote: "Such an amendment [the item veto] is desired by enlightened men. * * * Small as the change seems, its adoption would * * * save the Nation millions of dollars a year, by diminishing wasteful expenditure on local purposes."

More recently, Sydney Hyman has written in his volume, "The American President," that the item veto "would enable the President to pinpoint the pernicious details of legislation and appropriations, and veto them while he signed what remained. At present he has to throw the baby out with the bath water, or drink the bath water in order to embrace the baby."

PRESIDENT COMPELLED

In his recent book, "The American Presidency," Prof. Clinton Rossiter wrote:

"There is one final defect in the relations of President and Congress of which we should take careful note. * * * I refer to his lack of any power to veto separate items in the overstuffed appropriations bills presented for his approval. The President often feels compelled to sign bills that are full of dubious grants and subsidies rather than risk a breakdown in the work of whole departments."

Opponents of the item veto at the Federal level have expressed their fear that it would give the President too much power—power gained at the expense of Congress. As a general principle, I am in sympathy with the belief that we must zealously guard legislative responsibilities and prerogatives.

In the case of the item veto, however, I do not believe this to be a compelling argument. In the first place, both the beginning and the final responsibility for appropriations would continue to remain right where the Constitution placed them—with Congress. The custom would continue of initiating spending bills in the House Appropriations Committee; and the power of Congress to override an item veto, as well as the veto of an entire bill, would, of course, be complete and final.

It has also been contended that the item veto would weaken congressional responsibility for appropriations. This position can hardly be maintained. It is true that the President's role in the appropriations process would be enlarged, but this would be desirable since practically all Federal money is spent by the executive agencies which are responsible to him and for which he is responsible. But, as I have already indicated, ultimate authority at both the start and the finish with regard to these appropriations would still be with Congress. Any loss of responsibility by Congress in this matter would, therefore, be the result of a forfeiture by Congress itself rather than a forced deprivation.

The idea of the item veto has been attacked on the grounds that it would upset the system of checks and balances and weakens the doctrine of the separation of powers. There is little reason in theory to worry about this, and the extensive experience in the States with the item veto helps refute this charge. The fundamental authority and responsibility of both the President and Congress would remain unchanged. The President surely would find his hand strengthened with respect to appropriations, but not more than is necessary to execute properly the duties placed upon him by the Constitution.

The advantages of the item veto are obvious and compelling. It would reduce public expenditures substantially by making possible the reduction or elimination of many unnecessary "pork barrel" appropriations. The item veto could snip out the verbiage without rejecting the rest of the bill.

RIDERS ELIMINATED

In short, the item veto should go a long way toward establishing a fair and rational method for determining appropriations, and it could serve to expedite the entire process as well. All of this says nothing of the great potential value of the item veto as a means of doing away with riders, those pieces of substantive legislation having nothing whatsoever to do with appropriations, but attached, nevertheless, to appropriations bills because only in this way can they be passed. Most riders are usually too weak to stand alone, but under the present arrangement the President must either approve them or wipe out the whole appropriation.

Many of our Presidents have deplored their lack of authority to veto separate items. Buchanan did so in his first annual message to Congress. Grant asked for a constitutional amendment to effect the change. Hayes chafed under the weight of undesirable riders he had to take with the appropriations. Arthur and Taft both urged the adoption of the item veto, as did Franklin D. Roosevelt.

In the second volume of his "Memoirs," former President Truman wrote: "One important lack in the presidential veto power * * * is the authority to veto individual items in appropriation bills." In one letter to the Speaker of the House, President Eisenhower urged that Congress "* * * help assure continuing economy * * * take action that will grant the President the power now held by many State Governors to veto specific items in appropriation bills." He has repeatedly voiced his backing for this proposal in messages to Congress.

If the item veto is to be given to the President, how should it be done? This action could take any of two forms which are now before Congress. They are the Executive order method and the amending of the Constitution.

The Executive order plan would grant to the President by statutory law what is, in effect, the item veto. The phrasing of the bill before the present Congress (S. 2373), of which I am cosponsor, very well explains its purpose: "That the President is authorized to eliminate or reduce by Executive order, in whole or in part, any appropriation or appropriations made by an act or joint resolution. * * *" Under this measure the public interest becomes the primary criterion by which the President would be guided. His decision would stand unless either House of Congress passed a resolution within 60 days stating that it does not favor this action.

This method is similar to that which controls Presidential reorganizations of the executive branch agencies. As applied to appropriation vetoes, it has a precedent in an amendment offered to a money bill by Representative Woodrum in 1938. At that time a careful legal memorandum was written justifying the constitutionality of this approach.

If given no other choice, I should be happy to support the Executive order method because I am convinced that any form of the item veto would be of great value. My preference, however, is for an amendment to the Constitution to achieve this objective. Senate Joint Resolution 44, which I introduced in February 1959, and which is similar to measures I sponsored for years as a member of the House of Representatives, calls for the adoption of such an amendment. The proposal is straightforward and clear. Although the issue is of great importance, it can be expressed in unmistakable language, and that is what I have tried to do.

AMENDMENT

The heart of my amendment reads simply:

"The President shall have the power to disapprove any item or items of any general appropriation bill which shall have passed the House of Representatives and the Senate and have been presented to him for his approval, in the same manner and subject to the same limitations as he may, under section 7 of article I of this Constitution, disapprove as a whole any bill which shall have been presented to him."

Granting the item veto by constitutional amendment rather than by some other method would, in my judgment, have distinct advantages. Perhaps the most important of these is that there would be absolutely no question about its legality. Despite strong legal arguments that can be mustered in support of other methods, such as by amending the statutes, a shadow of doubt would still lie over them in the minds of some people. There would always be the possibility of their being challenged as being in conflict with the veto provisions of the Constitution. I find myself in agreement with the words of Prof. Edward Corwin, that eminent authority on the Constitution, who wrote in his "The President: Office and Powers": "I find persuasive * * * the argument that this reform (item veto) would require a constitutional amendment."

ARGUMENT

Another argument in favor of the amendment method is that, once adopted, it could be revoked only by going through the amendment process again. This would protect the President from any hasty, capricious, or ill-considered action by Congress that might arise as a result of a conflict or misunderstanding.

It can be argued, of course, that an amendment would make it far more difficult to correct a mistake. This is true. But the evidence, including the experiences of the States, is overwhelming that the item veto, far from being a mistake, would be a most valuable addition to the procedures and techniques of good government.

I believe firmly that the Constitution should not be amended except for the most pressing and compelling reasons. It should not be amended if a desirable objective of fundamental importance can be attained by other legal means. Amending the Constitution is a very serious business which should be undertaken only after the most profound thought and after every alternative approach to a problem has of necessity been rejected for good and substantial reasons.

OPINION

In my opinion, on the basis of these standards, giving the President the power to veto separate items in appropriation bills is of sufficient importance to justify this change in our fundamental law. Achieving this goal will not be easy, but no goal of any value was ever attained without toil and travail.

This is a task which I believe should command the energies and efforts of all knowledgeable citizens who are concerned about the efficient and equitable operation of our Government. It is a cause to which members of the bar and potential members of the bar can uniquely add their talents.

In the end, I am confident that the great preponderance of evidence in its favor, combined with the growing sophistication of the electorate and its representives, will result in placing the item veto in our arsenal of constitutional powers. Vigorously and wisely applied by our Chief Executives, the result can be the saving of literally millions of dollars, wiser use of taxpayers' funds, and a more perfect functioning of the greatest system of government the mind of man has ever devised.

ADJOURNMENT TO 10 A.M. TOMORROW

Mr. KUCHEL. Mr. President, in accordance with the previous order, I move that the Senate stand in adjournment until 10 a.m. tomorrow.

The motion was agreed to; and (at 6 o'clock and 50 minutes p.m.) the Senate adjourned, under the order previously entered, until tomorrow, Thursday, April 28, 1960, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate April 27, 1960:

PROMOTIONS IN THE REGULAR ARMY

The following-named officers for promotion in the Regular Army of the United States, under the provisions of title 10, United States Code, sections 3284 and 3299. All officers are subject to physical examination required by law:

To be captains

Abercrombie, Edward L., O76933.
Adams, Basil R., Jr., O86982.
Adams, John E., O88544.
Adamson, George F., O87990.
Adessa, Anthony J., O76935.
Agnew, James B., O85473.
Aguanno, Edwin M., O70580.
Ainslie, Robert E., O69844.
Aitken, Milton L., Jr., O70581.
Akey, Charles D., O75133.
Alameda, Donald J., O70582.
Albro, Ames S., Jr., O70583.
Allan, William L., O70584.
Allen, Charles B., O89173.
Alvey, Everett L., O76937.
Amaki, Satoru, O81367.
Anderson, Andrew H., O73283.
Anderson, Darrell R., O70588.
Anderson, George B., O76938.
Anderson, Jerome H., O70589.
Anderson, Richard V., O71754.
Anderson, Robert C., O85122.
Anderson, Warren H., O70161.
Andre, Nick J., O68864.
Andreas, Charles R., 3d., O70590.
Andrew, Donald G., O76939.
Anklam, Frederick M., O70591.
Anthis, Robert F., O70592.
Applewhite, Ray, O74627.
Archer, William T., O70593.
Archibald, Norman E., O79167.
Arkley, Robert J., O80206.
Armstrong, Raymond, O68867.
Arnold, Thomas H., O81370.
Asente, James, O88327.
Atkinson, Ellis O., O68869.
Augur, George M., O87997.
Ault, William E., O89027.
Avery, Cyrus S., 2d., O70595.
Avveduti, Paul R., O68874.
Awtrey, Sherry E., O77257.
Ayers, Theodore F., O68875.
Back, Arthur R., O76940.
Bacon, Willis G., O70596.
Baddaker, William L., O76941.
Badger, Robert W., O70597.
Bailey, Kenneth R., O70599.
Bailey, Ronald O., O76942.
Bain, John R., O81372.
Baker, Russell A., O75140.
Baldwin, Jessie E., O74629.
Baldwin, William R., O70600.
Ballantyne, John L., 3d, O70601.
Balzhiser, Robert M., O79171.
Bard, John C., O70602.
Barksdale, Clifford B., O81374.
Barnes, Harold F., O70603.
Barnes, Robert S., O81375.
Barnes, Wilson C., O70604.
Barnitt, George W., Jr., O71139.
Barrand, Kerwood W., O70605.
Barron, William T., O88563.
Bartolacci, Alfred D., O79177.
Bass, Richard H., O79179.
Bauer, Daniel H., O81376.
Baughman, Richard C., O70608.
Bean, John F., O68888.
Beaube, George P., O74635.
Beaumont, Charles D., O70610.
Beckwith, George G., O79182.
Bedell, Norman H., O70611.
Beers, John R., O70164.
Belcher, Eugene R., O71759.
Bell, Alexander D., O88567.
Bell, Frederick D., Jr., O76949.
Bellows, Robert E., O69856.
Beltman, Laurence J., O78635.
Benfer, Richard H., O70613.
Benn, Clark H., O70614.
Bennett, George C., Jr., O70615.
Bennett, John C., O70616.
Bennett, Raymond G., O76951.
Bennett, Willard M., Jr., O79185.
Bennetto, Edward, 2d, O84472.
Benson, Joseph E., O71315.
Beringer, Jack M., O70618.
Berkey, Ronald R., O71443.
Bernstein, Harold, O82141.
Bidwell, Bruce W., O70619.
Biggerstaff, Jack, O75145.
Bilderback, Gerald, O76952.
Billy, Myron D., O68900.
Bishop, John G., O87678.
Blackmore, James R., O85899.
Blanche, John G., 3d, O81379.
Blichmann, Donald J., O81381.
Bockman, Leonard I., O74641.
Bodine, James F., O79188.
Boe, Richard I., O70622.
Boggs, Joseph C., O72823.
Boggs, William L., O73291.
Bole, Albert C., Jr., O76954.
Bonner, Laurence B., O70623.
Bonomo, Reno J., O76956.
Bonsall, Edward H., 3d, O82144.
Boose, Gordon D., O70624.
Boster, Philip L., O81382.
Boswell, Aubrey R., O84951.
Bowden, John C., Jr., O76958.
Bowling, Fredrick B., O70625.
Bowman, Joseph R., O88582.
Boyd, Gerald M., O79192.
Boyle, Dean G., O81384.
Boyle, Dennis M., O76960.
Boyle, Willard F., O84955.
Boyle, William P., O81385.
Bozymski, Valentine W., O77276.
Bradbury, Donald K., O70627.
Bradel, James F., O70628.
Brady, James P., O76961.
Branch, William E., O76962.
Brandt, Leo M., O76963.
Brant, Kenneth E., O70629.
Brazel, David H., O75152.
Breeding, Gene L., O70630.
Breeding, William B., O85296.
Brinton, John R., O81388.
Brizee, Harry A., O71154.
Brobeck, Irvin, Jr., O79201.
Brock, Eldridge W., O87690.
Brock, Mervin E., O68919.
Brodeur, Alfred F., O81390.
Brogan, Thomas W., O68920.
Broman, Ralph W., O78242.
Brookshire, Grail L., O70133.
Broumas, Andre G., O70635.
Brown, Charles W., O69869.
Brown, Elmer A., O69870.
Brown, Robert F., O79203.
Brown, Sam A., O73437.
Brown, Thomas C., Jr., O70637.
Brown, Thomas D., O68458.
Browne, Robert T., Jr., O76965.

Alvin James Albright
Troy Gerard Arnold, Jr.
Leon Robert Arnoldi
William Farrar Balfanz
Roger Lee Bartelt
John Kent Bosking
John Theodore Bowden, Jr.
Kenneth Alvin Brewer
Robert William Browning
Terence Dunford Buck
Lynn Irvin Caraway
Donald Edwin Carlile
Samuel Anthony Carollo, Jr.
Richard Joseph Celichowski
Daniel Robert Clark
Gary Leon Comfort
Clyde Lee Cook, Jr.
Douglas Ray Cresswell
Gerald Franklin Croll
Hector Cruz
Dean Eckwall Danielson
Edwin Bernard Dean
Harold Frederick DeBolt
Milton Hewen Diehl
Louis Dean Easterday
Cecil Wilmont Elder
Larry Lester Fairman
John Joseph Fanning III
Nicholas James Fergadis
Clinton Andrew Fields
Robert Slade Fiero
Courtney Ronald Fritts
James Edward Fritz
Walter John Gabrysiak
Robert Webb Gannett
Jose Garcia
Miguel Angel Garcia
John Lawrence Geisinger
Taft Rosco Gilliam
Richard Joseph Girouard
William Anthony Gissler
James Morgan Goodrich
Eldon Henry Graham
Joe Hiram Griggs
James Frederick Hayes
Loyd Jean Hays
Larry Charles Heaton
Anthony Louis Hittner
Gerhardt Will Hodel
Richard Lee Hooverson
Jerry Alonza Hubbard
John David Hutcheson
Darrel Duane Jacobs
Edward Mark Jansen
James Buford Johnson
Thomas Willems Johnson
John Joseph Kane
John Richard Kane
Claude Hideaki Kanemori
Jack Ralph Keene
Thomas John Kiernan
Lloyd Wayne Kleinstiver
Gene Raymond Kobza
Thomas Owen Kuypers
Roger Joseph Labat
William Gregory Lacey
William Andrew Lang
Joseph Stanley LeGath
Martin Richard Lewis, Jr.
Andres Lopez
John Patrick Mackin, Jr.
Alan Doyle Mayberry
Walter Patrick McCann
Philip Remington McDonald
Irby Neill McInnis, Jr.
James Alvin Minyard
Charles Howard Morgan
Michael John Morin
Donald Stephen Mostek
Robert Stephen Nawalaniec
John William Nichols
Richard Joseph Ozga
Joseph Wesley Parent
Thomas Carl Rankin, Jr.
Dennis Allen Repp
Charles Monte Richard
Avrom A. Rosen.
Duvall Thomas Royster, Jr.
Thomas Frederick Ryan
David Clifford Saalfrank
Donald Ivan Saathoff
John Preston Sanders
Allen Dale Schlegelmilch
Leland Roy Schroeder
Stephen Joseph Snyder
Ralph Louis Sorensen
Robert LaVerne Spangler

John Paul Yeagley
James Joseph York

The following-named midshipmen, graduating class of 1960, U.S. Naval Academy, for appointment in the Regular Army of the United States in the grade of second lieutenant, under the provisions of title 10, United States Code, sections 541, 3285, 3286, 3287, and 3288, subject to physical examination required by law:

Isaac Francis Bonifay, Jr.
Arnold Richard DuPont
John Walden Durham
Jack Hamilton Ferguson
John Joseph Garrity, Jr.
Forrest Virgil Graves
James Clarence Householder
John Theodore Kazenski
David Livingston Lowry
John Anthony Martin
Douglas Sherman Morgan
Henry William Papa
Neal Gordon Parker
Robert Graham Patterson
John Robert Presley
Michael Louis Sheppeck, Jr.
James Joseph Ten Brook

POSTMASTERS

The following-named persons to be postmasters:

ARKANSAS

Everett L. Hall, Hazen, Ark., in place of L. A. Tyson, resigned.

CALIFORNIA

Fridolph E. Nelson, Keyes, Calif., in place of L. M. Hinson, retired.

Noriyuki Tashima, Livingston, Calif., in place of John Healy, deceased.

Dorothy E. Finn, Sausalito, Calif., in place of T. M. Bradley, retired.

Harold D. Dean, West Covina, Calif. Office established September 6, 1958.

COLORADO

Wesley H. Amrine, Cortez, Colo., in place of W. W. Winegar, resigned.

Leslie M. Cogswell, Pierce, Colo., in place of E. F. Huitt, retired.

Ertis D. Shelton, Pritchett, Colo., in place of J. W. Stuart, retired.

FLORIDA

Edythe C. Smith, Canal Point, Fla., in place of Osceola Upthegrove, resigned.

James E. Combs, Glen Saint Mary, Fla., in place of J. E. Franklin, retired.

GEORGIA

Charles R. Sprayberry, Trion, Ga., in place of C. S. Bell, deceased.

IDAHO

Clarence Larson, Hayden Lake, Idaho, in place of M. D. Becker, retired.

George L. Crapo, Idaho Falls, Idaho, in place of Parley Rigby, retired.

ILLINOIS

Violet L. Pittman, Camp Point, Ill., in place of W. H. Bruns, retired.

Raymond F. Cromwell, Kenney, Ill., in place of Enid Trowbridge, retired.

Tom H. Mason, Marietta, Ill., in place of J. A. McCance, retired.

Elmer A. Lawson, Jr., Rome, Ill., in place of E. A. Lawson, retired.

INDIANA

Lester S. Weir, Lagrange, Ind., in place of H. G. Groat, retired.

Herbert A. Hedges, Universal, Ind., in place of M. E. Lewis, retired.

IOWA

Lloyd R. Peterson, Casey, Iowa, in place of P. G. Thompson, retired.

Theodore W. Swensen, Decorah, Iowa, in place of O. A. Jaeger, retired.

Ralph B. Speers, Eldora, Iowa, in place of J. R. Bahne, retired.

Daniel H. Maxwell, Spencer, Iowa, in place of C. A. Tripp, retired.

KANSAS

Margaret L. Hejtmanek, Delia, Kans., in place of M. A. Lane, retired.

Jack Morrison, Jr., Great Bend, Kans., in place of J. L. Brown, retired.

KENTUCKY

Ben H. Dyer, Albany, Ky., in place of W. H. Vitatoe, retired.

Kermit L. Tussey, Cynthiana, Ky., in place of J. M. Magee, retired.

Georgia H. Wilkerson, Dixon, Ky., in place of M. W. Blackwell, retired.

Ira J. Westerman, Muldraugh, Ky., in place of M. B. Withers, retired.

James G. Dismuke, Salvisa, Ky., in place of N. M. Ramsdell, retired.

Mary F. Hill, Stone, Ky., in place of J. S. May, retired.

Arnold D. Sprague, Jr., Sturgis, Ky., in place of L. D. Rose, retired.

Francis E. Ryan, Verona, Ky., in place of Mayro Hayden, resigned.

LOUISIANA

John A. Schuchs, St. Joseph, La., in place of B. K. Schuchs, retired.

Herthel S. Devall, Springfield, La., in place of G. A. Rownd, retired.

MASSACHUSETTS

Vivian I. Tancrell, North Uxbridge, Mass., in place of W. J. Tancrell, retired.

Arthur F. King, Sharon, Mass., in place of J. J. Hayes, resigned.

Paul P. Skorput, West Stockbridge, Mass., in place of J. J. Troy, deceased.

MICHIGAN

Roger A. Camfield, Gobles, Mich., in place of L. A. Wauchek, resigned.

Vernon L. Erskine, Moran, Mich., in place of I. J. Gille, retired.

Charles H. Hill, Ontonagon, Mich., in place of J. L. Dobbek, retired.

William R. Froelich, Rogers City, Mich., in place of L. D. Larke, resigned.

MINNESOTA

Laverne W. Martin, Gibbon, Minn., in place of H. G. Carlson, deceased.

Robert F. Entzion, Knife River, Minn., in place of Grace Congdon, deceased.

Orville H. Eidem, Spring Park, Minn., in place of Marguerite Linquish, retired.

MISSOURI

Robert H. Hunter, East Prairie, Mo., in place of W. W. Bledsoe, retired.

NEW HAMPSHIRE

Russell N. Holm, Derry, N.H., in place of C. D. Floyd, deceased.

NEW YORK

John D. Wolcott, Alexander, N.Y., in place of E. R. Harrington, retired.

Millard H. Bury, Callicoon Center, N.Y., in place of S. W. Schuster, Jr., deceased.

Nellie P. Johnson, Chichester, N.Y., in place of Helen Bennett, retired.

James R. Fuller, Fleischmanns, N.Y., in place of J. F. Kelly, retired.

Carl J. Barry, Kent, N.Y., in place of R. K. Fishbaugh, deceased.

Francis P. Secor, Otego, N.Y., in place of R. A. Southard, declined.

Dominic V. Panichi, Wynantskill, N.Y., in place of I. R. Puffer, deceased.

NORTH CAROLINA

James D. Cobb, Lumber Bridge, N.C., in place of D. G. Clifton, declined.

NORTH DAKOTA

Raymond F. Pfeifer, Buffalo, N. Dak., in place of J. U. Pavlik, deceased.

Leland L. Ribb, Donnybrook, N. Dak., in place of C. C. King, transferred.

OHIO

Arthur F. Rizzi, Lansing, Ohio, in place of L. A. Franco, resigned.

Ruth C. Menker, Maria Stein, Ohio, in place of U. B. Menker, deceased.

OKLAHOMA

Lily J. Westfall, Carney, Okla., in place of J. O. Deer, deceased.

Charles F. Rhoton, Jr., Keyes, Okla., in place of O. L. Badgley, retired.

PENNSYLVANIA

Edward L. Thomas, Drifton, Pa., in place of N. E. Breslin, retired.

Paul R. Moore, Enon Valley, Pa., in place of P. N. Lindner, resigned.

Henry L. Haines, Maytown, Pa., in place of M. E. Culp, retired.

Preston L. Allison, Shrewsbury, Pa., in place of Marea Stover, retired.

Stewart C. McCullough, Wattsburg, Pa., in place of H. E. Burnham, retired.

SOUTH DAKOTA

William G. Stivers, Dimock, S. Dak., in place of C. A. Johnson, retired.

Eldon E. Case, Pine Ridge, S. Dak., in place of H. J. Hagel, transferred.

TENNESSEE

M. Greer Raulston, Monteagle, Tenn., in place of C. P. Fults, retired.

Thurman L. Jackson, St. Joseph, Tenn., in place of G. M. Bryan, retired.

TEXAS

Wilmoth A. Ingalls, Winnie, Tex., in place of Ethel Gill, retired.

UTAH

Max G. Johnson, Midway, Utah, in place of N. A. Burgener, retired.

VERMONT

Alton A. Ellis, West Pawlet, Vt., in place of P. E. Kehoe, retired.

VIRGINIA

William E. Humphreys, Clarksville, Va., in place of A. B. Crowder, retired.

William B. Anderson, Onley, Va., in place of W. O. Brittingham, resigned.

George A. Carpenter, Woodberry Forest, Va., in place of W. E. Ewers, deceased.

WASHINGTON

Genevieve F. Tapscott, Longmire, Wash., in place of H. C. Colvin, resigned.

WISCONSIN

George W. Smith, Franksville, Wis., in place of W. J. Perlberg, resigned.

HOUSE OF REPRESENTATIVES

WEDNESDAY, APRIL 27, 1960

The House met at 12 o'clock noon.

Rev. Halley Brooks Oliver, First Congregational Church, Owosso, Mich., offered the following prayer:

Our gracious Heavenly Father, we pause before Thee to seek the blessing of Thy guidance for the work of this day.

May, O Lord, those prayers made by Thy churches and people, for this Nation and these Thy servants, prepare hearts and minds for the working of Thy holy spirit.

We so often pray for Thy wisdom, Thy spirit, Thy love; yet it is too high, we cannot attain unto it. Make us, therefore, aware that we have wisdom from Thee: help us to use it; that we have felt Thy spirit: grant that we be receptive to it.

We know the conditions of Thy love and that it casteth out fear; may mercy and justice be shown.

Give these Thy servants the understanding that the Nation honors them and looks to their work. May what is done be pleasing in Thy sight. We pray in the name of the Master. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

DEPARTMENT OF COMMERCE APPROPRIATION BILL, 1961

Mr. PRESTON. Mr. Speaker, I ask unanimous consent that the managers on the part of the House may have until midnight tonight to file a conference report on the bill (H.R. 10234) making appropriations for the Department of Commerce and related agencies for the fiscal year ending June 30, 1961, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

COMMITTEE ON PUBLIC WORKS

Mr. EDMONDSON. Mr. Speaker, I ask unanimous consent that the Committee on Public Works may sit during the session of the House this afternoon during general debate.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

SUBCOMMITTEES ON LEGISLATIVE OVERSIGHT, AND HEALTH AND SAFETY

Mr. HARRIS. Mr. Speaker, I ask unanimous consent that the special Subcommittee on Legislative Oversight and the Subcommittee on Health and Safety be permitted to sit today during general debate.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

ARE WE FAILING IN THE FAR EAST?

Mr. MEYER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Vermont?

There was no objection.

Mr. MEYER. Mr. Speaker, yesterday I gave facts exposing the farce of so-called democratic free elections on Formosa under Nationalist China and related them to the serious situation in South Korea caused by similar hypocrisy and injustice.

Now we have word about so-called favorable election results in Laos. But we hear little about the use of the army and other measures to secure such results. I know enough of the facts, and have forewarned about them previously, to report that instead of being able to cite a case of a democratic free election, we will hear claims that these elections were rigged.

How long can the prestige of Western democracy and freedom be sustained in the Far East if there is so little of it or even honesty in so many places where we exert an influence?

I have called for a reappraisal of our activities in that area. I have said that our Foreign Affairs Committee and particularly our Subcommittee on the Far East and the Pacific should get the facts independently. We dare not let things drift; we cannot afford to participate in a "whitewash" or in sweeping dirt under the rug.

Several Members of Congress had doubts relative to the appointment of J. Graham Parsons as Assistant Secretary of State for Far Eastern Affairs. His appointment was a mistake and he should be replaced. The United States and all nations associated with us in the quest for peace, freedom, and justice dare not risk further failures in principle or direction of purpose.

LEAVE OF ABSENCE

Mr. COLLIER. Mr. Speaker, I ask unanimous consent that my colleague the gentleman from Ohio [Mr. DEVINE] be granted leave of absence for 5 days due to business in his congressional district.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

THE CAMPAIGN CONTRIBUTIONS ACT OF 1960

Mr. MASON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. MASON. Mr. Speaker, it is of primary public interest that campaign expenses of candidates for national, State and local offices shall be met by large numbers of modest contributions rather than chiefly from a relatively few large contributions.

The situation has become so serious at national levels that there has been talk of making appropriations from public funds available to the major political parties.

The bill I have just introduced is intended to meet the situation by encouraging large numbers of modest contributions to political committees, including independent committees organized to promote a candidate, or candidates. This would be done by making contributions deductible—but within two strict limits.

One limit would be that in no event would the amount deductible exceed 2 percent of the taxpayer's adjusted

gross income—the combined adjusted gross income of husband and wife filing a joint return. In view of the prime importance of our getting political issues and candidates before the people, it would allow deductions to this end at a fraction of the amounts allowable for ordinary charitable contributions and gifts.

Mr. Speaker, in view of the importance of encouraging only modest contributions, a maximum deductible contribution of any taxpayer is set at $1,000.

There can be, I recognize, some difference of opinion as to the precise rate and overall limit which should be set to contributions, but I believe that my proposal is both badly needed and basically sound in principle.

PAUL BUTLER

Mr. FORRESTER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. FORRESTER. Mr. Speaker, this morning's Washington Post carries an article saying that Paul Butler, national chairman of the Democratic Party, described the effect of the Negro sitdown demonstrations in the South as "a healthy reaction to an un-American situation." I wonder now if Mr. Butler would know what Americanism is if he met it in the middle of the big road. This is cheap politics. But the trouble is that while that statement is untrue, irresponsible statements of that kind are calculated to bring and are bringing untold troubles upon my people. I know now, and I believe the majority of the Democratic Party knows, that President Truman was on exceedingly solid ground when he said that Mr. Butler could never make a worthwhile contribution to the Democratic Party. Mr. Speaker, Paul Butler should resign.

KOREA

Mr. DORN of South Carolina. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. DORN of South Carolina. Mr. Speaker, the Secretary of State encouraged mob rule in Korea. He encouraged mob rule against the duly elected government of a free republic. The Secretary of State encouraged and backed the overthrow of a government which was the symbol and epitome of freedom in the Far East. The United States met the challenge of armed international Communist aggression for the first time in South Korea. We sacrificed thousands of the flower of our young manhood. In that struggle for freedom, the Korean people and their great leader, Syngman Rhee, fought valiantly at our side. This tragic and unparalleled action by the State Department in Korea could set off a chain reaction all over the world. It could be the signal for mob violence against every republican form of government on the face of the earth.

Already student mobs are forming in Japan. Is the State Department to encourage them to overthrow the Japanese Government? Is the State Department again to encourage mob action in Panama against the canal? What is going to be the attitude of the State Department about mob violence in South America and in the Near East?

This action by the Secretary of State helped the cause of communism in the Far East. It has weakened our defense line. It will encourage other mobs to form led by "students" with Castro sideburns.

EMERGENCY HOME OWNERSHIP ACT

Mr. O'NEILL. Mr. Speaker, under direction of the Committee on Rules, I call up the resolution (H. Res. 498) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 10213) to amend the National Housing Act to halt the serious slump in residential construction, to increase both on-site and off-site job opportunities, to help achieve an expanding full employment economy, and to broaden home ownership opportunities for the American people. After general debate, which shall be confined to the bill, and shall continue not to exceed three hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking and Currency, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

CALL OF THE HOUSE

Mr. GROSS. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently no quorum is present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 55]

Alexander	Devine	Jones, Ala.
Anderson, Mont.	Dooley	Keogh
Barry	Dowdy	Kilburn
Bolling	Durham	Lafore
Bonner	Fenton	McGinley
Brown, Mo.	Flynn	McIntire
Buckley	Frazier	Mailliard
Burleson	Gallagher	Martin
Canfield	Gavin	Miller, George P.
Chelf	Granahan	Moeller
Clark	Grant	Montoya
Cooley	Gray	Morgan
Delaney	Holifield	Morris, N. Mex.
Norblad	Jackson	Rooney
Pelly	Roush	Taylor
Philbin	Saund	Teague, Tex.
Pilcher	Scott	Thompson, N.J.
Powell	Shelley	Udall
Rabaut	Sheppard	Walter
Roberts	Steed	Young
Rogers, Tex.	Sullivan	

The SPEAKER. On this rollcall 368 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

EMERGENCY HOME OWNERSHIP ACT

Mr. O'NEILL. Mr. Speaker, I yield 30 minutes to the gentleman from Illinois [Mr. ALLEN] at the conclusion of my remarks; and at this time I yield myself such time as I may require and reserve the balance of my time.

Mr. Speaker, House Resolution 498 provides for the consideration of H.R. 10213, to amend the National Housing Act to halt the serious slump in residential construction, to increase both onsite and offsite job opportunities, to help achieve an expanding full employment economy, and to broaden home ownership opportunities for the American people. The resolution provides for an open rule, with 3 hours of general debate.

H.R. 10213 is designed to combat the critical shortage of home-mortgage credit which has caused a costly upward spiral of interest rates, unconscionable discounts on FHA and VA mortgages, increased use of unsound and costly financing devices in the conventional loan sector, and a serious decline in homebuilding. This has frustrated our national policy of improving housing conditions and encouraging home ownership on a sound basis. Moreover, the drop in residential construction which has taken place over the past year has resulted in a loss of more than half a million jobs. The experience of the 1957–58 recession proved that a downtrend in homebuilding activity, if allowed to continue unchecked, can undermine the entire economy.

The Committee on Banking and Currency is convinced that the dropoff in new home construction in the face of continued strong demand for housing is the direct result of the restrictive monetary policies pursued by the monetary and fiscal authorities. The hearings held on this bill established conclusively that this tight money policy has a particularly severe impact on residential construction. The purpose of this bill is to offset in some measure the discriminatory effects of that policy by interposing the financial strength of the Federal Government in favor of the homebuying family in the unequal competition in the money market. This action is essential if we are to live up to the national housing policy set forth in the Housing Act of 1949, and the economic policy established by the Employment Act of 1946.

During the hearings on the Emergency Home Ownership Act—H.R. 10213—by the Subcommittee on Housing, testimony in support of the bill was given by labor, veteran, and citizen groups, as well as

the homebuilding industry. Opposition came primarily from spokesmen for the large lenders and from the administration.

Mr. Speaker, I urge the adoption of H.R. 498.

Mr. ALLEN. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, the best government is the form of government that the people can offord to pay for.

Thomas Jefferson, an immortal, wisely said:

> The best government is that one which governs the least.

Able and sound economists recommend that in times of great prosperity that the budget be balanced—that there be no deficit financing.

Notwithstanding these commendable admonitions we are considering a billion dollar back door raid on the U.S. Treasury.

The sponsors of the bill presently before us, and they are few, designate it as the "Emergency Home Ownership Act." But the fact is there is no emergency. Perhaps it should be called "The Fiscal Irresponsibility Act."

Mr. Speaker, I do not know why this bill is presently before us. I have not received one letter in support of it. To my knowledge there is no demand from the people back home for its passage.

It is of interest to note that when this measure was before the Rules Committee that the gentleman from California [Mr. MCDONOUGH]—yes, from Los Angeles, the fastest growing city in the United States—testified:

> I know of no emergency existing in Los Angeles in this field. I know of no demand for this legislation.

Before the Rules Committee, Mr. DERWINSKI, our colleague from Chicago, Ill., the second largest city in the United States, said that he did not know of any demand for the passage of this legislation.

Our colleague, the gentleman from New Jersey [Mr. WIDNALL], whose district adjoins New York City, stated before the Rules Committee that he knows of no emergency in the field of housing—that he knows of no demand for its passage.

Mr. Speaker, these three distinguished colleagues speak for the three most densely populated areas in the United States. When they state there is no emergency and no demand—should we not pause and consider? Is it not reasonable for us to believe that if an emergency exists that they would know about it?

Today, we stand in the midst of our greatest prosperity. Today, more people are gainfully employed than ever before in history and with the highest wages in history. It is true that there are certain areas in our country, particularly West Virginia and certain sections of Pennsylvania that are not as well off economically as we would like to have them but the enactment of this legislation would not help them. Federal Government meddling in this field would not be of benefit to them.

It appears that some people believe that easy money, continuous Government borrowing and continuous Government extravagant spending will cure everything. "Budget busters" and "irresponsible spenders" seem to fear nothing. They seem to believe that our Government should continue to borrow and borrow additional billions of dollars for their children and their children's children to pay back. They attempt to justify themselves by unwisely stating that an emergency exists when it does not exist.

Mr. Speaker, it is imperative that all of us who believe in sound government, that all of us that have a sense of financial stability roll up our sleeves, tighten our belts, and stop these extravagant spending schemes. It is time for us to pause and to realize where we are—financially speaking.

Mr. Speaker, as sure as I stand here, this Congress will be called upon to raise our national debt limitation unless the spenders are stopped.

I am certain that if this irresponsible bill receives approval today that there will be many threats to the balancing of the budget. If all the proposals being seriously considered by Congress should be enacted, the deficit for fiscal year 1961 will be about $55 billion. If projected these bills over a 5-year period would amount to a $325 billion deficit. We all know that once these extravagant schemes start they never stop.

These are not my figures; they are the figures of the Director of the Bureau of the Budget that were given to me yesterday.

So today is a day of decision. The question before us is extremely simple. If we give in to the extravagant spenders we are doomed. We can expect a great offense from the budget busters through to adjournment date. If an unjustifiable bill of this nature can receive the approval of Congress, I ask you: What spending schemes can be halted? When will we stop?

So I say to you again—let us dedicate ourselves to the simple philosophy that "the best government is the type of government that the people can afford to pay for." That Thomas Jefferson was right when he said, "The best government is one that governs the least."

Mr. O'NEILL. Mr. Speaker, will the gentleman yield?

Mr. ALLEN. I yield.

Mr. O'NEILL. Does the gentleman know how many people in the United States are unemployed today? There are 4,500,000 people now unemployed in this country.

Mr. ALLEN. What I am saying, and he cannot dispute it, is that today there are more people employed in the United States than ever before in history and they are being paid the highest wages in history. Of course, there are some places such as in West Virginia, for example, and certain areas of Pennsylvania where there are areas of unemployment. But, as a whole, I do not believe the great majority of the people think we have any great emergency in this country. I do not know why these budget busters and these spenders are coming in with these extravagant schemes. They do not seem to realize that we do not have any money in the U.S. Treasury, but that we have to borrow it for our children and their children and future generations to pay back. I say that we should have some sense of financial responsibility.

Mr. PUCINSKI. Mr. Speaker, will the gentleman yield?

Mr. ALLEN. I yield.

Mr. PUCINSKI. It is my understanding that this is an authorization bill, and if the gentleman's statement is correct and if there should be no demand for this money, then obviously the money would not be made available; is that not correct? If there is no need for the money, the money would never be appropriated and would never be spent.

Mr. ALLEN. I will say to my colleague from Illinois that it has been my experience that when bills of this nature become law that somehow money is made available and money is spent.

Mr. PUCINSKI. I am asking the question for some elucidation. Can the gentleman explain that to me, please?

Mr. ALLEN. I say that during my long experience, whenever there is money available they will put it out.

Mr. PUCINSKI. I respect the gentleman's views. I want to know how to vote.

Mr. ALLEN. I am saying to the gentleman that when you make money available there is always a bunch of these "do-gooders" who will see it is spent.

Mr. PUCINSKI. These are not handouts. These are not direct appropriations given to somebody.

Mr. ALLEN. Now may I say this: These budget busters, these extravagant spenders, must realize that if we continue along this line we will soon have a bill here to raise the national debt ceiling.

Mr. O'NEILL. Mr. Speaker, I yield such time as he may desire to the gentleman from Massachusetts [Mr. MCCORMACK].

Mr. MCCORMACK. Mr. Speaker, we are witnessing today something we have seen repeatedly over the years, where a majority of our Republican friends are thinking in terms of status quo, in terms of yesterday; and lacking in vision. This is another illustration where the Republican Old Guard is in control of the Republican Party on the congressional level, blind in their opposition, just as they opposed social security and the minimum wage. Always fighting progress. That is going to be one of the big issues in this campaign. The Republican Old Guard control of the Republican Party on the congressional level. We just see another illustration of what is going on. The old force of reaction, trying to prevent the passage of legislation that is necessary in the best interests of the people of our country.

This bill meets an immediate situation that exists. We know of the high interest rates. We know the Republican administration is responsible for them. We know we are paying 4½ billion more on our national debt than we were paying 7 years ago when Harry Truman was in office.

We also know what large discounts are demanded throughout the country,

anywhere from 8 to 16 percent discount imposed upon borrowers of money.

This bill is aimed to meet this situation. It is legislation that is necessary in the best interests of the homeowners of our country, the backbone of the country, the family life of the Nation. Here we have another illustration of an old policy of our Republican friends, the great majority of them, blindly opposing; and their opposition clearly shows what I have stated on many occasions and what I will continue to state in the months to come between now and the fall elections, that the people have no hope during the next 4 years if a Republican President is elected, because the Republican Old Guard will be in control of the Government.

Mr. ALLEN. Mr. Speaker, I yield 6 minutes to the gentleman from Ohio [Mr. BROWN].

Mr. BROWN of Ohio. Mr. Speaker, again, here on the floor of the House, we are seeing another illustration of that which has happened so often in the past, an appeal to partisan prejudice in an attempt to raid the Treasury.

Personally, I am opposed to this legislation for many reasons. I voted against it in the Rules Committee. First of all, I would like to call your attention to the fact this resolution itself says something which, in my opinion, and in the opinion of the great majority of the people who are in the real estate, construction, and homebuilding business, is absolutely not true. In other words, the adoption of this resolution would have the Congress of the United States saying that this action is necessary "to halt a serious slump in residential construction."

There is no serious slump in residential construction. We are just a little bit behind 1959, which was the second highest year in all of our history. In 1960 residential construction is running ahead of past years under Democratic administrations. More homes are being built today under the present administration than ever were built in any 1 year under a Democratic administration, despite the plea of my good friend, the gentleman from Massachusetts.

Let me say something else to you, if I may: There is not any need for this legislation. This legislation provides for a direct approach to the Treasury or back-door spending without appropriation by Congress. This is not just an authorization bill; this measure just simply provides they can get this money out of the Federal Treasury without any further action by the Congress. This $1 billion would be spent above the budget. It would add to the national debt. It would increase deficit spending by our Government. And I say to you, very frankly, Mr. Speaker, there is nothing liberal about inflation and reducing the purchasing power of the people's money, especially for the old folks of this country who have limited savings to take care of their needs in their old age.

They call that liberalism.

They say we who oppose this activity are all wrong although what we are striving to preserve is the purchasing value of the American dollar; and not to reduce this Government to penury or insolvency. When we do that we are accused of being standpatters, Old Guard, or something similar. Let me remind you that we as representatives of the people are here to protect the best interests of the people. I want to protect the best interests of all the American people today by urging, if I may, the defeat of this rule and thus prevent the consideration of this monstrosity which is called an emergency housing bill, sent here because it is claimed an emergency exists. I wonder when we are ever going to reach the time in this country when we no longer have an emergency which requires the spending of the people's substance in wasteful and extravagant Government activities?

I wish to point out one other thing, and I want to be very frank about it: Just a week ago we voted for a civil rights bill in the House.

I have been informed by the author of an amendment, a man of honor, that he will introduce an amendment to this bill if the bill is considered on the floor, and I think I should read this proposed amendment to you. He was kind enough to give me a copy of it.

It provides, by adding on page 8 the following language, or new sentence:

> Notwithstanding any other provision of this section, the Association shall not purchase or make a commitment to purchase under this subsection any mortgage covering housing with respect to which there is (or is permitted to be) any discrimination against purchase, rental, or occupancy on account of race, religion, color, ancestry, or national origin.

If we are going to have a bill like this I believe all of you who supported civil rights legislation on the floor of the House, every one of you including those who have spoken today, will have to support this sort of an amendment. If we are going to have civil rights in school matters, in voting matters, and in other matters, then we should have the same equal civil rights, the same protection against discrimination in connection with the making of loans for housing guaranteed by this Government of yours and mine, which every citizen, regardless of race, color, or creed, pays taxes, is called upon to finance through payment of Federal taxes. I can assure you this amendment will have rather generous support, and that a great many people in America will be watching to see how some of the champions of civil rights last week will be voting on this particular amendment this week.

The issue may separate the so-called liberals from those of us who believe in a sound and responsible fiscal policy. I do not know, it may even finally decide who is truly progressive and really believes in these civil rights for which we voted and for which we stand.

Yes, this amendment will be the test of the sincerity of some of those who voted for civil rights legislation last week.

Mr. ARENDS. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Illinois.

Mr. ARENDS. The gentleman who is going to offer the amendment was called from the floor for a few minutes; but I am authorized to say that the amendment will be offered as the gentleman indicated.

Mr. BROWN of Ohio. I thank the gentleman.

Mr. O'NEILL. Mr. Speaker, I yield 5 minutes to the gentleman from Virginia [Mr. SMITH].

Mr. SMITH of Virginia. Mr. Speaker, I am opposed to this bill and I am opposed to this rule. The bill comes here under an inaccurate and untrue label.

The history is that 2 years ago when we were in a so-called brief emergency, there was a dropping off in housing starts. This bill, labeled "Emergency Housing Act," was brought in and passed by a voice vote under suspension of the rules in order to stimulate the housing industry. Two years have now passed, the emergency has passed, yet we are confronted here this morning with another bill labeled "Emergency Home Ownership Act" in an effort to get another billion dollars out of the back door of the Treasury under a label of "emergency" which no longer exists. That is the plain fact about this bill.

It is true that 2 years ago housing starts were off and there was a logical reason to pass this bill. Since that time, as you all know, the economy of the country has recovered. For the first 3 months of this year there have been 20 percent more housing starts than there were in 1958. There were something over a million housing starts in the first 3 months of this year. They are running well above the average of the past few years, and they are running very close to what they ran last year under the stimulation of the Emergency Home Owners Act.

Mr. Speaker, when the chips are down the people of this country are getting rather tired of spending more money than we have.

They are demanding a balanced budget. Now, this means taking $1 billion out of the Treasury by means of the back door. That billion dollars has a direct effect on your next budget, and I believe that the House realizes that we must exercise some rigid responsibility in the matter of spending more money than there is in the Treasury. I think all of you understand the method and the manner by which this money is appropriated. It never goes through the Committee on Appropriations. We never have a check on it, but when this bill is passed, that agency is authorized to go to the Secretary of the Treasury and have him hand over $1 billion without any further action by the Congress. Now, you cannot keep your finances straight with that sort of an operation or system. We have had discussions about it on the floor from the Committee on Appropriations and from others, and we have got to stop this back-door approach to the Treasury of the United States if we are ever going to have a balanced budget.

Mr. Speaker, before this session ends you are going to have another bill up here from the Committee on Ways and Means either to extend the emergency increase in the debt limit for another period or, if this sort of legislation keeps up until the end of this session—and

there will be other bills following this—if this keeps up, you are going to have another bill before you to again increase the permanent debt limit.

Now, gentlemen, I think it is time to stop, look, and listen to these things, because this is the first test whether this Congress is going to show some financial responsibility. But we must have some stop to these authorizations—and many of them are authorizations—that are coming before the Congress before this session ends that will increase the annual expenditures of this Nation by large sums.

Mr. Speaker, I hope that the House will vote down this rule and let it be known that we are going to have financial responsibility in this session.

Mr. ALLEN. Mr. Speaker, I yield 4 minutes to the gentleman from Idaho [Mr. BUDGE].

Mr. BUDGE. Mr. Speaker, the distinguished majority leader referred a few minutes ago to an attempt on this side to retain the status quo. When each of us in this Congress, no matter what our politics, thinks of the effect that this bill will have upon the fiscal affairs of this Nation, I think that all of us want to retain the status quo. I do not know of a Member of this body who wants to vote next week to raise the permanent debt limit of this Nation by $1 billion. That is what we mean by retaining the status quo. We mean that we want to finance this Nation and we want to finance the activities of this Government within the means we have with which to finance it.

Mr. Speaker, why do we have this constant eroding of the free enterprise system? Why do we continue at every opportunity to inject the Federal Government into the private affairs of the people of this Nation? The distinguished majority leader should recall this, that the effect of this bill will be not to help the little fellow; the effect of this bill will be to absorb the discount which is now being paid by the homebuilders, that discount to be absorbed by the taxpayers of this Nation. I give you this example. Suppose a young man has a $1,000 equity in a home which is appraised at $10,000 and which he desires to sell. If this bill is passed the 6-percent discount rate which has in the past been absorbed by the builders will now be absorbed either by the little fellow who has $1,000 of his savings in that home, or else it will be absorbed by the taxpayers of the United States. I doubt the majority leader, considering the things for which he declares himself, desires that the Federal Government pick up the tab, desires that the veterans and other small homeowners of this Nation pick up the tab for these large real estate builders who are building homes in the hundreds and thousands of units. Such a course would certainly be out of character to the spoken record of the majority leader of this distinguished body.

In simple language this is what the bill does: A homebuilder who desires to sell his product in the FHA and VA market must now absorb the discount which the home buyer would ordinarily have to pay to obtain an FHA or VA loan. The reason such loans are discounted is that interest rates fixed by law are not level with the market. The reason the builder must absorb the discount is that Congress by law refuses to let the buyer pay it. Consequently, at the present time the builder must take less profit since he and he alone must absorb the discount. Now under the provisions of the bill, the Congress is saying, "Mr. Builder, we are going to relieve you of having to bear the discount and we are now going to put that burden on the shoulders of the American taxpayer."

Also, Mr. Speaker, where is the compassion for the little guy about whom the majority leader so frequently speaks? The little guy veteran and nonveteran homeowner who must sell his home and sell it in the FHA and VA market, which is almost always the case. If he has an equity of $1,000 and the Government agency appraises the property at $10,000 a 6-percent discount loss would amount to $600. This discount means that the face value of the mortgage which the buyer is to assume will be $10,000 but the little guy selling his home receives back only $9,400. Six hundred dollars in savings of the little guy is wiped out and this bill does nothing for him. It does, however, saddle the $600 on the taxpayer and remove it from a builder if it is a builder who is selling the house.

This legislation is class legislation of the worst kind. It permits the savings of the little guy to be wiped out entirely or be reduced substantially and at the same time permits an increase in the profit of the builder. Such a result should never be brought about by action of the Congress of the United States and most certainly not when the price is a budget-busting $1 billion.

Mr. Speaker, I hope that this rule will be defeated.

Mr. O'NEILL. Mr. Speaker, I yield myself such time as I may consume.

I can see it is obvious that the coalition that was operating during the civil rights bill is back in operation. As we started this year there were those on the opposite side of the aisle who had rosy visions of November 8. The gross national product, as I recall, was going to hit somewhere between $530 billion and $545 billion. Now they have cut that back and they say that the gross national product is going to hit somewhere between $500 billion and $515 billion.

In the early part of the year the rosy picture was painted for us, and it was said that we were going to have less than 3 million unemployed in this Nation; that in November of this year more people were going to be employed than ever before in the history of the Nation and less people were going to be unemployed than ever before in the history of the Nation. But what is happening right now? We have over 4½ million people unemployed in this Nation. What are we facing toward? We are facing toward a recession similar to the one we had in 1958. What happened in 1958? There were over 5 million people unemployed in this Nation and our tax revenues dropped $12 billion.

Now is the time to act, before we find another half a million or a million more people are unemployed. The record shows that at the present time we have 20 percent less new home starts than we had a year ago at this time. What do you think brought this country out of the doldrums of the recession in 1958? It was the emergency legislation that we passed in that Congress.

We should not have to wait until the emergency arises. We should do a little planning. That is what the chairman of this committee and the members of this committee have done when they brought out this excellent piece of legislation. They are thinking of the future of America, they are thinking of the economy of America. This is emergency legislation; yes, it is an emergency, because it is going to forestall us from hitting a worse recession than we are in at the present time when we have 4½ million who are unemployed.

Mr. McDONOUGH. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield.

Mr. McDONOUGH. I do not know where the gentleman gets his figure of 4 million unemployed. I have a statement here from the Labor Department on the February unemployment figures, which show that there were only 3,931,000, and there were 800,000 less than in the same month last year. Now as to this question of increasing unemployment. We had a situation where weather affected the building industry and employment for quite a period of time. There were many factors influencing unemployment, but we are having a rising employment figure from month to month. The figure I gave was only for February. These figures do not include March.

Mr. O'NEILL. The gentleman just gave the February figure of 3,900,000?

Mr. McDONOUGH. That is right.

Mr. O'NEILL. We are now into the third week in April and I say that the figure is over 4 million, 4½ million that are unemployed in this Nation. It is about time, in my opinion, that the little fellow got a break from this administration. After all, if you want to look at the record back when Harry Truman left here in 1952 the Federal Government could borrow money on 90-day loans with interest at the rate of 1.52 percent. Today what is the Federal Government paying for loans? A rate of 4.375 percent. It is about time the little fellow in this country got a break. That is what the Democratic Party is fighting for, and that is what the majority of the Members of this House are fighting for.

Mr. Speaker, I hope the bill is passed.

Mr. ALLEN. Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. McDONOUGH].

Mr. McDONOUGH. Mr. Speaker, we have heard a lot of views and opinions on what this bill would do. I am speaking against the rule. I am against the bill because I believe it is inflationary, that it is a direct increase of a billion dollars on the national debt, that it will not provide relief to the home buyers, it will only provide relief to the homebuilders.

If the total amount in this bill were used in the next fiscal year it would build only 70,000 housing units out of a potential and anticipated 1,200,000 housing units that we are building on the anticipated annual rate at the present time.

Home ownership is one of the best deterrents to communism. Federally subsidized housing is the first step toward socialized housing, which would lead to communism. This is the first step toward federalized, socialized, subsidized housing.

We have gotten along pretty well with the program under FNMA, where FNMA has been discretionary on the type of mortgages purchased. This bill will apply only to $13,500 mortgages and to $14,500 mortgages in high-cost areas, if it is limited to the very small amount of the total building of the program. It contains no public housing, it contains no urban renewal, it contains no college housing, it contains no housing for the elderly. In fact, there is so little demand for it that even the builders throughout the country who have known that this bill has been pending before the committee, who knew about the hearings and knew the bill was coming before the House today, have not made any demand for it.

A $13,500 house is a restricted type of building today because the cost of land is high. When you add to that the cost of labor and material to build the house you exceed the $13,500 in most instances. So you are actually legislating for a select few of the homebuilders, giving relief to the homebuilders. I doubt if the home buyer will receive any value in the reduction of the rate of interest or the downpayment or the cost of the house. This is specialized, special-interest legislation for a select few of the homebuilders of the Nation. Only 70,000 houses will be built under it out of 1,200,000.

Mr. O'NEILL. Mr. Speaker, I yield 5 minutes to the gentleman from Alabama [Mr. RAINS].

Mr. RAINS. Mr. Speaker, I had not expected to speak on the rule, but I heard so many irresponsible statements—and that seems to be a good word that is being used here so much—that I felt somebody ought to give a little of the facts. And I am going to give the facts, and if anyone can dispute them, I will yield to anyone.

In the first place, my good friend, the gentleman from Virginia [Mr. SMITH] said there was not anything wrong with the housing starts. He is in total error. The housing starts are nearly where they were 2 years ago, taking into consideration the seasonal adjustments, when we passed in 30 minutes the bill that he talks about. The housing starts are down 20 percent from last year. Housing starts have been plunging at the most rapid rate of any year since 1950 with perhaps one exception. This is the very same type of bill that the Congress passed readily in 1958, in 30 minutes.

Somebody said that this bill was a bill for special interests. If you call the people who want houses up to $13,500—if they are not the small, little people of this country, the veterans, and the people under FHA—if you call them special interests, then this bill is a special interest bill because they are the people who will benefit. This bill is limited to housing for the low-income people. I wonder, and before I get through with the debate, I will be able to show it, if nobody is concerned about the 7 percent, 8 percent, and 9 percent discounts in the State of California. In other words, where you walk in to borrow money from the lender, and you want $13,000—he says you have to give me $1,000 and I will hold that out, but I will charge you interest on the whole deal. That is the situation that prevails in America today. Did you know because of the lack of mortgage credit in a dozen States of the Nation, FHA is bumping against the usury statutes? Well, will somebody stand up to deny that? In other words, everything is so wonderful for the homebuilder or the buyer who can pay 6 percent interest and from 6 percent to 12 percent discount.

Somebody said something about it being inflationary. I quote from the Department of Labor. These are not my figures, but these are from the Department of Labor commenting on the last cost-of-living index:

> The cost of services—particularly those associated with housing and medical care—provided the main upward thrust. Mortgage interest rates, which have risen persistently for the past 18 months, contributed appreciably to the rise in the cost of housing.
>
> The February index for mortgage interest was 8 percent above a year ago.

It is all right to talk about inflation. It is all right to talk about financial responsibility. But, it is not all right to use irresponsible statements in making these arguments. The subcommittee of which I have the honor to be chairman, has spent long months in a study of this bill. We have investigated interest rates and discount rates intensively. We did not do it, but the FHA and the VA did it for us. Investigation was made in practically every mortgage market in America. We have a printed volume on it. This is not our conclusion, but the facts as reported by the FHA and the Veterans' Administration. It is alarming to see the discounts, the unconscionable and unreasonable discounts, being charged to people who can only buy a house up to $13,500. Do you not ever believe that the homebuilders are absorbing the discounts. They are forced to pass them on to the home buyer and the home buyers cannot meet that extra charge.

Of course, the administration must be a little disturbed whenever they see this type of bill come on the floor of the House. I notice that they have called a meeting at which they expect to lower the downpayments under the FHA, as we authorized them to do in last year's Housing Act. I am sorry that some of my good friends were not present when we had this bill up in committee to hear the testimony of Mr. Mason, the administration's housing chief. He said that this is going to be the best year creditwise of any year. This was in January. Events have certainly proved him wrong.

The SPEAKER pro tempore. The time of the gentleman from Alabama [Mr. RAINS] has expired.

Mr. O'NEILL. Mr. Speaker, I yield the gentleman 3 additional minutes.

Mr. RAINS. Speaking on the economy, I am not saying we are in the middle of a depression, but I will say the bloom is off the rose. Before we get through with the debate I expect to take the indicators of the Administration itself and prove beyond peradventure of doubt that we are in a downward nosedive from the standpoint of unemployment and from the standpoint of housing starts. The 20-percent decline in housing starts has already meant the loss of 300,000 to 400,000 jobs in the industries which build and supply housing.

Somebody said this would be inflationary. The last time we passed a bill exactly like this—the testimony is in the record before you—the cost of a house in the $13,500 bracket went down a thousand dollars instead of going up. That is the way to lower the cost of housing. The true increase in the cost of housing is wrapped up in the tremendous increases in interest and discount rates.

Mr. McDONOUGH. Mr. Speaker, will the gentleman yield?

Mr. RAINS. I yield.

Mr. McDONOUGH. This bill applies to mortgages that must be sold to FNMA not to exceed $14,000 or $13,500 in high cost areas.

Mr. RAINS. That is right.

Mr. McDONOUGH. That is all it affects, as far as FNMA is concerned. The bill provides for a direct loan to FNMA for this purpose.

Mr. RAINS. Now, wait a minute. Please do not put words into my mouth. It is not a direct loan.

Mr. McDONOUGH. That is what your own bill contains. You wrote this yourself, and you should know.

Mr. RAINS. Indeed I wrote it, and I know what is in it. It is not a direct loan.

Mr. McDONOUGH. That represents 70,000 units, if you build every one of them out of the estimated 1,200,000 units this year.

Mr. RAINS. All right. I will answer that. I remember voting for the last one just like this. The administration admits that it was the 1958 housing bill that revived housing starts. That sparked us out of the recession in 1958. If did it then, why would it not do it now?

Mr. McDONOUGH. Oh, you had a different situation then.

Mr. RAINS. What was the difference?

Mr. McDONOUGH. You had greater unemployment, and many other things. As a matter of fact, the Senator from California, the Democratic Senator, at a meeting of a loan association recently made the statement that this bill was unnecessary.

Mr. RAINS. I do not know about that. I am only interested in whether or not we have a program that will help the small average American get a mortgage loan when he cannot get it now.

In your own home city the discount rates on FHA and VA loans range up to 10 percent, 12 percent, and higher.

Mr. McDONOUGH. And no demand for this bill.

Mr. RAINS. Unless we pass this bill there will be no hope for the little man to obtain GI loans or FHA loans to buy the home he needs.

The SPEAKER pro tempore. The time of the gentleman from Alabama has again expired.

Mr. ALLEN. Mr. Speaker, I yield 1 minute to the gentleman from California [Mr. YOUNGER].

Mr. YOUNGER. Mr. Speaker, I have always refrained from trying to make a talk here on the floor of the House on a subject about which I was not informed. I have spent my entire life in the housing field and with the FHA from its inception.

No reason exists for the adoption of this bill. The question of discounts raised by the gentleman from Alabama [Mr. RAINS] is not cured in this bill; there is nothing in it that will cure the discount abuse; as a matter of fact, it will give Government cash to the lender at par for his mortgages which he has taken at big discounts.

Not a Member of this House thinks in his own mind that this bill can ever become law, and I believe the House will be wasting its time to discuss and debate this bill any further.

Personally, I am against the rule because the bill does not carry any benefits for the little man. It is designed solely for the lenders to take advantage of all the discounts which they can, then let the Government hold the sack.

If you are going to furnish tax money or Government credit for the benefit of a few then put the Government into direct lending.

Mr. HIESTAND. Mr. Speaker, you have heard enough, I am sure, to convince you that the word "emergency" in the title of this bill—Emergency Home Ownership Act—represents a gross exaggeration. There is no drop in these housing starts today, and the figures will bear me out—the rate of a million, two hundred thousand, which is a very high level.

We are debating the rule, Mr. Speaker, and it is important that we vote on the rule. There are, of course, a great many Members who always vote in favor of a rule because they want the House to work its will on the legislation, and that is ordinarily very proper. But this rule, Mr. Speaker, is based upon a false premise. The preamble of the bill states that its purpose is to "halt a serious slump." I deny that statement and say that it is a false premise upon which we are asked to vote for the rule.

I would like to say something about the rest of the title of this bill, the home-ownership part. It is in fact, and should be so called, an "anti-home-ownership bill," and I want to take a minute or two to point out that this bill discriminates against hundreds of thousands of homeowners who every year must sell their homes in a normal FHA and VA market in competition with the builders.

This bill has much to say about sympathy for the builder who sees his profit reduced because he must absorb the VA or FHA discount. However, where is the compassion for the "little fellow," the owner of a house in the $10,000 to $14,000 sales bracket, who because of an increase in his family or employment reason must sell his home?

At the present time this home owner who might have a $1,000 equity in his house must absorb the discount if the purchaser requires FHA or VA financing. This $1,000 equity represents savings. Therefore, if the seller of an existing house must absorb a discount of $400 or $500 that is the same as wiping out 50 percent of his savings or equity in the house. This the owner of a house must do today, and this the owner of a house must do even if this bill is passed.

The owner of an existing house must compete with the speculative builder, who would be thus subsidized.

Mr. Speaker, every one of our previous housing bills had had one or two clauses in them that were '"musts"; they were needed. Mr. Speaker, there is not a clause in this bill that is needed, not one. Nothing is essential. I think we should bear that in mind when we are discussing the bill as well as the rule.

I believe, since the rule is based upon a false premise and there is no particular reason for the bill, that the rule, logically, should be defeated.

Mr. Speaker, I yield back the balance of my time.

Mr. ALLEN. Mr. Speaker, I yield such time as he may desire to the gentleman from New York [Mr. KILBURN].

Mr. ALLEN. Mr. Speaker, I yield such time as he may desire to the gentleman from Illinois [Mr. DERWINSKI].

Mr. DERWINSKI. Mr. Speaker, I oppose the rule since there is no emergency in home building this year. Therefore, the very title applied to this bill is exaggerated, since, I reemphasize, an emergency does not exist in the homebuilding industry. This bill rather than being called the Emergency Home Ownership Act should be called the "Political Home Ownership Act." May I briefly point out the facts in mortgage financing: The effects of tight money are immediately felt in the mortgage market and funds in that market are always curtailed more sharply than in other sectors as interest rates rise. This is reflected in a reduction in housing starts and a decline in the volume of home building. A decline in the volume of business activity is normal in order to keep the economy on a sound basis and to keep borrowing within the sums of money available in the capital market. Any action by the Treasury to increase the amount of money available would be directly opposite to the program of the Federal Reserve System in curtailing the money supply to prevent inflation. We should certainly not support such programs which work at cross purposes.

Mr. Speaker, 1959 saw a high level of activity in the homebuilding industry. The value of new residential construction was up 25 percent. The number of new starts in 1959 was approximately 1,340,000. This is the second highest year of housing starts in the history of our country. This is conclusive proof that homebuilding is getting its fair share of the available long-term investment funds.

Housing starts for 1960 are estimated by the experts to be well over a million units and probably in the neighborhood of 1,200,000. In view of the fact that family formations currently are running at about 900,000 per year, it is self-evident that we are improving our housing inventory and that home building is prospering. New starts in the last few months of 1959 were under the new starts for 1958. This, however, is nothing to be alarmed at and can be expected when we have a near record year as we did in 1959, keeping in mind that we added 400,000 more new units last year than there were family formations. The concern for a slight dip in homebuilding should not be exaggerated or overemphasized. No business or industry in America can expect to continually set production records year in and year out. Our productive capacity is such that we can produce more than we can use.

In spite of these facts, Mr. Speaker, some people in Congress called for an emergency housing bill. I, personally, find the emergency hard to find. This bill would call for the Federal Government to put up $1 billion to finance homes. Where would this billion dollars come from? In all probability, it would come from exactly the same investors who are now lending in the home mortgage field so that, in reality, little if any new money would be brought into housing. On the other hand, the public would have to subsidize this governmental action since the Federal Government is currently paying close to 5 percent on new Government bond issues. This money would be loaned at from 5¼ percent to 5¾ percent, and the difference is not sufficient to pay for the cost of the Government obtaining this money from new issues. In other words, the overhead and cost of getting the money and putting it into Government insured mortgages would mean a net loss to the Treasury. In addition, this money would not go as far as it would if it were left in the private investment field since it would be loaned for longer periods of time.

At the present time there is sufficient mortgage money available to continue the boom in homebuilding and to enable the public to get the maximum loans available. On top of all this, the Treasury Department is exceedingly hard pressed to get needed funds for day-to-day debt transactions and Government liabilities. They are paying the highest rate ever for short-term money, and it has been 30 years since the long-term rates were so high. Again, some people in Congress would like to add additional woes to the financing of Federal Government operations by requiring an additional $1 billion to be sought at this time. Obviously, this is neither logical nor expedient.

Everyone in Congress, I am sure, including myself, wants to see a better housed America and wants to see a continuing prosperous economy. To my knowledge, no single Member of Congress or either party has a monopoly on

housing legislation. I am very interested in housing legislation, but I think that it must be reasonable and appropriate. Today, the homebuilding industry is getting a higher percentage of the long-term funds than is any other industry, and the percentage is higher today than it has been in the years gone by. At a time, however, when homebuilding is very prosperous, it would be unfair and illogical to try and strip long-term investment capital from other segments of our economy that is needed just as badly in order to boost an industry which is already getting at least its fair share of the long-term capital available. Our State and local governments need capital for improvement of sewerage, community facilities, schools, hospitals, and other desirable necessary improvements. Many of these are in far more serious condition than is homebuilding. I believe that the majority of the American citizens are aware of this and are completely unaware of any emergency in housing at this time.

Mr. ALLEN. Mr. Speaker, I yield the balance of the time on this side to the gentleman from Illinois [Mr. ARENDS].

The SPEAKER. The gentleman from Illinois is recognized for 5 minutes.

Mr. ARENDS. Mr. Speaker, the rule before us makes in order a $1 billion housing bill. This presents to us a key vote. On this there must be a record vote. This is where we determine, for all the people to know, those of us who believe in fiscal responsibility and those who are more interested in their own political fortunes.

By our votes they shall know us. Government spending is popular with certain individuals, certain groups, and certain sections of the country that benefit. That is understandable. Everyone likes a spendthrift, but no one likes an economizer. It is easy to spend. It is hard to economize. That is the issue here on this rule.

Mr. Speaker, the vote on this rule will serve to separate, as emphatically as anything we have done, the spenders from the economizers. On this vote we will divide the budget balancers from the budget busters. On this vote we will decide who is interested in solely his own political future and who is really interested in our country's economic stability.

This bill is presented to us as an emergency measure. I choose my words, Mr. Speaker, and I choose them carefully when I say, that to label this bill as an emergency measure is fraudulent. There is no emergency in housing. On the contrary, new dwelling units were being started at the rate of 1,100,000 to 1,200,000 during the first quarter of 1960.

What does the term "emergency" really mean? It can be defined in many ways. Perhaps there has been a decline in the numbers of homes being built. Perhaps there has been a decline in the mortgage money available. In the construction business, as in all business, there are the inevitable fluctuations. But a mere fluctuation does not constitute an "emergency," as the committee reporting this bill would have us believe.

The fact is, and the committee reporting the bill knows it, there actually is no emergency. There is none whatsoever. To report a bill to meet an emergency is one thing, but to present us with a bill on the grounds that there is an emergency, when no emergency exists, is something else.

I should like to have an explanation of the word "emergency." Is the emergency to mean more expenditures from the Federal Treasury simply to serve political purposes? Is an election an emergency?

The only emergency there can possibly be is the emergency that would be created if the fiscal soundness of our Government were undermined by the passage of legislation that would add billions to spending. We must evaluate this so-called emergency housing bill upon a basis of the whole legislative picture. This bill, along with the other spending proposals that are pending, would add billions to the budget. The adoption of this measure would open the flood gates of Federal spending.

This bill is a challenge to the Congress on the question of fiscal responsibility. This is the test for us. This constitutes a determination of whether we wish to add unnecessarily to the cost of government and thereby add to the pressures of inflation.

There is no emergency in the home mortgage market. Nineteen hundred and fifty-nine was a record year for mortgage investment activity. All types of private mortgage lending institutions supplied increased amounts of credit for home buyers. Insurance companies invested $2.1 billion in mortgages—nearly $350 million more than in 1958. Savings and loan associations invested $7.5 billion—almost $2 billion more than in 1958. Banks invested $4.4 billion—an increase of $200 million over 1958.

In addition, large amounts of credit were made available to the home mortgage market in 1959 by Government agencies. The rapid growth of our economy last year resulted in heavy demands for capital and credit from all sectors of our economy. These demands are being met. If there ever was an emergency in the mortgage credit market in 1959, there is none now.

There is no emergency in our overall economy. Our country's total output of goods and services reached an all-time high at the annual rate of $498 billion during the first quarter of this year. Total personal income has also been rising, reaching an alltime high of $393 billion in the first quarter of this year.

As I stated at the outset this is a key vote by which the American people will be able to know by the record those of us who believe in fiscal responsibility and those who would spend with abandon. This is the first of a number of pending measures that would add billions to the cost of Government. This is where we decide whether we really want to keep our Federal budget in balance, whether we really want a stable dollar, whether we really intend to reduce our national debt, whether there really is any hope at any time for tax relief. If, during this period of record employment and personal income—if during this period of prosperity we cannot keep the Federal budget balanced—we never will be able to reduce our national debt and there will be no hope of any relief from the heavy burden of taxes.

Mr. Speaker, I urge that the House reject this rule.

Mr. O'NEILL. Mr. Speaker, I yield myself the balance of the time.

Mr. Speaker, it is interesting to see how the old guard of the Republican Party is really champing at the bit today. As a matter of fact, it appears that the legislation is a bit controversial but not so controversial that the old guard would not want to cut off the 3 hours' debate that the rule provides for. I am amazed that the second in command of the Republican Party wants to deny the Members of this House the right to hear a full and open debate on the bill which only 2 years ago passed this House in a matter of 30 minutes. I was amazed at the remarks the gentleman made that, "by their votes ye shall know them." How can he forget 1948, "by their votes ye shall know them"?

Mr. ARENDS. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman from Illinois.

Mr. ARENDS. Let me just simply say to the gentleman I am against wasting time as much as I am against wasting money.

Mr. O'NEILL. "By their votes ye shall know them." Of course, he says we are having a great year. Actually he looks back to the rosy predictions that were made in early January of this year. He said that the gross national product was supposed to hit $540 billion. Now they do not know that it is going to hit $500 billion. They said that unemployment was going to be below 3 million people, but at the present time it is 4½ million people, and we do not know where it is rising to. It is about time, Mr. Leader, on your side, that you start to think of the people, the little people, the middle class people, the upper middle class people, the people who comprise 90 percent of this Nation, and that you stop thinking of the great lenders of this Nation.

Mr. Speaker, I hope that the rule is adopted.

Mr. HIESTAND. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman from California.

Mr. HIESTAND. The gentleman's solicitude for the little people is quite understandable. It is understandable to all of us. How about the small homeowner who has to sell his house as against the big builder? The big builder would benefit by this bill and the small homeowner is discriminated against. How about the little fellow?

Mr. O'NEILL. I do not agree with you at all. I think that the rule should be adopted so that we can have 3 hours in which we can really discuss this matter openly and fairly so that the Members can be informed.

Mr. BAILEY. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman from West Virginia.

Mr. BAILEY. I would like to ask the Republican "whip," in his 5 minutes addressing the House he mentioned the question of fiscal responsibility four different times. I would like to ask him if he did not vote for the mutual security authorization last week.

Mr. ARENDS. Yes, sir; I voted for the mutual security authorization in the best interests of America.

Mr. O'NEILL. Mr. Speaker, I move the previous question.

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER. The question is on the resolution.

Mr. ALLEN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 214, nays 158, answered "present" 1, not voting 58, as follows:

Frazier	Morrison	

So the resolution was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. McCormack for, with Mr. Halleck against.

Mr. Keogh for, with Mr. Lafore against.

Mr. Morgan for, with Mr. Devine against.

Mr. Buckley for, with Mr. McIntire against.

Mr. Rooney for, with Mr. Pelly against.

Mr. Fenton for, with Mr. McGinley against.

Mr. Walter for, with Mr. Scott against.

Mr. Delaney for, with Mr. Taylor against.

Mr. Holtzman for, with Mr. Jackson against.

Mr. Jones of Alabama for, with Mr. Dooley against.

Until further notice:

Mr. Montoya with Mr. Gavin.

Mr. Morris of New Mexico with Mr. Martin.

Mr. Morrison with Mr. Riehlman.

Mr. McCORMACK. Mr. Speaker, I voted "aye." The gentleman from Indiana [Mr. HALLECK] is absent on official business. If present he would have voted "no." I have a live pair with the gentleman from Indiana, and therefore withdraw my vote of "aye" and vote "present."

The result of the vote was announced as above recorded.

EMERGENCY HOME OWNERSHIP ACT

Mr. SPENCE. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 10213) to amend the National Housing Act to halt the serious slump in residential construction, to increase both on-site and off-site job opportunities, to help achieve an expanding, full-employment economy, and to broaden home ownership opportunities for the American people.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 10213, with Mr. FORAND in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule the gentleman from Kentucky [Mr. SPENCE] will be recognized for 1½ hours and the gentleman from New York [Mr. KILBURN] for 1½ hours.

Mr. SPENCE. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, the three great essentials to civilized man are food, clothing, and shelter. The Government, recognizing that, has established a program to stimulate housing for its citizens through FHA insurance. It has made it possible for many of our citizens to obtain homes. Through VA direct and guaranteed loans our veterans have been helped.

This bill is to carry on further a general housing policy that has been established so that our people can obtain homes on fair terms and at reasonable rates of interest.

We all know that many of our citizens who have endeavored to purchase homes have been the victims of high discounts and high interest rates. I believe that the passage of this act will furnish some assistance to those people who desire homes.

I am not going to discuss the details of the bill, but I will say that I favor it.

Mr. Chairman, I now yield such time as he may desire to the gentleman from Alabama [Mr. RAINS], chairman of the subcommittee that reported this bill.

Mr. RAINS. Mr. Chairman, the bill before us today is H.R. 10213, which was reported by the full Banking and Currency Committee on March 15 by a vote of 18 to 7.

The bill has four main objectives.

First. It strives to help the consumer, the home buyers;

Second. It seeks to restore health and vitality to the key homebuilding industry;

Third. It seeks to be of help to a sagging economy; and

Fourth. It intends to help reduce the exorbitant and unconscionable discounts prevalent throughout the Nation on home loan mortgages and to reduce the interest rates which are at an alltime high.

Those are the primary purposes of the bill.

Listening to some of the debate on the rule, one would think that this is a new bogeyman with some kind of forked tail and horns, but actually this is the same kind of bill which the Congress over many times in the past has sponsored to help the homebuilding industry of this country.

It seeks to provide a revolving fund of $1 billion for the Federal National Mortgage Association to buy mortgages on which the Federal National Mortgage Association will make a profit for the Government of the United States. This is not a raid on the Treasury of the United States; this is not a sop to some homebuilder; this is directly aimed at and intended to be of benefit to the lower income groups of America in getting a home. It is the same method that we have used over the years to raise the percentage of home ownership in this country from about 30 percent in the thirties to better than 60 percent today.

It has been one of the main weapons that has helped FHA to become one of the most highly respected functions of this Government.

This bill will not cost any money. FNMA pays all of its own expenses, including interest to the Treasury. In the last year alone it returned in profits to the Government $16.3 million.

The accumulated net income of the Federal National Mortgage Association's special assistance program is $33.9 million over and above all costs, administrative, of all types.

It is not socialism, because actually it is a support to the private industry market. It is not liked and revered by the money lenders, and I sometimes think this administration is full of them. It is not liked by the people who want to charge a $1,000 discount on a $13,500 loan and then collect interest across the board on the whole amount. Sure, they do not like it. But, it comes at a time when the housing starts of this Nation have been dropping every month from January and today are 20 percent below what they were a year ago.

Presently we are starting houses at the rate of about 1.1 million a year. Last year we built 1.35 million. And, I would like to point out that the thing that helped us to build 1.35 million last year was the 1958 bill, the prototype of this bill, because it took more than 6 months, from April 1958, to put that bill into full operation. So, the pride that the opponents of this legislation display over last year's record is chargeable in large degree to the legislation we passed in 1958.

Somebody said we are not in an emergency. Well, I believe it would be better to take action to bolster an industry that certainly is sagging—and nobody can deny that—than to wait until the floor drops out from under it and more than half a million people are discharged from jobs in this country in the homebuilding and supplying industries.

I heard this morning that this bill would be inflationary and was labeled as a "spenders" bill. You know, when you get to the point where you call names and make statements that are totally irresponsible, it shows how completely in default and bankrupt the opposition to this bill is with reference to ideas. I would like to hear somebody answer the hard, cold facts of what we face up to, not what somebody writes in the paper about political "baloney" or "political payola"—nice brand names—but they do not get a home for your boys who want to buy one up to $13,500, or $14,500 in the high-cost range, where they cannot get it today.

I said awhile ago in the debate on the rule that the Labor Department, which makes our statistics now, said that one of the reasons for inflation last year—and I never hear my friends talk about inflation of interest rates, and I would just like to say parenthetically that the greatest inflation that has come to America under this administration—and do not forget that this fall when you walk across the hustings—has been in the inflation in interest rates on the backs of the little people of America.

The thing that is wrong with our economy today and the inflation proposition is the exceedingly high cost of money. Suits have been filed in the State of Tennessee and in the city of Baltimore in which the Attorney General is asking the FHA to be barred from doing business in the State because it violates the usury statute.

It is fantastic. And what can a fellow do, one who is on a salary, when he can pay only $50 or $60 a month on a house? How can he stand the high discounts and high interest rates? In the last 6 years this is what has happened. If you had built a house 6 years ago, the same house today would cost you $4,500 more in interest. That is in interest alone. That would mean a bathroom and another bedroom. Now, where does that go? That does not go to the appliance dealers or the lumber dealers. That goes into the pocket of the money lenders of America. That is where it goes. And why? Because they have no competition and because the administration's hard money policy has driven interest rates sky high.

Sure, I realize that this bill will build only about 70,000 or 80,000 houses in this country, but that is a good many. But once you turn this money into the mortgage credit channels of the country—we tried it, not just in 1958, but year after year—you will see other money moving in at a reasonable price. I am not against people who are in the mortgage credit business. I think I can prove by the record that I am one of their best friends in helping them with the right kind of legislation.

But I am against the unreasonable interest rate squeeze that is being put on people who cannot pay, and this bill is intended to help relieve that situation. I do not know if you want to know what the discount rates are in your town, but if you do, you can check a pamphlet that the Subcommittee on Housing has published in which we list practically every city in America, showing how much they are charging for discounts and interest rates in that city.

Somebody said that this would be inflationary, and would increase the cost of homes. That is absolutely not true. That is absolutely an irresponsible statement, because here are the figures. In 1958, after we passed a bill exactly like this bill, the cost of housing went down $1,000 a unit instead of going up. The same thing will happen now if we enact this bill into law.

Now I would like to make this statement. We talk about how well we are doing in housing—and I know somebody will stick up his ears at this—and we are proud of the programs that we have. And they have been good. But do you know where we are actually with reference to housing? We are building fewer houses per capita today than we built in 1925. That is right, horse-and-buggy days so far as providing homes for the American people is concerned. We took a great step forward to get us out of the same kind of disparity on highways last year and the year before when we put in a multibillion program for highways in America. But we never seem to realize that the basic center of American citizenship is wrapped up in the homes of this country. I do not know how you feel, but I am frankly not interested in the political end of this for myself. I have been in politics a good many years. I have been sitting on this committee for 16 long years and I have brought bill after bill like this to the floor of the House.

I never yet have seen anybody suffer from casting a vote to help the people of lower incomes in America become home owners. I mean that sincerely. Whether it is politics or not, it is the thing nearest to their hearts.

Do you realize that out of the billions of dollars FHA has guaranteed in this country the nonpayment rate is less than one-half of 1 percent? I have some friends who tell me, "You are going to bust this Government sometime with all the guarantees you have on housing in America." Do you know that FHA through the operations of FNMA and other agencies has a profit of nearly a billion dollars over and above all expenses, lying over in the FHA treasury? Do you know also that it was by these methods we are talking about today that that came about? They charge us with fiscal irresponsibility, but what we are really doing is to make a nation of home owners out of the American people clear down to the little fellow who cannot pay up to $35 or $40 a month.

Mr. Chairman, talk about public housing. There is no public housing in this bill. I wish we could find a way to get housing for that income group without public housing. This is the closest thing you can get to it in the private-enterprise way. If you are not going to be for supporting and helping a man buy a $13,500 home, do you want to put him in the poorhouse or do you want to put him in public housing? Or do you want

him to live in a cracker box or a piano case somewhere? There is no issue more dear to the heart of the average American than getting a home for himself and his family.

When I listen to all of this misleading propaganda that comes in about balancing the budget, let me say that this does not take any billion dollars out of the Treasury of the United States. It utilizes the money only as the mortgages are bought and the repayments are made and go back to the Treasury of the United States, with a profit. If you would believe some of the prophets of doom about the finances of this country that I have been listening to, you would think we were taking the taxpayers' money and building free houses for these people, and that they did not pay for them. I get tired of that kind of irresponsible talk. If a man does not know any better I excuse him, but I am sure these gentlemen know better.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield?

Mr. RAINS. I yield to the gentleman from New Jersey.

Mr. WIDNALL. I would like to know where the billion dollars comes from if it does not come from the taxpayers.

Mr. RAINS. I did not say it did not come from the Treasury. I said it did not come all at once. It is repaid. It is not a grant. The Government is making profits out of the FNMA operations. Is not that right?

Mr. WIDNALL. That is true, but any part of it at all that is taken this year unbalances the budget by that much. Is not that so?

Mr. RAINS. That will be true. But always remember that the biggest unbalanced budget I have ever heard about since I have been here was in the year 1958. It came in fiscal 1959, as a matter of fact. My distinguished friend served on the committee and he understands and knows what this is all about. The thing that made that $12 billion deficit in 1959—I do not know the exact figure, but that is approximately what it was—was the very thing we are trying to prevent with this bill, a decline in the gross national product caused by the last recession. You let housing starts fall below a million, and they are only 115,000 above it, and you will see every idea of a balanced budget go out the window.

We can only balance budgets in this country when people work. We can only balance budgets in this country when people make profits. We can only balance budgets in this country when everybody is employed. We cannot balance the budget by turning down legislation such as this which generates 10 times the amount of money for the building industry and all other kinds of activity that is involved than the legislation would cost. I tell you—you can laugh but you cannot prove otherwise—this is the best way to insure balancing the budget. We either go up or we go down and we are not going to sit exactly on the status quo. So this bill is not inflationary. This bill will not unbalance the budget. This bill will mean we will have a bigger surplus at the end of the year and, certainly, at the end of next year than we will have otherwise if this bill is passed.

I mentioned the housing start figures a moment ago. They are at an extremely low point. Yet, I can remember when we had the hearings on this that the distinguished gentleman who is the head of the Housing Administration pooh-poohed the idea that they were going to go up and said they were going to go up. But the simple truth of the business is that some effort has been made to charge it all off to the weather—these people forget that the figures we have been talking about are adjusted for seasonal factors such as weather. Some effort has been made also to say that nobody wants this bill, which is a false charge. Some effort has been made to say that not even the homebuilders want it. I suggest that the gentleman from California read what the builders from Los Angeles and San Francisco said. I could suggest also that the gentleman from New Jersey interrogate good men like Mr. Mitnick, who was president of the National Association of Home Builders, and who is one of his distinguished compatriots. See whether they want it or not.

Mr. McDONOUGH. Mr. Chairman, will the gentleman yield?

Mr. RAINS. I yield.

Mr. McDONOUGH. I do not dispute the fact that the gentleman had testimony from the homebuilders in favor of this bill. As a matter of fact, if I were a homebuilder, I would be very much in favor of this bill. If I can sell my $13,500 mortgage at par to the Government, I am going to sell as many of those mortgages as I can. Now I am not going to guarantee, if I do that, that the fellow who buys the house is going to profit one bit either by lower payments or a lower rate of interest or any better housing. I am going to take a profit out of it, and that is what this bill will do.

Mr. RAINS. We heard the gentleman or somebody make that statement this morning. That statement is in error. Certainly, I know the homebuilder is passing it on. I know that both the homebuilder and the high interest man is passing it on to the consumer. I know it because I have been through some of the situations myself. As I understand it, this bill would help to alleviate that kind of situation instead of making it worse.

Mr. Chairman, one other thing and then I am through. There are some items I want you to keep in your mind as you consider legislation this year. In March, and these are unassailable figures or I would not quote them because I have already learned long before now not ever to get up here and make a statement unless you can prove it. Unemployment in March was 4,200,000—only 3 percent below a year ago. And current unemployment on a seasonally adjusted basis equals 5.4 percent of the whole labor force and includes 1,200,000 men and women who have been jobless for 15 weeks or more. Average working hours in manufacturing declined for the third successive month. Press reports of layoffs in offices, plants and other industries are commonplace—read the Wall Street Journal today or for any other day.

Business activity continues to show many serious weak spots with declines generally outweighing gains in recent months.

Total business inventories rose $2 billion in the first 2 months of this year. These now amount to $91.4 billion, nearly back to the level reached just before the 1957–58 recession. The replenishment phase is now over.

Overall industrial production declined in each of the past 2 months. The daily rate of auto output has dropped 17 percent since January, while inventories have piled up past the million mark. The steady drop in steel output has cut operations below 80 percent of capacity. The slow market for home appliances has cut sales of gas appliances, electric ranges, refrigerators, washers and dryers, all below year ago levels. At the same time, consumers have steadily gone deeper into debt. Outstanding consumer installment credit has jumped by more than $5 billion over the past year. This is an increase of 16 percent—more than triple the rate of rise in personal income.

Farm income steadily slips lower. The annual rate in the first quarter of this year was only $10.3 billion. This was 15 percent below a year ago and 20 percent below election time in 1958.

Total contracts awarded for all types of construction have trailed year-ago levels for the past 8 months. While most categories have shown declines recently, the sharpest drop has been in housing. The seasonally adjusted annual rate of housing starts in March—1,115,000—was down 20 percent or nearly 300,000 units from the year ago rate. Further declines are indicated by the low level of FHA applications—down 30 percent from a year ago in March—and VA appraisal requests—down 45 percent.

These factors have been clearly reflected in the stock market. The Dow Jones Index is now approximately 10 percent lower than last December and in this period the total value of stocks on the New York Stock Exchange has tumbled $30 billion.

Main hope of the business optimists is now the forecast of plant and equipment spending. According to a Government survey, this would rise 14 percent over last year, but already doubts are being expressed about this forecast which was made very early in the year when optimism was the order of the day. Machine tool orders, usually an early indicator of any rise in this spending, have failed to increase, and at least one industry—railroads—has already lowered its sights.

Some newspaper reports have recently indicated a rise in department store sales. While it is difficult to adjust fully for the effect of Easter it should be kept in mind that these account for only 6 percent of all retail sales and do not necessarily indicate trends in the other 94 percent.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield?

Mr. RAINS. I yield.

Mr. WIDNALL. Why is it that any figure that shows an increase must be

explained away, while everything that shows a decrease is emphasized?

Mr. RAINS. I have not found a figure that shows any increase. I said it was expected there would be an increase around Easter, but I do not have the figures.

Mr. WIDNALL. I find it very difficult to follow the argument on the other side of the aisle many times, particularly with respect to the stock market. I remember that many decried an increase in the price of stocks and all the money that was being made in the stock market. Now the figures are being given today to show that everything is wrong with the United States because stock prices are going down. It is only off 6 percent. Do you want the stock market to go up and continue to go up?

Mr. RAINS. I am merely stating what the facts are in support of the case which I am presenting to the Congress. They are not warped. They are not twisted. The times are not what some people would have us believe they are. We need to pass this bill to prevent a recession so that you will have a surplus in the budget next year, not to mention the need to put the unemployed back to work.

Mr. EVINS. Mr. Chairman, will the gentleman yield?

Mr. RAINS. I yield.

Mr. EVINS. I wanted to point out in connection with the testimony before the House Appropriations Committee, of which I am a member, the testimony of Mr. Zimmerman, Federal Housing Commissioner, page 923, a corroborating statement of the gentleman from Alabama. He has made a very interesting statement and we always listen to him with profit. Commissioner Zimmerman points out that the housing starts are not as much as they have been in the past, but he also disagrees with the high interest rate. He says that is the crux of the problem.

So this testimony before the Appropriations Committee corroborates just what the gentleman from Alabama has said.

Mr. RAINS. I appreciate the remarks of the gentleman.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield further?

Mr. RAINS. I yield.

Mr. WIDNALL. The gentleman spoke about the number of employed and unemployed in this country just a little while ago. I have figures which I am sure are correct which show the average number of people employed in the first quarter of 1959 as 63.1 million. For the first quarter of 1960 the figure is 64.3 million, or up 1.2 million from the previous year.

The average number of unemployed for the first quarter of 1959 was 4.6 million; for the first quarter of 1960 it was 4.1 million, or down one-half million or 10 percent from the previous year. This certainly seems to bear out the statement that 1960 is showing an improvement over 1959.

Mr. RAINS. The gentleman surely does not mean to insist that conditions are better now than in 1959.

Mr. WIDNALL. Yes.

Mr. RAINS. Why does not the gentleman stop to remember that he does not take into consideration the extra 2 million people who went into the labor market; what happened to them?

Mr. WIDNALL. These figures show there were a greater number of people employed.

Mr. RAINS. Does the gentleman mean to tell me he can feel complacent when there are over 4 million people unemployed; not to mention the million or more forced to work a reduced workweek?

Mr. WIDNALL. The last figures are 4.2 million. What I object to is the fact that the people throughout the country are told as a serious matter that we are going further and further on the downhill road, when as a matter of fact the reliable figures show there were in March 4.2 million unemployed. The head of one of the great labor unions of this country told the people of the country there were 5 million unemployed the very same night these figures showed there were 4.2 million.

Mr. RAINS. I was correct when I said the figure was 4.2 million, was I not?

Mr. WOLF. Mr. Chairman, will the gentleman yield?

Mr. RAINS. I yield.

Mr. WOLF. I was wondering what happens to the people who are working 2, 3, 4 days a week, making sash and doors in factories in Dubuque, Iowa, and in the building industry in my district. Are they included in the number of unemployed?

Mr. RAINS. No, they are not, and the gentleman is correct to be concerned about the hardship these people are suffering.

Mr. WOLF. I was shocked just Monday of this week to discover that most of my building people who make sash and doors in Dubuque, Iowa, the largest industry in my district, are on a 2-, 3-, or 4-day workweek. Hundreds of them will be discharged. I thank the gentleman for what he has stated. I am very proud to be here to hear it.

Mr. RAINS. As I said in the beginning, when we bring in a measure to do something for our own people we are told we are putting the Government on the threshold of bankruptcy, yet in the past my distinguished friends on the other side of the aisle voted $4½ billion of back-door spending. Last year for the World Bank, for all of the programs all over the world, they voted large sums of money. They also did it when they voted for the Farmers Home Administration, the St. Lawrence Seaway, the Export-Import Bank, the program of direct loans for veterans and, of course, the Federal National Mortgage Association.

Many of the foreign aid bills that we have—and one particularly last year, $4½ billion—this is not the only one—went out of our committee, went zooming through the Rules Committee, went zooming out of this House, was signed by the President to give it away all over the world. I wonder, did they unbalance the budget last year? Will you ever get that back? Are not the American people a better risk than they are?

I want it understood I am one who votes for foreign aid, but at the same time I am getting to the point where I want to think of our folks here at home along with the rest of them.

Mr. MULTER. Mr. Chairman, will the gentleman yield?

Mr. RAINS. I yield.

Mr. MULTER. In his very complete and interesting discussion the gentleman overlooked another, the Inter-American Bank; and the administration is now urging the International Development Association, a division of the World Bank with obligations running into the hundreds of millions. Together with the gentleman I say let us do something at home now.

Mr. RAINS. I agree with the gentleman.

This bill is in the good American tradition of trying to do something with private enterprise to help build homes in this country.

Mr. Chairman, in concluding I would like to discuss in some detail the various provisions of the bill.

The heart of the bill, of course, is section 11 which authorizes an additional billion dollars for FNMA's program 10 operation to make par purchases and commitments of FHA and GI loans for the construction of low- and moderate-priced new housing. It is this provision which will supply a powerful stimulus in easing the mortgage credit famine which has been sorely afflicting homebuilding in many areas of the country. As preventive medicine, I can think of no more worthwhile form of Government investment.

As I have indicated previously, these mortgage purchases are not subsidies, they are not grants—they would represent riskless assets to be acquired by the Government which would be repaid with interest and would cost the Government nothing. And the benefits this investment will reap in my judgment will be incalculable. They will help restore health and vitality to residential construction; they will increase employment opportunities both onsite and offsite; and through the additional economic activity they will generate, and the consequent increase in tax income, they will benefit the Government as well as the health of the overall economy.

I think it important to emphasize also the indirect as well as the directly measurable effects of this additional billion dollars for the FNMA special assistance program. While directly this fund will stimulate the construction of from 70,000 to 80,000 dwelling units, expert opinion is convinced that the injection of this flow of mortgage credit on liberal terms will have a multiplying economic effect. I have been told by men who know in the building and mortgage industry that this fund would provide a powerful catalyst in increasing the availability of mortgage credit generally. They are convinced that the original 1958 program 10 had a powerful cumulative and reinforcing effect in giving a general stimulus to mortgage lending.

One amendment in the bill should be of particular interest to those who live in areas where housing costs are higher than the national average. While the present mortgage limit of $13,500 would be retained, FNMA would be authorized

to increase that ceiling by an additional $1,000 to $14,500 in high cost areas. In addition, we have written in a high cost provision to permit program participation for Alaska, Hawaii, and Guam which are faced with unique problems of higher building costs.

There is an amendment in section 10 of the bill to make it clear that section 213 cooperative housing will be eligible for purchase by the additional $1 billion fund authorized for FNMA's program 10 special assistance operation.

The bill would also restore for a 1-year period the par purchase requirement for all of FNMA's special assistance programs. These programs, which include urban renewal, cooperative housing, and others as well as program 10, have been designated by the Congress or by the President as deserving of special assistance. It is indefensible to permit the agency to continue to charge discounts in these special fields.

In addition, the bill for a 1-year period would establish a ceiling of 1 percent on the commitment and purchase charges which the association could make on special assistance mortgages—at present FNMA has set these charges administratively at 1½ percent. Also, to avoid excessive penalty to projects which do not go forward to completion for one reason or another, the bill would reduce the required initial payment for a commitment from one-half of the total charge to one-fourth of the total charge.

Mr. Chairman, I would like to emphasize that the bill contains safeguards to assure an equitable distribution of these loan funds. The bill would require the Association to allocate the funds in order to channel them to the maximum extent practicable into geographic areas where the problems of excessive mortgage discounts and the shortage of mortgage credit are most severe.

In order to guard against the possibility that a few builders might get a disproportionately large share of these funds, FNMA is also directed to establish regulations to provide for an equitable distribution of commitments.

One provision of the bill which would have an important effect in preventing a further deterioration of the mortgage market would prohibit FNMA from swapping mortgages for bonds for a 1-year period. This would be achieved by requiring sales for cash only and for a price not less than the cost of acquisition. Despite the unmistakable opposition of the Congress in the last session, and I would remind you that the Senate even passed a resolution condemning the policy, the administration persisted in carrying out its misguided policy of swapping FNMA-held mortgages for certain Government bonds. Apart from the debate as to whether this form of exchange results in a loss to the taxpayer, there can be no debate that in periods of mortgage credit shortage any action which would dump blocks of FNMA-held mortgages on an already saturated mortgage market is clearly indefensible.

Other amendments in the bill are designed to bolster the market support of FNMA's regular secondary market operations. In the first place, the bill would reduce FNMA's stock purchase requirement from 2 percent to 1 percent, which should help minimize the burden of doing business with that agency. The second provision would prevent FNMA from arbitrarily refusing mortgages offered to it. Over the years we have heard many criticisms of this policy and I think it is about time we made it clear that FNMA should not attempt to second guess the FHA and VA, and it must be made willing to purchase at prevailing prices any guaranteed or insured mortgage, provided of course that the mortgage is not in default. Also FNMA would continue to have authority to limit the age of eligible mortgages.

We have also incorporated in the bill a provision which would include in FNMA's policy directives an emphasis upon the desirability of stabilizing the mortgage market. This should prove to be a helpful directive for FNMA officials so that in conducting their operations they can give more effective support to the mortgage price structure.

Other sections of the bill seek to offset the increasingly severe burden which spiraling interest rates have placed upon home buyers. One provision would give discretion to the FHA Commissioner to reduce the insurance premium to one-fourth of 1 percent. FHA now boasts total reserves of three quarters of a billion dollars and most experts believe that the reserves under section 203 are adequate to meet a major depression.

A special section would seek to bring relief to home buyers under the section 203(i) program. For this low-cost housing, as you know, the administration permits an additional one-half of 1 percent service charge, which, when added to the 5¾ percent interest rate and the one-half of 1 percent insurance premium, brings the total financing costs to those low income families to 6¾ percent. Frankly, I am appalled to think that the Government has permitted itself to get into a situation where it is actively encouraging lenders to gouge lower income families with a mortgage financing cost of nearly 7 percent. To restore some equity for this lower income group, my bill would set up a special $50 million FNMA special assistance fund to which section 203(i) loans could be sold, provided a lender does not charge the one-half of 1 percent service charge.

Another important and unique feature of the bill would seek to increase the availability of FHA financing by permitting individuals to make FHA-insured loans. Presently, FHA-insured loans may be made only by incorporated lenders. By permitting individuals to participate, we hope to make the FHA program more effective, particularly in smaller towns and communities. Certainly we should leave no stone unturned in our search for means of increasing the availability of FHA financing. This provision has special importance in view of our growing need to find new sources of mortgage funds. It should be noted that the making of GI home loans by individuals has been permitted by the Veterans' Administration from the very beginning, and there has been no evidence of abuse.

Another important provision would set up an FNMA backstop to assure the availability of financing for the new section 810 off-base defense housing which we authorized in last year's Housing Act. Ordinarily it requires some time for new FHA programs to gain investor acceptance and to bridge this gap FNMA special assistance is needed. For this purpose the bill would authorize a $25 million revolving fund for the purchase of section 810 mortgages.

Another section would make mandatory the acquisition of Wherry Act housing by the military if the housing is located at or near permanent military installations. Presently, acquisition is mandatory only where Capehart housing construction is going forward.

The bill seeks to impose some restriction on the excessive discounts charged on FHA-insured and VA-guaranteed loans. Section 14 would set up a new procedure which would require the lender in the case of each VA-guaranteed or FHA-insured loan closed to report to the appropriate agency the amount of the discount charged and against whom it was charged. By providing for full public disclosure the bill should exert a healthy pressure to prevent excessive discounts. We will also benefit by having a sensitive indicator of the trend in discounts which can serve as a guide to future legislative policy in any attempt to reimpose controls on discounts.

And finally, section 16 of the bill is designed to make sure that the housing needs of civilian space agency personnel will be met. The recent shift of certain missile development bases from the Department of Defense to the new civilian space agency, the National Aeronautics and Space Administration, has denied the employees of the new agency the benefits of section 809 financing, a result of course which no one intends. The bill would make it clear that NASA personnel in these installations would be eligible for the benefits of section 809 financing.

Mr. Chairman, this concludes my remarks both of a general nature and in detail on the bill now before us. I think the immediate passage of this bill is imperative and because it is so greatly in keeping with the demands of our public welfare, I urge every Member to give it his support. Clearly no one should oppose the objectives of the bill which are powerfully and succinctly stated in the short title as needed to "halt the serious slump in residential construction, to increase both on-site and off-site job opportunities, to help achieve an expanding full employment economy, and to broaden home ownership opportunities for the American people."

Mr. BARRETT. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. BARRETT. Mr. Chairman, the need for better housing for all Americans is greater today than in any period of our Nation's history. Therefore, I sincerely hope our colleagues will unanimously vote for the passage of H.R.

10213, the Emergency Home Ownership Act. I personally strongly favor this bill because it will provide additional jobs for our unemployed and, at the same time, will grant home ownership to those families who for years have been unable to buy because of high prices and high interest rates.

This bill will be of special benefit to the residents in the First Congressional District of Pennsylvania because, among other things, it will permit them to buy homes at lower monthly payments.

I have talked with many civic and religious organizations and individual citizens about the housing problems facing us today and all agree that some positive legislative program must be established to provide modern, low-cost housing for our American families. This is particularly true in south Philadelphia where the demand for housing is desperate. While great strides have been made in the past few years to clear our slum areas and provide low-rent public housing, many Philadelphians are still finding it very difficult to find decent homes.

This is especially true in the large family class where a father and mother have the responsibility of properly raising five or six or seven children—and how can this be accomplished if the family is forced to live in a slum area simply because the rent is cheaper? This atmosphere is certainly not desirable for young, growing children, and surely the parents are not to be condemned because they cannot afford to buy a home. What can they do? All the public housing projects have long waiting lists for large family units. Private landlords are asking unreasonable monthly rentals for average living quarters, and in many instances will not take a family with more than two children. This is the problem facing not only the residents of Philadelphia, but the majority of low-income families throughout the United States.

Mr. Chairman, as representatives of the people, we cannot sit idly by while these very same people suffer. We cannot afford to wait until economic conditions improve. We must take immediate action to stimulate our rate of economic growth so that all Americans able and willing to work can find gainful employment.

One of the weakest spots in our economy is the decline in the homebuilding industry, and the bill before us now will give this industry a much needed shot in the arm by providing $1 billion in funds to purchase FHA and GI loans on lower priced housing.

Our homebuilding industry, comprised primarily of small business firms, is one of the Nation's largest. The building of homes the average American family can afford will create hundreds of jobs locally. The unemployed who need work, but cannot find it, will be offered many job opportunities. The economy of the area will become sound. And the people will be given the opportunity to buy a home.

Mr. Chairman, no intelligent man or woman can possibly find fault with the desirable objectives of this bill. I urge its immediate passage.

Mr. McDONOUGH. Mr. Chairman, I yield such time as he may desire to the gentleman from New York [Mr. KILBURN].

Mr. KILBURN. Mr. Chairman, this bill lays the spending issue squarely before the Congress.

If you want to be known as an irresponsible spender—vote for this bill.

If you want to be known as a budget buster—vote for this bill.

If you are for fiscal irresponsibility—vote for this bill.

If you want to socialize mortgage credit—vote for this bill.

If you think the taxpayers should subsidize about 3 percent of the home buyers this year—vote for this bill.

Over $30 billion of mortgage credit will be used this year.

Those are the issues raised by this legislation.

Rollcall votes on this measure will make clear to the taxpayers where you stand.

I am against this bill and I urge that it be defeated.

Mr. McDONOUGH. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, I always enjoy hearing my friend from Alabama with whom I have served on the Subcommittee on Housing since its inception. He is sincere, he believes in what he says, he is devoted to many fine principles with which I agree. But I think he is being led up a dark alley in this bill because the statistics he read to you concerning unemployment and the present economic situation in this country, the gross national product, discounts on mortgages, and the effect it is having on the small wage earner gives the impression that this bill is going to cure all of those problems. It is not going to make the slightest indentation on that.

The billion dollars authorized in this bill is for the purpose of purchasing through FNMA mortgages not to exceed $13,500 and $14,500 in high-cost areas. If the whole amount were used, and that is doubtful because in the last attempt we made to provide special relief for homebuilding, only 85 percent of the billion dollars that the gentleman referred to that we passed upon 2 years ago, was used. The situation economically in the country was far worse than it is today. But if all the amount that this bill provides were used it would build only 70,000 housing units at the rate of $13,500 or $14,500. That is out of an anticipated annual total of, we will say conservatively, 1.1 million homes this year. Is that going to restore the situation so far as the employment level is concerned all over the country? I am sure he cannot leave that impression with anyone and make it stick, because it is not going to do that. It is going to pump a billion dollars into the investment market in this country, which will interfere with the depositors in savings and loan associations, it will reduce the possibility of return on money invested by many small wage earners in various ways. It will impose upon them a tax obligation to pay this billion dollars back because there is no other place to obtain the billion dollars except from the Treasury of the United States. It will add to the national debt and it will add to the further tax obligation of everyone.

I want to quote from a statement that the Senator from California [Mr. ENGLE], formerly a Member of the House, now a Member of the Senate from the State of California, made at a meeting in California recently of the California Savings & Loan Associations specifically about this bill. If this bill should pass the House, Senator ENGLE will have to vote on it, and he will undoubtedly express his views on the Senate floor at that time. He said, and I quote:

> On the House side in Washington this session Congressman ALBERT RAINS, of Alabama, has introduced a bill to provide for $1 billion worth of Treasury money to be available to FNMA to be used for FNMA purchase of VA mortgages and FHA-insured loans at par.
>
> It seems doubtful that this will pass, for two reasons. First, unlike 1958, when the last such transfusion took place, we do not today have a general economic recession. Second, again unlike 1958, housing starts have not dropped to 900,000, or any other figure at which the situation seems critical for the housing industry. So this year, the Rains proposal does not enjoy the same broad base of support that a similar measure did 2 years ago.
>
> Even if it did become law, it still would not provide the answer. Based on our experience in 1958, California would get about 8.7 percent of the appropriation, or $87 million. But now, as then, we are building about 13 percent of the houses in the country, and I calculate our State's total need to be in the neighborhood of $2¼ billion. This is more than twice the total amount contemplated by the Rains bill, if we got it all, instead of less than one-tenth of it.

This is an indication of what a futile effort this is to relieve the unemployment situation.

There is no complaint, so far as I am concerned, from people by mail or otherwise, that the home buyer is complaining about not being able to buy the house he wants, the downpayment, the rate of interest, the maturity of the mortgage, and so forth. This bill has been pending before the Congress since January, and the only appeals I have had for its passage have been from a few builders, homebuilders, in California; nothing from home buyers. Therefore, I believe that we should, if we are going to pass any legislation at all, consider the taxpayer on the broad basis, the home buyer, rather than the homebuilder.

Take the automobile industry. My friend the gentleman from Alabama [Mr. RAINS] read the figures recently about the high inventories in automobiles. We are producing more automobiles this year than we did last year up to the present time, but is there any attempt to ask for a Federal subsidy to take care of these million cars that are in the inventory? Is there any legislation pending here to prevent the car buyer from becoming a victim of a high discount on the paper that he has to assume when he buys an automobile? Why should this apply in this instance if it does not apply in the other? And if we attempt to get into it here, in my opinion we are approaching Federal subsidies, socialized housing, or any other type of subsidy where we use Federal funds to help the

homebuilder. Public housing is close enough to socialized housing. When we say we are going to provide for the homebuilder par value for all the mortgages that he offers to FNMA, then we are giving him an advantage that the other conventional investment house and the purchaser of a house on a conventional loan basis does not enjoy.

Here is another effect this bill will have. At the present time the builder who sells a mortgage to FNMA must pay 2 percent of the mortgage in stock.

When we passed the bill in 1954 the purpose was to get ownership in FNMA into the hands of the public. That has gone on for some time. There are a great many stockholders in FNMA all over the country. They are not only obtaining a profit from the purchase of stock in FNMA, but it has become an item of consideration on the stock market.

This bill reduces the obligation to 1 percent. That penalizes the people who have already bought stock in FNMA.

Another thing this bill would do that we have not considered necessary heretofore in all of our legislation on housing, is to make FNMA a primary mortgage market source. It is a secondary mortgage market source and we are making it a primary market and pumping $1 billion into the investment field, giving to a selected few—because it will only be a selected few who will profit from this—the advantage of par value for the mortgage it sells to FNMA, and denying that to the conventional loan.

There are many other features about this bill. This bill weakens the FHA because it grants authority to reduce the percentage of premium paid to one-quarter instead of one-half, which is now the law on FHA loans. In my opinion, this is the first step toward the possibility of federalized, socialized housing. I do not think we should take that step because the problems we face today in the shortage of housing starts have been caused largely by weather from which we have not yet recovered. In my opinion, if we should wait another 2 or 3 months we will be out of what the gentleman from Alabama [Mr. RAINS] claims is a recession, which claim I do not agree with. If we allow time to pass to a point where this activity will recover, we will not have to obligate the American public by $1 billion to buy mortgages for a selected few homebuilders.

The CHAIRMAN. The time of the gentleman from California [Mr. McDONOUGH] has expired.

Mr. McDONOUGH. Mr. Chairman, I yield 10 minutes to the gentleman from New Jersey [Mr. WIDNALL].

Mr. WIDNALL. Mr. Chairman, I, too, have a great deal of respect for my colleague, the chairman of the Special Subcommittee on Housing, the gentleman from Alabama [Mr. RAINS]. I have served with him since 1952 on that special committee and I know how earnestly he tries to provide for the housing needs of this country. I do not like to take a completely opposite stand to his on any bill because I do respect him so much. But I think this bill is completely uncalled for. There is nothing in the record to indicate any need for such legislation. Before the Committee on Rules I characterized it as the most amazing piece of legislation that has come to my attention since I have served as a Member of the House, having come here in 1950. This bill is a bill that nobody wants, and just a few people seem to be in back of it. Whenever major legislation comes before the Housing Subcommittee, as a senior member of that committee I am normally flooded with appeals for the passage of that legislation. Those appeals come from special interest groups and they also come from the public at large. Up to the time that I appeared before the Committee on Rules I had not had a single request from anybody for the passage of a piece of legislation involving $1 billion of the taxpayers' money. What I emphasized to the Committee on Rules and what I reemphasize again to the House is this.

Only recently members of the Building Trades Union came to my office in connection with legislation that they felt it was important to pass during the current session of the Congress. They believed this legislation was important to the members of unions and legislation important to all the American people. They spoke about the minimum wage, they spoke about "situs" picketing, they spoke about the extension of minimum wage coverage, but not one single word was said about a $1 billion bill that, if you are to be persuaded by the arguments of the majority chairman, is wanted to keep the building trades people employed in the United States to the extent of 300,000 to 500,000.

Mr. CURTIS of Missouri. Mr. Chairman, will the gentleman yield?

Mr. WIDNALL. I am pleased to yield to the gentleman from Missouri.

Mr. CURTIS of Missouri. I am interested in the gentleman's observation on the interest in the bill. I cannot refrain from remarking that the lack of attendance on the floor of the House during debate on this $1 billion bill is a pretty good indication of the lack of interest in this legislation.

Mr. WIDNALL. I thank the gentleman for his comment. There are probably a few more people here on the floor of the House now on the Democratic side of the aisle than have corresponded with any Member of the House on that side with respect to this bill, other than the chairman of the Subcommittee on Housing.

There are several methods of measuring activity in the housing field. No one of these is all inclusive. Each serves some useful purpose but each also has its limitations. To arrive at a balanced judgment requires consideration of all of them.

One method of measurement to which reference is frequently made is the series known as private nonfarm housing starts. This series is compiled monthly and adjusted on a seasonal basis to arrive at an indicated annual rate of production of new housing units. It is arrived at by a sampling of building permits in about 7,000 local governmental jurisdictions. Adjustments are made for a time lag between issuance of permits and start of construction, and for permits not used. The result is an estimate of units started in permit-issuing places. To this is added an estimate for nonpermit areas to arrive at a figure for private nonfarm housing starts. Adjustment is made for a seasonal factor and the result is then multiplied by 12 to arrive at the annual indicated rate of starts.

Now, let us see what has been happening to this series. In October 1959 the indicated annual rate of starts was 1,180,000 units. In November this increased to 1,210,000 units, and in December it moved to 1,330,000 units. At the time of the subcommittee hearings on this bill the very good December figures had just become available. Here is what the chairman of the Housing Subcommittee had to say:

> Far too much is being made of the fact that the seasonally adjusted annual rate of housing construction rose during the month of December, the latest month for which statistics are available.

For January, the start level dropped back to 1,216,000 units and in February to 1,115,000 units.

Then the chairman of the Housing Subcommittee issued another press release in which he stated:

> The February housing starts figure just released underscores the need for immediate mortgage credit legislation to shore up a sagging key industry.

I just do not go along with seeing no good in the good and only bad in the bad. I think we have to be a bit more consistent than that. March starts held steady at the February level of 1,115,000 units.

In making any comparison between figures, it is important that we consider how they are used. For instance, if you compare the indicated annual rate of starts of 1,148,700 units based on results for the first quarter of this year with those for the first quarter of 1959, you will find they are down 17.3 percent from the indicated annual rate of 1,290,000 units for the first quarter of 1959. Now that looks pretty bad. But the 1959 first quarter rate was the highest first quarter rate on record. Let us see what happens if we compare the first quarter rate for 1960 with the first quarter rates for other years.

Compared with 1958, the 1960 starts are up 20.8 percent.

With 1957, up 21.7 percent.

With 1956, up 0.9 percent.

With 1955, down 17 percent.

With 1954, up 3.1 percent.

With 1953, down 2.7 percent.

In other words, the 1960 performance is about average rather than the poor performance indicated by a comparison with just the 1959 record rate.

In the course of this debate, we will hear much of the impact of the declining starts on the employment situation and activity in the building materials field. Obviously a statistical series on building permits is a poor measure of the impact on employment and the materials industry. There is another series far better adapted for measuring such impact. This is the Department of Commerce tabulation on expenditures for new

construction. Dollar expenditures directly reflect payments for wages and materials. The seasonally adjusted annual rate of expenditure for new private nonfarm residential construction in the first quarter of 1959 was $21.9 billion. For the first quarter of 1960, the rate was $21.2 billion. That is a decline of only 3.2 percent. By no stretch of the imagination is that very modest decline cause for alarm over the plight of labor and material distributors in the home construction field.

Another measure of housing activity is the series on heavy construction contract awards. The Engineering News-Record, a McGraw-Hill publication, compiles a weekly record of heavy construction contracts awarded in 50 States. Only mass housing contracts are included in the series and these large housing project contracts currently account for about 25 percent of the total to date. For the first 16 weeks of this year; namely, for the period ending April 21, 1960, private mass housing construction shows a whopping big gain of 39 percent over the figures for the comparable period in 1959. For all types of heavy construction, the contract figures show a gain of 7 percent for the 1960 period over the 1959 period.

There is still a different way of appraising the position of housing. This is a practical approach. Just notice as you drive home to your districts the miles upon miles of new housing projects and even whole new communities under construction. There just is not gloom and doom in the housing industry. When I first came to Congress, I used to drive between cities and communities. Now when I come down from New Jersey, much of the way is through continuous urban development.

We have made tremendous progress in housing over the past 10 years and 1960 promises to be at least an average year. Even if you take the most unfavorable figures upon which to base your judgment, namely, housing starts, this is still true. Over the past 10 years, housing starts have averaged 1,159,100 units. The first quarter 1960 annual rate is 1,148,700 units. Personally, I think the production for the year as a whole will be above that level and I think the opinion of the experts that housing starts will total 1,200,000 units this year is a conservative estimate. I base that opinion on two things. Employment is at record levels and money markets have eased, making mortgage credit more readily available. In 1959, the Federal debt increased by $7.9 billion. It represented a huge drain of funds from the private capital markets. In 1960, the prospects are that Federal Government financing, in place of draining funds from the private capital markets, will be returning funds to the private markets through a reduction of approximately $2 billion in Federal debt. That is a net favorable shift in the impact of Government financing of almost $10 billion. This bill in itself would require a billion dollars of Government expenditure for the purchase of mortgages. In other words, it would use up 50 percent of the prospective $2 billion return flow of funds from the Government market to the private capital market this year. Its principal effect would be to substitute Government financing for private financing in the home building industry. That would be fiscal folly in the name of a nonexistent emergency.

The savings picture seems to be improving. March was the first month since the end of 1958 with a monthly net savings inflow at mutual savings banks above the year-ago level, by 2 percent, and the net savings inflow at savings and loan associations—preliminary—was up 6 percent. In February, the net gain in total assets of life insurance companies was greater than a year ago by 6 percent.

At the same time, nonhousing capital demands are running below year-ago levels. Thus far in 1960, new capital issues and private placements of corporations are down by about 10 percent and State and local government issues by about 12 percent from the comparable period of a year ago. The magnitude of Treasury net borrowing and mortgage requirements have also been appreciably below 1959 levels.

In the mortgage market this has been reflected in February and March increases in the proportion of areas with adequate funds for FHA-insured loans as reported by FHA and VA for the standard sample areas and by FNMA for a group of identical areas. At the end of March, FHA and VA showed an adequate supply of such funds in 63–68 percent of the areas, while FNMA reports—for a greater number of areas, including smaller areas—showed an adequate supply in only 30 percent of the areas. With respect to funds for VA loans, an adequate supply was indicated by FHA and VA reports in 16–18 percent of the areas and by FNMA reports in 4 percent of the areas.

The Chicago, Fort Worth, and San Francisco regional offices of HHFA, all commented upon increased availability of mortgage loan funds at savings and loan associations, primarily for conventional loans.

Outstanding Federal home loan bank advances continued to decline, from $1,628 million at the end of February to $1,520 million at the end of March. During the first 3 weeks of April, three of the banks—Cincinnati, Des Moines, and Topeka—reduced their rates on secured short-term advances to 4¾ percent, from 5¼ percent in two instances and from 5 percent in the other. This makes a total of six home loan banks that have reduced their rates on advances in the past 2 months. During April, the Federal home loan banks redeemed the entire issue of $247 million in 4.65 percent notes that came due. Another issue of $240 million at 5⅛ percent becomes due on May 16.

In February and March, the 8-month increase in the private secondary market discounts on FHA-insured loans was reversed, although the reduction of discounts thus far has been very slight—from an average of 3.7 points to an average of 3.5 points. Nevertheless, the continued increase in availability of funds makes it likely that some funds would be available for FHA-insured loans with lower downpayments than are now permissible. This would lend support to housing demand.

FHA APPLICATIONS AND VA APPRAISAL REQUESTS FOR NEW HOMES

On a per-workday basis, FHA new home applications increased 13 percent and VA new home appraisal requests decreased 13 percent from February to March. After seasonal adjustment, the FHA application volume showed a 2-percent decrease.

HOUSING STARTS

From February to March, the seasonally adjusted annual rate of private nonfarm housing starts remained unchanged at 1,115,000. If the unusual winter weather in February and March caused a greater than normal lag in the use of building permits issued in those 2 months, there may be some offsetting reduction in April building permits and, consequently, in the estimated seasonally adjusted annual rate of starts in April.

Of the total private starts in March, 23 percent were FHA, 6 percent VA, and 71 percent conventional. A year ago, when total private starts were 26 percent greater, the breakdown was 25 percent FHA, 8 percent VA, and 66 percent conventional.

In December and January, the latest 2 months for which figures are available, multifamily housing starts accounted for 19 percent of total private starts, compared with 15 and 16 percent, respectively, in October and November and with 20 percent in January 1959.

I would like to read to you at this time an important editorial from the New York Times of February 13, 1960:

NEW MORTGAGE BILL

A new housing bill introduced by Representative RAINS of Alabama, has been approved by a subcommittee of the House Banking Committee. This proposed measure would not only call for the pumping of an additional emergency $1,050 million into the residential mortgage market under the special assistance program of the FNMA (Fanny May); it would at the same time alter beyond recognition the character of that secondary market for Government-insured residential mortgages.

Neither of the two implicit assumptions underlying the proposal to pump this huge additional sum into the market for residential mortgages will stand even superficial examination. One of them is that the economy is faced with an emergency that calls for such stimulants as this; the other is that the residential mortgage area is getting less than its fair share of the available supply of capital funds.

So far as the state of the economy is concerned, it is such as to indicate that the proposal to blow up mortgage demand artificially would not only be potentially inflationary on the demand side (for residential building has an exceptionally high multiplier effect on municipal and private spending) but it would lop off at a stroke nearly one-fourth the hoped-for surplus in the 1961 Federal budget. As to the lack of funds available for residential mortgages, this is true only if one believes that the Nation has a responsibility to maintain the supply of such funds at all times at a figure equal to or exceeding the recent previous high.

But more serious, perhaps, even than the provision for this huge sum itself are the terms on which it would be provided. For

a year after the enactment of this suggested legislation it would, among other things, direct the FNMA to purchase any kind of Government-underwritten mortgages so long as the title to the property was not in doubt; it would forbid the latter to dispose of any mortgage; it would prohibit it from paying less than par for any mortgage, and it would freeze the premium charge (which is now discretionary within a range of ½ to 1 percent) to ¼ of 1 percent. (It is out of this premium that the reserve is created on which the Government insurance is based.)

In short, Fanny May would be transformed overnight from a revolving fund designed to provide a secondary market for insured mortgages on time when other purchasers were not available to a priming market that would buy all mortgages offered at fixed prices, presumably above the true market price, and at the same time be prohibited from liquidating any mortgage presently held.

I have had some figures prepared addressed to, "Where is the emergency?" Incidentally, we on this side have been hit time and again by those on the other side of the aisle with the charge of using a Madison Avenue approach to politics. If ever there was a Madison Avenue approach to politics, it is with the slogan "Emergency Home Ownership Bill" that is being used on this bill when there is no emergency.

First. Number of private nonfarm housing starts on adjusted annual basis: First quarter 1959, 1,390,000 units—all-time high; first quarter 1960, 1,148,700 units; decrease 241,300 units, or down 17.3 percent. Average annual rate past 10 years, 1,159,100 units.

Second. Value of new private residential nonfarm construction on adjusted annual basis: First quarter 1959, $21.9 billion; first quarter 1960, $21.2 billion; decrease, $0.7 billion, or down 3.2 percent.

Third. Value of total new private construction on adjusted annual basis: First quarter 1959, $39.7 billion; first quarter 1960, $40.4 billion; increase, $0.7 billion, or up 1.8 percent.

Fourth. Value of gross private domestic investment, including producers durable equipment and change in business inventories, on adjusted annual basis: First quarter 1959, $70 billion; first quarter 1960, $77.5 billion; increase, $7.5 billion, or up 10.7 percent.

Fifth. Average number employed: First quarter 1959, 63.1 million; first quarter 1960, 64.3 million; increase, 1.2 million, or up 1.9 percent.

Sixth. Average number of unemployed: First quarter 1959, 4.6 million; first quarter 1960, 4.1 million; decrease, 0.5 million, or down 10.9 percent.

Seventh. Percent unemployment on seasonally adjusted basis: First quarter 1959, 6 percent; first quarter 1960, 5.1 percent; decrease, 0.9 percentage point.

Eighth. Labor income on adjusted annual basis: First quarter 1959, $260.6 billion; first quarter 1960, $279 billion; increase, $18.4 billion, or up 7.1 percent.

Ninth. Total personal income on adjusted annual basis: First quarter, 1959, $371.8 billion; first quarter, 1960, $393.1 billion; increase, $21.3 billion, or up 5.8 percent.

Tenth. Gross national product on adjusted annual basis: First quarter, 1959, $470.4 billion; first quarter, 1960, $498.0 billion; increase, $27.6 billion, or up 5.9 percent.

Just where is this emergency? I certainly do not find it in our economy. But wait, here it is. I have one more set of figures. They deal with the public debt of the Federal Government. In March of 1959, it was $282.2 billion. In March of 1960, it was $287 billion or an increase of $4.8 billion. My colleagues, that is where the emergency exists. That is an emergency we must do something about. We must get control of Government spending, and this bill is a good place to start. We have heard remarks that a projection was made of $540 billion to $550 billion as the gross national product this year. I never heard those figures mentioned by any economist who testified either before the Joint Economic Committee or before the House Committee on Banking and Currency or before the Subcommittee on Housing. We have been told, and the record will bear it out, that for the first time in our Nation's history the gross national product of the United States will be over $500 billion. That does not sound like the situation that the apostles of gloom and defeat would have you believe, that the country is going to the dogs and that it is going down hill so fast that we have to pull all these emergency measures out of the slot and try to do something about it. I would be the first one to admit, as I am sure many others on our side of the aisle would be willing to admit, that if the country was in a recession or was pointed toward a major recession we would be the first ones to back this type of legislation. Many of us supported the legislation offered in 1958 which took effect in 1959. We felt at that time we were entering into a period of recession and it required some major attention. There is absolutely no comparison between the economic condition of this country today and the economic condition at the time we passed the other $1 billion bill. I take issue with the statement that this costs nothing. It takes $100 million or $200 million or $1 billion or whatever is spent out of the amount that will be authorized in this bill, out of our budgetary balance, the hard fought budget surplus that President Eisenhower has envisioned for the country this year. And there are other bills that are pending that would do the same. We are headed once again into deficit spending, inflationary measures that will push up costs and devalue pensions and cause serious hardship for millions of our people. Too much is dependent upon the leadership of the United States throughout the free world to treat our responsibility lightly. It is all very well that you want to be all things to all people and you want to provide some cheap housing for people. But, I challenge the statement and the claim that cheap housing is provided by this bill for low-income groups. As an example I cannot envision a person in the city of New York being helped by this legislation.

Mr. McDONOUGH. Mr. Chairman, I yield 10 minutes to the gentleman from Illinois [Mr. DERWINSKI].

Mr. DERWINSKI. Mr. Chairman, I hope it will not be necessary for me to use more than a few minutes of my time. I think it is rather obvious that regardless what we say this afternoon, our minds are completely made up and facts will not disturb anyone. I would like to quote, if I may, from a distinguished Member of the other body, the chairman of its Committee on Banking and Currency, the Senator from Virginia, who on January 13, 1960, had some rather interesting, and at this time I believe we could say pertinent, remarks about the housing issue. He said:

The most effective way, I think, for the Congress to reduce the ups and downs in housing aside from the elimination of the statutory interest rates on FHA and VA mortgages would be to balance the Federal budget. An unbalanced Federal budget means that the Treasury must go into the capital market and borrow billions of dollars, in competition with other users of money. The $12 billion deficit of the fiscal year 1959 imposed on capital markets a drain which could not help but push interest rates up substantially.

I think it would be wise for you gentlemen who are going to jam through this inflationary housing bill to heed the words of wisdom of the Senator from Virginia.

In all of this discussion I am mindful of the fact that about 4 months ago, when we started discussing the Emergency Housing Act of 1960, we were told that the emergency was caused by a little thing called tight money. Four months later we find that tight money is no longer with us but supposedly the emergency is, but the plain matter of fact is that savings and investments by the people in this country have solved the problem of tight money and we do not need the injection of a billion dollars into the housing market. The natural flow of savings and investments solves the tight money situation.

Also I would like to point out that if we assume that the anticipated number of housing starts in 1960 constitute an emergency, then we have had an emergency in housing in 7 of the last 11 years. I understand this is the third emergency housing bill. Supposedly there were similar emergencies in 1949, 1951, 1952, 1953, 1956, and 1957, which were solved without an emergency housing bill. I think it is obvious to all of us that this legislation is purely political and completely unnecessary. I believe we are all aware that we are going to pass this uncalled for bill and if the other body passes it, the President will then veto it and then the taxpayers will heave a sigh of relief because the spenders will have once again been defeated, and the country spared from the ill effects of this inflationary proposal.

Mr. McDONOUGH. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield.

Mr. McDONOUGH. In your study of the bill and in the business in which you are engaged can you inform the Committee if there is any place where the homeowner is going to profit by this deal of selling mortgages to FNMA?

Mr. DERWINSKI. No. This bill will not help the home owner. That reminds

me of another matter, for which I thank the gentleman.

There is one additional point that I wanted to make. Earlier this afternoon the chairman of the Housing Subcommittee said his remarks were to be nonpolitical. Actually, his remarks were political and failed to prove the need for this legislation. The charge was made that homebuilders were demanding this legislation. Representing the Chicago area, I have been unable to find any builders in the Chicago metropolitan area who are here demanding this legislation. As a matter of fact, at a recent national convention of the homebuilders, Chicago area and Midwest builders waged a tremendous battle in which they fought to stop the demand for artificial and inflationary use of funds from the U.S. Treasury. Certainly, if the majority of homebuilders, and the other segments of the housing industry and for that matter the home-buying public, are not asking for this legislation it would be an act of irresponsibility for the Congress to pass it. Regardless of the phoney title, this bill would aggravate rather than help the housing industry of this Nation. Home ownership for more Americans will continue to develop when we have less rather than more Government interference with the supply and demand and the desires of American families for a continued improvement in housing standards.

Mr. BROWN of Georgia. Mr. Chairman, I yield such time as he may desire to the gentleman from Texas [Mr. RUTHERFORD].

Mr. RUTHERFORD. Mr. Chairman, I would like to urge all of my colleagues to support the bill now before us. The need for this bill has long since been proved. Last fall the Subcommittee on Housing, of which I am proud to be a member, undertook two studies which demonstrated conclusively that the tight money policy was having a serious adverse impact on the homebuilding industry. The use of second mortgages and other questionable financing practices was becoming widespread and discounts on FHA and VA loans had become prohibitive in many areas of the country. The recent trend in housing starts confirms those findings. Once again residential construction is being choked off by high interest rates and a shortage of mortgage credit. Last month we were building new homes at an annual rate of only about 1.1 million units, down 20 percent from a year ago.

Mr. Chairman, I am at a complete loss to understand the administration's objections to this bill. One would expect that they would have taken the lead in requesting legislation of this nature. That would certainly be called for by the policy directive which the Congress included in the Housing Act of 1949. Mr. Chairman, I would like to remind my colleagues of what that policy statement said. For one thing, it calls for a level of housing production sufficient to "enable the housing industry to make its full contribution toward an economy of maximum employment, production, and purchasing power." Further on it calls for "the stabilization of the housing industry at a high annual volume of residential construction."

Mr. Chairman, we have learned that we can disregard this statement of policy only at our peril. The dropoff in homebuilding activity was a major contributor to the severe recession of 1957 and 1958. By the same token, the rapid recovery in housing starts that followed the enactment of the Emergency Housing Act of 1958 deserves a good deal of credit for our recovery from that recession.

Now once again we have seen a sharp decline in residential construction along with weakness in other parts of the economy and a rise in unemployment to more than 4 million. I believe that even the administration would have to agree that a rise in homebuilding activity would be extremely desirable right now. I also believe that the approach taken in the bill now before us is the right one. I do not believe that the policy of wait-and-watch-and-hope is enough to cure the present slump in homebuilding. Furthermore, I absolutely reject the administration's contention that higher interest rates are the answer.

For 7 years now we have witnessed a steady rise in the cost of money. We are continually told that somehow higher interest rates combat inflation. The plain truth is that higher interest rates themselves are an important part of the high cost of living. Nowhere is this seen more clearly than in the case of housing. Let me take the case of a family who can afford to pay $75 a month on a home loan. Back in 1952 when the GI interest rate was 4 percent this family could afford a mortgage of $15,600. Today, because the interest rate has risen to 5¼ percent that monthly payment will carry a loan of only $13,500. As a matter of fact GI loans are simply not available in many areas of the country.

If this family trys to buy a home under FHA today they will find that that $75 payment will now carry a mortgage of only $12,000. This, to me, is the cruelest form of inflation because it means that lower income families are the first to be squeezed out of the market. In the example I have just cited, that family would have lost $3,600 worth of house just so they can have the privilege of paying these higher interest rates, still in the name of fighting inflation.

Mr. Chairman, we could go on raising interest rates endlessly and the average homeowner will never be able to meet the competition in the money market. After all of these increases in interest rates we find that mortgage discounts are as high as ever. In my own State of Texas even the Federal National Mortgage Association charges a discount of 5½ percent on GI loans and in many States the discounts are even deeper. It is obvious that few builders can operate under these terms and the result has been a sharp drop in activity under the FHA and VA programs which supply the bulk of lower-priced new homes.

The demand for new housing is still extremely strong. The principal cause of fluctuations we have seen in housing starts has been changes in the flow of mortgage credit. Our main weapon to assure a continuing high flow of mortgage credit is the Federal National Mortgage Association, in particular its special assistance functions. Unfortunately, too many people, including the administration, have forgotten that the law directs the Association to buy mortgages as needed "as a means of retarding or stopping a decline in mortgage lending and homebuilding activities which threatens materially the stability of a high-level national economy." This is exactly the problem confronting the Nation today and this is exactly the purpose of this bill, especially in the provision of $1 billion for FNMA purchases of FHA and GI loans on lower cost housing.

The decline in residential construction has a particular importance to my area, as it does in other growth areas around the country. In order for business and employment to expand in the newer sections of our Nation it is necessary first to provide adequate housing. When that cannot be provided at prices and mortgage terms within the reach of the average family we find that our growth is stifled.

The need for the Emergency Home Ownership Act is urgent on every point. It would provide a much needed stimulus to all sectors of the economy and would help put some of the more than 4 million jobless men and women back to work. It is needed to achieve the high and stable level of housing production called for in our national housing policy and required to meet the demands of population growth and shift and to replace slum units. It is needed to provide fair treatment for the home buying public and for the homebuilding industry who are the hardest hit by the present tight-money policy.

Mr. Chairman, I am confident that the great majority of this body recognizes the need for this bill and will vote accordingly.

Mr. McDONOUGH. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois [Mr. COLLIER].

Mr. COLLIER. Mr. Chairman, unfortunately in dealing with this type of legislation charges of politics are always generated. If we did not have the bill on the floor at all the previous speaker from our side would not have made reference to political implications. There would be no political issues if we did not have the bill, and the bill should not even be on the floor.

Mr. BROWN of Georgia. Mr. Chairman, I yield myself such time as I may desire.

Mr. Chairman, I would like to speak briefly in support of the bill now before us, the Emergency Home Ownership Act. This bill was introduced on the first day of this session by my able colleague from Alabama, ALBERT RAINS. The need for it grows greater every day. As we all know, the annual rate of housing starts has dropped sharply. The number of homes started during the month of March, after adjustment for weather conditions and other seasonal influences, represented an annual rate of only about 1.1 million new homes,

according to the Government's figures. This is a 20 percent decline from the rate this time last year.

The cause of this decline is obvious. Tight money and high interest rates are once again stifling homebuilding activity. As we found in 1958, when a bill very similar to the one now before us sped through the House by voice vote, the use of FNMA special assistance can break the logjam in the money markets and quickly bring about a recovery in housing starts. This is just the action we need today. A reversal of the drop in housing starts would provide a much-needed stimulus to business and employment.

Mr. Chairman, experience has proved that homebuilding is highly vulnerable to tight money. One of our main weapons in the defense of residential construction against the tight money policy is the Federal National Mortgage Association. Let me remind my colleagues that in 1954, after careful deliberation, the Congress included in the statement of purpose governing FNMA that the Agency should use its special assistance program to retard or stop a decline in mortgage-lending and homebuilding activities which threatens materially the stability of a high level national economy. In order to carry out this responsibility FNMA needs the funds which would be provided by section 11 of this bill. This section would authorize FNMA to purchase up to $1 billion worth of FHA and VA loans on low and moderate cost housing.

Mr. Chairman, I do not think we can emphasize enough that this fund does not represent grants or giveaway money. For each dollar of the $1 billion to be expended under the bill the Government would acquire guaranteed and insured mortgages of equal value. Moreover, these mortgages would earn interest over their life and the Government will make a profit because the interest income will more than cover the cost of providing and servicing the loan. It is significant, Mr. Chairman, that in all its operations FNMA has earned a net income of $367 million in its 21 years of existence after paying all of its expenses. In its special assistance operation alone, FNMA has earned $34 million since 1954.

Mr. Chairman, the funds to be provided under this bill would bring maximum relief to areas where the mortgage credit shortage is hurting most. Under a provision of the bill, the FNMA would be required to channel the funds to those areas where mortgage credit is in short supply. Also, to assure an equitable distribution of the funds, the bill would require the Association to prevent an excessive share of the funds going to any one builder or lender.

Another provision of the bill which would help us gain the maximum benefit from the investment of special assistance funds would require the Agency for a period of 1 year to pay the full face value of any FHA-VA mortgage purchased. In other words, discounts would be eliminated. In addition, section 9 of the bill would set a ceiling of 1 percent of the unpaid principal amount of the mortgage for commitment and purchase fees. At present there is no limit to how high these charges can go. Under its current regulations FNMA charges a total of 1½ percent. Moreover, the bill would limit the amount collected in advance to one-fourth of the total fees and charges in place of the current regulatory assessment of one-half of the total. This would be of considerable benefit to those builders who for one reason or another are unable to complete their projects and deliver the mortgages. Let me state again that these requirements on purchase price and limitation of fees and charges apply only to FNMA's special assistance operations which are designed to aid mortgages designated by the President or by the Congress as especially deserving of support. The provision for par purchase and the limit on fees will greatly reduce financing costs to the builder which means, Mr. Chairman, that the homebuyer will benefit by a lower price.

FNMA's regular secondary market operation will still have to play an important part in stabilizing and supporting the home mortgage market. This was the obvious purpose of this function when it was established by the Housing Act of 1954. To make certain that this purpose is clear, section 4 of the bill states explicitly that FNMA in its secondary market operations shall work toward the goal of aiding in the stabilization of the mortgage market.

To help carry out this purpose, the bill would reduce the stock purchase requirement for those using the secondary market operation to 1 percent for a period of 1 year. At present the law gives the agency discretion to set this requirement anywhere between 1 and 2 percent. FNMA has elected to maintain it at the maximum rate. To my mind this is entirely wrong. In view of the extreme discounts already charged by FNMA, a 2 percent stock purchase requirement can only be regarded as a measure designed to discourage the use of FNMA. In my State of Georgia, FNMA charges a discount of 5½ percent for GI loans and in many other States the discounts are even greater.

As a general rule VA appraisals assume a 10-percent profit margin for the builders so here we have FNMA saying to the builder, "Give us more than one-half of your normal profit and we will do business with you." On top of this discount FNMA requires the seller to buy capital stock equal to 2 percent of the amount of mortgages sold. We all know that few builders want to hold the stock or can afford to hold it. Normally the builder quickly sells it and when he does he finds that it is worth only about 50 cents on the dollar. As far as the builder is concerned this 50-percent loss on FNMA stock is just an additional cost of doing business with the Agency. In fact there is a bill in conference right now which would recognize this fact for tax purposes.

A provision of the bill which has widespread industry support is section 5 which directs FNMA to purchase any FHA or VA loan which is in good standing. This would end the Agency's practice of "second guessing" the FHA and VA on mortgages offered to it for sale. If there is anything wrong with these mortgages that is the responsibility of the Agency which is insuring or guaranteeing FNMA against loss on the loan.

Mr. Chairman, I am proud of my record of steady support for the Federal National Mortgage Association. This Agency has proved its value in the years since it was created in 1938. Altogether FNMA has purchased FHA and VA loans amounting to $9.2 billion; after deducting sales and repayments its present holdings amount to $5.5 billion. In the colossal terms of mortgage lending these amounts are not particularly large. Its present holdings account for less than 5 percent of total home mortgage debt. However, FNMA's activities have played a key role over the years.

This is particularly true in the case of the GI home loan program. FNMA has been a vital factor in helping our veterans to receive the benefits provided by the Congress. For example, fully three-fourths of the mortgages purchased under the special assistance program provided by the Emergency Housing Act of 1958 were GI loans. This same assistance is needed today since tight money is effectively killing the GI program.

This bill would remedy that unfortunate situation and it would do it without one cent of cost to the Government. Mr. Chairman, I strongly urge all of my colleagues to cast their votes today in favor of reviving the GI program and the entire homebuilding industry. At the same time they will be voting in favor of spreading the benefits of homeownership and of giving the economy the boost which this bill would provide.

Mr. McDONOUGH. Mr. Chairman, I yield 10 minutes to the gentleman from Ohio [Mr. BETTS].

Mr. BETTS. Mr. Chairman, I would like to call attention to another angle of this subject which has not been touched upon as yet and also call attention to what was said by the National Association of Home Builders.

The National Association of Home Builders, which is a 43,000-member trade organization in the homebuilding field, does not endorse the billion dollar spending proposal in this bill. The testimony shows the association would support the bill only as a third choice alternative, if the funds were obtained through appropriations rather than back-door borrowing from the Treasury and if the mandatory par purchase requirement was eliminated. Those are two most important "ifs." But there is another bill which the association does endorse and which it is actively supporting because it believes the legislation is of vital importance to the homebuilding industry. That bill is H.R. 10590 which the Ways and Means Committee has reported and which would give the Treasury elbow room in financing long-term debt outside the 4¼-percent interest rate ceiling. Here is what that great organization said to its members in its Washington letter of April 1, 1960:

FOUR AND ONE-FOURTH PERCENT INTEREST ON LONG-TERM BONDS FAILS TO ATTRACT

Failure of investors to respond with enthusiasm to a Treasury offering of 25-year bonds at 4¼ percent has underscored the need for congressional approval of H.R.

10590, the subject of President Martin Bartling's special Washington letter of March 11.

The Treasury had hoped to sell a minimum of $500 million worth of the bonds, and was prepared to handle sales of up to $1.5 billion. Investors bought only $370 million.

Treasury officials, headed by Secretary Robert B. Anderson, viewed the poor response as additional evidence that the 4¼-percent ceiling on Government bonds maturing after 5 years must either be removed or modified. NAHB's leadership strongly concurs in this viewpoint.

"It is perfectly obvious that even in a period when money has eased that the 4¼-percent rate is not attractive to long-term investors," Bartling said. "This test constitutes a fair warning that unless the ceiling is modified the Treasury will have no alternative other than to drain funds out of the short-term market to handle its refinancing of the public debt. This will hit homebuilding—and hit it hard."

Prior to the long-term bond test, the easing of money during the first quarter had established a psychological climate which had noticeably dimmed the prospects for any favorable action on H.R. 10590. What was being overlooked—or ignored—is the fundamental soundness of the proposition that the Treasury must have a greater degree of flexibility in the management of the public debt which now stands at $287 billion. Debt management is not simply a Treasury problem; it is a national problem.

TREASURY WOULD BE GIVEN ELBOW ROOM

H.R. 10590 would permit the Treasury in any fiscal year to issue new bonds up to a total of 2 percent of the public debt at interest rates in excess of the 4¼-percent ceiling. It also would permit some advance refunding. These provisions would give the Treasury badly needed elbow room in handling the debt. They would act to spread the debt out more evenly over a longer span. Now the Treasury is forced to concentrate virtually all of its financing activities in the short-term market. The Government's present position might be compared to the plight of a modest-income home buyer who had to buy a home over a 20-year period, but was required to refinance his mortgage every 90 days.

There is no assurance—in fact, the evidence is to the contrary—that the softening of the money markets will continue throughout the year. Moreover, under anticipated future conditions, there is no assurance that the Treasury will not again attempt another short-term issue similar to the Magic 5's, which hit savings institutions so hard last year.

If the Treasury is not permitted to do some substantial refinancing in the long-term sector of the market, the situation is bound to worsen. During the 1960's, $80 billion of securities will come due. The real test will come in the last 6 months of the year, including a peak on August 15, when a $9.6 billion issue comes due, and again on November 15, when $10.8 billion in bonds and certificates come due. These peaks will hit at times when the needs of business for funds will be at high levels.

Unless Congress approves H.R. 10590—and your continued support for this measure is urgently required—there may be trouble in the fall.

As to the present state of the money market, NAHB has received scattered reports of slight easing in the availability of mortgage funds, although it is still impossible to obtain an accurate measurement. Advance commitments are probably loosening, and the problem of qualifying buyers is somewhat less acute in many areas.

Mr. CLEM MILLER. Mr. Chairman, will the gentleman yield?

Mr. BETTS. I yield.

Mr. CLEM MILLER. Am I to understand then that absent action on the legislation to which the gentleman has just been referring, NAHB would support the Emergency Home Ownership Act; is that correct?

Mr. BETTS. I am not saying that.

Mr. CLEM MILLER. I thought the gentleman just said that the National Association of Home Builders said that as a third alternative it would adopt this bill; and it seems to me we are at that third point.

Mr. BETTS. But we still have the back-door Treasury approach which they object to.

Mr. CLEM MILLER. Will the gentleman say unequivocally that the homebuilders are opposed to this bill as it stands?

Mr. BETTS. I am only saying that they are an organization which I think have an important part in homebuilding. I am quoting from a letter which I think is pertinent and which I think they deserve to have put in the RECORD.

Mr. CLEM MILLER. But according to the proceedings of their convention they definitely went on record in favor of this bill; is that not correct?

Mr. BETTS. I am saying only what the letter says, and I think they are entitled to have it in the RECORD.

Mr. CLEM MILLER. I thank the gentleman.

Mr. McDONOUGH. Mr. Chairman, will the gentleman yield?

Mr. BETTS. I yield.

Mr. McDONOUGH. I think the point that the gentleman from Ohio made in the letter was that some builders would support the present bill providing it did not provide for par purchase of FNMA; in other words, $1 billion for additional purchase of mortgages but not at par. And also, the back-door approach, which would kill the present bill.

Mr. BETTS. Mr. Chairman, I am informed the other great trade associations interested in homebuilding—namely, the National Association of Real Estate Boards, the U.S. Savings & Loan League, the National Association of Mutual Savings Banks, the Mortgage Bankers Association of America, the American Bankers Association, and the National Retail Lumber Dealers Association—unanimously oppose this so-called emergency housing bill but unanimously support giving the Treasury relief from the 4¼-percent straitjacket ceiling on long-term financing. If the Congress really wants to do something to help the housing industry it seems to me we are working on the wrong bill. The Congress should vote down this so-called emergency housing bill which the housing industry does not want and in its place get busy and pass the interest rate ceiling bill which the housing industry does want to prevent the drain of mortgage funds from savings institutions.

Mr. McDONOUGH. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. FINO].

Mr. FINO. Mr. Chairman, while some of the perennial enemies of Government housing programs would want us to believe otherwise, we have yet to win the battle to provide American families with decent, safe, sanitary housing. Instead, the need for a continuous flow of funds into the home mortgage market remains at the top of the list of stabilization measures. For this reason, we must continue to supplement and support the private capital markets which have been assisting the building industry. The Emergency Home Ownership Act of 1960 has as its primary objective the encouragement of mortgage lending. It, therefore, becomes imperative that we, in Congress, strive for the successful passage of this important housing legislation.

My home city of New York has been among the cities which are in the forefront of the fight to improve the living conditions of urban families. In spite of all the State, Federal, and municipal housing programs and the sometimes heroic efforts of the homebuilding industry—more than 200,000 substandard housing units still remain in the city's housing inventory; and another 100,000 dwelling units are grossly overcrowded. Only through a miracle of miracles could the children living in such an environment emerge as mentally adjusted, physically sound individuals.

I would like to bring to the attention of the Members of this House an article that appeared in the New York World Telegram under date of April 21, 1960. It was in connection with a dinner held in New York. The caption of the article is "Loan Outlook Still Bad, MBA Group Hears." MBA stands for Mortgage Bankers Association of New York. It says:

Homebuilding in the metropolitan area and throughout the State has declined sharply because of the inability of builders to obtain mortgage financing in the present tight money market, members of the Mortgage Bankers Association of New York were told at their April dinner meeting in the Hotel Biltmore last night. "Despite the headlines that loan funds are easing, the outlook is not good and is not likely to get better," asserts Alexander Paulsen, board chairman of the Long Island Home Builders Institute and vice president, General Builders Corp. "Builders today can't get commitments for building loans and permanent mortgages in the volume and at terms we and our home buyers need."

Jack Friedland, Staten Island builder and president of the New York State Home Builders Association, noted that the mortgage crisis extends throughout most areas of New York State. Mr. Friedland said that just within 2 weeks the State Savings Banks Association had tried to remedy the situation by having local savings banks send $1 million into Westchester and another $1 million to Buffalo to cover needed home mortgages.

The New York City housing situation is but a miniature of the state of the national housing panorama. The 1956 national housing inventory revealed that there are almost 4 million dwelling units in this country which are seriously deficient in some respects; another 2.8 million do not have running water and 4.7 million lack private plumbing facilities. That such misery and filth should exist in this most economically and socially progressive Nation of the world is beyond comprehension. It is conclusive proof that the battle for improved housing is really just beginning, for not only

must we increase the amount of housing under the pressure of population growth and mobility but we must also strive to upgrade the condition of the existing supply of housing.

A profitable, progressive business enterprise constantly seeks to protect its investment—this is the key to its remaining "profitable" and "progressive." Numbered among this country's assets are more than $250 billion in nonfarm residential wealth. This is for structures only; the value of land is not included in this sum. The physical plant which comprises our residential structures is an investment which warrants a high level of protection, through rehabilitation and the replacement of obsolescent structures; by stepping up the capacity of the housing machinery to provide for increased needs, and by furnishing the necessary tools for proper maintenance. This is as vital to the Nation's economic growth and stability as the proper maintenance of the capital equipment of a business enterprise.

The accumulation of residential wealth of such magnitude could not have been achieved by private industry alone. The National Housing Act of 1934 undergirded the home mortgage market by developing a standard mortgage instrument, promoting uniformity in mortgage transactions and encouraging home ownership through measures designed to impart a degree of liquidity to mortgage market funds. The contributions of the agencies operating under this historic legislation are legion. I do not have to reiterate them here. The programs administered by these agencies continue to be important to the limited-income home buyer, to the lending institutions and the homebuilding industry.

The housing bill now pending before us will help to ease the flow of mortgage funds, thereby preventing a sharper decline in homebuilding activity and accommodating those families who wish to exercise the right to reside in a home of their own. It will not increase the taxpayer's bill. Nor does it provide for any further encroachment by the Government into what is essentially the responsibility of private enterprise. Instead, it will assist the homebuilders of America to continue to provide improved housing.

In the late 1940's when Senators Taft, Wagner, and Ellender fought so diligently and unselfishly to provide a legislative vehicle for housing and community improvement, the need was great, and it was urgent. In the decade just passed, in spite of the efforts of the Congress, civic leaders, Government officials, the construction industry and lending sources, we have succeeded in the elimination of only one-fourth of the dilapidated housing which existed in 1950. While housing starts have averaged in excess of 1.2 million units annually, it has been estimated that at this level of new construction we will not be able to eliminate our backlog of substandard housing by 1970—ten years hence. Therefore, today—1960—the need for housing programs continues to be urgent.

In the face of a generally high standard of living and a national product which increases with each passing year, we cannot afford to neglect so important an asset as our residential structures and their environment. The billion dollar fund to purchase FHA and GI home mortgages envisioned by this emergency measure would be a worthwhile investment in the future. The economic and social returns from such an investment will more than repay the advance of this sum. I urge the Members of this House to support this important bill which will benefit so many of our citizens by not only increasing job opportunities but creating decent and suitable living conditions for our American families.

Mr. SANTANGELO. Mr. Chairman, will the gentleman yield?

Mr. FINO. I yield to the gentleman from New York.

Mr. SANTANGELO. The gentleman from New Jersey stated in his remarks regarding this bill that no one from the city of New York would be aided by the provisions of the bill. Can the gentleman state from his experience on this committee, as well as from his experience living in the city of New York, as I do, that the people who are trying to build in the so-called suburban areas of New York City, such as Queens, the Bronx, and Staten Island, and those who are going into Westchester County and New Jersey because of lack of decent housing in New York City, find they cannot buy a home because the money is not available in a mortgage market, and that the builders are having difficulty building because they cannot get mortgages for the homes for these people from New York City?

Mr. FINO. The gentleman has stated the facts correctly.

Mr. SANTANGELO. So that when the gentleman stated this would not help the citizens of New York City he was in error?

Mr. FINO. Yes; the gentleman from New Jersey is not entirely correct in his remarks.

Mr. McDONOUGH. Mr. Chairman, will the gentleman yield?

Mr. FINO. I yield to the gentleman from California.

Mr. McDONOUGH. Does the gentleman believe the land can be purchased and a home built thereon for $13,500 in his area?

Mr. FINO. We are not talking about a $13,500 home.

Mr. McDONOUGH. You are talking about New York City.

Mr. FINO. The gentleman asked me a question. Allow me to answer it. When we are talking about $13,500 and $14,500 we are talking about mortgage money and not the entire price of a loan.

Mr. McDONOUGH. That is right.

Mr. FINO. We can build homes in New York City for $16,000 and $17,000.

Mr. McDONOUGH. Then the down payment would have to be the difference between the cost of the house and $14,500 in the high cost area.

Mr. FINO. Exactly.

Mr. McDONOUGH. So when someone buys that high-cost house for $17,000 you are not catering to the low wage earner. The purchaser has to make a $3,000 downpayment on a $17,000 house in order for the builder to have the advantage of selling the mortgage to Fannie Mae. How do you reconcile that?

Mr. FINO. If we have this legislation on our statute books, the benefits from it would flow into the tight money market and help ease the present situation by making more mortgage funds available.

Mr. McDONOUGH. That is an assumption. That is all a presumption.

Mr. FINO. Additional funds would be available and there would be enough funds for those purposes which you have mentioned.

Mr. McDONOUGH. Mr. Chairman, will the gentleman yield?

Mr. FINO. I yield.

Mr. McDONOUGH. In the last billion dollar Fannie Mae special assistance fund that was voted in 1958, the entire State of New York got 104 houses and most of them were in low-cost areas and not out on Long Island or other higher priced areas.

Mr. FINO. I appreciate the gentleman's concern for New York State, but our concern and interest should also be national.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. BROWN of Georgia. Mr. Chairman, I yield such time as she may require to the gentlewoman from Michigan [Mrs. GRIFFITHS].

Mrs. GRIFFITHS. Mr. Chairman, I would like to point out that as a member of the Housing Subcommittee of the Committee on Banking and Currency, I am more than for this bill. The State of Michigan has been the third fastest growing State in the past decade. Detroit has had the most rapid industrial expansion of any city in America during the past 6 months. Yet, the Detroit metropolitan area exceeds the national average in dropoffs in housing starts. It is not necessary to point out that America can afford housing.

Secondly, I think it is a good thing to point out that those people who are suffering in the building trades and in the building industry from lack of housing starts are facing a far greater problem than those people who share in a general depression. People who are out of work during the time of high employment and rising prices in areas face unusual difficulties. America can afford this bill.

I might point out further that while this may affect the budget of the United States, there is no debt service charge to be carried in this bill.

I urge that all members of the Committee support the bill and that it be passed and made the law of this Nation.

Mr. McDONOUGH. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan [Mr. HOFFMAN].

Mr. HOFFMAN of Michigan. Mr. Chairman, it is unpleasant to be forced to disagree with my delightful colleague from Detroit [Mrs. GRIFFITHS], who just addressed us, and for whose views I have the utmost respect, but it is also very difficult, in fact, impossible, to understand the need for this bill. Yesterday and today the majority leader Mr. MCCORMACK made his usual speech, the one that he

makes when legislation of this kind comes up. I gathered the impression that Republicans are all living in the dark ages. That is the way they prefer to live. They are all back numbers. They do not know what is going on in the world. He seems to follow the Hopkins theory. Tax and spend and so win the votes of the thoughtless—the support of those who would redivide the wealth of our people—take from those who have worked and earned and saved and give to those who have spent as they lived—saved not at all for the day to come.

I would like to have you read this little letter from a young man who writes he does know what is going on. He writes:

APRIL 23, 1960.

My letter concerns itself in its entirety with the controversial H.R. 4700 or the Forand bill. As you must have already realized the new generation which will within a short time, control tomorrow's Government is better informed, better educated than ever before. There is relatively little happening in our Government today of which the people of today are unaware when compared with a decade or two ago. South Korea is a good example of the awakening of a sleeping giant, public opinion.

The Forand bill is one of the so-called hurdles which demonstrate to the public where their Representatives actually stand. Our Government is of the people, by the people, and for the people, and is existent therefore to serve the people. It should, therefore, be your duty to aid with the passing of the Forand bill and challenge the opposing selfish, well-financed minority blocking the bill due to conflicting interests. I would very much like to hear of your support and aid with a discharge petition to get H.R. 4700 out of the Ways and Means Committee. When it is time to go to the polls I shall vote for a candidate which supports the average individual and sincerely hope that you shall be one of those I shall have in mind.

I know of no more delightful procedure than that of being generous and helpful, especially if you are giving away someone else's money. How eager we are to help the other fellow around election time with the tax dollars of the other man's earnings.

That is what most of the measures supported by our Democrat colleagues favor—again Harry Hopkins—tax-spend brings the votes.

We are told—at least that is the impression I get—that the home folks do not have any money to buy homes, homes cost too much. Why—because of the giveaway policy of the majority party. I just read that the electricians are getting $6 an hour. That, and the ever-rising cost, may have something to do with the inability to buy a home.

Then, as you listen to that sort of an argument and as our office found in the last week it is impossible to get a hotel reservation here in Washington for a constituent, you wonder just where this scarcity of money exists. People have money to come to Washington. Today's paper says 400,000 are here. Did not the press tell us a week ago Sunday that 8,000-plus people were waiting in line to go through the White House? It costs money to come to Washington. It costs dollars to visit here. In truth and in fact it is not a scarcity of money at all which prevents the purchase of a home. It is the high cost—in turn the result—of the so-called liberal policy of buying when payment is not possible. It is the inclination of the people to buy something they want instead of something they need. Read the press. Look around Detroit. Look on the streets and the highways. There is money to buy autos. Talk about unemployment. They are making more cars in Detroit than ever before. There are so many almost everywhere that there is no place to put them; scarcely room on the highways to drive them in safety.

It is not a scarcity of money that creates an emergency if there be one. It is the cost of building. Why are homes so high? Because all during the last few years the cost of building has been going up and up. They have pushed the cost of a home beyond the reach of the average man. Oh, yes, say the liberals—wages must go higher—and they do, but unfortunately the higher wage buys no more; sometimes less. In times gone by one was able to buy 40 acres of land for what an automobile costs now. You could make a living on that land. No longer is that true.

In my opinion, it is not a matter of a lack of money. It is a lack of judgment in spending. It is the direct result of the so-called liberal policy of those who tax one to give to another. If money is needed for homes it is the determination to have our own way, buy beyond our means and pile up the national debt; leave the bill, the cost both private and public, to some future generation to liquidate. A selfish unfair policy—but one which gets votes. If that is not selfish I do not know what selfishness is. We cannot go on endlessly increasing wages. Adding to the cost of everything. Being able to buy no more with the higher wage. Think of the case of the old person who has a home, a good home, but is physically handicapped and has to have someone about 30 hours a week. Do you know what it costs? Fifty dollars for less than 30 hours work. Where is the older person, unable to work, to get the money? Savings exhausted, earning capacity exhausted.

What we need is a little wise planning. What we need is what the late Senator Wadsworth, who served here for so long in this House after serving in the Senate, you remember, what Senator Wadsworth said: A little work, a little thrift, and a little thought for the future. Sound doctrine then, sound today.

Where is this going to end? With a real depression and then a sad and cruel retrenchment. My correspondent referred to the Forand bill. That means more billions, how much no one knows, if we keep on, how much and from what source will it all come?

Mr. BROWN of Georgia. Mr. Chairman, I yield 3 minutes to the gentleman from California [Mr. CLEM MILLER].

Mr. CLEM MILLER. Mr. Chairman, there have been remarks on the floor about the National Association of Home Builders supporting this bill only as a third alternative. Presuming that to be the case, it seems to me we have reached the third alternative. But let the record show that the National Association of Home Builders went on record at their convention in favor of this legislation. The board of directors subsequently apparently reversed the position of the convention. They speak of "back-door spending." Homebuilders should know you need a back door as much or more than a front door. This is a methodology of Congress, and what are the homebuilders doing in this dispute at all? I think it is about time the National Association put its money on the line and decided who its friends were.

The gentleman from California [Mr. MCDONOUGH] has said this afternoon that this bill will benefit builders. I hope the National Association will pay careful attention to this because he is opposed to the bill. He said that the people who are not going to benefit are the consumers. We will see about that in a moment.

What are the facts? It seems to me that when we get down to the question of need or no need we should go to the record, to the hearings, and not charge politics. I do not know what is being said elsewhere, but I do know the witnesses from California who came before our committee said there was need. I am not weeping any crocodile tears for California, but we do give up large amounts of money. That money flows into the eastern money market in savings and insurance, and only a trickle comes back. The fact is that in California we need money for housing, and we need an easing of the money market. I do not see how any colleague from California, regardless of what has been said here, can stand on the floor of this House and oppose the need for help in housing. There is ample evidence in this record that I am holding here.

The gentleman from New Jersey [Mr. WIDNALL] was present at the time the witnesses from California appeared, the gentlewoman from Michigan [Mrs. GRIFFITHS] was there at the time. There is ample testimony in this record, and it is a most convincing case beginning at page 206 of the hearings. Let me quote just a typical example:

Here is what Dan Schwartz has to say:

Now, coming to another situation which is becoming more and more prevalent in the State, the last figures showing that 80 percent of the homes produced in southern California were conventional with second mortgages, and 60 percent of the homes in our area were produced with conventional, with second mortgages.

In this situation we have a 7.2-percent first mortgage for a term of 25 years, on top of that being an 8-percent second mortgage with a 7-year due date, which is the average situation, with payments at 1 percent per month.

Again the discount for this type of mortgage is 6 percent, or $762. However, the monthly payments are $158. The $158 comprises the approximately $90 on the first mortgage, 1 percent of the $3,300 second mortgage, or $33, plus an average of $35 for taxes and insurances, and, of course, the big danger here is that come the end of the 7 years lightning strikes.

Mr. MILLER. Would you amplify on that?

Mr. SCHWARTZ. At the end of 7 years the buyer is going to have to face a fantastic problem. His 1 percent a month didn't begin to pay off the $3,300 second mortgage over the 7-year period, so as of the end of the seventh year he finds he has to make a payment of $1,750 on the house that he got into with no downpayment, and this, gentlemen, we feel is a growing and very serious situation, and why has this come about?

It has come about because builders such as myself and others up and down the State have been unable to finance GI and FHA, the money not being available. We have had to resort to a conventional program, doing a tremendous injustice to the people of the State of California, knowing that at the end of this seventh year there is going to be a big problem.

Where was the opposition to this testimony? There was not any. Where was the challenge to this fine testimony from Dan Schwartz and the other Californians? It seems to me that if we are going to speak here in opposition to this bill from California, there should be some indication of it—the record. And there is none.

Mr. WIDNALL. Mr. Chairman, I yield 10 minutes to the gentleman from Missouri [Mr. CURTIS].

Mr. CURTIS of Missouri. Mr. Chairman, I usually do not vote against a rule. In fact, I have been trying to think when I last voted against a rule. However, I did vote against the rule on this bill, and I might say that the attendance during debate on this issue has tended to confirm my vote because there does not seem to be any interest in this bill.

Mr. SANTANGELO. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count.

Mr. SANTANGELO. Mr. Chairman, I withdraw the point of order.

Mr. GRIFFIN. Mr. Chairman, I make the point of order a quorum is not present.

The CHAIRMAN. The Chair will count. [After counting.] Seventy-eight Members are present, not a quorum.

The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 57]

Alexander	Garmatz	Morrison
Anderson, Mont.	Gary	Nix
	Gavin	O'Hara, Mich.
Arends	Granahan	Pelly
Bailey	Grant	Pilcher
Baker	Gray	Pillion
Barden	Halleck	Porter
Barrett	Hargis	Powell
Bentley	Harmon	Rabaut
Bolling	Holifield	Riehlman
Bonner	Irwin	Roberts
Boykin	Jackson	Rogers, Tex.
Buckley	Jones, Ala.	Rooney
Burleson	Kearns	Saund
Canfield	Keogh	Sheppard
Celler	Kilburn	Short
Chelf	Kilday	Smith, Kans.
Chiperfield	Lafore	Springer
Clark	McGinley	Sullivan
Cooley	McIntire	Taylor
Dawson	McMillan	Teague, Tex.
Delaney	McSween	Thompson, La.
Devine	Magnuson	Walter
Dooley	Martin	Whitten
Dowdy	Moeller	Withrow
Durham	Montoya	Wright
Fallon	Morgan	Young
Frazier	Morris, N. Mex.	

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. FORAND, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H.R. 10213, and finding itself without a quorum, he had directed the roll to be called, when 348 Members responded to their names, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

The CHAIRMAN. The gentleman from Missouri [Mr. CURTIS] is recognized.

Mr. CURTIS of Missouri. Mr. Chairman, at the time of the quorum call I was commenting on the rule and the reason I felt the rule should have been voted down.

I want to refer to the fact that this is entitled "Emergency Home Ownership Act" and is predicated upon the assumption that there is an emergency. I think it is also pertinent to point out, in the light of the way the debate was going, with the emphasis on need for this housing, the fact that in the preamble to the bill there is no mention at all of need for housing. As a matter of fact, there is a very interesting economic theory embodied in the preamble of this bill. It is a new theory that has just been advanced, primarily in the past year or two, by Mr. Keyserling and Mr. Galbraith and some of the economists of the Americans for Democratic Action. The theory is that we have to have Federal spending if we are going to maintain a prosperous economy. Incidentally, it is an economic theory that I am completely opposed to. I think it is erroneous. I would say it is directly contrary to the concept of the private enterprise system, but it is a subject worthy of debate.

But read the preamble along with me. What is this housing bill supposed to do? First, to halt a serious slump in residential construction. That says nothing about the need of homes, the need for cheap and adequate housing for our people. It refers to the economic welfare of a segment of our economy, the homebuilders. That has been the argument, that we need to do something about this particular industry.

Second, to increase both onsite and offsite job opportunities. This has to do with employment.

Third, to help achieve an expanding full employment economy.

That is practically Mr. Keyserling's theory. You have to spend Federal money whether in the housing field or whatever field. The whole theory is that this economy cannot maintain maximum employment, maintain price stability and have economic growth unless we are spending Federal money at a certain level, regardless of need. So need, indeed, has very little to do with this bill.

Now we come to the fourth reason in the preamble of the bill. At last we get around to human beings: To broaden home ownership opportunities to the American people; and, of course, I question whether it will do any of these things, particularly the last. But now to get around to the bill.

One of the interesting developments here has been the arguments of the proponents of this legislation that the difficulty in the housing industry results from high interest rates. I wonder how many Members of the House paid attention to the Joint Economic Committee hearings and the papers and discussions of the various economists in this country on the subject of the interest rate ceiling, the ceiling of 4¼ percent, on long-term bonds, and the arguments of people like myself who took the floor and warned this House as economists have been warning the country of the damage that was going to result from not taking that ceiling off? We were and are not saving anything on the interest rates by leaving the ceiling on, because there is no ceiling on short-term Government financing, but we have been imposing the ceiling on long-term financing. That has forced the Federal Government to do its refinancing and new financing in the short-term money field; and as we tried to point out, one of the great industries that provides short-term money financing is the savings and loan institutions. When the Treasury Department issued the "fabulous fives" it took considerable sums directly into Government securities away from these institutions to which people building homes would go for their borrowing. The very warning that those who blindly hampered sound debt management were given is now coming true. People are paying high interest rates.

What has created this particular situation? Because it is not just homeowners I might state who are damaged by this forcing the Federal Government into the short-term investment field all of our consumers who want to buy washing machines and durable consumer goods must go into the short-term field where the Government has already been forced to move.

There is only one way to solve this high interest rate and this shortage of investment money. There are two ways, really. One is to decrease the demand, which I do not think we want to do. If the demand is from our private sector we do not want to decrease the demand of people for homes and for the good things of life. But one thing we can do to decrease the demand I might say is to decrease the demand of the Federal Government for this money by reducing, certainly not increasing, the Federal debt.

The other way in which we could solve the short-term problem, the other area in which we could do something about this tight money, of course, is increased personal savings, and I am very hopeful that in the long run that is exactly what will solve this problem.

Tight money is not created by Government action; Government inaction, Government mishandling of fiscal and monetary affairs, of course, can contribute to the problem; but, clearly, tight money is related to the demand for money in relation to the supply of money.

Those who want to hearken back to the days of Mr. Truman will remember exactly what happened at that time. The Federal Reserve was pegging the

Government bond market. It was under Mr. Truman and his administration that the Federal Reserve-Treasury accord was reached. Pegging the bond market was the very process that brought about inflation which cut the purchasing power of the dollar in half. The Assistant Secretary of the Treasury, Mr. William Martin, who was under Mr. Truman, a Democrat, who is now incidentally head of the Federal Reserve Board, was the one who worked out this accord to eliminate this policy to peg the Government bond market by Federal Reserve purchases in order to control this inflation.

Now, we have heard all of this plea for the little man from those on the other side of the aisle speaking in behalf of this bill. Let me say that the thing which hurts the little man the most is inflation because every dollar that the little man has goes for consumption and inflation hits every consuming dollar. The man who has a higher income can divert some of his dollars into investments and thereby ride the impact of inflation. It is the little man, the man who has to use all of his dollars for consumption, who is hurt the most by inflation. And, Mr. Chairman, that is the reason we are not having the Federal Reserve System peg the bond market, that is the reason it is better to have the economic laws of this country react so that we can actually see what is the demand for investment dollars and what is the supply and relate the two together. If we have tight money, let us recognize it is due to the great demand for that money. This is somewhat encouraging, but we can never get ahead of the amount of savings that our people are willing to accumulate in order to finance our future growth. It comes back fundamentally to the savings of our people.

My concluding remarks relate to the welfare of our economy. I was amazed to hear the chairman of the committee make remarks of gloom and doom in light of the record.

The Joint Economic Committee held hearings during the month of January and February on the President's economic report and there was not an economist who came before us who did not agree that the year 1960 is going to be the most prosperous in our history. There was no estimate of $550 billion of gross national product, as I have heard some people say on the floor. The administration, I think, predicted $510 billion, and the economists said they were being conservative, that it probably would go to $520 billion.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. McDONOUGH. Mr. Chairman, I yield the gentleman 3 additional minutes.

Mr. CURTIS of Missouri. Mr. Chairman, they said that the economy would run to around $510 billion. There is a good indication we will reach that figure. The best indicator, of course, we have of economic welfare is the gross national product. Everyone has the Economic Indicators for April 1960, and if they will turn to page 2 they will see that for the first quarter of 1960 our gross national product is at the rate of $498 billion. That relates to the $479 billion of 1959, it relates to the $470 billion of the first quarter of 1959. Indeed, it shows exactly this prosperity for 1960 coming along. I notice a complete and apparently unawareness of this most unusual weather we had in the month of March, which, of course, had a momentary impact on any economy. But we are coming out of that.

Referring to other economic indicators that are also contained in the joint Economic Indicators, almost without exception every economic indicator shows that this year, 1960, is going to be a prosperous year, that we have a fundamentally sound economy and a growing economy. So much for these prophets of doom and gloom who on the slightest fluctuation in any economic indicator want to come down here and make wild statements. They may think it is good for political reasons, but I think it is rather foolish because if the prognostication does not turn out to be accurate, just look at where you are going to be. Every economist I have heard and read about even in recent weeks I may say reaffirms the fact that this year is going to be a prosperous year. It is not going to be a great boom year, but very few of us indicated or said we were going to have a great boom year. We said it would be the most prosperous year in the history of the United States, as, indeed, it is.

Mr. Chairman, how ridiculous it is to bring a so-called emergency bill on the floor of the House under this kind of economic climate.

Mr. BROWN of Georgia. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. PATMAN].

Mr. PATMAN. Mr. Chairman, the distinguished gentleman from Missouri [Mr. CURTIS], who has just addressed the House has made some extremely interesting remarks concerning the cause of high interest and concerning the low interest policy of the previous Democratic administrations. I desire to address my remarks to these subjects, particularly.

Interest rates have gone so high under this administration, we are told, only because we are in a period of a most unusual and perhaps an unprecedented demand for money. We are in a great business boom, or at least a promise of one, and there is tremendous demand for funds on all sides.

I would invite the Members' attention to the situation which prevailed first, during World War II; and, second, in the post-World War II years.

From the beginning of the war in Europe on September 1, 1939, until at least 1951, our Nation experienced a very trying time, to put it mildly. The stresses and crises the Nation met were enough to test the economy of any nation.

During the World War II years we were spending a quarter of a billion dollars a day on the battlefield. We were shooting it away. The amount of money that had to be borrowed in that period was unprecedented in the history of our Nation, and the history of any nation. Not only did this unprecedented demand for Government borrowing have to be met, but industry had to borrow unprecedented sums to build the plants to produce the war goods—the ships, the airplanes, the munitions, the textiles—everything conceivable.

Yet at no time in this period did the Federal Government pay a rate of more than 2½ percent on its long-term bonds; and never did the market yield on Government bonds rise above 2½ percent.

In the post-World War II years there was a tremendous demand for funds that well could have strained and broken our monetary system. There was a great backlog of demand from the period when half of the Nation's production had gone into the war effort, and ordinary people all across the country had large amounts of liquid assets with which to buy the goods they wanted to buy and had postponed buying. Production capacity was inadequate in almost all lines, and an unprecedented expansion of business facilities had to be financed.

Yet through these postwar years, up until March 3, of 1951, the date of the so-called Federal Reserve-Treasury accord, the price of Government bonds never dropped below par. The market yield never went above 2½ percent, and at most times the market yield was substantially below 2½ percent.

Was the rate fixed? Yes; it was pegged. It was the duty of the Federal Reserve to peg them. It was then the duty of the Federal Reserve to help all the people and not just the bankers and the wealthy families. The Federal Reserve was then doing its duty. Today it is not doing its duty. It is a Government agency serving the special interests of the few—not the welfare of the whole country.

Mr. CURTIS of Missouri. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. Just a moment, please.

Mr. CURTIS of Missouri. I just want to ask a question. Were there not price and wage controls about that time, and what about the situation when they were removed?

Mr. PATMAN. I hope the gentleman from California [Mr. McDONOUGH] will give me 4 or 5 minutes to answer that question. I have only a limited time.

Yes; we had controls during the war years, but after the war there was a big clamor to get rid of these controls immediately, and practically all controls were removed in 1945, soon after the war was over. Except for rent controls in selected areas, almost no controls remained after 1946.

From 1946 to 1951, the greatest potential inflationary period in history, we kept our bonds above par and we kept the interest rate no higher than 2½ percent. So I submit, Mr. Chairman, that if during the most trying periods of our existence, during those 12 years, we could keep Government bonds above

par and the interest rate at 2½ percent, we can do it any time. I say we can do it now if there is a desire to do it, but the Federal Reserve does not desire to do it. It desires high interest, just as all officials in this administration desire high interest.

Mr. CURTIS of Missouri. What about the value of the dollar under those circumstances?

Mr. PATMAN. Of course, that varied, just as it does right now. It depends upon what you are buying with that dollar. If you are buying short-term credit, the dollar is worth only 7 cents today compared with that period.

I will show in a moment that the price increases made after the controls were lifted were not the result of any monetary inflation in this period, any more so than the price increases that have been made under this administration have been caused by a monetary inflation.

Mr. Martin, whom the Republicans insist on calling a Democrat, was appointed by a Republican President. Why? To carry out the Republican policy of high interest. He has carried out the Republican policy, as they wanted it carried out. He was first appointed on a trial basis. They wanted to make sure how he would act before they gave him the regular place. But he has carried out their policies all right, so much so that he is now their hero.

Now I would like to invite the Members' careful attention to the official record of the postwar period preceding the so-called accord of March 1951.

I refer to it as the "so-called accord" because it was not an accord, or an agreement in any legal or proper sense of the term.

Agencies of the Government cannot properly reach an accord on an interest-rate policy unless the President of the United States agrees to it, because the President has a duty, under the law, to approve each and every bond issue and the interest rate which the public is going to pay on that bond issue.

The President of the United States was not in accord with the so-called accord of 1951 which was arrived at between certain officials of the Treasury and the Federal Reserve. On the contrary, the President of the United States on this occasion was the victim of a mutiny and a revolt—a kind of self-declared session of the Federal Reserve from the rest of the Government.

Only shortly before this so-called accord, the President had called the members of the Federal Open Market Committee to the White House and asked them to hold the line at 2½ percent on Government bonds, and they promised to do that.

Let me point out for those who do not know, that the Federal Open Market Committee is the group within the Federal Reserve System which determines interest rate policy for the United States. This committee is composed of the seven members of the Board of Governors, plus a selection of five of the Federal Reserve bank presidents, the latter individuals being chosen for their office by representatives of the private banks.

The members of the Federal Open Market Committee promised the President of the United States they would hold the line at 2½ percent on Government bonds, despite the fact that there was then a tremendous agitation among the bankers for higher interest rates, and news had leaked out that the leaders in the Federal Reserve wanted to raise interest rates.

A point of fact, according to testimony later given by Mr. Allen Sproul who was at the time president of the New York Federal Reserve Bank and a member of the Federal Open Market Committee, the Open Market Committee had already made a decision in the previous August to go its own way and raise interest rates despite what the President wanted them to do.

The cause of our troubles today is that the bankers have gotten control of the Federal Reserve System and are running it in the interest of the bankers, imposing higher and higher interest rates.

Today our Government's bonds are selling in the market at 82 cents and 83 cents on the dollar—an absolute disgrace.

Now what are the facts about the low interest policy in the preaccord period? During the past few years these facts have been more misrepresented than any facts I know of. And they have been misrepresented through all of the organs of propaganda.

We have heard it said on all sides, "Yes; the Federal Reserve was able to keep interest rates by being committed to buy Government bonds in the open market whenever the price went below par, but to maintain the artificially low interest rates, the Federal Reserve had to buy up vast quantities of Government securities, and this inflated the money supply and caused all our troubles."

The main trouble with this claim is that it is exactly contrary to the facts.

The facts are that the Federal Reserve did not buy huge quantities of Government securities in the postwar period, prior the accord, when it began to raise interest rates, but it actually made a huge net reduction of its holdings of Government securities.

So, if the Federal Reserve increased the money supply too much in this period, it was not because it increased its holdings of Government securities—an event which would have given the banks more reserves and thus enabled them to make more loans and investments.

But the further fact is that the Federal Reserve did not permit an increase in the money supply, in any real sense, by any means whatever. In fact it restrained the normal growth of the money supply and actually reduced the money supply relative to the amount of goods and services produced.

For those members who have not seen the rebuttal to the claim that the Federal Reserve had to go into the market and buy up vast quantities of Government securities in the postwar years to keep interest rates reasonable. I will insert in the RECORD the official figures from the Federal Reserve report, showing the exact amount of its holdings of Government securities in these years.

These figures show that between the end of 1945 and the end of 1950—just 2 months before the accord of March 1951—the Federal Reserve reduced its holdings of Government securities by a net of $3½ billion. This was done notwithstanding the fact that there was a tremendous increase in the production of goods and services in these years and, consequently a real need for an increase in the money supply. By money supply we mean, of course, both bank credit and currency in circulation outside of banks.

The following table was taken from the annual report of the Board of Governors of the Federal Reserve System for 1959, page 119:

End of year or month	Reserve bank credit outstanding						
	U.S. Government securities			Discounts and advances	Float	All Other	Total
	Total	Bought outright	Held under repurchase agreement				
1945	24,262	24,262	----------	249	578	2	25,091
1946	23,350	23,350	----------	163	580	1	24,093
1947	22,559	22,559	----------	85	535	1	23,181
1948	23,333	23,333	----------	223	541	1	24,097
1949	18,885	18,885	----------	78	534	2	19,499
1950	20,778	20,725	53	67	1,368	3	22,216
1951	23,801	23,605	196	19	1,184	5	25,009
1952	24,697	24,034	663	156	967	4	25,825

Where, may we ask, were all the Government securities which the Federal Reserve bought up in the postwar years in order to maintain what is called an artificially low-interest rate? If it bought up these securities we have heard so much about, it must have burned them or hidden them away in the back of the vault somewhere and neglected to include them in its official reports.

As I have already said, without respect to the means by which it may have done it, the Federal Reserve did not increase the money supply in any realistic meaning of the term in the first war years prior to the accord. Actually, it increased the money supply less relative to the growth in the economy than it has in the years since the so-called accord.

I will insert a table showing the official figures on this point:

Comparison of changes in the money supply and changes in real output, 1946–58

Year	Percent increase in real GNP (1954 dollars)	Percent increase in money supply [1]
1947	−0.1	3.5
1948	3.8	.5
1949	−.1	−1.0
1950	8.7	2.5
1946–50	12.6	5.6
1951	7.5	5.1
1952	3.4	5.1
1953	4.4	2.4
1954	−1.6	1.3
1950–54	14.1	14.7
1955	8.2	3.5
1956	2.1	1.4
1957	1.8	.5
1958	−2.3	1.0
1954–58	9.9	6.6

NOTE.—Real GNP: The total gross national product (representing the total national output of goods and services) measured in current dollars has been converted to 1954 constant dollars.

[1] Money supply as measured by demand deposits adjusted and currency outside banks. Demand deposits are adjusted to exclude interbank deposits, U.S. Government deposits, and cash items in the process of collection. Data for money supply are based on 13-month averages.

Now I challenge any Member to obtain from Chairman MARTIN or Secretary Anderson any meaningful statement relative to this factual record. The record does not agree with their propaganda, and they evade all questions that put their propaganda and the record side by side. I have tried it. Let me illustrate the results.

Recently Secretary Anderson was testifying before the Joint Economic Committee, and I gave him some questions in writing which compared some of the claims he has made on this subject with the actual record. Furthermore, I called his attention to a statement made in the Board of Governors' report for 1951 which admitted that prior to the accord the market would take any amount of Government bonds at the 2½-percent rate then being offered.

Comparing what it claimed to be the situation in the Government bond market immediately following the accord with that before the accord, the Board's report states:

> The new market situation contrasted sharply with the situation that had prevailed throughout the postwar period, when any amount of bonds could be sold readily at relatively fixed prices.

I cited this passage to Secretary Anderson and asked him this question:

> My question is, first, whether you agree that throughout the postwar period, up until the beginning of 1951, any amount of bonds could be sold readily at relatively fixed prices?

Now please note his answer in which he manages to misunderstand the Board's statement. His answer begins:

> During much of the postwar period, up until the time of the Treasury-Federal Reserve accord in March 1951, a large amount of Government bonds were sold readily by investors to the Federal Reserve at relatively fixed prices. Since that time, however, the Federal Reserve authorities have properly pursued a flexible monetary policy—

And so on. So you see, he will not say whether or not he agrees with this very embarrassing statement about the preaccord period which the Board itself made in 1951. His answer twists the Board's plain statement into a statement, not that any amount of bonds could be sold to investors at 2½ percent, but that investors readily sold the bonds to the Federal Reserve when the rate was only 2½ percent.

After that the Secretary's statement goes on to praise the Federal Reserve's present monetary policies which are, of course, in perfect accord with what this administration wants.

My effort to have Chairman Martin retract the erroneous statements that have been made about the preaccord period have met with no greater success. When he was before the Joint Economic Committee in February of this year I called to his attention the contrast between the facts and the statements being made to the contrary. Members may judge the results from a portion of the record of the hearings, which I will insert below:

> Representative PATMAN. We often read statements to the effect that: In the preaccord period, in order to maintain yields on long-term Government bonds at no more than 2½ percent, the Fed was forced to buy large quantities of Government securities in order to maintain what is called an artifically low rate, caused inflation of the money supply.
>
> I will now read from the Board's annual report for 1958. * * * In other words, the Fed did not increase its holdings of Government securities in these postwar years up to 2 months before the accord. Rather, it made a net reduction in its holdings of Government securities, the reduction amounting to approximately $3½ billion. Is that correct?
>
> Mr. MARTIN. Those figures are correct. But that must be related to the Federal budget, of course, during the period. We have a debt today getting on to $300 billion, whereas then we had a lower debt.

The figures must be related to the Federal budget? Why? The claim has been made that the Federal Reserve acquired vast quantities of Government securities in the preaccord period, in order to maintain what is conveniently called an artificially low level of interest rates. So the only question is whether this is a correct statement of fact or not, Mr. Martin prefers to talk about other matters, but it is not a correct statement of fact, because the Federal Reserve did not acquire Government securities for any reason. It reduced its holdings of Government securities.

All the Federal Reserve had to do to keep interest rates low was to let it be known that it stood ready to buy Government securities if the market price fell below par.

Interest rates are high today for one reason and one reason only. The reason is that the administration and the Federal Reserve want them high, and I would remind the Members that when this administration first started raising interest rates, its first action on taking office, its spokesman then made no bones about the fact that it wanted to raise interest rates and it intended to raise interest rates.

On January 20, 1953, when President Eisenhower was taking the oath of office, the Federal Reserve was at that moment raising the discount rate.

A month later the administration put out its first bond issue. It issued a bond at a rate of 3.25 percent when the market rate on the longest Government bond then outstanding was three-quarters of a percent less. Secretary Humphrey made no pretenses that this was intended as anything other than a move to help raise interest rates. He put out a statement declaring that it had inherited from the previous administration "artificially low" interest rates and that it meant to raise them.

The administration has been raising interest rates ever since, and as a result it has given away billions and billions of dollars. Bank profits have been more than doubled, insurance company profits have been more than doubled, and personal income from interest has been more than doubled.

Just think of it—personal income from interest is now $24 billion a year—more than twice the total farm income of the country. Yes, the bankers and the 1 or 2 percent of the families who are very wealthy have profited handsomely from the administration's high interest policy. But all of this has come out of the pockets of the other 98 percent of the American families. This high interest policy is nothing more or less than a way of redistributing the income. It is taking purchasing power out of the pockets of 98 percent of the people to further enrich those who are rich already.

The high interest policy has increased the interest cost for carrying the Federal debt twice what it would have been if interest rates had been left at their 1952 level. We are now paying more than $9 billion a year just in interest charges on the Federal debt—and what a giveaway this is. This $9 billion a year is as much as the total Federal budget in the New Deal years. And I can remember in those days when our Republican colleagues were constantly declaring that this amount of Federal spending was absolutely certain to bankrupt the country. That was in the days when most of the spending was to provide useful work for the unemployed to take families out of the breadlines and put the economy back on its feet after the collapse which followed the previous experiment with the Republican high interest policy.

It is more than a little strange to hear our Republican colleagues declare themselves so much concerned over the taxpayers money when we are considering such things as a housing bill or a distressed areas bill.

When we proposed spending a quarter of a billion dollars to help distressed areas help themselves, we are charged with being big spenders and wasters. Yet we are asked to appropriate billions

of dollars to help foreign countries relieve their distressed areas, and we are told that is all very fine. At least five different agencies of the Government are in competition with one another to see which can make the softest loans or the easiest grants to foreign countries, but not one of them has one penny to help the distressed areas in America.

We propose a billion dollars to help American families obtain decent homes, help the homebuilding industry and help put the unemployed back to work, and this is declared to be wasteful and unnecessary spending of the taxpayers' money. Yet the Federal Government is giving away many billions of dollars of the taxpayers' money because of the high interest policy and we hear from our Republican colleagues not one murmur of protest against this waste. And the fact of the matter is the high interest policy is the very reason that millions of American families cannot buy decent homes without our help.

Mr. McDONOUGH. Mr. Chairman, I yield 2 minutes to the gentleman from Missouri [Mr. CURTIS].

Mr. CURTIS of Missouri. Mr. Chairman, after listening to my distinguished colleague from Texas, who serves on the Committee on Banking and Currency, which has jurisdiction over the Federal Reserve System, may I say that if he feels as he does and as his speech indicates, why does not the Committee on Banking and Currency amend the Federal Reserve System Act? You have the power to do so, yet I notice you keep coming over to the Committee on Ways and Means trying to get us to mess into the affairs of the Federal Reserve System. If this is so, why does not the majority in control of the gentleman's committee do something about it? I do not think the case is well made. I congratulate the gentleman's colleagues on the Committee on Banking and Currency for not doing this.

Mr. PATMAN. Does the gentleman congratulate us for not doing it?

Mr. CURTIS of Missouri. That is correct.

Mr. PATMAN. I take neither the responsibility nor the credit, because if it were within my power we would have hearings on these things and do something about them; but it is not within my power to do it.

Mr. CURTIS of Missouri. In other words, the gentleman has not been able to persuade his colleagues on his own side that his theory is correct?

Mr. PATMAN. That is right. However, the Ways and Means Committee has responsibility for acting, or not acting, on the President's request that the interest rate ceiling be repealed—not the Committee on Banking and Currency. That is the reason that I have urged the Ways and Means Committee to look carefully into the situation it is faced with before it takes any such action to allow and encourage the administration and the Federal Reserve to raise interest rates still higher.

Mr. BROWN of Georgia. Mr. Chairman, I yield 15 minutes to the gentleman from Ohio [Mr. ASHLEY].

Mr. ASHLEY. Mr. Chairman, I rise in support of H.R. 10213, the emergency homeownership bill, and I think the Banking and Currency Committee is to be commended for bringing such timely legislation to the floor.

The reason that I support this measure, as a member of the Housing Subcommittee, is that I am convinced that it is needed now and that it will be needed in the months ahead.

The heart of the bill, as you know, is the provision for a $1 billion loan fund to purchase FHA and GI loans through the FNMA Special Assistance Program. This is the stimulant which the committee is convinced is necessary to halt the dangerous downward drift of the housing industry and the important industries which depend upon a healthy and vigorous home building industry.

Mr. Chairman, there can hardly be any doubt about the serious decline in housing which has been taking place ever since last spring. During most of last year, the decline in the annual rate of housing production was gradual, but in the early months of this year the falloff has become precipitous. Latest statistics show that we have fallen to a seasonally adjusted rate of only 1.1 million units, which is a falloff of approximately 20 percent below the rate a year ago.

This is a dangerous situation for two reasons:

First, because production at such a retarded rate can only mean that we are slipping further and further behind in our efforts to make a reality out of the objectives of our national housing policy, namely, a decent home and suitable environment for every American family. We simply have to face the fact that this goal cannot ever be achieved unless we step up the rate of housing production over the level of recent years. At the present rate we are going, we are not making a dent in the disgraceful inventory of substandard and slum housing, and we are barely breaking even—if that—in meeting the minimum demands of family formation.

Second, is the fact that a sagging or depressed home building industry must be considered a forerunner to a depressed economy nationally. Recent history demonstrates convincingly that a failing home building industry signals an overall decline in economic activity, just as housing production on the upswing is a harbinger of stepped up activity in our overall economy.

Mr. Chairman, for those who doubt that there is trouble in the home building industry, I invite attention to the reports issued by the subcommittee and testimony given in our hearings. These show that discounts on FHA and VA mortgages have reached an unconscionable level, particularly in the South and West. It is apparent that some builders have found ways to inflate housing prices in order to cover these discounts, but it is almost impossible for small builders to do this—and the result is that they are simply forced out of the VA and FHA programs, programs meant to provide homes for the modest income market.

It hardly need be pointed out, Mr. Chairman, that these exorbitant discounts are basically the result of a tight money policy which has forced interest rates to ever higher levels.

May I just say on the subject of interest rates. I was very interested in what the gentleman from Missouri was saying, but he appears to be convinced that the level of interest rates depends entirely upon the law of the marketplace, in other words, upon the demand and the supply of credit. Mr. Chairman, I remember a few years ago when people in discussing inflation would reflect the classical concept of inflation—that is, too many dollars chasing too few goods. Well, we have learned in recent years that there is another kind of inflation—high price inflation brought about by administered prices. This is the situation which, as I say, we have become familiar with where despite a falling off in demand, prices stay at a high level or even go higher. We saw this in the last recession and it is particularly true in our basic industries. It seems to me that possibly we are going to hear more and more in the future about administered interest rates. The facts, according to the Wall Street Journal and other sources of information that are available to all of us, are that funds are becoming more readily available and that savings are going up. Why is it then that interest rates remain at the high level that they are. I say it is because the correlation between supply and demand and the interest rate ceiling is not quite as attuned as the gentleman from Missouri and others seem to indicate.

I was addressing my remarks, of course, to discounts.

Discounts are just one device to increase the yield on mortgages which have a ceiling on the rate of interest which can be charged. The bill before us will do much to relieve this outrageous situation, both directly and indirectly. And in so doing, it will check the alarming increase in the use of second mortgages and other questionable financing devices in the conventional loan field.

Where second mortgages are used they are typically discounted by as much as 25 percent, believe it or not, and this staggering discount is often added on to the normal sales price of a home.

Another practice which is dangerous for the buyer, and for the industry, is the use of installment sales contracts. Under this plan, a buyer doesn't even get title to the house he's buying and can be dispossessed for even a momentary default in payment, since he is without the usual protection provided by most State foreclosure laws.

Mr. Chairman, the use of these costly, dangerous, and undesirable methods of financing can be directly traced to the growing difficulty in obtaining long-term low downpayment FHA and VA loans. Let me repeat, this is another and very important reason for the legislation at hand.

Now, Mr. Chairman, I understand that the Republican side of the aisle is planning to offer a so-called civil rights

amendment to this bill and I want to comment briefly on this.

We will be told, I'm sure, that the purpose of this rider is to prevent discrimination in the operation of this bill.

This simply is not the fact of the matter. The truth is that the purpose of the amendment is to kill the bill. Nothing could be clearer. The idea is to force liberal Democrats to join Republicans under the umbrella of civil rights, thus assuring adoption of the amendment.

But what would happen on final passage? The same thing that has happened time and time again in the past. Republicans would joyfully join conservative Democrats to vote the bill down.

I say this maneuver is transparent, that it is overworked and I very much hope that other Democrats who regard themselves as liberal will join with me in voting against the proposed amendment.

The principal feature of the bill, of course, is the provision of $1 billion for FNMA investment in FHA and GI loans on lower priced housing. However, there is far more to the bill than that. Other sections of the bill complement this provision and provide assistance and incentives to increase production in other types of housing. For example, the bill would restore the requirement that FNMA pay the full face value of loans bought under the special assistance program. In addition, it would reduce FNMA's fees and charges in these special areas. Right now there is no restraint in the law on the amount FNMA can charge under special assistance and it has set the cost at 1½ percent by regulation. This bill would impose a ceiling on fees and charges of 1 percent of the amount of mortgages sold to FNMA. Moreover, it would limit the amount collected at the time of commitment to one-fourth of the total in contrast to FNMA's present regulatory requirement of one-half. These provisions will immediately benefit such programs as urban renewal housing, which is highly dependent on FNMA for financing. It would also cover other types of mortgages which have been singled out as deserving such aid, such as housing for the elderly and cooperative housing.

Another section which would benefit a broad range of housing is the prohibition against FNMA's present practice of rejecting some FHA and GI loans offered to it. This is a simple matter of commonsense and should never have been a problem in the first place. If the loan is acceptable to FHA and VA, and is not in default, there is no justification for FNMA to second guess these agencies.

The flow of new mortgage money generally will also be aided by the limitation imposed on FNMA sales, including their recent efforts to trade mortgages for government bonds. In view of the extreme tightness in the mortgage market this is no time for FNMA to be unloading its portfolio. By so doing, it is simply sopping up funds which could have gone to financing new homes.

Mr. Chairman, I will not attempt to go into all the provisions of this bill. I am convinced that this represents a well-thought-out answer to the present problems plaguing home buyers, and the homebuilding industry. It would make an important contribution toward getting our housing needs and toward meeting our responsibility to do everything in our power to assure employment and maximum production. I urge all of my colleagues to support the Emergency Home Ownership Act.

Mr. KASEM. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield.

Mr. KASEM. Do you think the civil rights amendment is as transparent as having the Vice President represent us at the summit conference in the event the President finds he has more important business in this country?

Mr. ASHLEY. I would say no. I do not think it is quite that transparent. Nothing could be more transparent than this.

Mr. McDONOUGH. Mr. Chairman, I have no further requests for time.

Mr. BROWN of Georgia. Mr. Chairman, I yield such time as he may desire to the gentleman from Missouri [Mr. CARNAHAN].

Mr. CARNAHAN. Mr. Chairman, I rise in support of H.R. 10213. It is not only a good bill, it is a vitally needed bill. It addresses itself to two of the most important and current weak spots in our Nation—the need to put every citizen under decent and adequate shelter and the compelling need to encourage and maintain a progressively vibrant economic structure for continued growth.

I called the Labor Department's Bureau of Labor Statistics this morning and was told that as of March 1960 there are 4 million and 206 thousand people in this Nation out of work. I talked with the National Association of Home Builders here in Washington to be told that housing starts remain at 1,115,000. All of this in a nation of 180 million people which is growing daily. Furthermore, I talked with the Bureau of the Budget to learn that the Administration thinks this to be a bad bill and is opposed to it. Over 4 million out of work and the housing starts figure remaining where it has been for so long—and the executive branch of this Government sits idly by. It is high time that we in the Congress become concerned and take definitive action to correct this growing national housing problem.

I know that you will hear the argument that housing is a function of the free enterprise complex and is no business of Government. I submit to you, my colleagues, that anyone who believes that housing this Nation's citizens is not properly a concern of Government is living in the past and that furthermore that past is a terribly expensive one and utterly unrealistic. The facts are easy to come by—just as easy for the administration to procure as for me. There are over 3 million dilapidated, nonfarm homes in use in America today; this, I am told, is twice the number that were in existence and use 10 years ago. When one examines the figure of 1,115,000 housing starts today and then discovers that this current figure is one-half million less than in 1925 when our population was only 115 million he discovers a shocking picture. In 1925 we were building 111 homes for every 10,000 people. In 1960 we are building 77 homes for every 10,000 people. This is an era of unparalleled prosperity. Why, Mr. Chairman, we are not even holding our own. In fact, we are retrogressing.

Exhaustive hearings have been held on this bill and much expert testimony has been given. Outstanding among all that testimony is the statement to the effect that a minimum starts figure to adequately house our ever-expanding population would be 2 million starts annually. Coupled with this is the fact that we have not begun to feel the effect in housing of the post-World War II birth rate. In addition to this there is the ever-present problem of the continued spread of urban blight and slums and the loss of housing inventory through Federal and State highway programs and urban and community redevelopment. Looked at from this angle, Mr. Chairman, we are building for ourselves as a nation a problem in housing that reaches near emergency proportions and promises to get even worse unless we in this body take the initiative and create the necessary machinery to begin immediately a frontal attack on this neglected problem.

Mr. Chairman, we dare not fail to create in this body the opportunity through private enterprise assistance for this growing and healthy population of ours to avail itself of adequate and decent housing within a fair and just range of prices. To do otherwise will be nothing less than "sowing to the wind and reaping the whirlwind" for the social consequences that are bound to follow this long-neglected problem are bound to be serious and of tragic consequences to our national fiber if we fail to act positively. Unless adequate housing, fairly priced and within the easy acquisition of our citizens, is not soon made available to all willing to save and plan and pay for it, then we may expect crime among adults as well as juveniles to increase. Bound to follow substandard housing is the serious disruption of family patterns, broken homes, and a further breakdown in moral and ethical standards. If this happens, then we as a free people are in real trouble. I hate to contemplate what the social agenda in the next 10 years might read like unless we act. Another fact to be considered is always lurking in the background during these past few years—the effects of recession and inflation on our economic structure. Unless we act on this matter in a positive and bold manner, we have a nation in trouble.

It was just 2 years ago when our economic position suffered a rather severe and shocking jolt. Most people had been led to believe through slogans of peace and prosperity that our economic base was solid and substantial. But, as if without warning, the man in the street was told that we were going through a period of strategic retreat, of economic tightening up—a recession. In the spring of 1958 this Nation, living in an

era which almost automatically guaranteed prosperity, suddenly was awakened to the rude fact that over 5 million of its people were out of work, wanting to work and could not find work. It was only natural that people began to draw parallels between the early 1930's and 1958. Through the Madison Avenue use of slogans we had long since become convinced that this thing that haunted America in the thirties could not happen again, certainly to the extent that it was happening. Fear and uncertainty about the future was naturally engendered in the minds of many people. We are told now by a spokesman of the administration that inflation is no problem and that the recession is over. This may be, but the damage was severe. As an example of this damage let me cite the $12 billion deficit in the Federal budget for fiscal year 1959. Nine billion dollars of this deficit is directly traceable to the loss of income tax revenue.

During this period the Congress initiated and passed the Emergency Housing Act of 1958 and the administration used it in helping to get the Nation out of the recession. This act of 1958 reversed the downward trend in homebuilding, a trend which once again is beginning to assert itself and should be of concern to all of us who desire a healthy economy. This act of 1958 proved to be a real shot in the arm for our recovery efforts.

Under this Emergency Housing Act of 1958, the Federal National Mortgage Association was authorized to invest $1 billion in FHA and VA mortgages on new construction. That investment in turn was a stimulus to an even greater investment of private funds in mortgage construction. This bill will, I believe, have the same sort of triggering effect in encouraging the investment of a much larger share by savings institutions across the country in one of the soundest investments available—private homeownership.

What does the bill do? The major feature of the bill is a reactivation of the Federal National Mortgage Association's program 10. This was a program initiated under the 1958 Emergency Housing Act, and this bill would increase the program No. 10 authorization by $1 billion for the purchase of FHA and VA mortgages on new construction. The principal amounts of these mortgages could not be over $13,500 except in those areas where high construction and labor costs warrant. The FNMA is, under the provisions of this bill, directed to channel to the maximum possible extent the available funds into those areas. And FNMA is further directed by this bill to allocate these funds in the most equitable possible manner to insure against a disproportionate use of them by any one builder.

This, then, is the main feature of the bill. The other provisions are directed at making the FHA home mortgage insurance program more workable—to remove stumbling blocks toward the end of broadest possible use of the FHA program. Various inhibiting factors in making the Federal National Mortgage Association fulfill its true purposes as a real secondary mortgage market stimulus are removed by this bill. The other function of FNMA—the provision of special assistance for financing of selected types of FHA and VA loans—is aided by restoring the par purchase requirement.

In short, Mr. Chairman, this bill gives real impetus to an industry which has power to reverse present downward trends in our economy; but, more importantly, delivers in the form of a finished product an item every person vitally needs, an item this Nation can ill afford to let its citizens do without—shelter for every American family.

I urge you, my colleagues, to support this bill.

Mr. LINDSAY. Mr. Chairman, I rise in opposition to H.R. 10213, which has been somewhat wistfully dubbed "Emergency Home Ownership Act." And I do so more in sorrow than in anger.

The housing field is one in which I have a very keen interest. In my own district, as in the Nation, there are housing problems still unsolved. I am acutely conscious of the role Government can and must play in this area.

The substance of this bill, however, is a scheme to subsidize housing construction in one small part of the industry, and this chiefly in the South and Texas. This will be done by purchase of mortgages through FNMA without the point discount which is now prevalent in the marketplace as the mechanism for adjusting the controlled FHA interest rates to the market. Under the law, the discount is paid by the builder, and consequently, the subsidy will be to the builder. That is why this is strictly a builders' bill. It does little if anything for the small homeowner. Furthermore, the builders so subsidized contribute to only a small fraction of the total residential construction.

I have read the majority report, and I still do not see how it can be said that the bill will make a constructive contribution toward solving any national housing problem. I know the housing problems of my own district. Certainly, this bill will solve none of them. In fact, intensified urban areas where apartment dwelling is the rule will receive no benefit whatsoever from the bill. These are the areas where we should be focusing our attention.

Now I suppose anyone who is from New York City should not be surprised to encounter politics in housing, even in this year when politics is so far from everyone's mind. But I should like respectfully to suggest to my colleagues on both sides of the aisle that H.R. 10213 is patently so poorly conceived for its announced purpose that its enactment is neither good government nor sound politics.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Emergency Home Ownership Act".

Mr. BROWN of Georgia. Mr. Chairman, I move the Committee do now rise.

The motion was agreed to. Accordingly the Committee rose, and the Speaker having resumed the chair, Mr. FORAND, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill H.R. 10213 directed him to report it had come to no resolution thereon.

TV MUST ABANDON CUSTOM OF TYPING CRIMINAL CHARACTERS AS BEING ITALIAN

Mr. LANE. Mr. Speaker, I ask unanimous consent to extend my remarks in two instances in the body of the RECORD and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, television programs are showing an increasing disrespect for the intelligence and pride of the American people. From rigged quiz presentations to the reflections cast upon large national groups by falsely identifying them as being stupid or violent, this segment of the entertainment industry has failed to live up to its public responsibilities.

Its poor taste, cynicism, and mockery of the viewing audience has aroused large numbers of people who are demanding that the industry clean house or forfeit the support of those upon whom it depends for its very existence.

Americans of Italian origin are offended by TV's habit of stereotyping all racketeers and gangsters as being automatically Italian by name or accent.

It gives the impression to those who do not know of Italy's great contributions to civilization, and who are ignorant of the deep religious faith, the hospitality and the kindness of the Italian people, that our Italian-American friends are enemies of law and order.

This is an out-and-out insult to our fellow citizens who are proud of their magnificent traditions and heritage.

It is truly "A Case of Libel," which is the theme of the lead editorial that appeared in the April 23, 1960, edition of the Boston Pilot, which is the voice of the Archdiocese of Boston, Mass.

As this issue is coming to a head, I include the editorial in the CONGRESSIONAL RECORD. I hope that it will induce TV to change its ways.

A CASE OF LIBEL

A libel against a person is reprehensible enough, but a libel against a whole people multiplies the crime. Even when the libel is a subtle one, it can be effective, and even when unintentional, it can do its damage. The libel we speak of is fast taking on the proportions of a national scandal and very few Americans can fail to be exposed to it. Radio and television, not to mention the theater and the short story, have decided that the criminal in American life must be an Italian.

At the present time the most offensive presentation seems to be on television where violence and crime are getting vastly more than their deserved space. By accident or by name, by suggestion or by specific reference, the gangster, the tough guy, the bookie and the jailbird are all Italians. We have

often wondered how those of Italian origin must feel as they watch their nation stereotyped in this libelous way; at least we know that for many of the rest of us, who know something of what Italy has done for Western civilization, the suggestion is revolting.

Is there any other national group that would have put up with this sort of business this long without getting action? We think not. We have noted that Irish protests long ago got rid of "paddy," the buffoon; that Jewish protests long ago disposed of "izzy," the merchant; the Negro protests have killed off blackface—and we just wonder how long we are going to have to put up with "tony," the gangster. It is long past time that this last fellow followed his other friends into oblivion.

Let no one say at this point—"but there are Italian gangsters." The answer to this is a simple affirmative. But there are also gangsters who are English, Irish, Dutch, Jewish, German, Negro, and whatever else. No one group has a monopoly on crime any more than a monopoly on virtue. It has never been suggested that each national tradition does not have its proper share of scoundrels; the objection is raised when one group is steadily identified with an offensive stereotype.

What to do about all of this? Every person with a sense of fairness has some responsibility in clearing up the libel we have been speaking of. Italians may feel self-conscious in taking up the cause, just as many Jews feel self-conscious in combating anti-Semitism. Others in the community, however, who resent the attack that is being made on the reputation of their Italian neighbors must do something positive to change the habits of the TV scriptwriters.

One clear avenue is to write to the TV stations, who are appropriately sensitive to public opinion, especially when it is reasonable and politely expressed. The second avenue, which sometimes brings even quicker response, is to write to the advertisers who present the offending programs. The last thing that either of these groups wish to have is public opinion offended and a potential buyer alienated from the product they are interested in selling. In the last analysis we will have this problem with us just as long as we do nothing to change it; as soon as we decide that it is worth doing something about, we will have solved it.

LAWRENCE, MASS., AND ITS BLUEPRINT FOR PROGRESS

Mr. LANE. Mr. Speaker, one of the most inspiring stories of our times is the organized effort by some of our labor-surplus communities to fight their way back to economic recovery and progress.

Greater Lawrence, in Massachusetts, is a notable example of the success achieved through realistic planning and community spirit.

Since its incorporation, more than 100 years ago, Lawrence was a one-industry community.

When the textile industry upon which it depended for its livelihood collapsed, Lawrence was threatened by economic disaster.

But its people did not quit.

Under the leadership of the Greater Lawrence Chamber of Commerce and the two newspapers of this community, the Lawrence Eagle-Tribune and the Lawrence Sunday Sun, they started to rebuild the local economy through diversification of industry.

Not content with mere recovery, Greater Lawrence is determined to move ahead.

Its blueprint for progress outlines the new Lawrence that is developing.

And the spirit that is putting those plans to work is expressed in the front-page editorial, "Our Greatest Challenge," that appeared in the April 22, 1960, edition of the Lawrence Eagle-Tribune.

Under unanimous consent, I include it in the CONGRESSIONAL RECORD, as an example that will guide and encourage other communities.

OUR GREATEST CHALLENGE

In April 1958, in cooperation with the Greater Lawrence Chamber of Commerce, the Eagle-Tribune published a report to the Nation edition which proudly proclaimed how our community, with unbounded determination and a solidly united spirit to fight, overcame its textile mill losses through the introduction of greater diversification of industry. Subsequently, Greater Lawrence became the quoted example and envy of American cities everywhere because of the economic upswing which followed and the resultant increased employment and payrolls.

In April 1959 the Eagle-Tribune published a preview edition of "New Horizons for Greater Lawrence" and what its future was to be. Many of the enterprises and projects outlined then have already been completed and others are in their final stages. Yet, there remains a great deal more work to be done if we are to keep our Greater Lawrence community in the forefront as a leader in this great country of ours.

Today, we present a special 60-page supplement for the beginning of the fabulous sixties. It contains the completed master plan of a "Blueprint for Progress"—a long-range pattern of design showing what must be done in the physical and industrial structure of Lawrence in the next 10 years if we are to make more efficient and profitable use of its resources.

There is much material in these pages for all to study and absorb thoroughly. We strongly recommended that you keep this edition as a checksheet of progress and accomplishments. "Blueprint for Progress" is our greatest challenge to date. We must not fail now.

Greater Lawrence, today, stands on the threshold of an era of further expansion and prosperity. We are about to take what is perhaps the boldest forward step in our long history.

During the next 5 to 10 years we will observe, and actually be a part of, events of such magnitude that they will shape the course of commerce, industry, transportation, education, and employment in the Merrimack Valley for future generations.

Situated strategically in the center of the Merrimack Valley, Greater Lawrence has long been referred to as "The Hub of the Merrimack Valley."

In the immediate future that title is about to become even more definite, and the community itself will assume still larger stature as new highways, new bridges, expanding educational facilities and new commercial and industrial enterprises increase the flow of people and products into and out of "The Friendliest Community in the United States."

We can see a variety of projects taking shape—some long overdue, some in the early stages of development, others still on the drawing boards—but all of them, in their own ways, calculated to serve our growing community and to enhance the nationwide prestige of "The Hub of Merrimack Valley."

Greater Lawrence is on the march and you are in the parade.

IRVING E. ROGERS,
Publisher.

SAVING AMERICA'S GRASSROOTS—THE 25TH ANNIVERSARY OF THE SOIL CONSERVATION SERVICE

Mr. JENSEN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. JENSEN. Mr. Speaker, I should like to remind Members of the House of a most significant birthday that is being observed today. This is the 25th anniversary of the signing of the Soil Conservation Act, which not only set forth the Nation's soil and water conservation policy but established the Soil Conservation Service in the U.S. Department of Agriculture to carry forward a nationwide program of erosion control.

Few more important pieces of legislation, in my opinion, have ever been passed by Congress, from the standpoint of safeguarding basic elements of the Nation's economy. I am referring, of course, to our soil and water resources, without which this Nation could not produce its bounty of food, fiber, and other essentials for this and future generations.

The Soil Conservation Act, for the first time in national legislation, recognized that wastage of soil and water resources on our farm, grazing, and forest lands, as a result of soil erosion, is a menace to the national welfare. It declared the policy of Congress to provide permanently for the control and prevention of soil erosion, the preservation of natural resources, and related objectives including flood control.

It is fitting that on this date we recognize the vast amount of effective soil and water conservation work that has been done on the farms and ranches and watersheds of the country by landowners and communities since April 27, 1935. It is also a good time to take note that much more urgently needs to be done before the job we started out to do has been completed.

I want to pay special tribute to two former Members of this House, the late Jack Dempsey, of New Mexico, and Marvin Jones, of Texas, now the distinguished chief judge of the U.S. Court of Claims here in Washington. Twenty-five years ago they introduced identical bills to declare the conservation policy of Congress and establish the Soil Conservation Service. As it happened, Congressman Dempsey's bill was the one acted upon, but it was Congressman Jones, then serving so effectively as chairman of the Committee on Agriculture, who reported the bill and handled it on the floor.

The bill became law exactly in the form in which it was introduced. Forty members of the 74th Congress which

passed the Soil Conservation Act are serving in the present 86th Congress. Many of them certainly remember the urgency that prompted their action in those earlier days.

Only 3 weeks before the House acted on the bill, Members of Congress, in common with the rest of the people in the Nation's Capital and elsewhere in the East, had seen the sun dimmed by a yellow haze. Enormous clouds of fine dust particles swept across the country from the eroded, drought-parched fields of the Great Plains, created something new in eastern weather.

Many members of the 74th Congress had seen fields stripped of topsoil and riddled with gullies. They had seen muddy creeks and rivers after every rain, silted reservoirs and stream channels, and other costly results of uncontrolled erosion in all parts of the country.

A start had been made toward doing something about the growing problems of soil erosion, but it clearly was not enough. Thanks to the missionary zeal of that pioneer soil conservationist and first chief of the Soil Conservation Service, Dr. Hugh H. Bennett, Congress as early as 1929 had provided for cooperative erosion control experiment station studies at 10 locations. A Soil Erosion Service, also under his direction, had been set up administratively in the Department of the Interior in 1933, to give on-the-farm technical assistance in a number of erosion control demonstration projects and Civilian Conservation Corps areas. This early Soil Erosion Service was transferred to the Department of Agriculture in March 1935 and renamed the Soil Conservation Service on April 27.

With the declaration of conservation policy by Congress, a continuing and expanded national action program of soil and water conservation was assured. Two years later, in 1937, farmer-organized and farmer-managed soil conservation districts, established by authority of State enabling laws, began to accept responsibility for directing local soil and water conservation programs. They drew on the technical assistance of the Soil Conservation Service and on other sources of Federal, State, and local help.

Looking back today, we have the satisfaction of knowing that our nationwide soil and water conservation undertaking rests on sound foundations that have stood the tests of a quarter of a century. This undertaking, so important to the welfare of every one of this country's 180 million citizens, has moved ahead successfully and steadily. Responsible people everywhere have praised its operations. It continues to deal effectively with today's multiplying problems involved in the conservation and development of our soil, water, and related resources.

I am proud of the fact that even before I came to Congress in 1939 I had supported in every possible way the sound soil and water conservation program carried on by the soil conservation districts of Iowa.

Since then, I am happy to have had a part, as a member of the Appropriations Committee and on the floor of this House, in the enactment and financing of the watershed protection and flood prevention program authorized by Public Law 566 of the 83d Congress. I believe we all owe a vote of thanks to the authors of this act, Senator GEORGE AIKEN, of Vermont, and former Congressman Clifford Hope, of Kansas. Through this program, communities in all parts of the country are now able to get the essential technical and financial assistance needed to move ahead with their watershed work.

Flood prevention structural work is now underway, or contracted for, in many of these watersheds. It is in various stages of planning in many other watersheds. At the same time, essential land treatment work is being done in all of the watersheds being developed under this program.

Our big concern now, as I pointed out to this body on March 11, is getting adequate funds to meet the Federal Government's share of the cost of these essential watershed projects.

The Great Plains conservation program is another and more recently authorized part of our nationwide conservation effort. This program, which provides complete conservation plans for participating farmers and ranchers, is designed to give comprehensive land treatment in the very region from which the giant dust storms originated 25 years ago.

I cannot begin to remember how many times I have spoken here on the floor, in my own State of Iowa, and elsewhere over the country, in behalf of this conservation work that is so vital to a healthy agriculture and to our whole economy. Back in 1947 I introduced a national land policy bill, to strengthen even more the national soil and water conservation program.

I like to think that my efforts, added to those of so many of my colleagues on both sides of the aisle, have helped our national soil and water conservation program attain the record of accomplishment that is the basis for its widespread and favorable public recognition today.

Conservation farming is no longer an experiment. It is a practical necessity producing important economic benefits. Today, conservation farming is an accepted objective from Alaska to Florida, from Maine to Hawaii. Our new challenge is to keep pace with the growing demand for the kind of technical assistance and other help that was contemplated by the Soil Conservation Act 25 years ago.

The accomplishments so far achieved under this legislation have been most gratifying. When I first ran for Congress, I called attention to two particular problems in my southwestern Iowa district. One was the erosion that was wreaking havoc on so much of our good Iowa farmland. The other was the haphazard dredging of streams, which was lowering the water table in an alarming manner. I am happy to say that as a result of the effective work done by the farmers themselves, through their soil conservation districts, we are well on the way toward remedying these conditions.

For example, up to 10 or 12 years ago, the watershed above Shenandoah, Iowa, like many other uncontrolled watersheds in my district and yours, my colleagues, used to dump damaging floodwaters down onto the city area with distressing regularity after every heavy rain. Nurserymen operating on some 2,900 acres of this watershed decided to do something about the situation, in cooperation with the Page County Soil Conservation District. Since they got together and treated their lands, there has not been a flood of any consequence.

It is not the enactment of legislation or the setting up of an agency that gets the conservation job done. It gets done by the hard work of individual farmers on their own farms and watersheds back in your counties and mine, with, of course, the necessary guidance of the SCC technicians and financial help from the ACP.

I remember, back in the early forties, being on the train with a banker from one of my counties. The talk turned to my favorite subject—soil conservation. When he told me about some of the erosion and other problems they had in his county, I convinced him they ought to have a soil conservation district there. On his return home, he took a leading part in stimulating interest in the organization of a district in his county and, within a short time thereafter, a district was actually formed—which completed the organization for my entire congressional district.

A few figures will serve to illustrate how fast and far we have come in soil and water conservation accomplishment in the last two decades:

As of June 30, 1939, Chief Bennett reported that 22 million acres of land in private ownership were covered by cooperative agreements. The SCS had working agreements or detailed plans on an additional 26 million acres of public lands. Approximately 81,500 cooperators were represented in Soil Conservation Service operations on private lands, in projects, CCC camps, soil conservation districts, and so on.

As of June 30, last year, the Service reported soil conservation districts had a total of approximately 1,860,000 cooperators, operating nearly 564 million acres. More than 1¼ million of those soil conservation district cooperators had basic conservation plans, on more than 365 million acres in about 2,860 soil conservation districts.

There are similar figures showing notable progress with the land capability surveys and with the individual conservation measures that have been applied on the farms and watersheds of America. They only serve to confirm further the gains we have made.

But we are still in the beginning stage. The conservation job is far from being completed. Some 2½ million farms still need basic conservation plans. Thousands of tributary watersheds need the

combined conservation land treatment and structural work contemplated in the Watershed Protection and Flood Prevention Act. What I have said before still holds true for all our lands which remain without the benefit of conservation treatment and management:

We must stop erosion on this land. We must stop mining the soil. We must stop bad land use and bad water management at the earliest possible hour. Let us never make the mistake in our country that was made by so many older nations that neglected their land. As a result of this neglect they are experiencing today the hunger, misery, and strife that are the penalties of failing to take good care of priceless natural resources of soil and water.

The degree to which we are successful in halting this damage and waste, without unnecessary delay, will help determine the health and vigor of our agriculture when the 50th anniversary of the Soil Conservation Act rolls around in 1985. I know my fellow Members of the Congress are proud of the support they have and are giving to their local soil conservation districts; to the States now participating more actively in conservation matters, and to the Soil Conservation Service. I urge you, in the name of America, to give your continued support to this great movement on which our agriculture, our food supply, and our future as a Nation so greatly depends.

CONSERVATION RESERVE—SOIL BANK

Mr. BYRNES of Wisconsin. Mr. Speaker, I ask unanimous consent to extend my remarks in the body of the RECORD and to include therein extraneous material.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. BYRNES of Wisconsin. Mr. Speaker, I have become convinced that there is a solution to the pressing farm surplus problem within our grasp, if we will but seize the opportunity.

Our opportunity lies in putting renewed energy and emphasis into the agriculture program which is the only program now in operation effectively cutting back surplus crop production.

I refer to the conservation reserve, or soil bank.

Of all the solutions proposed for our urgent farm problem, this is the program which holds the greatest promise of sound, constructive results at the least cost while preserving, at the same time, the priceless freedom of the American farmer.

The conservation reserve program is one farm program which makes sense.

It has proved itself in operation. It is doing a superb job in reducing surplus crop production and conserving the soil. Now is the time to recognize its accomplishments and take steps to realize its full potential. Now is the time to extend the conservation reserve and greatly expand its scope. This is our opportunity to do something about the farm problem.

Accordingly, I have today introduced a farm bill, H.R. 11930, which will extend the conservation reserve for 3 more years, direct its expansion to the point where cropland in production and cropland actually needed are in approximate balance, allow rental payments to be made in wheat or feed grain certificates and make other improvements in the program which experience have shown will be helpful.

The soil bank is doing two jobs for us and doing them well. It is taking cropland out of production and thus reducing burdensome commodity surpluses. At the same time, it is conserving our soil. The report of the Secretary of Agriculture to Congress on the soil bank conservation reserve program, submitted on March 15, 1960, shows how well it is performing in these two vital fields. I include that report and related tables, as well as the text of H.R. 11930, as part of my remarks.

The essential point I want to make, however, is that what has been accomplished thus far in the field of surplus reduction and soil conservation represents but a small part of the program's potential.

In my opinion, the soil bank has just reached the takeoff point. Its real promise lies ahead. If we give it a chance to show what it can do, I am convinced that we can, over the course of the next 2 or 3 years, make heavy inroads against the agricultural imbalance which plagues us today.

If we are to strike effectively at the root cause of our farm problem, we must reduce cropland acreage to a point where it comes into balance with the demand for agriculture commodities, and we must do so in a way which will not bring about a social and economic upheaval by a centrally directed control program which relies upon the police power for enforcement.

We have learned the hard way—by accumulating costly surpluses which cannot be utilized—that too much of our land is being farmed. We have been tilling soil that should better remain in cover, water, or trees. We have been planting land which produces crops far beyond our needs at home or abroad. In the process, we have depressed agricultural prices and have done great damage to our most precious natural resource.

If we can successfully reduce crop acreage to the point where land in production meets our needs, we will have reached the point where we can end the rigidities of Government controls, supports, and subsidies and let the free market bring its challenges and rewards to the American farmer.

The soil bank can do this job if we make it the keystone of our agriculture program.

It can reduce surplus acreage in a purely voluntary manner, permitting the exercise of free choice, paying fair value for farmer participation, and avoiding the straitjacket of Government-directed planting.

It can do so with the least administrative cost and governmental redtape. The machinery is already in operation. It is administratively efficient, relying upon locally elected farmer committees for local administrative decisions.

It can do so without subsidy, its payment to farmers representing only what the land would otherwise bring in rental on the marketplace or in crops that would otherwise be produced.

Its costs, while large, would be one-half to one-fourth as much as the present price stabilization program and far less than any of the proposed regimentation type substitute programs.

Economists who have studied the problem estimate that a soil bank of 60 million acres, varying possibly 20 percent either way, would bring cropland into balance with demand. It is estimated a 60-million-acre soil bank would cost about $900,000 million annually. The 1961 budget request for farm price and income stabilization is $3,950 million, or almost quadruple the cost of a mature soil bank program.

Most important, however, the cost of a stabilizing soil bank would not represent sterile support, control, and storage operations which do nothing to attack the basic causes of farm surpluses. It would be a far-seeing national investment, regardless of its adjustment value, in the future fertility of our soil and in the conservation of our water and wildlife resources.

I urge early consideration of my bill, H.R. 11930, extending, expanding, and intensifying the conservation reserve program. The program is scheduled to end with this year's contracts. It would be a grave mistake to let it expire.

There is a danger of this happening. Congress is once again confronted with the possibility that no farm legislation will be enacted because of fundamental differences between the two parties—one in control of the legislative branch and the other in control of the executive. That difference relates largely to methods or systems of price support operations and the degree of control to be exercised by the Federal Government over production or marketing. The Congress will not accept the President's recommendations. The President cannot sign the kind of farm bill this Congress is most likely to pass. We have reached a stalemate which is becoming increasingly costly for both the American farmer and the American taxpayer.

We will not be living up to our responsibilities if we let this stalemate on the most controversial aspects of farm legislation prevent action to meet our most pressing need. That need, as I see it, is to tackle the surplus problem by action to extend and expand the one farm program which is actually reducing surplus production.

Personally, I would prefer to see legislation enacted which deals with some of our urgent price and acreage problems, such as wheat, combined with an expanded conservation reserve program. I am realistic enough, however, to recognize that it is entirely possible that no agreement can be reached on price supports and acreage controls. It is for that reason that I propose we go ahead and enact what can be enacted and what is so sorely needed. I am confident that an expanded conservation reserve, once its potential is fully understood, will receive substantial bipartisan support in this Congress.

It would be tragic if we failed to seize the opportunity which we now have to make substantial progress in eliminating the farm problem.

H.R. 11930

A bill to extend and expand the conservation reserve under the Soil Bank Act

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the Agricultural Act of 1960.

SEC. 2. Section 108(a) of the Soil Bank Act is amended to read as follows:

"SEC. 108(a). The Secretary shall not later than March 1 of each year determine and announce the national conservation reserve goal for the following year. Such goal shall be the percentage which the Secretary determines it is practicable to cover by contracts during the year for which the goal is established of the number of acres, if any, by which (1) the probable acreage used for the production of agricultural commodities, plus the acreage retired from production because of governmental programs, during such year exceeds (2) the estimated acreage needed for domestic consumption, exports, and an adequate allowance for carryover during such year. The Secretary shall announce the national goal for 1961 within 30 days of the enactment of this section."

SEC. 3. Section 108(b) of the Soil Bank Act is amended by adding at the end thereof the following:

"Effective beginning with 1961, the Secretary shall give special consideration to those States and regions where it is desirable for soil conservation or production adjustment purposes to discourage the production of surplus agricultural commodities."

SEC. 4. Section 109 of the Soil Bank Act is amended:

(1) by amending subsection (a) to read as follows:

"(a) The Secretary is authorized to formulate and announce programs under this subtitle B and to enter into contracts thereunder with producers during the eight-year period 1956–1963 to be carried out during the period ending not later than December 31, 1972, except that contracts for the establishment of tree cover may continue after December 31, 1977."

(2) by amending subsection (c) to read as follows:

"(c) In carrying out the conservation reserve program, the Secretary is authorized and directed to enter into contracts as rapidly as is practicable and consistent with good management in order to reach a national conservation goal, as set forth in section 108(a) of this Act, of hundred per centum at the earliest possible date."

SEC. 5. Effective beginning with contracts entered into after the date of this Act, section 107(b)(2) of the Soil Bank Act is amended by adding at the end thereof the following:

"The Secretary is authorized to provide for payment of the annual payment through the issuance of certificates which the Commodity Credit Corporation shall redeem in wheat or feed grains in accordance with regulations prescribed by the Secretary. Notwithstanding any other provision of law, no producer shall be paid an annual rental payment, or its equivalent in such certificates, of more than $7,500 with respect to all contracts within a State to which he is a party."

SEC. 6. Section 211 of the Agricultural Act of 1956 is amended by striking out "three years" where it appears therein and substituting "six years."

REPORT OF THE SECRETARY OF AGRICULTURE ON THE 1959 SOIL BANK CONSERVATION RESERVE PROGRAM

SUMMARY

Going into the 1960 crop season, the conservation reserve of the soil bank is having substantial impact on the acreage and production of surplus crops. With approximately 300,000 contracts in effect and more than 28 million acres under contract, cropland which has been contributing heavily to the surplus build-up in recent years is being withheld from production and devoted to conservation uses under long-term contracts.

During the 1959–60 period, farmer participation in the conservation reserves more than doubled. The acreage of cropland withheld from production almost tripled, and the percentage of whole farms under contract grew to more than two-thirds of the total.

Under the conservation reserve, farmers voluntarily enter contracts to hold cropland out of production and devote it to conservation uses. After 4 years of experience, it is apparent that large numbers of farmers will participate in a program of this type. In each of the last 2 years, farmers have offered land for the program well in excess of the amount that could be accepted.

Calendar year 1960 is the last year for entering into new contracts under present legal authorization. The President has recommended an extension and an expansion to 60 million acres to bring the program to maximum effectiveness, provided the Congress passes legislation to change the price-support programs constructively.

HIGHLIGHTS OF 1959–60

The conservation reserve for the 1959 program year began in the fall of 1958, when the Department went to the field with a program containing a number of changes from the earlier, largely experimental years. The announced annual rental rate was raised from a national average of $10 to $13.50, and a greater incentive was offered for whole-farm participation. The acreage reserve for retirement of allotment crop acreages has been discontinued after the 1958 crop season, and the conservation reserve was the only soil-bank program available.

Nearly twice as much cropland was offered for 1959 contracts as could be accepted within the funds available, and a bid system was used to determine priorities. When the signing of contracts was completed in the spring of 1959, more than 12 million acres had been added to the acreage previously under contract. (See table 2.) This brought the cumulative figures on participation to 246,220 contracts with 22.4 million acres of cropland in the reserve, of which 14.8 million acres are on farms on which all eligible cropland is out of production. (See table 3.)

For the 1960 signup, held in the fall of 1959, the average per-acre announced rate was continued at $13.50 with a premium for whole farms, but several program changes were made. Chief of these were the elimination of State-owned land from the program and the requirement that land be owned 3 years to be eligible for participation. The national acreage goal was set at 5.1 million acres.

Reports on the 1960 program to date indicate that this goal is being exceeded. As of February 15, 1960, progress reports from the field indicate that new acreage placed under contract for the first time in 1960 may total 6.5 million acres. (See table 2.) With contracts for about 300,000 acres scheduled to expire in 1960, the net increase for the year would total about 6.2 million acres. This would bring the total acreage in the conservation reserve during the 1960 crop season to about 28.6 million acres. That is more than 6 percent of total U.S. cropland as shown by the 1954 farm census (figures 3 and 4).

HOW THE PROGRAM OPERATES

The conservation reserve is a voluntary program. The farmer who participates signs a contract with the Government to place part or all of his cropland in the reserve. This means that he will withhold the land from production and protect it with approved conservation uses. Contracts are for a minimum of 3 years; a maximum of 10.

The Government makes an annual per-acre payment for each year of the contract. The maximum annual payment that any producer may receive is $5,000. This limit was originally determined administratively, but was required by law for 1960. The Government also pays a portion (usually 50 percent) of the cost of establishing conservation uses on the land.

A basic per-acre payment rate is set for each individual farm or part-farm for which it is requested. The rate is based on the national rate ($13.50 in 1959 and 1960), but is determined for the individual farm on the basis of the productivity of the land and other factors. It may not exceed 20 percent of the value of the land. When all eligible cropland on the farm is to be retired, the basic rate is generally set 10 percent higher than the rate for only part of the eligible land.

After the basic rate has been determined, the farmer may apply for a contract at any figure below that rate. In cases where acceptance of all applications would exhaust available funds in a county or where more land is offered than it would be desirable to retire in 1 year, offers are accepted on a best buy basis, and contracts are offered to successful bidders. Each offer is computed as a percentage of the basic rate for the land offered and acceptance begins with the lowest percentage bid.

Only cropland is eligible for the conservation reserve. Permanent pasture or woodland is not eligible. Generally, the land must have produced a crop or been in a regular crop rotation during the year immediately preceding the first year of the contract. Publicly owned land is ineligible for the program, beginning in 1960, and so is land which has changed ownership (except by inheritance) since December 31, 1956.

The farmer who places land under contract agrees to harvest no crop from the land, permit no grazing on it and keep down noxious weeds. He agrees to comply with any acreage allotments on his farm and to place no new land in cultivation. For most farms, also, placing land under contract requires a corresponding acreage reduction in soil bank base crops (grains, oilseeds, and row crops).

Each year's program is announced as soon as possible after authorization by the Congress. Contracts are signed during the fall and winter months and ordinarily begin April 15 of the first year they are effective.

IMPACT ON ACREAGE AND PRODUCTION

Cropland which has been producing substantial quantities of surplus crops in recent years is being held out of production under conservation reserve contracts.

A study of the 22.4 million acres under contract in 1959 shows that 3.5 million acres were formerly devoted to corn; 3.5 million to grain sorghums; 3.2 million to oats; 2.3 million to wheat; and about 10 million acres to other crops, cropland hay and pasture and special uses (table 1). The 1960 acreage is expected to contain an additional million acres of former cornland and substantially increased acreages of the other crops, as well.

Particularly effective in checking crop surpluses is the retirement of whole farms, which is encouraged by annual payment rates that may run as much as 10 percent higher than regular rates. Approximately two-thirds of the 1959 conservation reserve acreage is in the form of whole farms. A whole farm contract takes in all eligible cropland, including acreage allotment land that would otherwise be devoted to the farm's money crop. Almost 22 percent of the whole farm cropland in the reserve in

1959 consisted of allotment acres. Production adjustment is assured under whole farm contracts because no land remains for more intensive cultivation that might tend to offset the adjustment sought.

When all eligible land on a farm is placed under contract, the farm usually goes out of production entirely. Livestock is sold, and the pasture land and other noncropland is usually retired voluntarily. It appears that heavy participation in the conservation reserve by dairy farmers in the Great Lakes region should contribute to improving the dairy market situation.

The conservation reserve also contains large acreages formerly devoted to major crops which are not subject to acreage allotments, but are eligible for price support. Under contract in 1959, for example, are former grain sorghum acres equal to nearly a third of the country's total grain sorghum acreage as reported in the 1954 Census of Agriculture, as well as sizable acreages of barley, oats, flaxseed, soybeans, vegetables and other crops. (See fig. 1.)

Compared with the use of all U.S. cropland, the land placed in the conservation reserve has been relatively high in acreage of feed grains and low in acreage of cropland hay, rotation pasture, and summer fallow. As shown in figure 2, the percentage of reserve cropland formerly used for oats, barley, grain sorghum, and flaxseed was substantially higher than the percentage of all U.S. cropland used for those crops. Acreage of corn, wheat, soybeans, vegetables, and peanuts was about equal to the national average. On the other hand, only a little more than 20 percent of conservation reserve acreage was formerly in cropland hay, rotation pasture and summer fallow, compared with more than 37 percent of all U.S. cropland devoted to those uses.

Since the average conservation reserve contract covers a period of 5 to 6 years, the land put into the reserve will not be producing any crops for that length of time. This includes both the allotment land and the land customarily devoted to other crops. This helps in holding down surpluses and also reduces price support expenditures, since the volume of crops eligible for price support is reduced.

At yields appropriate for the quality and location of the land under contract, the conservation reserve in 1960 would produce about as much corn as the annual crop of the State of Ohio; nearly as much wheat as Oklahoma produces in a normal year; more cotton than the annual crop in North Carolina; and substantial quantities of other surplus crops, such as peanuts, tobacco, oats, barley, soybeans, sorghum grain, and flax. (See production estimates table 1.)

CONSERVATION ACCOMPLISHMENTS

Every conservation reserve contract requires the establishment of protective cover or other sound conservation uses on the cropland withheld from production. Cover may consist of grasses and legumes, trees or shrubs. Other approved uses include wildlife and water conservation (fig. 6 and table 4).

Trees in the conservation reserve

The conservation reserve has played a major role in the greatest tree-planting program in the Nation's history. During 1959, about 700,000 acres of cropland were planted to trees under conservation reserve contracts.

The heaviest tree-planting activity under the conservation reserve is in the Southeastern States, particularly in Georgia and South Carolina (see fig. 7 and table 4). All tree-planting contracts are for a 10-year period. When cropland goes out of production and is planted to trees, it usually can be considered to be diverted permanently from crop production.

Grass in the conservation reserve

Most popular conservation use of conservation reserve acreage is to establish and maintain grass cover on land retired from production. Of the 22.4 million acres in the reserve through 1959, contracts call for 14.7 million acres to be established in grass with Government cost sharing. (See table 4.) Most of this cover had actually been established as of the end of 1959. In addition, about 5 million reserve acres consist of cropland which is already in acceptable cover or will be established in grass at no expense to the Government.

Texas is the leading State in the establishment of grass cover under the program, followed by North Dakota, Colorado, and Kansas in that order. In these and other Great Plains States, large acreages formerly devoted to wheat and grain sorghums are being returned to native grasses.

Wildlife cover in the conservation reserve

Land formerly cropped but now in grass or tree cover feeds and shelters wildlife. In addition, the program contains specific wildlife cover practices under which cover and food plots for game are planted on conservation reserve acreage. Through 1959, contracts called for a total of more than 206,000 acres of wildlife cover. (See table 4.) This phase of the program has gained the general approval of sportsmen and wildlife organizations.

Ponds in the conservation reserve

Ponds may be built on conservation reserve land for water conservation and fishing. Through 1959, farmers had contracted to build about 6,400 ponds under this program. (See table 4.) These farm ponds, together with grass and tree cover, protect land by trapping water where it falls and retarding the runoff. In keeping with the conservation reserve goal of checking surpluses, ponds built under the program may not be used for irrigation.

Marsh management in the conservation reserve

The conservation reserve also provides for wetland or marsh management practices, under which marshland that has been drained and cropped is restored to wetland use for water and wildlife conservation. Contracts through 1959 call for a total of nearly 12,000 acres to be devoted to this use. (See table 4.)

PROGRAM COST

For the 1959 program year, Congress authorized a conservation reserve program of $375 million. In planning the year's program, it was estimated that $87.7 million of this amount would be required to make annual payments on the approximately 10 million acres placed in the program during the 1956–58 period. The rest was available for the first year's payments on new 1959 contracts and to pay the Government's share of establishing conservation uses on the newly contracted land.

On the basis of these facts, the national acreage goal for 1959 was established at 12.5 million acres and the announced national average rental rate per acre was set at $13.50. With a 10-percent increase for putting a whole farm in the program, the applicable rate could approach $14.85.

In actual practice, the strong competition for contracts led to a national average per-acre rate somewhat lower than had been estimated. Although more than 83 percent of all 1959 contracts were for all eligible land and thus earned a whole farm rate, the average annual payment for all new acreage under contract was only $13.56. For all acreage placed under contract during the 1956–59 period, the Government is paying an average rental of $11.53 per acre. For 1960, preliminary data indicate that the average rental per acre on a new reserve acreage will be about $12.60 as a result of still keener competition for a smaller amount of funds.

Generally speaking, it is proving possible to obtain considerably higher quality land than had been anticipated at the rental rates offered. Various reasons are given by rural people for desiring to place land in the conservation reserve. The farmer who withholds land from production in this way is protected against natural crop production hazards and gets an annual return (similar to rent from another farmer) to cover his fixed expenses and the cost of meeting his contract obligations. The conservation reserve is of assistance to widows, farmers in ill health, and older people who wish to reduce farm work or retire. One State reports that about 70 percent of its participants are more than 50 years of age. The program also assists those who wish to shift to nonfarm employment while continuing to live on farms. In these respects, it is speeding up adjustments that have been in progress for some time and ties in closely with the objectives of the rural development plan.

Now that Government cost-share payments for conservation practices under 1959 contracts are largely complete, it is apparent that practice costs for the program to date will be substantially less than had been anticipated. This is partly the result of extraordinarily favorable weather in 1958 and 1959 which produced satisfactory stands of volunteer cover in many areas. It also reflects experience which has demonstrated that satisfactory cover for a program of this type can be established at less cost, through lighter seeding and less use of minerals, than has been customary in establishing stands of grass for use as pasture and hayland.

For 1960, Congress again authorized a $375 million program. With $256.2 million needed to make payments on existing contracts, it was estimated that 5.1 million acres could be taken in under new contracts this year with the $118.8 million remainder.

AREAS OF PARTICIPATION

Farmers in 2,864 counties in 48 States participated in the conservation reserve in 1959. Figure 5 shows cropland under contract on a county basis as compared with total cropland as reported in the 1954 Census of Agriculture.

Among the more productive areas with average or higher participation are the Maine potato country, New York grain area, Georgia-South Carolina grain and peanut counties, the Mississippi delta, Texas blacklands, Kentucky-Tennessee counties of the Mississippi Valley, Wisconsin corn area, Nebraska-South Dakota corn counties and certain important wheat counties in Washington and Idaho.

More than half of all reserve cropland is in the 10 Great Plains States, heart of the Nation's serious wheat surplus problem. Much Great Plains cropland which was planted to wheat under the pressures of the war period is now being withdrawn from crops and returned to the native grasses of the plains.

PROGRAM ADMINISTRATION

The conservation reserve is administered by the Commodity Stabilization Service through its Soil Bank Division, which is under the general direction of the Deputy Administrator for Production Adjustment. The program is operated in the field by the Agricultural Stabilization and Conservation State and county committees, which also administer acreage allotment and marketing quota, price support, agricultural conservation, and other programs.

The facilities of several other Department of Agriculture agencies are used in the

program. The agricultural conservation program service develops program provisions relating to conservation uses. The Soil Conservation Service provides onsite technical assistance to farmers using water conservation and certain other practices. The Forest Service, in cooperation with State foresters, provides technical assistance and directs a program to provide tree seedlings required for the conservation reserve. The Extension Service uses its educational facilities in providing farmers with information about the program and advises as to conservation cover specifications at the local and State levels.

Former use of conservation reserve cropland as compared with use of all U.S. cropland

Crop or land use	1954 Census of Agriculture		1959 conservation reserve acres		1960 conservation reserve acres	
	Acres for crops and land uses (a)	Percent of total cropland (b)	Former land use (acres) [1] (c)	Percent of total reserve acres (d)	Former land use (acres) [1] (e)	Percent of total reserve acres (f)
Hay and pasture	143,750,616	31.3	3,659,000	16.3	4,992,000	17.4

Total (includes multiple use) [3]	465,334,889	101.2	22,977,000	102.5	29,318,000	102.4
Total (excludes multiple use) [3]	459,648,961	100.0	22,422,000	100.0	28,620,000	100.0

[1] Estimated acres which would have been devoted to this use without a conservation reserve program. It should not be assumed that acreage was reduced to this extent below the previous year because some of this land went under contract in each of the years 1956, 1957, 1958, 1959, and 1960.

[2] Includes acreage devoted to fruits and nuts, which is ineligible for the conservation reserve program, but which is included in census total cropland acreage.

[3] Variations between total lines are due to double cropping, crop failure replanted, and similar unusual land uses. Conservation reserve acres reported as of Aug. 14, 1959, for 1959 and estimated Dec. 1, 1959, for 1960.

TABLE 1.—*Estimated adjustments in specified land uses and production due to 1959 and 1960 conservation reserve programs*

Former cropland use	Estimated acreage adjustment		Estimated production adjustment		
	1959 revised	1960 preliminary	1959 revised [1]	1960 preliminary [1]	Units
	Thousands	*Thousands*	*Thousands*	*Thousands*	
1. Corn	3,518	4,579	148,099	183,174	Bushels.
2. Wheat	2,330	3,080	46,130	61,607	Do.
3. Cotton	517	660	407	491	Bales.
4. Peanuts	113	148	106,581	131,905	Pounds.
5. Rice	5	7	165	215	Bags (100 pounds.)
6. Tobacco	11	15	17,296	23,332	Pounds.
7. Oats	3,237	4,082	108,115	139,589	Bushels.
8. Barley	1,245	1,616	32,626	42,496	Do.
9. Soybeans	860	1,089	18,402	21,236	Do.
10. Sorghum grain	3,458	3,837	122,069	108,984	Do.
11. Flaxseed	433	599	2,686	4,369	Do.
12. Dry edible beans	67	84	583	799	Bags (100 pounds).
13. Irish potatoes	29	39	5,900	9,063	Hundredweight.
14. Hay and pasture	3,659	4,992	5,854	7,587	Tons, hay equivalent.
15. Vegetables	176	224			
16. Other crops	1,360	1,696			
17. Summer fallow, idle and failure	1,959	2,571			
18. Total, including duplication [2]	22,977	29,318			
19. Estimated reserve acreage [2]	22,422	28,620			

[1] Production adjustment for 1959 is based on 1959 crop yields adjusted for location and quality of reserve acres; 1960 estimate is based on recent normal yield adjusted for location and quality of participating land.

[2] Item 18 exceeds item 19 because of double cropping, crop failure replanted and similar unusual land uses. Total reserve acreage was estimated based on most recent allocation of authorization funds to States and indicated costs per acre.

USDA Reports 6.3 Million New Acres in Conservation Reserve in 1960

New acreage placed in the conservation reserve of the soil bank in 1960 exceeds 6.3 million acres, surpassing the announced acreage goal for the program year by more than 1 million acres, the U.S. Department of Agriculture reported today.

The Department said reports from county agricultural stabilization and conservation offices have been tabulated showing a preliminary total of 6,317,946 acres that will be in the program for the first time when the new contract year begins April 15, 1960. The acreage goal was announced last summer at 5,100,000 acres—the estimate at that time of the new acreage that could be taken into the conservation reserve this year with available funds.

The larger acreage accepted for contracts is chiefly the result of two factors: (1) Conservation practices are being established more economically than in the past; and (2) per-acre annual payment rates under 1960 contracts are lower than anticipated. The competitive bidding system used in awarding contracts has resulted in an estimated average annual rental payment for the new 1960 acres of $12.90 per acre, compared with a national average per-acre rate of $13.50 announced in advance for the year. Field reports also indicate that the quality of land placed under contract in 1960 is higher than in any previous year.

The preliminary report for 1960 brings the cumulative total of conservation reserve contracts that will be in effect this year to 305,003 contracts involving 28,432,186 acres. Both annual and cumulative totals will be increased slightly when work is completed on approximately 3,000 contracts still being processed.

Approximately 80 percent of the farmers placing new land in the program for 1960 elected to come in on a "whole farm" basis; that is, to place all their eligible cropland under contract. This is of maximum effectiveness in checking surplus production, since the entire farm is withdrawn from crops and usually from livestock production as well.

Under a whole farm contract, the family may continue to live on the farm, and recent field studies indicate that most of them are doing so. In some instances farmers who would have sold and moved off their farms are retiring and continuing to live on them. Some who have shifted to nonfarm work and are continuing to live on their farms said they would have moved to towns or cities if they had not had the opportunity to obtain a reasonable return from their farm property through the conservation reserve.

New conservation reserve participation will be particularly heavy in 1960 in wheat-producing areas. The five leading States in new

1960 acreage—accounting for more than a third of the total—are Kansas, North Dakota, Oklahoma, South Dakota, and Texas, all major wheat States. During the 1960 crop season the reserve will contain more than 3 million acres formerly devoted to wheat. For other crops, 14 million acres formerly devoted to feed grains, nearly 2 million acres formerly devoted to oilseeds, and 660,000 acres formerly producing cotton will be in the conservation reserve and out of production.

The conservation reserve is a program in which farmers voluntarily sign contracts with the Government to retire cropland from production and devote it to conservation uses, such as grass and tree cover and wildlife shelter. The contracts provide that the Government will make an annual rental payment to the contract signer and will assist in establishing the conservation use on the land. Contracts may be for 3 to 10 years, depending upon the conservation use to be established and the wishes of the farmer.

The accompanying table shows, by States, the preliminary figures on number of contracts with new 1960 acres, number of new 1960 acres, and 1959–60 cumulative totals on number of contracts and acres:

Conservation reserve program: Contracts and reserve acres for 1960 new participation and cumulative participation (preliminary)

State	Number of contracts with 1960 new acres	1960 new acres	1956–60 cumulative total contracts	1956–60 cumulative total acres	State	Number of contracts with 1960 new acres	1956–60 acres	1956–60 cumulative total contracts	1956–60 cumulative total acres

APPRECIATION FOR THE CARE OF EASTER SEASON VISITORS TO THE CAPITOL

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I want to pay tribute to you, to the employees of the House, to the guides, the attendants in the gallery, and to the police, inside and outside the Capitol, for the fine way they have handled the tremendous crowds that have been milling in and out of the Capitol in the past days. It has been a tremendous happiness to me that such could be the case, because with the crowds there were inside and outside the Capitol there easily could have been a riot without understanding police. Everybody deserves the greatest possible credit and appreciation.

Many, many thanks, Mr. Speaker.

LEGISLATION PROPOSED TO DEFINE THE AUTHORITY OF MONITORS EMPLOYED IN LABOR UNION DISPUTES

The SPEAKER. Under the previous order of the House, the gentleman from California [Mr. KASEM] is recognized for 1 hour.

Mr. KASEM. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. KASEM. Mr. Speaker, today I introduced legislation which was previously introduced by the chairman of our Subcommittee on Claims, the gentleman from Massachusetts [Mr. LANE] pertaining to the scope of the authority of the monitors who are employed in labor union disputes or in labor union affairs. May I say that other Members besides myself have introduced identical legislation. We seek in this legislation to curtail the function of the monitors so that they will not operate and supervise unions but that they be confined to the duty of conserving the assets.

In this bill we put forth what has long been considered by most lawyers to be the law, but developments recently in the Cunningham against English case, or better known as the Teamster case, has caused us to have most serious doubts.

The proposed legislation would amend the Norris-La Guardia Act by prohibiting Federal courts from appointing receivers or other officers to administer or govern the internal affairs of a labor organization, except to preserve assets pursuant to the union election provisions of the Landrum-Griffin Act.

This proposal is intended to insure that the Federal courts will not assume the function of running labor unions.

The proposal keeps unimpaired the traditional judicial power to redress wrongs by the judge's own order. It prohibits only use of the authority of a Federal court to run a labor union. No judge can supervise the running of union by himself; participation of subordinate judicial officers is necessarily required. The bill proposes to accomplish its object by prohibiting the use of subordinate officers for this purpose, thus leaving traditional judicial power unimpaired. The proposed legislation will not come into play as long as the judge does not delegate any part of his authority to a receiver or similar officer, as long as he is acting himself in the familiar context of judicially cognizable cases and controversies. The principle underlying this proposal is that the function of the Federal courts is to decide particular cases and not to undertake general supervision over labor organizations.

This is a familiar but fundamental principle. Because of it, the Federal courts have refused to impose receiverships even upon business enterprises in the absence of clear proof that no other remedy is available to preserve the assets from imminent danger of dissipation. And except as specifically provided by statute, they have granted receiverships only in few, special cases, most often insolvency. Certainly the Federal courts have never assumed control merely because they believed the business could be run better or with higher morality. Never has a receivership rested on the character of the actual managers, as opposed to the impact of their conduct on the financial standing of the business. Never has a court even hinted that it might entertain a possible belief that it could order a business "into receivership for moral insolvency at the top level." This was the suggestion recently made by Godfrey P. Schmidt, as a basis for imposing a Federal receivership on a labor union. Deposition, April 6, 1960, in

Cunningham v. *English* (U.S.D.C., D.C. C.A. No. 2361–57, p. 75).

The Supreme Court has consistently condemned receiverships for the sake of receiverships. Time and again it has declared that a receivership must not be granted as "an end itself" (*Kelleam* v. *Maryland Casualty Co.* (312 U.S. 377, 380), *Gordon* v. *Washington* (295 U.S. 30, 37)), but only for the few legitimate ends long recognized in the law. Accordingly, the Federal courts have been most reluctant to impose receiverships. Typical is the following statement in *Skirvin* v. *Mesta* (10th Cir., 141 F. 2d 668, 673):

> A court should be cautious and circumspect in the exertion of the remedy because perversion or abuse may work great hardship.

In the case of labor organizations the potential evils resulting from perversion or abuse of the power to impose receiverships are multiplied. Labor organizations are voluntary associations, created and maintained to serve the interests and welfare of the membership. Federal law protects and guarantees the right of the members to select their own officers and determine internal union policies, the freedom of the members to exercise that right, and affords a member redress against violators.

Mr. BRAY. Mr. Speaker, will the gentleman yield?

Mr. KASEM. I yield to the gentleman from Indiana.

Mr. BRAY. I have not read the bill that the gentleman refers to but I have briefly studied the bill introduced by the gentleman from Massachusetts [Mr. LANE], in the Judiciary Committee. Is the bill that the gentleman is introducing or has introduced the same or similar?

Mr. KASEM. It is identical. I might further add that the bill was introduced at the request of a member of the executive committee of the AFL–CIO.

Mr. BRAY. There is one other question I would like to ask. How long ago was it that these monitors were appointed, roughly?

Mr. KASEM. Well, certainly in excess of 1 year ago, in the case of the Teamsters. And in that case they were selected pursuant to a stipulation between the adversary parties. However, the court took it upon itself to extend the time, the original stipulation being for 1 year, and to alter the terms of the stipulation.

Mr. BRAY. Was there any agreement between the parties, in the stipulation between the parties, changing the length of time and the powers of the monitors?

Mr. KASEM. No. I believe, on the contrary, that it was resisted by one of the parties defendant.

Mr. BRAY. I would like to ask another question. At the time these monitors were appointed, as I recall, that was brought about by a suit filed in the Federal court by 13 or 16, some number, of members of the Teamsters Union alleging that the last national election, as I recall it, was rigged; is that correct?

Mr. KASEM. Yes, that is the case. There was an allegation of certain improprieties in the selection of the delegates, and they asked the Federal court to stay—I forget just actually what the legal remedy sought was, but it was to prevent the assumption of the presidency by James Hoffa.

Mr. BRAY. Then, in a general way, they were alleging that the election was unfair and that steps be taken to have a fair election to protect their rights as members and having a fair election; is that generally what happened?

Mr. KASEM. This was the reason for the stipulation, to provide for the appointment of monitors as caretakers and to provide for an election that would be of a proper character.

Mr. BRAY. Now, who was the other party? Was it the International Teamsters Union, or was it Mr. Hoffa and other members of the union, or do you recall?

Mr. KASEM. The defendants in the case were—well, technically, I better be careful about it.

Mr. BRAY. It is not material, but at least there was a suit filed by 13 union members wanting an election?

Mr. KASEM. Yes.

Mr. BRAY. Then the court did not order an election but it appointed these monitors; is that correct?

Mr. KASEM. The stipulation, if I am correct, provided that the plaintiff would appoint a monitor, the plaintiff being the 13 members, bringing a class suit on behalf of the entire membership, and the administration of the union or, in effect, Mr. Hoffa as the defendant would appoint one, and the court would appoint the third monitor, there being three monitors.

Mr. BRAY. Has there ever been an election ordered by these monitors or by the Federal court?

Mr. KASEM. No, there has not been, and there have been repeated requests. There are presently, I believe—I do not know what the figure is—60,000 or 100,000 members of the Teamsters Union that have petitioned for their rights as now provided under the Landrum-Griffin bill for a new election. Prior to that there was action taken by members saying they substituted themselves as the representative parties for the membership holding that the 13 did not act on behalf of the membership in not pursuing the demand for an election.

Mr. BRAY. Now, the original plaintiffs, 13 in number, and those additional ones that have come in, all of those have asked for an election?

Mr. KASEM. Yes.

Mr. BRAY. Generally they have asked for an election. The head of the Teamsters Union, Mr. Hoffa, and the other members, have they asked for an election?

Mr. KASEM. Well, I cannot really answer you, but I understand they want an election very badly and they are now pressing for it.

Mr. BRAY. I have been getting letters from members in my district—I assume they are members of the Teamsters Union—personally I know some of them are—and generally they are asking to be given an election guaranteed, well, by the Landrum-Griffin bill, I guess. Anyway, it was guaranteed earlier than that. Do you know of any reason why they have not been given the right to have an election?

Mr. KASEM. I could speculate on the reasons arising from the attitude of the court, and so on, but I really have nothing to back it up with. I do not know the real reason. All I know is that they have been denied an election. Perhaps I could enlighten my colleague by reading him a letter written by William Goffen which was published in the "Letters to the Editor" column of the Washington Post, where he deals with this subject. It is not too long and I would interrupt my dissertation long enough to read it. The title is "Monitors in Trouble":

> Upon reading your April 12 editorial entitled "Monitors in Trouble," one cannot help but wonder whether the Washington Post, great newspaper though it is, gets all its information on the monitorship from O'Donoghue and Schmidt.

And as an aside I think these two gentlemen were two of the three monitors.

> Since when is it in "the public interest" to let two anti-Teamster monitors, O'Donoghue and McShane, function while barring a Teamster representative? William E. Bufalino, a lawyer and union official, should not be blacklisted by reason of a metaphor applied by a publicity seeking, labor-baiting Senator.

Since I do not know who that is, I cannot be accused of violating a personal privilege.

> Certainly the Teamsters have a right to the representative of their choice, subject to removal only for just cause, at least as clearly as the dissident union members had to representation by Schmidt until his resignation after the Court of Appeals for the District Circuit found him guilty of conflict of interest.
>
> And when did it become a monitorship obligation "to purge the union," especially since the Secretary of Labor has found full compliance with the Landrum-Griffin Act provisions prohibiting the holding of office by persons convicted of certain crimes? The primary purpose of the consent decree of January 31, 1958, was the holding of a new election of union officers in 1 year, after which the monitorship was to be dissolved.
>
> Instead, the monitorship has succeeded in turning its appointment into a perpetual political plum, costing the rank and file so far about $1 million. While the monitors have thus found it profitable over the past 2 years to publicize that purging the union is a prerequisite to an election, actually an election by secret ballot could have been arranged within 3 months, as has been attested by the Election Institute, labor election specialists.
>
> The deprivation of 1.6 million Teamsters of their right to vote for the international officers of their choice is no more defensible, legally, than to deprive stockholders of the right to vote for the officers of their corporation.
>
> Instead of furthering the public interest, the dangerous precedent created by such lawless action is a threat to all segments of our economy far transcending any monitorship threat to Hoffa. If, instead of trying to get Hoffa, the monitors performed their lawful functions, they would at long last permit an election, the democratic way for "purging" any group.

I hope that helps to enlighten my colleague.

Mr. BRAY. One more question, if the gentleman will permit. Does the gentleman believe that his bill, if enacted, would get for the Teamsters Union—I am not talking about Mr. Hoffa, but for members of the Teamsters Union—the right to elect their officials?

Mr. KASEM. I would hope it would. I cannot assume that that would necessarily follow, but I think that it would probably follow: The monitors have an assigned function. If they were limited by law in the supervisory activity that they have usurped for themselves they would then, perhaps, get to the business that they were created for and provide an election so that the 1.6 million Teamsters in the United States could elect their representatives and let them pass on the character of their officers, which is the democratic process.

Mr. BRAY. Has the gentleman made any study as to any legislation that might be better than this that would give them the right to elect their own officials as they see fit?

Mr. KASEM. There was a bill passed in this Congress some time back which is popularly known—I do not know if it is popularly known, but is commonly known—as the Landrum-Griffin bill. That bill contains provisions that would effect that end. So far it has failed to achieve that result.

Mr. BRAY. Plainly they have not had their election. I am trying to find some method whereby the members of any union through the democratic process can elect their leadership. This is my only interest, not for any special individual, but it is the handling of it in the democratic way. I frankly thought that there was legislation that did give them that right. At least, if there is such legislation something has failed in the administration of it because up until late today they had not got the right to have their election.

Mr. GRIFFIN. Mr. Speaker, will the gentleman yield?

Mr. KASEM. I yield to the gentleman from Michigan.

Mr. GRIFFIN. In order at least to have the record straight, would the gentleman agree with the fact that the Teamsters election out of which grew the appointment of the monitors took place prior to the enactment of the labor law last year?

Mr. KASEM. Yes.

Mr. GRIFFIN. The law applies prospectively, and applies to elections held after that date. Would the gentleman agree with that?

Mr. KASEM. Yes. It applies insofar as any provisions that would be in effect as to the results of the election.

Mr. GRIFFIN. In other words, any election held after the effective date of the act could be challenged under the provision of that act, but any election held prior to that act would not be subject to that act.

Mr. KASEM. No, I think the election was successfully challenged without the need or use of the Landrum-Griffin bill.

Mr. GRIFFIN. That is right, it was challenged before the act became effective and the monitors were appointed pursuant to a consent decree.

Mr. KASEM. Right.

Mr. GRIFFIN. I think that somewhat clarifies why this act is not completely applicable.

Mr. PUCINSKI. Mr. Speaker, will the gentleman yield?

Mr. KASEM. I yield to the gentleman from Illinois.

Mr. PUCINSKI. Within the framework of that explanation as to the effective date of the act, is it not correct that the election that had been held in the Teamsters' Union prior to the passage of the act had been set aside by the Court when the monitors were appointed under a consent decree?

Mr. GRIFFIN. No; if the gentleman will yield for a reply, I do not believe the election was set aside. As I understand it there was no further challenge to the election after the parties entered into a stipulation agreeing to entry of a consent decree allowing Mr. Hoffa to continue as president provisionally. This was an arrangement agreed to by the parties to the litigation.

Mr. KASEM. May I address a question to the gentleman from Michigan? The gentleman from Michigan does agree with me that the present arrangement was made for the purpose of having subsequently thereto, or provisionally, an election that would satisfy the courts of the democratic process?

Mr. GRIFFIN. Certainly, it is my understanding that the original petition of the 13 dissident members was for that purpose, and if the attorneys or those representing the Teamsters Union at the time had not agreed to a consent decree, I believe the probable outcome of the proceedings would have been a new election. But instead of allowing the proceedings to take a regular course, the parties agreed to entry of the consent decree which permitted the court, without challenge to its jurisdiction, to appoint the monitors.

Mr. KASEM. Does the gentleman contend that the monitors' notice to provide an election or that this monitorial arrangement supersedes an election?

Mr. GRIFFIN. No, I would suppose that in due course the court would order a new election. I would imagine, though, that it might be of interest to the members of the Teamsters Union to see the outcome of the present litigation in which Mr. Hoffa's right to serve as the president has been questioned. I believe that trial is about to begin. I think the people of the country as well as the members of the Teamsters Union might like to see what evidence is developed in that proceeding.

Mr. PUCINSKI. Mr. Speaker, will the gentleman yield so I may propound another question to the gentleman from Michigan [Mr. GRIFFIN]?

Mr. KASEM. I yield.

Mr. PUCINSKI. Is it correct then that without the consent decree that was entered into, setting up the present president as a provisional president, one of the duties of the monitors was to create a situation and set up a situation wherein the election would be held. And do I understand the history of this case properly in assuming this particular road was taken at that time because there was no law on the books to deal with this particular situation? Subsequent to that, the 1959 act was passed and now there is machinery for finding redress of grievances in the words of the phrase used by the dissident group. Is my understanding of that quite correct along those lines?

Mr. KASEM. I yield to the gentleman for a reply.

Mr. GRIFFIN. Of course, I cannot tell you what was in the minds of the parties when they entered into the consent decree. I am not particularly trying to pass my judgment on the advisability of setting up the monitorship in the first place. I arose originally only to comment on the jurisdiction of the court to do so and the applicability of the new labor law.

Mr. KASEM. I would like to ask the gentleman from Michigan, who is a coauthor of the Landrum-Griffin bill, if he feels it is proper for a Federal court to take supervisorial powers over a labor organization and to manage the affairs of a labor organization.

Mr. GRIFFIN. I certainly think whenever a court of equity assumes such power and appoints a receiver or appoints monitors or otherwise takes over an organization, whether it be an association, a corporation or a labor union, it should be a very unusual situation for it is an extraordinary procedure to be exercised by a court. There is no question about that. Whether or not, and for how long this receivership or monitorship should continue, I certainly am not going to pass judgment. There are remedies available to the parties. If the court of equity exceeds its power, the situation can be corrected by appeal to a higher court.

Mr. KASEM. May I ask the gentleman, when such a situation as this arises, should it not be the object of the court and its officers to bring that situation to a halt and terminate the jurisdiction of the court as soon as it is practicable to do so?

Mr. GRIFFIN. I think as a general proposition that is a good statement. I certainly would not comment on what would be the appropriate length of time in this particular proceeding and I do not think this is in our province nor would it be appropriate for us to do so.

Mr. KASEM. Wherever it appears that a situation was created because of improprieties in an election and that this could be corrected by the holding of a new, proper, and correctly held election, that should be expedited as soon as possible; would that not follow?

Mr. GRIFFIN. I can only recall for the gentleman the fact that the monitorship was established by the consent-decree agreement of the parties to this litigation. If they do not like this position, it should be recalled that they put themselves in it.

Mr. KASEM. Yes, and I might remind the gentleman there is no provisional law that permits a court to continue a stipulation beyond the agreed time or to alter the provisions of it, as has been done here.

May I go on and finish my statement?

It is abhorrent to our system to allow outsiders, and particularly judicial officers, to supersede this right of union members or dictate to the union, through receivership or other supervisory techniques, the practices or policies or officers it may or may not have.

This is not to say that unions are or should be immune to general legal standards; or that courts may not protect the rights of union members as established by law. But determination of what general policies and standards are to govern the internal affairs of unions is a legislative, not a judicial, prerogative. And Congress has fixed such policies and standards as it wished to establish in this area in the Landrum-Griffin Act.

The fundamental principle underlying that legislation is that ultimate responsibility for operating a union, for its policies and its choice of officers must be lodged in the membership. Secretary of Labor Mitchell expressed it as follows, in testifying for the bill:

> The administration does not believe that the Government should inject itself into the internal affairs of any organization more than is absolutely necessary to correct the evils which must be remedied. We believe that it is wise to proceed cautiously and to leave as much as possible to the responsibility to improve their own organizations which informed union members may be expected to exercise when they have access to the necessary information and the right by secret vote to select and to remove the officers whom they entrust with administration of their organization.

Congress intended that this policy apply in the case of union elections. This is demonstrated by the following comment in the Senate committee report:

> One final point is significant. Since union business must not be brought to a standstill whenever an election is challenged, it is necessary to make some provision for the conduct of business while the proceeding is in progress. It would be intolerable for the Government to appoint outsiders to act as receivers. * * * A union election should be presumed valid until the contrary can be reasonably established. There would be the least disruption of normal procedure within the union if they were continued in office. However, the ultimate decisions upon this point should be made by the labor unions themselves (S. Rept. No. 187, 86th Cong., 1st sess., 22 (1959)).

The provisions of the act effectuate this policy of leaving the final determination to the membership under all circumstances. Even where the Federal court and the Secretary of Labor find that a union election has been "rigged" or otherwise invalid, Congress prescribed that the officer may not be removed except upon a membership vote—section 402. And even if there is a finding that the union officer has been guilty of serious misconduct in office, the ultimate remedy is a membership vote on his removal. Section 401(h). If the membership votes to retain him, he stays in office. His background may be unsavory; his election may originally have been obviously invalid; his misconduct in office may be gross. But if the membership so desires, he retains his union office. In no circumstance can a union officer be removed if the membership desires to retain him in office.

The clear, deliberate congressional policy in Landrum-Griffin is that the union membership decides who its officers shall be, the union membership exclusively. It is not the courts. It is not the Secretary of Labor. It is not the complaining member or any dissident minority. It is not any outsider and certainly not any public official. Congress could obviously have qualified the exclusive control of the membership; it did, after all, assign certain roles to the Secretary and to the courts. But Congress was very clear and certain about the fundamental values of democracy and free associations which it was intent on preserving and protecting.

This legislation is essential to maintain that congressional purpose. To permit a Federal court to run a labor union is to frustrate the policy carefully enacted by the Congress. To permit a Federal court to regulate the qualifications of candidates for union office, or to veto any particular individual, is the antithesis of the policy expressed in Landrum-Griffin. The purpose and the effect of that act is to vest sole and final selection of union officers in the union membership. The proposed legislation insures this result by prohibiting Federal courts from making the decisions and choices which Congress has reserved for the membership.

This legislation is necessary to preserve the reputation, dignity and stature of the Federal courts. Just as the Norris-La Guardia Act was necessary in the face of injunctions in labor disputes, this proposal is necessary in the face of receiverships or monitorships over labor organizations. That judicial officers should supervise labor unions is contrary to the fundamentals of our jurisprudence. It involves the courts in performance of legislative and administrative—that is, by definition, nonjudicial—functions. Moreover, it is destructive of the standing of the Federal judiciary, for it casts the court in the role of partisan, striving to attain a predetermined objective, rather than in the accustomed role of adjudicator of causes under law. And it is further detrimental to the welfare of the judicial system because it bogs the courts down in a morass of details and controversies arising from monitorial assumption of the tasks of administering a labor union.

These evils are illustrated by the course of *Cunningham* v. *English* (U.S. District Court for the District of Columbia, Civil Action No. 2361–57). In that case, as a result of a consent decree, pending conduct of a new election and convention, the court undertook to supervise compliance by officers of the Teamsters Union with provisions of the international constitution, to police their observance of fiduciary standards and to institute administrative and procedural reforms within the union. This was to be accomplished through the device of a three-man board of monitors, officers of the court, one to be designated by the plaintiffs, one by the defendants and one by the parties jointly. This device has not been successful in achieving results or in bringing the litigation to an end. Indeed, although the protections afforded by the Landrum-Griffin bill themselves guarantee that a fairly and honestly conducted convention and election may now be held and that officers as elected will fairly reflect the democratic choice of the membership, a new convention is being blocked in order to perpetuate judicial control over the union. Since the monitorship will terminate only after a new election of officers, the end of the case is nowhere in sight. The court has become embroiled in internal union controversies and its very impartiality has been publicly questioned.

There has been sharp controversy not only between the Board and the union; but, in addition, within the board of monitors itself. For a considerable period the plaintiffs' monitor, who was also the plaintiffs' attorney, and the jointly nominated monitor saw eye to eye and voted together, with the monitor nominated by the defendants frequently in opposition. The plaintiffs' monitor, faced with conflict of interest charges, resigned. His successor at first agreed with the jointly nominated monitor and then, on important issues, began to oppose him and to vote with defendants' monitor. Judge Letts thereupon removed the plaintiffs' monitor, because, the Wall Street Journal says, the judge thought "he did not have his heart in his work."

To replace him the court appointed a former FBI agent who had earlier investigated Hoffa. He was nominated, however, by Godfrey P. Schmidt, the original attorney and monitor for the plaintiffs, who was discharged by the plaintiffs. Schmidt had already been repudiated by his clients before he nominated McShane as plaintiffs' monitor. Moreover, when the defendants' monitor asked to resign for reasons of health, the court refused to allow him to do so.

Furthermore, over 160,000 members of the union are now seeking to intervene in the suit, claiming that the membership is inadequately represented by the 13 members who originally brought suit in a class action nominally on behalf of all members. Those seeking intervention claim that the court, through a majority of the board of monitors, is determined to oust Hoffa and prevent him from running for union office without giving the membership an opportunity in a free, fair and honest election to vote for or against him. They claim that the monitorship is being deliberately prolonged until that goal has been accomplished. They say that the litigation is being maintained, not in the general membership interest, but to foster the interests of a dissident minority represented by plaintiffs, as against the majority of the membership.

The damage this has wreaked upon the Federal courts is reflected in the April 6, 1960 editorial of the Wall Street Journal. This editorial pointed out that the record in the case left the court open to a charge of "rigging" the board against Hoffa. It decried the fact that "a Federal court has become as entangled as this one in trying to manage the Teamsters." With evident regret it observed that "a Federal judge with other

judicial duties has to spend a great deal of time trying to run a labor union." This kind of public comment, particularly if it is justified, does harm to the Federal courts which the Congress should prevent.

This proposed legislation will enable the Federal courts to devote themselves to their normal judicial functions, without the need to consider or undertake the administration of a labor organization. This legislation will further the purpose of having union membership, rather than judicial officers, run labor unions. It is consistent with the fundamental nature of our economic and political system, and with Congressional legislation in this field. This proposed legislation should be supported and enacted.

Mr. O'NEILL. Mr. Speaker, will the gentleman yield?

Mr. KASEM. I yield.

Mr. O'NEILL. I want to congratulate the gentleman from California, Mr. Speaker, on his fine remarks and to say that I am in favor of the bill filed by my colleague from Massachusetts [Mr. LANE]. Possibly tomorrow, or within a day or two, I intend to introduce a similar bill.

I had a few remarks to say the other day when I believe the gentleman from California and other Members were talking about the Teamsters Union. I explained about the Teamsters Union in Massachusetts. That is the only place with which I am familiar with them. I know Nick Morrissey who is the New England regional director for the Teamsters. I have a very high regard for him as a friend and neighbor and all who know him, who live near him or have dealings with him have the same high regard for him that I have.

Last year we passed the Landrum-Griffin Act. I was one of 50-odd who voted against it. I voted for all the substitutes, I believe, with the exception of the Shelley bill. The Landrum-Griffin bill is the law of the land. I think it is a ridiculous situation when you take into consideration the fact that the Teamsters Union are paying about $2,000 a day, coming out of the pockets of the hard-working men who drive these over-the-road trucks and who are responsible for our great highway transportation freight hauling system in this Nation, that they should have to pay at the rate they are presently paying for this board that has been set up by the court.

The Landrum-Griffin bill is the law of the land, and I think as the law of the land it should take precedence and take the place of the present setup. I think the legislation that has been introduced recently on this subject should be passed by the Congress. I think the judge should step out.

If there is anything wrong with the Teamsters Union—I am not arguing whether they are clean or not clean, for as I say all I know is the local situation in my State, but I believe a national election should be held, and I believe once and for all the law of the land should be lived up to and we should get rid of the monitor system as presently set up.

Mr. KASEM. I thank the gentleman from Massachusetts for his remarks. I may say also that I have had but little contact with the Teamsters Union, but those few members of the Teamsters Union I have known have seemed to me to be persons of splendid character. I did not introduce this bill for the specific purpose of helping Mr. Hoffa or the Teamsters Union or any private group.

Mr. O'NEILL. I understand how the gentleman feels. I feel the same way. I may say that in the past 10 days my office has been barraged by members of the Teamsters Union, and I mean by the rank-and-file members of that union. I live in a metropolitan area in a city which is comprised of hard, honest-to-goodness working men. Throughout my political career I have come in contact with a great many men in all types of unions. I also have surveyed the letters that have come through. It is not a run-of-the-mill letter. These are written by men who have confidence in their own local, realizing it has done for the working men of our area a great good. They are sincere when they write me, and they are truthful with me when they ask their Congressman to give them some help in this matter.

Again I want to congratulate the gentleman from California for his outstanding courage and for the remarks he has made on the floor of the House this afternoon.

Mr. KASEM. I thank the gentleman for furnishing this information. It simply strengthens my resolve that legislation will be enacted so that the Federal courts cannot take unto themselves the jurisdiction of the monitoring of a labor union. Obviously this would take us back to the pre-Norris-La Guardia days when the injunction was the device used to beat labor unions into submission. Now a new device has been created, and all we need for this device to be employed is a Federal judge with anti-labor tendencies.

Mr. O'NEILL. May I say at that point I am highly in agreement with the gentleman.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. KASEM. I yield to my distinguished majority leader.

Mr. McCORMACK. I concur in the remarks made by the gentleman from Massachusetts [Mr. O'NEILL]. I know Mr. Morrissey very well. I have known him for many years. He is a dedicated American. He is one of the most able, outstanding labor leaders I have ever met. In any situation that exists a distinction must be drawn, it seems to me, between the members of the Teamsters Union throughout the United States and any individual or individuals therein. I am not passing judgment on any individual or individuals. The Teamsters Union nationally is composed of American citizens. Their patriotism has never been impugned or attacked. The members of that union are good citizens in their various communities and from my observation of them in Massachusetts they are a very powerful, dynamic union, an organization composed of men of real patriotism who are for a strong America. My relation with them throughout the years has been a most pleasant one. I have profound respect for them—for the leaders in the New England area and for the members of the union itself. I have respect for members of organized labor as American citizens. Care should be taken to differentiate between an individual here and there and a great organization like the Teamsters Union, either locally or nationally.

Mr. KASEM. The encouragement of my majority leader means a great deal to me, and I am very grateful for his remarks.

I would further point out that not only does the monitor system as it is presently used constitute a threat to labor unions but it stands also as a threat to all business enterprise and all fraternal activities throughout the land. It is a precedent that could be equally applicable in any such circumstance; therefore, I feel it is of vital important and most timely that we should limit this activity in its embryonic stage so that it will not grow to be a shadow over the conduct of all human affairs—commercial, economic or otherwise.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield further?

Mr. KASEM. I yield.

Mr. McCORMACK. I might also say there is another gentleman who is one of the top officials in the Teamsters Union, Mr. John English, who my friend, the gentleman from Massachusetts [Mr. O'NEILL] knows. He is one of the finest gentlemen I have ever met, and certainly an outstanding labor leader and a dedicated American. I have never met Mr. Hoffa. I met Mr. Beck once when he came into my office several years ago. He came in to see me then in connection with the proposed increase on gasoline, and he hoped that the increase on diesel oil would not be any greater than the increase on gasoline because of the competitive disadvantage it would give to the truck transportation business as against the railroads. I thought he made out a case. And, as you will remember, the increase on diesel oil was the same as the increase on gasoline when we passed the road bill in connection with the Interstate Highway System. Politically Mr. Beck, they tell me, is a Republican, and I also understand Mr. Hoffa is a Republican.

Mr. KASEM. That is my understanding, that Mr. Beck was the chairman of labor for Eisenhower, and I am told that Mr. Hoffa was a member of that committee of labor for Eisenhower. It seems that they have been badly used, does it not, compared to others who have supported Mr. Eisenhower?

Mr. McCORMACK. I just made that passing observation that my recollection is that Mr. Beck was very prominent in the Republican Party. I kind of thought he should have been grateful the following election for what we Democrats did for him, but in the exercise of his judgment he again supported the Republicans in the fall election. I do not personally know the party politics of Mr. Hoffa, but I have been reliably informed that he has been a very strong Republican all his life.

Mr. KASEM. I do not know about him being a very strong Republican, Mr. Leader.

Mr. McCORMACK. Well, a Republican.

Mr. KASEM. I am informed by the press that he endorses me, which shows that his judgment can be excellent.

Mr. McCORMACK. Well, I would endorse the gentleman, so I will make it on the ground that my judgment is excellent.

Mr. KASEM. In that we all concur, Mr. Leader, that your judgment is excellent.

Mr. GRIFFIN. Mr. Speaker, will the gentleman yield?

Mr. KASEM. I yield to the gentleman from Michigan.

Mr. GRIFFIN. It is interesting to note that those on the other side of the aisle do not want to claim Mr. Hoffa or Mr. Beck as members of their party. I want to make it clear that we do not claim them either. I recall an instance, for example, in the 1958 campaign in Michigan, that the Teamsters Union allegedly contributed some $11,000 to the Democratic candidate for prosecuting attorney in Wayne County, where Detroit is located, and that on many other occasions, as is well known, Mr. Hoffa and his Teamsters Union have contributed to and supported candidates for the Democratic Party as well as the Republican Party on occasion.

Mr. KASEM. When was this that they contributed?

Mr. GRIFFIN. In 1958.

Mr. KASEM. In 1958? I believe that Mr. Rogers was the Attorney General of the United States at that time. I cannot understand why he did not prosecute under the provisions that forbid labor organizations to make campaign contributions.

Mr. GRIFFIN. That is a very interesting question. Will the gentleman allow me to discuss it for a few minutes?

Mr. KASEM. I would like to have the gentleman explain why the Attorney General did not prosecute.

Mr. GRIFFIN. There is a very good reason. The Corrupt Practices Act, which is a Federal statute, prohibits a corporation or a labor union from contributing funds to the campaign of candidates for Federal office, but there is no prohibition in Federal law to prevent contributions by a union to the campaign of candidates for State or local offices.

Mr. KASEM. I suggest the gentleman has supplied a perfect answer why the Attorney General did not prosecute. I thank the gentleman.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield further?

Mr. KASEM. I yield.

Mr. McCORMACK. Just to have the record clear, my remarks were not claiming anybody. I just simply made a passing observation that Mr. Beck was a Republican politically, which he has a right to be. As I understood it, Mr. Hoffa is also a Republican. The gentleman from Michigan [Mr. GRIFFIN], disclaimed wanting to have him in the Republican Party. It would be rather interesting, if Mr. Beck or Mr. Hoffa should read this colloquy, to know the thoughts running through their minds when they go back through the years and search their mind and conscience, as to their loyalty to the Republican Party in the past. As I say, as I understand, both are Republicans. It is not a question of our claiming anything. My friend, the gentleman from Michigan, has disclaimed them. It puts the Republicans in the position of disclaiming.

May I say this, also? Fortunately, in America, it is not the right of a political party to say to anybody, "You are permitted to be a member of our party." It is the right of the individual American to be Republican or Democratic or independent. No party passes upon the membership of any citizen and no party can oust any citizen, fortunately, under our political setup in the United States.

So far as I am concerned, having made just a passing observation as to the political loyalties of Mr. Beck and Mr. Hoffa, I see nothing from them that they are not still interested in the Republican Party and that they are not still Republicans.

Mr. KASEM. Mr. Speaker, I think if Mr. Hoffa were to read the remarks of our colleague from Michigan [Mr. GRIFFIN] and see that the Republican Party has disclaimed him he would smart, because there is no serpent sting like ingratitude. I am neither denouncing nor defending Mr. Hoffa. I met Mr. Hoffa on one occasion when he was most gracious and cordial to me, and I appreciated it as I do when any person is gracious and cordial to me. Mr. Hoffa said very fine things about my being a courageous person who was willing to lay his political career on the line and I yield to such flattery and I am taken in to some small extent. But I am willing to judge Mr. Hoffa objectively. So far as I know he has prevailed in the only tribunal where he has been brought, where he was permitted to put on a defense. Condemnation of him arises out of the proceedings of the McClellan committee, which hardly seemed impartial and where there were political overtones and implications. My other impressions, of course, come from the press, which I have learned "to take with tons of salt."

Mr. ROOSEVELT. Mr. Speaker, will the gentleman yield?

Mr. KASEM. I yield to my colleague from California [Mr. ROOSEVELT].

Mr. ROOSEVELT. Mr. Speaker, I thank the gentleman for yielding to me. I want to apologize to him for the form of the question I am going to ask. It may be that it was covered in the debate but unfortunately I had to be at another committee hearing.

Mr. KASEM. Repetition is no novelty in this House.

Mr. ROOSEVELT. May I ask the gentleman whether it has been brought out that the so-called Griffin-Landrum bill passed last year in section 401(h) calls for a proceeding which may be started by any rank-and-file member, by request to the Secretary of Labor who, under proceedings then set up by the Secretary of Labor, calls for ouster proceedings, and a vote by the union members; so that if there is any question as to whether or not Mr. Hoffa should or should not be eligible to run again for reelection at a convention which, of course, is called for under section 402 of the act, this proceeding is open to any rank-and-file member; so that Mr. Hoffa's eligibility for reelection by direct charges calling for an ouster can be had before the convention?

It would therefore seem, under this circumstance, that there is mighty little excuse in this or, for that matter, from here on in, in any other matter, for the courts deliberately to take over and to run a union's affairs, inasmuch as that act last year, much of which I am in very great disagreement with but which in these particular provisions at least, covers this case beyond any question. So that I would ask the gentleman if he would not agree that under these conditions most certainly the court should abandon the present proceedings and allow the law to take its effect and allow the rank-and-file teamsters to make their own decision.

Mr. KASEM. I think the gentleman knows that I do agree. In answer to his first concern, that it might be repetitious, we did touch upon the issue but not with such specificness and clarity as the gentleman from California has put forth.

Mr. ROOSEVELT. It may also have been touched upon in the debate, but I think it is of interest that this afternoon Judge Letts disqualified himself from any further proceedings in this case, and another judge will now take over. In the meantime, over 40 other cases are pending in the Federal courts as the result of this one case, which obviously indicates to me that additional expense and additional litigation are being piled one upon the other. I think the time has come, and I hope the new judge will see it this way and that he will take whatever steps have to be taken to resolve this matter by letting the normal course of the law, as it is now written, take care of the matter.

Mr. KASEM. My colleague from California has brought forth a most cogent point which I have heretofore failed to put forth that is strengthening the argument that the court has no place in operating and managing a union's affairs. That is the argument that by the sheer amount of the detail of the task assigned, the court cannot do it, or the courts could not engage in any other activity whatever. The function of the court is to decide cases and controversies between individuals. This is a usurpation and diversion from that basic fundamental duty of the courts.

Mr. PUCINSKI. Mr. Speaker, will the gentleman yield?

Mr. KASEM. I yield to the gentleman from Illinois.

Mr. PUCINSKI. I wanted to direct a question to the gentleman from California [Mr. ROOSEVELT]. In an earlier part of this colloquy the coauthor of part of last year's Labor Management Disclosure Act the gentleman from Michigan [Mr. GRIFFIN], if I understood him correctly, said there was general agreement that there is here now sufficient language and provision in that act to deal with this particular situation as concerns the Teamsters. The question I should like to direct to the gentleman from California [Mr. ROOSEVELT] is whether he or anyone else has any direct knowledge whether or not any locals of

the Teamsters have directed such a request to the Secretary of Labor. The gentleman has pointed out that section 401(a) contains provision that upon request to the Secretary of Labor by any aggrieved party of a labor organization this machinery goes into action. Does the gentleman know whether such a request has been made? I do know that requests have been sent to many Members of Congress, but can the gentleman say whether or not a request was made of the Secretary of Labor under the terms of the act?

Mr. ROOSEVELT. To the best of my knowledge no such request has been made, for two reasons, either of which would probably be effective. First, one would hesitate to do that with the matter directly before the court.

Second, anyone who wanted to ask for ouster proceedings would obviously be an enemy of Mr. Hoffa, someone who would feel that the longer they could keep the thing going in the present condition the more likely they were to have this thing alive and in its presently completely chaotic position.

Those reasons are probably the basic reasons why such a request has not yet been made. However, should the court resolve the matter by dropping its position, then it would force Mr. Hoffa's enemies or anybody who thought Mr. Hoffa was not doing a proper job within the rank and file to leave that as the one way by which to accomplish whatever they wanted to accomplish.

Mr. PUCINSKI. It is my understanding that there does not necessarily have to be an adverse party asking for an election. It is my understanding that any local of the union can ask for this type of election. It does not have to be an adverse party.

Mr. ROOSEVELT. I would say that the position of the gentleman from Illinois is absolutely correct, but, of course, if he does that he will be labeled within the union as an adverse party although it might be arranged that someone else might do it for the simple purpose of clarifying it. So far as I am concerned that would be the statesmanlike thing to do, if Mr. Hoffa wishes in order to prove his innocence, to get a fair trial before this body representing the union. I think that is what would have to be done in order to have the matter settled.

Mr. PUCINSKI. I think the gentleman has now put this thing in the proper perspective, namely, that there is relief and many of the locals have in good faith written to Members of the Congress seeking relief under the 1959 act. Perhaps, they are in the right church, but in the wrong pew. Perhaps, now they ought to direct these requests to the attention of the Secretary of Labor so that he can implement the 1959 law and bring some order out of the chaos that exists in this whole situation.

Mr. ROOSEVELT. But not until the Federal court had dropped the matter. Perhaps, he might be held in contempt if he did that prior thereto. If I were an individual member, I do not think I would run that chance, especially, as long as Judge Letts was there. Now that he is not there, however, still that is a problem I would rather not have until the Federal court dropped the matter.

Mr. PUCINSKI. I thank the gentleman from California.

Mr. KASEM. Mr. Speaker, I thank the gentleman from Illinois [Mr. PUCINSKI] and the gentleman from California [Mr. ROOSEVELT] and the gentleman from Michigan [Mr. GRIFFIN] for their assistance in this debate and for clarifying to some extent for the American people the issues that are involved in this monitor type situation that we presently find here.

Mr. Speaker, if I have obtained unanimous consent to revise and extend my remarks, I will yield back the balance of my time and I know my colleagues will extend to me an ovation of great gratitude for that.

The SPEAKER pro tempore (Mr. SMITH of Iowa). Without objection, it is so ordered.

There was no objection.

THE PRESIDENT'S PRESS CONFERENCE REMARKS ON WILLIAM R. CONNOLE

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from Connecticut [Mr. DADDARIO] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. DADDARIO. Mr. Speaker, I placed in the RECORD yesterday a statement urging the reappointment of William R. Connole to the Federal Power Commission. This morning, President Eisenhower, apparently indifferent to the wide support for Mr. Connole, said he has no intention of making that reappointment.

This is disturbing to me and, I am sure, to the millions of consumers on the east coast and in the Nation who have come to regard Mr. Connole as a defender of their interests.

The President said at his press conference that he thought he could find a better man. I shall certainly watch with interest to see who he feels meets this definition. I have learned in my lifetime someone who uses the phrase "better man" ought to be asked immediately—better for whom?

Here we have a man who has a proven record in support of the consumer. He is an able lawyer, whose views in more than one critical case have been upheld by the highest court in the land. His training in the field of utilities regulation has been outstanding and he has a dedicated interest in the basic principle underlying our regulatory agencies—the control of economic forces for the good of all the people.

If he is dropped now, and if the administration's new appointments follow the speculation which has been rampant, there is not going to be anyone on the Commission from east of the Mississippi River. That is a gap in representation which ought to be avoided. Just as disturbing will be the loss of a man who has had the interests of the consumer at heart, one whom I have seen described as the most consumer-minded man ever to serve on this Commission.

I return to the question, then, better for whom? I hope the new man will not be better for those who believe that higher prices are a natural thing to seek and to receive. We are all well aware that the Nation recorded this week, under this same administration, the highest cost of living index in its history.

THE ELDER STATESMAN SPEAKS—LISTEN

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. MULTER] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. MULTER. Mr. Speaker, there is no more inspiring American on the contemporary scene than Elder Statesman Bernard M. Baruch. We could not learn more at the feet of any other man. I would like at this time to share my good fortune with our colleagues.

Mr. Baruch has written me as follows:

MY DEAR MR. MULTER: Because you show such a practical grasp of your subjects I am taking the liberty of sending you a copy of a speech on "Medical Care" made 13 years ago.

With warm regards.

Sincerely,

BERNARD M. BARUCH.

The enclosure reads as follows:

SPEECH BY BERNARD M. BARUCH AT A DINNER SPONSORED BY THE MEDICAL SOCIETY OF THE STATE OF NEW YORK, COORDINATING COUNCIL OF THE FIVE COUNTY MEDICAL SOCIETIES OF GREATER NEW YORK, GREATER NEW YORK HOSPITAL ASSOCIATION, TO REPORT ON PROGRESS OF PREPAID MEDICAL AND HOSPITAL CARE IN NEW YORK CITY, AT THE BILTMORE HOTEL, NEW YORK CITY, NOVEMBER 19, 1947

You do me honor to ask me to talk to you about health. I almost became a doctor myself.

When I was a boy my mother took me to a phrenologist. His office was across the street from where Wanamakers now is. He felt the bumps on my head and asked my mother what she expected to do with me.

She replied, "I am thinking of making him a doctor."

"He will be a good doctor," said this phrenologist, "but my advice to you is to take him where they are doing things in finance and politics—he might even make good there, too."

It has been a long detour for the prodigal. He has returned.

In many ways I am sorry I did not become a member of this noblest of professions. For I believe we approach a great adventure in health. That is our goal. I think it obtainable. It would be gratifying to take a more active part in it.

All my thoughts on medicine are colored by memories of my father, Dr. Simon Baruch. He was the wisest man I ever knew. He pioneered in surgery, physical medicine, and "incurable diseases." Often I heard him tell prospective medical students:

"Do not enter the medical profession to make money. Study medicine only with the

idea that your greatest compensation will be knowing that you help your fellow man. Do not expect gratitude and you will never be disappointed."

As Chairman of the War Industries Board in the First World War, I realized how important to defense was the health of our citizens. That awareness was reinforced manifold during this past war.

In preparing a report for the late President Roosevelt on manpower, I was shocked to learn at least 4 million men had been rejected as 4-F's—unfit to defend their country. Some, not all, of these defects were preventable.

How much more shocking would have been the record if everyone had received the same examination?

Since then I have given the problems of medical care much thought. It deeply concerned me that we not fail the returning veteran, so I studied their medical needs. From that, it was only a step to related problems of general medical care for all.

Soon I was up to my neck in reports, statistics, speeches, congressional hearings. I conferred with many persons, doctors, and nondoctors, experts and amateurs.

May I tell you some of my conclusions. They may not be particularly new to you, pioneering this field. They may be helpful, coming from a nonprofessional mind.

But before I list them, I would like to point out that the medical science and art have conferred a new and great benefit upon society in the last generation. The years of our lives have been heavily increased. This helps not merely the individual, who wants to go on living—and living in dignity and self-respect—but all the people to live more comfortably and freer from fear.

And now to go on with my exposition:

There is no question—the need for more medical care exists.

Also there is no question this need will have to be met.

The problem is, How?

All over the world the masses are stirring for higher living standards. Improved medical care is a foundation of that better standard. Without good health, of what advantage are higher wages or shorter work hours, better education or greater leisure?

The families whose earnings disappear with serious illness—the many who suffer disease which your skillful diagnosis and treatment could have prevented or halted—or whose limited means bar them from the medical attention available to you and me—these people will not remain content.

This striving of the masses for better living is felt everywhere. In health your profession must steer that surging tide into channels of improvement. Then the surge does not overspill into the revolutionary flood, which washes away more than it brings.

One of the last things Woodrow Wilson wrote—called "The Road Away From Revolution"—was this:

"In these doubtful and anxious days when * * * the road ahead seems darkened by shadows which portend dangers of many kinds, it is only common prudence that we should look about us and attempt to assess the causes of distress and the most likely means of removing them."

That was Wilson's method—to assess portending dangers, and anticipate them by timely action. So, he proposed the realistic League of Nations, which men rejected as a dream—and got a nightmare. Wilson knew social change was inevitable. He worked to steer that change into orderly channels.

You should take that as your guiding star.

Society usually divides into three broad groups.

At one end—the left end—are those who burn with a passion to change everything as quickly as they can—if not quicker.

At the other—right end—are those who want things just as they are.

In the middle are people, like Woodrow Wilson, to whose school I belong, who believe in intelligent progress and seek to guide it.

What differentiates these three groups is their attitude toward that vital element of life—time.

The left-enders feel time panting hot on their necks.

The right-enders use time to fight rearguard actions, all the way.

The middlers—sometimes both left and right call us "muddlers"—seek to come to terms with time, preserving the best of the past, discarding the outworn, and moving on to a better future.

In the matter of adequate medical care, too many doctors have been fighting a rearguard action for too long. I feel I must warn those doctors—time is running against them. The medical profession has justly earned great influence in the community. It can keep that hold only as it moves forward. It will lose that hold if it has nothing but objections to offer, if it has eyes only for what not to do.

We must look for what can be done—and do it.

The great question is, How? I do not want to seem to say I know the answers. We do know the public is demanding better and more medical service through some action—political or otherwise.

What is this adventure in health I see dawning, and toward which you all have been keeping the doctor's vigil through the night? This adventure, which you will have to lead—or it will fail—has many elements:

1. More and better doctors—in more places.

2. An immediate, complete survey to modernize medical education, with greater emphasis on chronic and degenerative diseases, mental hygiene, and preventive medicine.

3. More hospitals more evenly spread through the country.

4. Less specialists, more general practitioners.

5. Reorganize medical practice, stressing group medicine where needed and voluntary health insurance.

6. For those who cannot afford voluntary insurance, some form of insurance, partly financed by the Government, covering people in by law. I would call this "compulsory health insurance," if that term's proper meaning had not been lost.

7. Increased medical research.

8. Greatly expanded physical and mental rehabilitation.

9. Education to make health a national habit.

10. A vigorous, preventive medical program, reaching everyone, children above all.

11. A new Cabinet post for health, education, social security.

12. Creation of a nonpolitical watchdog committee to safeguard progress in medical care for veterans.

13. Increased numbers of well-trained nurses and technicians.

14. Adequate dental care.

15. A stabilizing economy—inflation will make worthless any health program or anything else.

Each of these would take a speech by itself. I can but sketch some of them.

Even the least ambitious schemes for improving the Nation's health require more doctors, all competently trained. Why aren't more doctors being educated? In studying that question, I was struck by how expensive training a doctor has become—in dollars and in time. In its fine report on "Medicine in the Changing Order," the New York Academy of Medicine states:

"There seems no alternative other than Government aid if educational standards are to be raised or even maintained. If medical schools are to continue as centers of research, here also Government aid may be necessary."

If science and medicine ask the Government for aid—which even the conservative deems necessary—they must expect he who pays the fiddler will call the tune. This means the Government will rightly insist upon no discrimination in medical care because of race, color, or creed. It will rightly insist upon opportunity for all to enter the profession and advance on the sole basis of ability and character—without restrictions of race, color, creed, or sex. And, I hope, without fear of, or favor from, the State.

Minimum standards should be set for institutions getting financial aid.

How much more the Government is likely to insist upon will depend upon the more progressive leaders in your profession.

According to the academy's report—I quote—"there has been no fundamental reorganization of American medical education since about 1910." That finding certainly calls for your profession undertaking—now—a most thorough, down-to-earth survey to modernize medical education, making recommendations so boldly inspiring the people will gratefully back them. No one can draw up a better program than doctors.

Chronic illness and preventive medicine deserve greater attention. In all fields—I hope in war as well—there is a new accent on prevention. From answering fire alarms, our thinking is progressing to fireproofing.

Preventive medical care should commence as close to the beginning as society can reach. I favor a major, sickness-prevention drive at the public school level. This should include compulsory examination of all children at regular intervals. Means should be made available for correcting defects disclosed.

How wonderful, if children were taught how to properly eat, sleep, sit, stand, play, and take care of themselves, developing both the knack for getting along together, and self-discipline—physical and mental.

Even when medical care is available, many adults neglect or refuse to use it—often because of social taboos, as in venereal diseases, or psychological dreads, as in cancer and tuberculosis. These attitudes reflect our not having outgrown the awkward age in thinking about disease and health. We do not really have a grownup, national health habit—although we are getting there.

People need to be educated on the virtue of medical care; how to use it; how to prevent disease. The greatest asset of any nation is a healthy, educated citizenry.

And now to what is perhaps the toughest problem—how can better medical care be extended to those who cannot afford it?

Your organizations have been particularly active in pressing voluntary health insurance. You and others have proven group insurance to be a sound, practical way. That is a great achievement. You can be mighty proud of it.

But I would not be frank—nor friendly—if I did not add what you know. It is not good enough.

Rome was not doctored in 1 day. It may be, as some have told me, that the needs of the bulk of our people can be met, given time, through voluntary insurance. What troubles me most are the needs of that sizable segment of society, which does not earn enough to pay for voluntary insurance.

The American Medical Society—its bureau of medical economics—estimated in 1939 that families earning $3,000 or less—two-thirds the population—cannot afford the cost of serious illness. Some of these can afford voluntary insurance, although inflation has reduced their number. But what of the little fellows who cannot?

I have asked that of nearly everyone with whom I have discussed medical care. Nothing has been suggested so far which promises

success, other than some form of insurance covering these people in by law and financed by the Government, at least in part—what some would call compulsory health insurance.

Since doctors, nurses, technicians, and hospitals already are strained, such insurance probably would have to move in stages. That requires careful study. Any program should utilize existing medical facilities to the maximum—it must to get started—and be organized to the local level.

Nationally, the program might well be administered by a body of doctors and nondoctors to keep medical care as free from politics as possible.

As to financing, my own preference runs toward the Government meeting only part of the cost, with part coming from payroll deductions from employers and workers. In time, these deductions will become absorbed in general costs of production. I have the utmost confidence in the efficiency of American industry—both labor and management—and which good health will stimulate. We can absorb these medical costs better than other countries which must also meet these needs.

The detailed problems raised by so-called compulsory health insurance are too numerous to be discussed tonight. I have weighed them most carefully. Many doctors and many lay people have sought to paint this issue as a choice—all black or all white. I have found every aspect of medical care to be gray—the happy color sensible compromise wears. All law imposes compulsion. A form of compulsory health insurance for those who cannot pay for voluntary insurance can be devised, adequately safeguarded, without involving what has been termed "socialized medicine." The needs can be met—as in other fields—without the Government taking over medicine, or socializing it, something I would fiercely oppose.

Law protects society. It is the absence of law which destroys it.

I do not fear Government taking its legitimate part in medicine, any more than I fear it in education or housing. I do oppose socialization here. It leads ultimately to the police state, degradation of the individual, and lessened well-being. There should be just one Federal agency, with Cabinet rank, for all health and human welfare problems. I do not like Government agencies to be like Mahomet's coffin, suspended between heaven and earth.

Some say many people do not know how to pick their doctors. So, with any human activity. The best insurance against poor choice is improving the general quality of all doctors. But good or poor, it must be the patient's choice. No one else's.

May I interject this about inflation? Should health schemes fail, be sure to ask—were they killed by the plan itself—by incompetent administration—or by an inflation which ruined the plan's financing?

In connection with this doctor-Government relationship, it is a pleasure to point to the excellent medical progress in the Veterans' Administration—thanks primarily to Gen. Omar Bradley and Gen. Paul Hawley. They would never have accomplished their good work, had they not refused to allow the politicos to move in on them.

I would like to see the President name a small committee of top-grade citizens—some doctors, some lay people—to act as a vigilant watchdog over the veterans' medical program, so the ground so arduously gained may not be lost when someone replaces General Bradley. He should be supported by the entire Nation—particularly by doctors. His is the kind of courage and vigilance which will assure good administration of any health program.

More doctors must be distributed to more places in the country, which requires, among other things, less stress on training specialists, more on general practitioners. A number of counties do not even have a doctor. This reflects, in part, a lack of facilities in which doctors can work. Happily, some of this will be corrected under the Hill-Burton Act for hospital construction, with Federal and State governments cooperating.

Orderly change is the American way of life. Remember the spirit of your oath of Hippocrates. Use your own good judgment to move along with humanity's legitimate aspirations in its trek toward better living.

I would hate to see any medical care program under guidance of others than those who have the know-how. So would the American people. That is why I urge the doctors to get in and pitch—not stand by on the side lines. You need fear politicians or bureaucrats only to the degree you fail yourselves. You must take the leadership—no—yours is now the leadership. Keep it.

This meeting is an outstanding example of your deep concern to meet the need for action.

I have met people in all fields of human endeavor. I respect no group more—for your unselfish zeal and devotion to the sick, for the jealousy with which you guard your professional virtue—placing beyond the pale the rare violator of your oath.

I envy you the thrill which comes from relieving a patient from pain, and, often, snatching one from death.

I still am sorry that phrenologist didn't let me become a doctor.

Your situation reminds me of something my father said back in 1873, while president of the South Carolina Medical Society:

"Let us not be silent, but offer our facts, and defend them while we may.

"As an Arabian sage has said:

" 'What good comes from Ali's sword, if it be sheathed?

" 'What good from Sadi's tongue, if it be silent?' "

What Mr. Baruch said so succinctly, yet so eloquently, 13 years ago could not be better said today, nor could it be more apropos.

It is indeed most unfortunate that his words have gone unheeded so long by those to whom his remarks were addressed.

I am certain that much of the mail I am receiving from doctors opposing the Forand bill, to provide medical care for the aged who cannot afford it, comes from those sought to be reached by that important message I have just read.

Some of them rest their argument on the fear of socialization of the medical profession. Like Mr. Baruch, I, too, would resist to the end socialization of any of the professions, or, for that matter, any of our private enterprise.

Others argue that Congress should not act hastily but should study the problem some more. Have we not studied the problem long enough? I think we have.

Maybe the Forand bill is not the complete answer. Maybe it does not go far enough by covering everybody. Maybe it does cover some who can afford to buy insurance. Maybe—maybe—maybe.

The first child labor law was not perfect.

The first minimum wage law was not perfect.

The first workmen's compensation law was not perfect.

The first unemployment insurance law was not perfect.

The first social security law was not perfect.

The first aid to education law was not perfect.

In fact, no manmade law is perfect.

But we do start and as experience teaches us we improve our laws and their implementation.

Government makes the most progress and serves its purpose best when it does for the governed that which they cannot do for themselves.

Let us move forward again in the field of humanities. One way is to enact our first law to give medical aid to the aged who cannot otherwise afford it.

I have signed the Forand discharge petition at the desk to bring that bill before the House. I did that not because I believe the Forand bill is the ultimate. I did so because I want the House to debate it, to amend it and to work its will with reference thereto so that we can move forward in this important field for the good and welfare of our country.

A BILL TO PROHIBIT CERTAIN JUDICIAL ACTS AFFECTING INTERNAL AFFAIRS OF LABOR ORGANIZATIONS

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. ROOSEVELT] may extend his remarks at this point in the RECORD and include telegrams.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. ROOSEVELT. Mr. Speaker, I am today introducing, by request of the National Maritime Union and the Flight Engineers International Association, both AFL–CIO affiliates, a bill to prohibit certain judicial acts affecting the internal affairs of labor organizations. Following receipt of these requests, I carefully looked into the matter and reached the conclusion that such legislation reflects the very sound principle that the operation of labor unions should remain in the hands of the membership, by prohibiting Federal courts from appointing receivers, trustees, masters, monitors, or administrators, except to preserve the funds, property, or assets of a labor organization pending the conduct of election of officers or the vote upon the removal of officers.

I was also pleased to note that a measure had already been introduced, also by request, by my distinguished colleague and a ranking member of the House Judiciary Committee, the Honorable THOMAS J. LANE, of Massachusetts. My colleague's bill meets the objective on which I was planning to prepare legislation and therefore I am joining him in his efforts by introducing an identical bill to his measure, H.R. 11845.

Mr. Speaker, if the bill of rights set forth in the Landrum-Griffin Act means what it says then there is no justification for courts to be empowered to supervise or administer, in any form, the rights of the members of any labor association. From that standpoint it is incumbent on

this Congress to act favorably upon this legislation. Therefore, I hope and urge that hearings be held as soon as possible so that the will of this House may be expressed prior to adjournment.

At this point I insert the telegrams received from the presidents of the unions which I have mentioned, setting forth their request for legislation in the area I have just discussed:

NEW YORK, N.Y., *April 22, 1960.*

Hon. JAMES ROOSEVELT,
Member of Congress, House of Representatives, Washington, D.C.:

On behalf of the National Maritime Union, AFL–CIO, urge you sponsor legislation to prevent encroachment by courts upon right of union members to determine democratically internal government of their labor organization. It is a travesty of justice for rank and file self-government to be frustrated by imposition of judicial restraint upon exercise of free expression by union members. Union members are not second-class citizens and should not be treated as such.

JOSEPH CURRAN,
President, National Maritime Union, AFL–CIO.

WASHINGTON, D.C., *April 22, 1960.*

Hon. JAMES ROOSEVELT,
Congressman, 26th District, State of California, House Office Building, Washington, D.C.:

This association representing flight engineers of the Nation's airlines urges you to introduce legislation which will prohibit certain judicial acts affecting the internal affairs of labor organizations. Principally it should amend the Norris-La Guardia Act by prohibiting Federal courts from appointing receivers or other officers to administer or govern the internal affairs of a labor organization, except to preserve assets pursuant to the union-election provisions of the Landrum-Griffin Act. Such legislation then would prevent the Federal courts from assuming the function of running labor unions.

Sincerely,

RONALD A. BROWN,
President, Flight Engineers International Association.

NATIONAL MILK SANITATION BILL

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from Wisconsin [Mr. JOHNSON] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. JOHNSON of Wisconsin. Mr. Speaker, the Health and Safety Subcommittee of the House Interstate and Foreign Commerce Committee is now holding hearings on my national milk sanitation bill, which 19 of my colleagues have joined me in introducing in the House. Four Senators are cosponsoring the measure in the Senate. This proposed legislation has bipartisan support, with 10 Democrats and 10 Republicans introducing the measure in the House, and 3 Democrats and 1 Republican sponsoring the bill in the Senate.

Under the provisions of the legislation, a Federal milk sanitation code which would be at least the equivalent of the U.S. Public Health Service's proven milk ordinance and code would become the quality yardstick for milk shipped from State to State. Fluid milk and fluid milk products meeting the standards of this Federal milk code could not be kept out of interstate trade because of varying local health rules.

Over the years the various States and municipalities have set up and added to their milk sanitation regulations until we now have a regular crazy quilt of rules that hamper the free flow of high-quality milk from State to State. Unfortunately, human nature being what it is, some milksheds are using their health standards as an excuse to maintain a neat little milk monopoly for themselves.

Mr. Speaker, sanitary regulations should be used only to protect the public health, not for the protection of local monopolies. The use of arbitrary and outdated milk rules as trade barriers is obviously a perversion of the intent of the regulations.

This Balkanization of milk markets works to the disadvantage of both consumers and the bulk of milk producers. In some places, such as our Nation's Capital, the health regulations prevent the entry of milk from other areas, giving an absolute monopoly to local producers. Other cities permit milk to be shipped in only after it has been checked by their own inspectors at its point of origin to see that it meets the standards of the receiving area. Since the milk must also conform to the sanitary rules of the shipping area, the resulting duplicate inspections add to the cost of milk.

In the fall of 1958 I was studying the poultry situation in Alabama. The manager of a poultry processing plant had high praise for the Federal poultry inspection law passed during the 1st session of the 85th Congress. He commented that with modern transportation and refrigeration methods, he was now shipping federally inspected poultry from Alabama to California and the Midwest, including Wisconsin and Minnesota. I told him that all the dairy farmers want is the same chance for interstate sale of their milk that the poultry farmer gets.

Mr. Speaker, at this point I would like to include in the RECORD an editorial from the St. Paul (Minn.) Pioneer Press, which raises the question, "If the principle of freedom of commerce in wholesome food applies to meat and poultry, why shouldn't it apply to milk?":

GEORGIA FRYERS

Remember when fried chicken was a luxury? When its fragrant brown succulence was for holiday dinners only? Well, flavor and the aromas linger, but gone forever are the luxury days.

Now the housewife can rub her eyes at the great buys being offered by the food ads in frying chickens.

Loss leader selling? Could be. For bargains in chickens or fresh milk are fine bait for attracting shoppers into a store. But also behind these prices is a mighty drama of the effects of a Federal guaranty of freedom of interstate commerce in wholesome food.

Though the trade calls them Georgia fryers, they come in fact from several Southern States. As with meat and milk, perishability was once thought to bar them from nationwide markets. But, also as with meat and milk, that problem is solved by modern, sanitary, refrigerated transportation.

Eighteen to twenty semitrailer loads of these Georgia fryers roll into the Twin Cities each week from afar. By summertime, the arrivals will be up to about 30 refrigerated vans a week, each loaded with 7,500 or so 2- to 3-pound dressed chickens, all iced.

These birds are products of one of agriculture's great revolutions known as integrated farming. Production, processing, and selling are integrated under one management. One man may feed 5 batches totaling 60,000 a year of these broiler or fryer chickens.

A uniform Federal inspection system guarantees freedom of wholesome dressed poultry to cross State lines into the Nation's markets. It is mighty tough competition for our Midwest chicken raisers.

That's one story back of our housewives' bargains in fryer chickens. Another story is that this same Federal poultry inspection system is putting the foundation of free markets under our Midwest turkey industry. A third story is that our Midwest fryer industry, with advantages of a short haul and economical feed, is competing more and more strongly in our markets. Our housewives are getting good buys and more of our own homegrown chickens, too.

But the traffic of southern fryers into Milwaukee, Chicago, Des Moines, and other Midwest Dairy Belt cities is still immense. And when we try to ship our wholesome milk in refrigerated tank trucks into those markets that so freely send us chickens, we are stopped by Federal, State, or local bans in the name of sanitation. Even Washington is barring our milk, regardless of proved wholesomeness, on those ostensible grounds so as to serve local monopoly.

No industry or region can do well under such discrimination and the Lester Johnson bill in Congress would abolish it. The bill would apply to milk, the same principle of freedom of commerce in wholesome food the United States already applies to dressed meat and poultry.

For more than 50 years the Federal meat inspection system has been providing the equivalent of the Johnson bill for meat. A foundation of access to markets everywhere sustains the meat industry. We are a Nation of meat eaters.

For dressed poultry, the equivalent of the Johnson bill went into effect on a voluntary basis last year and became compulsory for interstate commerce this year. At competitive prices, consumption of fryers and other dressed poultry has risen to break all records.

For many years the branch of Government most concerned with sanitation, the U.S. Public Health Service, has had a uniform sanitary code for milk. But the U.S. Department of Agriculture and Eastern and Southern States and cities won't accept this code. Behind their monopoly walls, high milk prices are enforced. U.S. consumption per person of milk since World War II has slumped.

The Johnson bill would let American consumers drink more milk at competitive prices. It would let the Nation's dairy industry share with meat and poultry the blessings of American freedom of commerce in wholesome food.

Mr. Speaker, during April of 1958 hearings were held on another milk sanitation bill—H.R. 7794—which I had introduced and which had the same basic objectives of my present bill. The 1958 hearings revealed a number of deficiencies in H.R. 7794 and pointed the way for the development of an entirely different approach. I believe this new

approach satisfies the major objections which were raised 2 years ago.

Those objections were, first, that direct Federal inspection would unnecessarily superimpose another layer of control on existing State and local inspection systems; second, that direct Federal inspection would be costly to administer; third, that the "affects interstate commerce" clauses would preempt the rights of States and municipalities to exercise sanitary control over their intrastate milk supplies; and fourth, that Federal control might result in a lowering of the quality of milk sold in those municipalities having high sanitary standards.

My present bill, H.R. 3840, does not propose the establishment of a far-reaching Federal inspection system of all milk sold in the United States. Rather, it seeks to apply the force of Federal law only in those instances where health regulations are deliberately misused to obstruct the interstate marketing of wholesome milk of the highest sanitary quality.

The bill would place in the Surgeon General of the U.S. Public Health Service the responsibility for the establishment of a Federal milk sanitation code setting forth sanitation practices and sanitary standards for milk shipped in interstate commerce. He would cooperate with the States in conducting a system of certification of milk which complies with the standards. Milk certified under this system would then be permitted to move freely in interstate commerce, subject only to laboratory tests upon arrival to assure that the milk still complied with Federal standards.

Mr. Speaker, this measure is designed to avoid the addition of another layer of expensive inspections to the existing system. State and local inspection services would be utilized, and no direct system of Federal inspections is provided for or contemplated. A minimum of Federal expenditure would be required to monitor certifications made by the States and to support certain other services such as training, research, and development of standards.

There are no "affects interstate commerce" clauses in this legislation, and it would not interfere with the normal inspection activities by State and local governments of their own milksheds. In addition, it permits States and municipalities receiving interstate milk shipments to check such milk upon arrival for compliance with bacterial counts, temperature standards and composition standards prescribed in the Federal Milk Sanitation Code.

This concept of Federal legislation to eliminate the misuse of milk sanitation regulations was proposed and developed by a committee of the Association of State and Territorial Health Officers. As the name implies, this association is composed of the chief health officials in each State and territory. In 1957, the association set up a committee to study the matter of Federal milk sanitation legislation and, a year later, issued an official report titled "Need and Recommended Principles for Federal Milk Sanitation Legislation."

This report states:

> The association believes that there is need to strongly reaffirm that the sanitary control of fluid milk and fluid milk products is a public health matter which is primarily the responsibility of State and local governments, except where interstate commerce is involved.

Mr. Speaker, my bill is in full agreement with the principle set forth by the Association of State and Territorial Health Officers. This legislation seeks only to provide unrestricted interstate markets for milk of the highest sanitary quality by eliminating the use of capricious and arbitrary pseudo-health regulations to keep high quality milk out of monopolized local markets.

Some critics of my bill have advanced the theory that it would be detrimental to the quality of milk sold in their markets. These critics reason that the Federal standards to be established under the bill might not be adequate to protect the health of their citizens, and that distant and anonymous agencies would not have the same degree of interest in the welfare of local consumers as would local agencies.

Concerning the first point, the bill provides that the Federal standards shall be at least the equivalent of the high health standards now contained in the milk ordinance and code recommended by the U.S. Public Health Service—which is the watchdog of our public health. At the present time, 36 States and some 1,900 local jurisdictions have voluntarily adopted this model milk code or one based on its provisions. Surely a body of health regulations in such general use cannot be notably deficient in providing for adequate health protection of our citizens.

As to the second point, it is difficult for me to believe that in this day of scientific advancement and free interchange of technical information among professional people that there can be any one area where there are milk sanitation people who possess knowledge not available to health authorities in all parts of the United States. Nor can I believe that health authorities and milk producers in one area of the country are any less interested in providing consumers with a pure and wholesome product than are those in another.

Mr. Speaker, the bill provides authority for the Surgeon General to make such spot checks as he deems necessary to validate State certifications that interstate milk supplies have achieved a minimum compliance of at least 90 percent with the national standard. This provision, together with the requirement that milk and milk products upon receipt in a jurisdiction meet bacteriological, temperature and composition standards, certainly provides adequate guarantees that the welfare of the consumer will be safeguarded, no matter where that consumer is located.

Further evidence of the absurdity of a claim that certain cities enjoy a vastly superior supply of milk than would result from compliance with the Federal Code can be found in the list of interstate milk shippers and their ratings, which is published by the Public Health Service. Take, for example, the local Washington, D.C., milk supply, which we were told repeatedly and emphatically last year was "the best milk supply in the world." It has a U.S. Public Health Service rating of 91.2 percent. This is a good rating and would comply with the requirements of my bill. However, the District of Columbia rating is still slightly below the overall average rating of 92.66 percent for the 691 shippers from 35 States which the April 1, 1960, USPHS list contains.

Many States and municipalities have adopted the position that they will not permit milk to be brought into their jurisdictions unless it has been checked by their own inspectors. In many cases, this position constitutes a serious trade barrier because some of these jurisdictions cannot, or will not, inspect sources in other States.

In other instances, exorbitant fees are charged for such inspections, and these fees add to the cost of milk. When such inspections are made, they constitute an unnecessary and expensive duplication of the inspection services already being provided by agencies of the State in which the milk is produced.

Mr. Speaker, I would like to point out that this insistence on the part of some States and municipalities on having their own personnel duplicate the inspection services of other health agencies is one of the present evils toward which this bill is specifically directed. Such a requirement may have been necessary and practical 25 or more years ago, when milk was produced, processed, and sold almost exclusively on an intrastate basis, and sanitary control of fluid milk was not in effect in all areas of the United States. However, it is a serious deterrent to the dairy industry as it exists today and ignores the changes in technology which permit milk to be shipped long distances without loss of wholesomeness or quality.

As our population has grown, we have seen a complete overlapping and interlocking of milksheds. In many cases, an individual producer's milk may be shipped to different municipalities and even several different States in the course of a year, depending entirely on the marketing practices of the plant or receiving station to which he delivers his milk.

In such cases, the insistence of State or local jurisdictions on inspection at the source by their own inspectors can only result in unnecessary and confusing duplication of inspection services. One of the dairies in my home district sends milk to 10 different markets—and has 10 different inspectors trooping through the place every year. Such multiple inspections cannot provide any more public health protection than would result from inspection by one well-trained individual. Duplicate inspections are costly to the dairy farmer, to the health agencies which engage in such practices, and, inevitably, to the consumer.

Mr. Speaker, H.R. 3840 would provide for a system of administration which is in close accord with two highly effective

and highly respected programs of the U.S. Public Health Service that are now being carried out on a voluntary basis. Since 1923, this agency has provided States with milk sanitation standards for voluntary adoption in the form of the model milk ordinance and code. As I stated previously, this milk ordinance and code is now in effect in some 36 States and 1,900 local jurisdictions. Its sanitary regulations would be the basis for the development of the Federal code for interstate milk under the provisions of my bill.

Section II of the Public Health Service's milk ordinance and code is very significant in that it authorizes receipt of milk into a jurisdiction without local inspection if the supply has been awarded a rating of 90 percent or more by the milk sanitation authority of the State of origin. This provision has been implemented by the conduct of a voluntary cooperative program whereby supplies meeting this criteria are certified by the States and the information is transmitted to the receiving jurisdictions by the Public Health Service.

This voluntary program has no doubt facilitated the movement of high-quality milk in interstate commerce and has eliminated some trade barriers. However, the program, being voluntary, has had no effect on the deliberate use of health and sanitation regulations as trade barriers.

Mr. Speaker, I would like to reemphasize that H.R. 3840 would apply the force of Federal law only in those instances where health regulations are deliberately misused so as to obstruct the interstate marketing of wholesome milk of the highest sanitary quality. It would not affect in any way those jurisdictions which are already accepting milk from other States on the basis of their compliance with adequate sanitary regulations. Therefore, the bill would alter the policies of only those States and municipalities which seek to foster local monopolies at the expense of their consumers by improper exercise of the public health function.

In conclusion, I would like to recommend two minor amendments to H.R. 3840. The first has been recommended by the commissioner of the Department of Public Health of Tennessee. He pointed out that the definition of "State milk sanitation agency" in section 802(5) is likely to be difficult to interpret in Tennessee unless further clarified.

There are at least 12 States in which the division of responsibility between health and agriculture is so complex that an administrative decision would be required to designate the milk sanitation agency should any controversy between the affected agencies arise. For this reason, I believe that section 802(5) should be amended by including at the end of this definition the words "or shall mean such agency as may be designated by the Governor of the State."

The second amendment has been recommended by the International Association of Ice Cream Manufacturers and would specifically exclude ice cream mix, ice cream, and related products from the provisions of this bill. Section 802 in H.R. 3840 does not specifically include these products, and it was not my intention to include them in the proposed act. However, section 813, which excludes most of the other manufactured dairy products, does not specifically mention ice cream mix, ice cream, sherbets, ices, and so forth.

Therefore, I recommend the amendment of section 813(a) by the insertion after the words "evaporated milk" the following words, "frozen desserts or frozen dessert mixes as those products are defined in the edition of the USPHS Frozen Desserts Code which is current on the date of the enactment of this title."

Mr. Speaker, two of the witnesses who testified at the milk sanitation hearings yesterday were Dr. David E. Price, Assistant Surgeon General, Chief of the Bureau of State Services, Public Health Service, U.S. Department of Health, Education, and Welfare; and Dr. Russell E. Teague, Commissioner of Health of Kentucky, who represented the Association of State and Territorial Health Officers. I include their testimony at this point in the RECORD:

STATEMENT OF DR. RUSSELL E. TEAGUE, COMMISSIONER OF HEALTH OF KENTUCKY AND REPRESENTATIVE OF THE ASSOCIATION OF STATE AND TERRITORIAL HEALTH OFFICERS

Mr. Chairman and members of the committee, I am Dr. Russell E. Teague, commissioner of health of Kentucky, and I am appearing before you as the representative of the Association of State and Territorial Health Officers whose membership includes the commissioners of health of the 50 States, and in my capacity as chairman of the environmental sanitation committee of that association, concerning support of the Federal milk legislation incorporated in H.R. 3840—National Milk Sanitation Act sponsored by the Honorable LESTER R. JOHNSON, of Wisconsin.

It is significant to note that the State and territorial health officers, in full awareness of their responsibilities and in the interest of facilitating the flow of high quality milk in interstate commerce and of preventing the use of milk sanitation requirements as trade barriers, appointed a subcommittee to make a thorough study of the need for Federal legislation regarding interstate milk shipments, and of the provisions of several bills which had been introduced in the Congress pertaining to this matter.

In this study, the association gave consideration to the practice of some States and municipalities to use health regulations as economic barriers to the free movement of fluid milk both in intrastate and interstate commerce. The association recognized that States and their political subdivisions have the right to exclude milk of questionable quality, but unanimously agreed that health regulations should not be used to restrict either the intrastate or interstate movement of milk of high sanitary quality. In this connection it was felt that the sanitary control of market milk and milk products cannot be divorced entirely from the economics of milk production, processing, and marketing, and that health agencies at all levels of government have a responsibility to avoid taking actions which cannot be sustained on public health grounds, and which have an adverse economic effect on the dairy industry.

The changes which have taken place in the dairy industry in the past 25 years, and which have resulted in greatly increased volumes of milk being offered for sale in interstate commerce, were reviewed in order to determine whether or not the present system of State and local supervision could be utilized for the control of interstate milk shipments without creating an undue burden on interstate commerce. It was the consensus of opinion that the problems of the industry can no longer be considered solely on a local milkshed basis, that the increased interstate movement of milk has complicated its control by State and local agencies, and that uniform sanitary standards and practices are necessary to insure the quality of milk shipped interstate and to eliminate the unjustified use of health regulations as trade barriers. While the voluntary cooperative State-PHS program for the certification of interstate milk shippers, which was actually established at the request of our association, has greatly facilitated interstate milk shipments, it has not been able to break down deliberate barriers toward which most of the past Federal legislative proposals have been directed. For these reasons, it was agreed by the Association of State and Territorial Health Officers that some form of Federal legislation was needed.

The association considered specific forms of Federal legislation that might be appropriate. While it favored the objectives of H.R. 7794, and certain aspects of that bill and similar bills, it was opposed to those sections of the previous bills which would provide for centralized Federal control, supervision, and the extension of such control to all milk supplies "affecting interstate commerce." It was felt that direct Federal supervision would unnecessarily superimpose another layer of control on existing State and local systems that might be utilized, and that the "affects interstate commerce" provisions would result in the Federal Government preempting the right of State and local governments to control their intrastate supplies.

Consideration was also given to a Federal legislative approach which would simply place a legislative base under the present voluntary State-PHS milk certification program. It was recognized, however, that such an approach would not solve in its entirety the trade barrier problem, and thus would not be acceptable to the proponents of the proposed Federal legislation. However, in view of the fact that the voluntary certification program, which utilizes State and local inspection services, has proven effective and practical in operation, the association believed that the essential elements of this program should be incorporated into any Federal milk sanitation legislation enacted by the Congress to control interstate milk supplies. It was the consensus that if these elements were coupled with a provision prohibiting a State or municipality from excluding milk from out of State sources which complied with basic public health criteria for certification, that such an approach would provide an effective and practical means of assuring high quality products for consumers in milk-importing areas and for eliminating the use of health regulations as trade barriers without abridging the rights of State and local agencies to control the sanitary quality of their intrastate supplies. In fact, the association believes that this approach would strengthen the programs of State milk sanitation agencies. Therefore, the following recommendation was passed on October 24, 1958, at the annual association meeting in Washington, D.C.:

"RECOMMENDATION

"That the Association of State and Territorial Health Officers recommend to the Congress the adoption of Federal legislation pertaining to interstate milk shipments, incorporating the following principles:

"A. Declare as public policy that the sanitary control of fluid milk and fluid milk products is necessary to protect the public health, and that the exercise of such sanitary control is primarily the responsibility

of State and local health departments, except that no State or local government has the right to obstruct the free movement in interstate commerce of fluid milk products of high sanitary quality by the use of unnecessary sanitary requirements or other health regulations.

"B. Establish uniform sanitation standards and practices consistent with those contained in the unabridged form (pts. III and IV) of the milk ordinance and code 1953 recommendations of the Public Health Service, for fluid milk and fluid milk products shipped in interstate commerce.

"C. Authorize the Surgeon General of the Public Health Service to conduct, in cooperation with State milk sanitation authorities, a program for certification of interstate milk shippers, in which certification would be based on compliance ratings made by State milk sanitation rating officials in accordance with a rating method, criteria, and procedures to be promulgated by the Surgeon General of the Public Health Service.

"D. Authorize the Surgeon General to certify only those interstate sources of fluid milk and fluid milk products which are awarded a compliance rating of 90 percent or more by the State milk sanitation authority.

"E. Authorize the Surgeon General (1) to make ratings, inspections, laboratory examinations, studies, and investigations as he may deem necessary to satisfy himself as to the validity of the sanitation compliance ratings submitted by the State milk sanitation authorities for certification; (2) to provide for revocation or suspension of certifications for cause; and (3) to disseminate information on certified sources.

"F. Prohibit the use of State and local milk regulations as trade barriers to the interstate shipment of fluid milk and fluid milk products of high sanitary quality by providing that no State, municipal, or county authority or official may exclude, on public health grounds, or because of varying sanitation requirements, any fluid milk and fluid milk products shipped in interstate commerce from sources certified by the Surgeon General as having a sanitation compliance rating of 90 percent or more, if, upon receipt, such fluid milk and fluid milk products comply with the bacterial standards, temperature requirements, composition standards, and other criteria specified in the prescribed sanitation standards and practices.

"G. Authorize the Surgeon General to amend the prescribed sanitation standards and practices if, after consultation with State and territorial health authorities, other State milk control agencies and the dairy industry, he finds amendments are necessary to either protect the public health or to eliminate obsolescent sanitation standards and practices.

"H. Authorize the Surgeon General (1) to conduct research and investigations, and to support and aid in the conduct by State agencies, other public or private organizations and institutions of research and investigations, concerned with the sanitary quality of fluid milk and fluid milk products; and (2) to make the results of such research studies and investigations available to State and local agencies, public or private organizations and institutions, and the milk industry.

"I. Authorize the Surgeon General to (1) train State and local personnel in milk sanitation methods and procedures; (2) provide technical assistance to State and local milk sanitation authorities on specific problems; (3) conduct field studies and demonstrations; and (4) cooperate with State and local authorities, public and private institutions, and industry in the development of improved programs for control of the sanitary quality of milk.

"J. Exclude from provisions of the legislation, manufactured dairy products such as butter, condensed milk and evaporated milk unless used in the preparation of fluid milk or fluid milk products, sterilized milk or milk products not requiring refrigeration, all types of cheese other than cottage cheese, and nonfat dry milk, dry whole milk and part fat dry milk unless used in the preparation of fluid milk or fluid milk products.

"K. Authorize necessary appropriations for the Surgeon General to carry out his responsibilities under the legislation."

Since this association believes that the protection of the public health through the regulation of the sanitary quality of fluid milk is the prerogative of public health agencies and in further support of this bill, I should like to submit a resolution adopted at their 1959 annual meeting by the Association of State and Territorial Health Officers entitled "Statutory Responsibility for the Sanitary Control of Market Milk" which reads as follows:

"Whereas public health agencies, through their unremitting efforts over a period of 75 years, have been responsible for the control of milk borne disease and for the great improvement in the sanitary quality of market milk served the American people; and

"Whereas certain agencies and persons whose primary responsibility is to foster agricultural interests are waging a continuing campaign, in some cases successfully, to remove the sanitary control of milk from public health agencies, both State and local; and

"Whereas the end result of such action would be to place an important public health responsibility in the hands of agencies not fitted by interests or philosophy to protect the consumer of milk, while at the same time depriving public health authorities of one of their most important means of preventing transmission of disease; and

"Whereas as pointed out in Resolution No. 10, adopted by this association on November 8, 1957, the transfer of responsibility for sanitary control of milk from health to agricultural agencies would be inimical to the public interest: Therefore be it

"Resolved by the Association of State and Territorial Health Officers, in conference assembled at Washington, D.C., on October 14, 1959, That the association reaffirm its position that statutory provisions for the fundamental State authority for the sanitary control of milk production, processing, and distribution should be vested in the State health agencies; and that the necessary delegations of duties for implementing inspections and other control measures should be made to local health departments in manners best suited to obtain uniformity, efficiency, and protection in the interests of the whole community of our Nation; and be it further

"Resolved, That action be taken by the members of the Association of State and Territorial Health Officers to forcefully oppose the transfer of the sanitary control of milk from public health to agricultural agencies by presenting the facts outlined herein, and in Resolution No. 10 adopted in 1957, to the public, the Governors and legislative bodies of their respective States; and be it further

"Resolved, That in those States where responsibility for the sanitary control of milk now reposes in agencies other than health, that positive action be taken to initiate legislation which would give the State health agencies statutory responsibility for the sanitary control of milk production, processing and distribution."

It is the feeling of our association that H.R. 3840 will go far toward the elimination of sanitary regulations as economical trade barriers and will, at the same time, protect and maintain the rights and prerogatives of State and local health authorities in respect to milk originating within their respective jurisdictions.

Inasmuch as H.R. 3840 embodies and conforms to the recommended principles adopted by the Association of State and Territorial Health Officers, this association wishes to fully support and endorse H.R. 3840 as introduced by the Honorable LESTER R. JOHNSON of Wisconsin and urges the favorable endorsement of your committee on this bill.

As a representative of the Association of State and Territorial Health Officers, I wish to express to you, the Committee on Interstate and Foreign Commerce, Subcommittee on Health and Safety, the thanks of the entire membership of the association for the time you have allotted to our organization to be heard on this very vital matter concerning the health and welfare of the people of our Nation.

Thank you very much, Mr. Chairman.

STATEMENT OF DR. DAVID E. PRICE, ASSISTANT SURGEON GENERAL, CHIEF, BUREAU OF STATE SERVICES, PUBLIC HEALTH SERVICE, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, ON H.R. 3840, NATIONAL MILK SANITATION ACT, BEFORE THE SUBCOMMITTEE ON HEALTH AND SAFETY, HOUSE COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE, APRIL 26, 1960

Mr. Chairman and members of the committee, we appreciate this opportunity to testify concerning the views of the Department of Health, Education, and Welfare on H.R. 3840 and identical bills. I have with me today Mr. John D. Faulkner, Chief of the Milk and Food Program, Division of Engineering Services, Bureau of State Services, Public Health Service and Mr. Theodore Ellenbogen, legislative attorney, Office of the General Counsel, Department of Health, Education, and Welfare, both of whom testified before this subcommittee 2 years ago on H.R. 7794—which also dealt with interstate milk shipments.

I should like to present a statement and then, with the assistance of these gentlemen, answer any questions which the committee may care to ask.

H.R. 3840 would amend the Public Health Service Act in such way as to require the Surgeon General to promulgate a Federal Milk Sanitation Code and to administer a program for certification of interstate milk plants, whose milk and milk products, subject to certain conditions, could not be excluded from a receiving State or locality on health grounds if they complied with the provisions of the Federal Milk Sanitation Code.

The Department of Health, Education, and Welfare favors the enactment of H.R. 3840 with minor technical amendments. The reasons are contained in Secretary Flemming's report on the bill. I request, Mr. Chairman, that this report be incorporated in its entirety in the record, and I will limit my presentation to a discussion of Public Health Service interests and activities in the field of milk sanitation which appear pertinent to the bill and to further amplification of points made in the Secretary's report.

It is paradoxical that milk is both important to the maintenance of our health and at the same time has a great potential to serve as a carrier of disease. The very nature of milk production and its subsequent handling enhances the danger to the consumer unless the product is properly safeguarded at every stage. The list of diseases which have been transmitted to man through the consumption of milk is long. It includes typhoid and paratyphoid fever, bovine tuberculosis, brucellosis, diphtheria, septic sore throat, diarrhea and enteritis, Q fever, and food poisoning. Information on the extent of milkborne disease in the United States during the first quarter of the century is limited; however, in the literature for this period, there are records of 891 disease outbreaks.

A total of 42,327 cases, and 410 deaths were involved. Since 1926, the Public Health Service has received reports of 1,026 out-

breaks of milkborne disease involving 40,973 cases and 655 deaths.

The incidence of milkborne disease in the United States has been sharply reduced in recent years, but occasional outbreaks still occur, such as the 1955 paratyphoid fever outbreak in Lancaster, Pa., which serve to remind us that it is a measure of control through constant vigilance rather than elimination of disease which has been achieved.

The activities of the Public Health Service in milk sanitation began at the turn of the century with studies on the role of milk in the spread of disease. This work led to the conclusion that effective public health control of milkborne disease requires the application of sanitation measures throughout production, handling, pasteurization, and distribution of milk. These early studies were followed by research to identify and evaluate sanitary measures which might be used to control disease, including studies which led to improvement of the pasteurization process.

To assist States and municipalities initiate effective programs for prevention of milkborne disease, the Service undertook the development of a standard milk ordinance for the sanitary control of milk which would include only those provisions necessary for protection of the public health. This resulted in 1924 in a model regulation, now known as the milk ordinance and code recommended by the Public Health Service. With the aid of a national advisory committee, it has been revised 12 times since 1924 in order to incorporate new knowledge into public health practice.

The great variation once prevalent among milk regulations has been markedly reduced. The milk ordinance and code is now used as the basis for the milk sanitation regulations of 36 States. It has been voluntarily adopted by 1,426 municipalities and 496 counties. It is the basic standard used in the voluntary Cooperative State-PHS Program for the Certification of Interstate Milk Shippers which I shall describe shortly. It is also incorporated by reference in Federal specifications for procurement of milk and milk products, is used as the sanitary regulation for milk and milk products served on interstate carriers, and is recognized by public health agencies, the milk industry, and many others as a national standard for milk sanitation. We believe that the authors of H.R. 3840 were wise to propose its grade A standards as the basis for the development of the Federal Milk Sanitation Code which the bill would authorize.

Following the development of the milk ordinance and code, the Service expanded its milk sanitation activities in order to provide assistance to the many States and municipalities who were desirous of inaugurating programs for the control of milkborne disease. Today, our milk sanitation activities include: (1) Conduct of research and investigations; (2) education and training of State, local, and industry personnel; (3) provision of technical and advisory assistance to States, municipalities, and industry on milk sanitation problems; (4) development of recommended standards and technical procedures; (5) enforcement of the interstate quarantine regulations with respect to the sanitary quality of milk and frozen desserts served on interstate conveyances; and (6) participation with the States in a voluntary program for certification of interstate milk shippers. I would like to discuss the way this latter activity was initiated, since H.R. 3840 would require full utilization of State and local supervision and inspection, and State certification, in a manner quite similar to that now used in the voluntary certification program.

The development of local milksheds for each community in the United States resulted from the fact that milk, which is such an important dietary item, is a highly perishable product, and that, until comparatively recent years, there was not sufficient refrigerated transport in use to move large volumes of milk long distances in relatively short periods of time. Because of the ever-present possibility of contamination of milk with disease organisms, and because, in the early years, the sanitary control of milk was not extensive, practically all States and municipalities included in their milk sanitation regulations, a requirement that no milk could be sold within their jurisdiction unless inspected at the source by their own personnel. Under the conditions then existing, this requirement was probably justified.

These conditions, however, have changed during the past 25 years. The expansion of population and growth of our metropolitan centers, with an attendant reduction of land available for dairy farming, has compelled communities to look to more distant sources for more and more of their fluid milk and cream supplies. In some areas of the United States this need has been limited to periods of seasonal shortage, but an increasing number of areas have found it necessary to import some milk throughout most of the year. This period of population growth has also been a period of great technological change. Developments in sanitation, farm refrigeration, processing techniques, and refrigerated transport now make possible the movement of quality milk and milk products safely to any point in the Nation.

As more and more communities found it necessary to supplement their milk supplies from outside sources, many health authorities took the position that it was unnecessary, and, in fact, wasteful of tax dollars, to send their personnel to make inspections of distant sources that were already under adequate supervision and inspection of another health agency. The problem this group faced was how to obtain reliable information as to the sanitary quality of the supply, and they urged the Public Health Service to set up a system to supply such information. Such a system was established in 1950, following a National Conference on Interstate Milk Shipments which was called by the Surgeon General.

Under this program, inspection and laboratory control of interstate milk supplies are performed by the States and municipalities in which the source of milk is located, using the Public Health Service Milk Ordinance and Code, and the rating method developed by the Service, as uniform criteria for evaluation. The States report to the Service those shippers whose products and plants have been rated by them in accordance with the applicable sanitary requirements, and the Service publishes quartely, a list of the sanitation ratings of such certified shippers for the information of areas desiring to import milk. However, no shipper's rating is published without his permission. In order to validate the sanitation compliance ratings submitted by the States, the Service periodically spot checks such ratings and evaluates the work of each participating State, including its laboratory program. The basic features of this voluntary system are the same as those which the authors have incorporated into H.R. 3840, and identical bills.

This voluntary program has grown considerably during the last 8 years. In 1951, the first year of the program, 160 shippers located in 17 States were certified. The January 1, 1960 list of certified shippers includes the names and ratings of 700 interstate plants located in 35 States and the District of Columbia. These shippers obtain their supplies from an estimated 100,000-125,000 Grade A dairy farms. In our opinion, it has been helpful in facilitating the interstate movement of milk supplies of high sanitary quality into States and cities whose regulatory officials are willing to accept such milk on the basis of the ratings made by the milk sanitation rating agency of the State in which the outside supply is located. However, being voluntary in nature, it has not and cannot eliminate the deliberate or unreasonable use of health regulations as trade barriers.

There is considerable evidence to indicate that milk sanitation regulations of States and municipalities are frequently used to obstruct the movement of milk of high sanitary quality in interstate commerce.

Such obstruction may result from legal limitations contained in the laws and regulations of a given jurisdiction; from practical difficulties in the inspection of farms or plants located in distant areas, when a community insists on making its own inspections as a prerequisite for acceptance of out-of-State milk; or may be a matter of administrative policy which has been established for economic purposes.

The U.S. Department of Agriculture, several years ago, conducted a study of the impact of sanitary requirements, Federal orders, State milk control laws, and truck laws on price, supply, and consumption, the results of which were published in Marketing Research Report No. 98. This study included a survey of the policies affecting the acceptance of milk in all communities over 25,000 population having full-time health units. The report states (p. 20) under "Examples of Restrictive Sanitary Regulations":

"By far the most common policy standing in the way of free movement of milk was the refusal of given jurisdictions to accept milk produced or handled under the supervision of other jurisdictions having substantially equivalent sanitary standards."

In the "Summary and Conclusions" section of the same report, the statement is made:

"Some markets prohibit outright the entry of milk from beyond specific limits. Others burden such entry by insisting on their own inspection and then delay or refuse to inspect, or levy discriminatory fees. Still other markets differentiate their regulations from those of surrounding areas without apparent necessity."

Our experience indicates that there are milk sanitation requirements and practices, of little or no public health significance, which impede or obstruct the movement of high quality milk in interstate commerce, or which limit the acceptance of such milk to periods of seasonal shortage. These are: (1) The charging of high inspection fees which distant shippers feel they do not wish to pay considering the volume of milk likely to be sold; (2) inclusion of certain detailed specifications in regulations which have little or no effect on the sanitary quality of milk, such as specific dimensions for cow barn gutters, and which are not required by the producing State; (3), refusal to accept milk from an out-of-State source, or even an intrastate source, because the producing jurisdiction does not have an identical bacterial standard in its regulations, regardless of whether or not the milk itself meets the bacterial count standards of the receiving jurisdiction; (4) refusal, or unwillingness, to inspect dairy farms or milk plants located beyond an arbitrarily fixed distance; and (5) more stringent application of sanitary standards to out-of-State sources than are enforced within their own jurisdiction.

The Association of State and Territorial Health Officers has given consideration to the use by some States and municipalities of health regulations as economic trade barriers to the free movement of fluid milk both in intrastate and interstate commerce. In an official report entitled "Need and Recommended Principles for Federal Milk Sanitation Legislation," it is stated:

"The association recognizes that States and their political subdivisions have the

right to exclude milk of questionable quality, but unanimously agrees that health regulations should not be used to restrict either the intrastate or interstate movement of milk of high sanitary quality. In this connection it is felt that the sanitary control of market milk and milk products cannot be divorced from the economics of milk production, processing and marketing, and that health agencies at all levels of government have a responsibility to avoid taking actions which cannot be sustained on public health grounds and which have an adverse economic effect on the dairy industry."

On this point, we would like to state that the Public Health Service has long held the view that milk sanitation regulations were for the express purpose of protecting the public health, and should not be used as a means of regulating the economic aspects of milk marketing. I would like to emphasize that our objections to the misuse of health and milk sanitation regulations as trade barriers do not stem from any opinion we may hold concerning the economic regulation of milk marketing. Our concern in this matter is that we believe public health regulations should be kept separate from economic regulations so that they will not be subject to economic pressures.

The policy of some local jurisdictions to insist that their own personnel make inspections of out-of-State milk supplies as a prerequisite for acceptance, even though such supplies may be under the full-time supervision of another health agency, leads to costly duplication of inspection services. Often a single supply may be inspected by authorities from six to ten different States or municipalities in a year's time. It is our view that, where an out-of-State source is under the routine supervision of a responsible milk sanitation agency, and means are available for obtaining reliable information on the sanitary status of the supply, duplication of inspection is wholly unnecessary as well as an expensive and wasteful practice to both the shipping and receiving jurisdiction.

Many of the advocates of direct inspection of out-of-State sources have taken the position that this is the only way that they can be assured that such supplies conform with their own requirements, and are safe for consumption within their own jurisdictions. On the other hand, there is wide agreement today among health authorities as to the basic requirements necessary to protect milk supplies, and the voluntary program for the certification of interstate milk supplies has demonstrated that States and municipalities can obtain reliable information on the sanitary status of out-of-State supplies without sending inspectors to distant sources. In our opinion, those agencies, which unnecessarily spend part of their health appropriation to duplicate the inspection services of other health agencies, would be better advised to spend such funds to strengthen local milk sanitation services, or for other more pressing health needs.

Commenting specifically on H.R. 3840, I would like to point out that this bill is quite different in approach and application from H.R. 7794 (85th Cong.) on which we reported unfavorably in 1958. Our position on that bill was based primarily on the view that the problem of trade barriers arising from the misuse of milk sanitation regulations was not of such dimensions as to justify so drastic a remedy as the expensive, far-reaching, pervasive, and overriding system of Federal regulation of all milk and fluid milk products in, or affecting interstate commerce, such as H.R. 7794 would have prescribed. We were particularly concerned with the "affects interstate commerce" clause of H.R. 7794, which appeared to us to call for a costly system of Federal inspection that would be superimposed unnecessarily on State and local inspection services to such an extent that even intrastate supplies of most major milk markets would have been involved. Thus, we were of the opinion that H.R. 7794, if it became law, would weaken State and local milk sanitation programs considerably.

Following the hearings on H.R. 7794, the chairman of the Subcommittee on Health and Science, Committee on Interstate and Foreign Commerce, requested the Department to submit recommendations for changes which should be made in the event the committee should desire to give favorable consideration to the enactment of Federal milk sanitation legislation. In replying to this request, Assistant Secretary Richardson, in submitting a supplement report on H.R. 7794, stated:

"We believe that, if there is to be Federal regulatory legislation on this subject, its objective—i.e., to prevent the use of State or local milk sanitation requirements as trade barriers to the free interstate marketing of milk and fluid milk products—could, and should, be fully achieved by a law far less drastic and costly to the Federal Government, one so designed as to avoid direct Federal regulation of, and Federal penalties on, persons engaged in milk production, processing, distribution, etc., and to keep Federal interference with the traditional authority and responsibility of States and localities for milk sanitation to the necessary minimum.

"This is also the conclusion of the Association of State and Territorial Health Officers, which had established a committee to consult with the Surgeon General on the advisability of Federal legislation in this field.

"The above-suggested approach would require preparation of a completely new bill."

Our review of H.R. 3840 indicates that its provisions are in accord with the specifications set forth in Assistant Secretary Richardson's supplemental report of December 17, 1958, as well as with the principles specified in the official statement and recommendations of the Association of State and Territorial Health Officers entitled "Need and Recommended Principles for Federal Milk Sanitation Legislation."

We would favor the enactment of H.R. 3840, with the minor amendments set forth in Secretary Flemming's report on the bill, for the following reasons:

1. H.R. 3840 would provide an effective means of eliminating barriers to the interstate shipment of fluid milk and fluid milk products resulting from unduly restrictive sanitation regulations and differing inspection requirements without displacement of existing local systems. It would apply the force of Federal law only where health regulations or enforcement practices unnecessarily obstruct the interstate marketing of wholesome milk of high sanitary quality. At the same time, it would preserve to all jurisdictions the right to reject milk which had been certified under the provisions of the bill if such milk failed to conform to the bacterial, temperature, composition standards, and other criteria of the Federal Milk Sanitation Code which would be promulgated under the act. It would not affect those jurisdictions which already accept milk from other States.

2. H.R. 3840 would utilize, subject to Public Health Service checks, the existing structure of State and local milk sanitation services for supervision, inspection, laboratory control, rating, and certification of interstate milk supplies, in a manner quite similar to that now used in the voluntary program for the certification of interstate milk shippers. It would utilize, as a basis of the Federal Milk Sanitation Code, the grade A sanitation standards of the milk ordinance and code recommended by the Public Health Service, current on the date of enactment of the bill. The recommended milk ordinance and code, as mentioned earlier, presently serves as the basis for the regulations of 36 States and over 1,900 local jurisdictions. This should remove the reservations that some health authorities, as well as industry people, may have concerning both the adequacy and practicality of a new Federal Milk Sanitation Code. Also, since the bill does not contain an "affects interstate commerce" clause, it does not deprive States and local communities of the right to exercise full sanitary control over their intrastate supplies.

3. We believe H.R. 3840 has other important public health implications. It would assure fluid milk and milk products of high sanitary quality to jurisdictions receiving milk and milk products under its provisions. In many cases, it would undoubtedly lead to an improvement in the sanitary quality of milk supplies by eliminating the need for utilizing supplies of inferior or questionable quality during periods of shortage. We also believe it inevitable that the immunities conferred by the bill, together with the prestige attached to compliance, to a degree of at least 90 percent, with the Federal standard, would inspire both industry and official milk sanitation agencies to seek necessary improvements in their local supplies. Consequently, we are certain that the bill would result in added health protection for consumers of milk in many areas.

4. H.R. 3840 would discourage State and local jurisdictions from sending their own personnel to make inspections of out-of-State milk sources and thus, to a large degree, would eliminate duplication of inspection.

5. The provisions of H.R. 3840 could be carried out by the Surgeon General of the Public Health Service at a relatively modest expenditure by the Federal Government. It is estimated that, if the bill should become law, the Public Health Service could carry out its responsibilities under the act at an estimated cost of $630,000 for the first year of operation, $834,000 for the second year, $905,000 for the third year, $976,000 for the fourth year, and $1,046,000 for the fifth year, at which point, costs should level off. These cost estimates are in addition to approximately $365,000 being spent in fiscal year 1961 for milk sanitation activities. However, while these estimates indicate that the statutory appropriation ceiling of $1,500,000 per year contained in the bill would be adequate for some years, we urge that the dollar ceiling be eliminated from the bill, especially since our estimates are not a long-range forecast. As said in the Department's report on the bill, to "put a dollar ceiling in a health-regulatory measure, especially one which makes receiving States and localities depend on the ability of the Public Health Service to carry out its responsibilities under the bill in all eventualities, would be seriously objectionable. The budgetary process is fully adequate to assure congressional verification of actual requirements for the program."

I wish to thank the committee for its courtesy to me and to the Department in the presentation of his statement.

ROBERT CALDWELL, EDITOR OF BAYONNE TIMES, RECEIVES AD HUMANOS AWARD

Mr. WOLF. Mr. Speaker, I ask unanimous consent that the gentleman from New Jersey [Mr. GALLAGHER] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. GALLAGHER. Mr. Speaker, it is with a great deal of pleasure that I call to the attention of my colleagues a recent

award which was bestowed upon a most deserving gentleman—Robert Caldwell, editor of the Bayonne Times, a newspaper published in my district. Mr. Caldwell received the first Ad Humanos Award of Mount Carmel Institute of Adult Education. This award is given to an outstanding person in recognition of distinguished and noteworthy service in promoting the cause of the humanities and fostering in an exemplary manner the true spirit of good citizenship. Mr. Caldwell is most deserving of this award. He is a dedicated humanitarian whose diligent, faithful, and outstanding contributions are exemplified by his tireless efforts on behalf of Bayonne.

I wish to commend the institute for selecting such a worthy citizen as the recipient of this award. I want to congratulate and wish every continued success to Mr. Caldwell.

I would like to include as part of my remarks the following article from the Bayonne Times of April 7, 1960, in which their editor is honored:

INSTITUTE HONORS EDITOR OF TIMES, NAMES HIM FOR AD HUMANOS AWARD

Robert N. Caldwell, managing editor of the Bayonne Times had been named to receive the first Ad Humanos Award of Mount Carmel Institute of Adult Education, Rt. Rev. Msgr. Anthony A. Tralka, president, announced today. The award is "given to an outstanding person in recognition of distinguished and noteworthy service in promoting the cause of the humanities and fostering in an exemplary manner the true spirit of good citizenship."

Stanley P. Kosakowski, spokesman for the awards committee, lauded Caldwell "for the past 13 years of service to the citizens of Bayonne with such steadfastness of purpose, courage, and ability, with dignity and wisdom as well as prudence in the exacting and challenging post of managing editor of the Bayonne Times.

"During his tenure, the Ad Humanos Award recipient has unceasingly stressed and heralded the good and wholesome, maintaining the high standards of ethics and morality so sadly neglected by many in journalism today." Dean Kosakowski continued: "Caldwell has thus helped make and keep the Bayonne Times so typically a good community and family newspaper—one with a heart—serving all the citizens in all parts so effectively.

"Editor Caldwell, by his constant, faithful, and diligent efforts has helped promote the idea that Bayonne is a good place to live and work and is a good neighbor, as evinced by his provocative and timely editorials, by maintaining a thoughtful and challenging youth page, by his treatment of political issues and news items so intelligently and objectively. Also by the impressive and well balanced social page, by the complete, and comprehensive coverage of local sports news, by the selection of many inspiring, and informative feature articles that appear in the pages of the Bayonne Times, and by an adequate reporting of church and religious news and indeed by the integrity of reporting daily happenings in the community.

"The 1960 award winner has performed his duties with steadfastness of purpose in spite of many difficulties, obstacles, and barriers, taking the lead in critical areas to help make the lives of all the people in the community and Nation a better, friendlier, and safer place to work and live amidst the bountiful gifts showered on us by Almighty God," Kosakowski continued.

"Mount Carmel Institute being an integral part of the community, feels that it has honored itself by bestowing this honor upon Robert N. Caldwell, who in the opinion of the committee, after a careful and diligent study, was considered to have contributed much for the cause of humanity, so that his works and example serve as a beacon for the rest to see and imitate in the great cause of the humanities.

"Being mindful of these outstanding qualities the president and faculty of Mount Carmel Institute of Adult Education wish to recognize and extend their sincere and wholehearted appreciation to Robert N. Caldwell, for his outstanding contributions to the citizens of Bayonne and to commend him and the publisher and staff of the Bayonne Times for their faithful and unselfish efforts."

Caldwell was born in Titusville, Pa., and attended schools there, in New York, and in Hasbrouck Heights. After graduation from Columbia he worked with the Bergen Evening Record for 13 years, and then spent 2 years in business in New York before coming to Bayonne in 1947.

THE TEAMSTERS UNION

Mr. TOLLEFSON. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. TOLLEFSON. Mr. Speaker, I have received several communications relative to the Teamster monitoring system which is now in effect under an order of the U.S. District Court for the District of Columbia. All inform me that the members of the Teamsters Union, who number some 1,600,000, desire to hold a convention for the purpose of electing a president at a free and open election. They have been denied the right to hold such an election. Editorials appearing in the Wall Street Journal, the Nation, the Detroit News, and the Toledo Blade have commented on the situation which exists, and have agreed in general that during the approximately 2 years of monitorship nothing much has been done about Hoffa and the Teamsters. These editorials have not reflected much credit upon the court having jurisdiction of the case or the monitors.

Copies of the editorials have heretofore been printed in the RECORD and therefore it is not necessary to ask that they be printed again in connection with my brief remarks. However, an excerpt from the editorial of the Nation merits attention, and reads as follows:

The truth is that to deprive union members of the right to vote for their international officers is no more defensible, legally, than to deprive stockholders of their right to elect officers of United States Steel.

The consent decree in the case pending in the district court provided for a board of three monitors to serve until a new convention for the election of Teamster officers. The Landrum-Griffin bill of last year provided for the calling of such elections. Yet the Teamster members are denied the right to hold one by virtue of the actions of the monitors and the court. It seems to me that this situation is one which merits the early attention of Congress.

One of the communications I have received is a telegram from members of a Teamster local in my State. I include it herewith:

SEATTLE, WASH., *April 20, 1960.*

Hon. THOR TOLLEFSON,
Member of Congress, House Office Building, Washington, D.C.:

We, the undersigned rank-and-file members of General Teamsters Local No. 174, hereby petition Congress for redress of grievances:

1. Undue delay of the monitorship has led to the squandering of over $1 million of Teamsters rank-and-file moneys and the denial of our basic rights to a convention to elect officers of our own choosing as guaranteed by the Landrum-Griffin law.

Please use your good offices to bring this matter to the attention of Congress and the appropriate congressional committee to investigate the misconduct of the monitors and the Federal court judge and cause the necessary remedial legislation.

FEDERAL MINE SAFETY ACT

Mr. GRIFFIN. Mr. Speaker, I ask unanimous consent that the gentleman from Pennsylvania [Mr. SAYLOR] may extend his remarks in the body of the RECORD and include extraneous matter.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. SAYLOR. Mr. Speaker, it was indeed gratifying to learn of the overwhelming approval by the U.S. Senate of the bill introduced by the senior Senator from Pennsylvania, Mr. CLARK, and cosponsored by others, to extend the protection of the Federal Coal Mine Safety Act to all miners, regardless of the size of the mine in which they work or the number of men employed in those mines.

Those Members of Congress who participated in the debate and passage of the Federal Coal Mine Safety Act in 1952 recall the testimony that led to the enactment of that law.

Every year since that time the U.S. Bureau of Mines, the United Mine Workers of America, and the individual operators have requested Congress to amend this act, thereby extending its provisions to mines employing less than 14 men. A coal miner should be entitled to the protection of the best safety conditions regardless of the number of men who work with him. His life is just as precious to him and his family regardless of the size of the operation.

The arguments against this bill have been principally economic. I personally believe that a mine that affords adequate safety regulations for its miners will be a better mine from the operators standpoint. It seems rather ridiculous to say that if you employ 14 or less miners you can disregard their safety, but if you employ 15 men you must make their working conditions safe as provided in the Federal Coal Mine Safety Act of 1952.

I again congratulate the Senate on its overwhelming vote and hope that the House Committee on Education and Labor will soon bring this bill to the floor for speedy passage.

TWELFTH ANNIVERSARY OF THE STATE OF ISRAEL: THE MIRACLE OF THE IMPOSSIBLE

Mr. IRWIN. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. TELLER] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. TELLER. Mr. Speaker, if a miracle is that which transcends the bounds of the possible, then this year on May 14 we celebrate the 12th anniversary of a miracle—the rebirth of the State of Israel. To paraphrase the words of the 17th century British poet, Andrew Marvell:

> This state was a birth as rare
> As dream and hope could ever be;
> It was begotten by despair
> Upon impossibility.

For it seems impossible that a people dispersed through countless countries for countless centuries should have held to a dream of returning to their original homeland. Yet faith in this dream did not die despite the oppressions and persecutions the descendants of Israel so often endured in so many lands. It seems impossible that a people so long alienated from agrarian pursuits should have tried to turn an arid wasteland into a fertile orchard. Yet their endless endeavor and patient perseverance caused water to flow, trees to grow and fruit to flourish. It seems almost impossible for a long-passive people to have dared to brave the onslaught of numerically superior forces that threatened with force of arms to engulf them from all directions. Yet in desperation the people long known as the "People of the Book" took sword in hand and successfully defended themselves against overwhelming odds. This was truly a triumph of faith, courage and endeavor over impossibility.

When after 2,000 years the State of Israel rose again like a phoenix from the long-dormant desert, it was only to face a challenge whose very magnitude made survival seem impossible. This was the challenge of accepting and absorbing the thousands and thousands of Jews who desperately needed a place of refuge and rehabilitation.

The problems facing the new State seemed already insuperable without this additional task. First there was the ever-present problem of defense. Ringed around by hostile nations eager to obliterate them, the people of Israel were forced to expend much of their resources and energies to maintain a perpetual state of preparedness. To protect the borders was not easy. For in Israel, smaller in size than our State of Massachusetts, no settlement except in the southern Negev is more than 20 miles away from an Arab frontier. Then there was the problem of meeting the minimum needs of the people already in the country. Despite the intensive efforts of several generations of dedicated pioneers on the land, Israel was far from supplying her minimum food needs. Much had still to be done in the way of irrigation and land reclamation to make the barren and rocky soil fit for further cultivation. Little industry existed in Israel in 1948 and nearly all of the manufactured commodities consumed needed to be imported from abroad. These were but a few of the many problems upon whose solution depended the survival of the country and its people.

Yet Israel could not close its doors to the multitudes who needed entry. For to have done so would have been to deny its own roots and spiritual heritage. The proclamation of independence had stated:

> The State of Israel will be open to Jewish immigration and the ingathering of exiles.

And the exiles came—from 4 continents and 70 countries. They came individually, in single family units, and in triple-generation patriarchal clans. They came from almost as great a variety of backgrounds as this world can offer. From the DP camps in Europe came the wan survivors of the Hitler horrors, the refugees from central Europe and those who could get out from the Iron Curtain countries of Eastern Europe. From the Near East came the victims of Arab retaliation—Syrian Jews from across the border, Iraqi Jews from the bazaars of Baghdad and the hills of Kurdistan, Yemenite Jews whose ways had not changed from the days of the Old Testament. They emigrated from north Africa—cosmopolitans from Cairo and Casablanca and rural groups from the remote Atlas Mountains. They emigrated from more distant Asia—Iranian Jews from Teheran and Isfahan and Indian Jews from Travancore-Cochin. From England, from South Africa, from New Zealand, from the United States, and from Canada, they came as pioneers to contribute their knowledge and skills to the building up of the reborn state.

During the first 3½ years of modern Israel's existence, over 684,000 entered Israel, taxing its limited facilities to the utmost. By now the total number of new immigrants has reached almost a million. This means that the Jewish population of 650,000 at the time of Israeli independence has had to absorb

twice its own number in a scant dozen years.

This was not merely a matter of opening the doors and making a place for people prepared for the rigors of resettlement in a harsh and challenging environment. For many of the new immigrants did not come, as did the early wave of settlers, with a sense of mission and a zeal for breaking ground in agricultural pioneering. Nor did they come, as did the latter wave of pre-state settlers, with the skills and trades and professions vitally needed in a newly developing country. Most arrived without money and means of any sort. Fewer than 2 percent had had any agricultural experience. Over half lacked vocational professional training. Included among them were large numbers of children, of aged and ill, urgently in need of medical attention and of social services of all types.

Food was in short supply, but they had to be fed. Textiles were in short supply, but they needed to be clothed. Housing was scarce, but they needed to be housed. They came speaking many tongues and needed to be taught the language of the country. They needed to be trained in productive tasks and given employment to become self-sufficient. Coming from a variety of cultures with many different customs, they needed help to integrate themselves into the social and cultural climate of their new home.

To provide all this in so brief a span of time seemed truly impossible and yet this Herculean task was accomplished. Plans were drafted by numerous governmental and semigovernmental agencies and resources, energies and manpower channelled into absorbing the immigrants into the already strained economic fabric of Israel. At first the immigrants were taken into reception centers and transitional camps where immediate survival needs were met but they were dependent upon continued assistance. In 1954, a new policy was instituted, called "From Ship to Settlement." This made provision for the new immigrants to be sent upon arrival to specific settlements and development areas where housing had been prepared and work was available.

To these settlements came doctors and nurses, teachers and technicians, agricultural advisers and irrigation specialists, social workers and numbers of other skilled specialists to help in the process of adaptation. Young Israelis sacrificed their individual ambitions to aid the immigrants to establish themselves. Old pioneers who had long earned the right to rest from their labors worked again to give the newcomers the benefits of their experience.

Today there is hardly a transitional camp left in Israel. Since 1948 more than 150,000 homes have been built for the new settlers. Where barely a few years ago was nothing but sand and stone, flourishing communities are growing and spreading. People who a short time ago had seen nothing more mobile than a camel are operating tractors and elaborate mechanical equipment. Schools and community centers and adult education institutes are providing a variety of courses, including intensive training in the Hebrew language. Over 400,000 adults have learned Hebrew in the last decade. What seemed impossible is being attained at an incredible rate of speed.

Not only has Israel, beginning with such limited sources, succeeded in absorbing these immigrants, but at the same time she has succeeded in expanding these resources at a remarkably impressive rate. In the first decade of her existence, for example, the land area under cultivation grew 2½ times. This feat is remarkable enough. But I am sure this audience needs no reminder that the land when the Israeli state was established was not like our own rich upstate New York, Ohio, or Iowa soils into which our own forefathers were fortunate enough to be able to move. The Israeli pioneers had to move into seemingly arid, almost desert-like areas where little rain falls and where any water, if it is to be had, must be brought long miles through costly irrigation systems. The desert land is fruitful soil if only the precious, life-giving water can be brought to it. And through tremendous efforts, the irrigated area of the land has been more than quadrupled. Almost 500 new agricultural settlements and villages were established in less than a decade. Earlier, these settlements, particularly in the desert Negev area, were mainly strung along the coast where there was some rainfall. But now that desert is spotted with green and verdant fields, drawing from the soil and the new water a rich garden of nature's fruitfulness.

Agricultural production, for example, has almost tripled and new crops have been introduced. The country has sought to produce crops for home consumption and for export. Cotton was first sown in 1953, for example, and now it supplies almost 40 percent of the local needs. The sugar beet was first planted in 1951 and is now not only cultivated but it is processed locally to contribute to Israel's standard of living, the highest in the area. Israel is already self-sufficient in the production of eggs, poultry, dairy and milk products, although a decade ago much of her dairy supplies had to come from abroad. The new Israel, like Palestine before it, is noted for its luscious oranges that are favored in many foreign markets, and the country is now self-sufficient in fruits and vegetables.

Prior to 1948, as I have said, there was little industry. But now Israel is the most industrialized area of the Middle East, exporting industrial as well as agricultural commodities. A remarkable variety of goods are now turned out by Israeli factories. Rubber tires, textiles of many types, canned foods, electrical equipment like radios and bulbs are all produced. Her ceramics and chemical industries derive largely from her own resources. Building materials she has aplenty, like cement. Her skilled immigrants have brought the difficult craftsmanship to manufacture industrial diamonds and to cut rough diamonds into beautiful and useful shapes. After many years of exploration, much discouragement but persistence, oil was finally located in the Negev, and domestic oil production now meets one-tenth of the country's needs. A lengthy pipeline winds its way from the Gulf of Aqaba and then across the desert to Beersheba. Its extension to the Mediterranean may make possible the movement of oil across from the Red Sea to the Mediterranean without having to depend upon the good will of the Egyptian Government. From the Dead Sea and the desert of the Negev minerals such as potash, copper, and phosphate are being extracted. Thus from very small beginnings, in one decade Israel has been able to develop many of the industries which distinguish industrial from agricultural countries. The skill, the dynamic drive and the enterprise of Israel's intelligent population have together made great things happen in Israel.

It is no devaluation of the Israeli achievement to point out that this remarkable economic and industrial growth is not alone the result of Israeli efforts on Israeli soil. Without their vision and skills these achievements were not possible. On the other hand, it is only just to note the very important role that foreign resources have also played in this development. Aid from abroad has been very large, not by comparison with the need, but in proportion to the population. Extensive loans and grants have been made by our Government. The Jewish community of the world has contributed to this great cause. Indeed, without the voluntary contributions of millions of the more favored members of the Jewish community, the entire enterprise would long ago have foundered. Moreover, Israel's finances have been helped over several rough patches by reparations from Germany—however bitter the recollection of what the Nazis did to decimate the Jewish community in Western and Eastern Europe. And the release of frozen sterling balances from London also helped. Moreover, Jewish and non-Jewish firms have invested directly in enterprises in Israel, investment decisions which brought technical know-how, sales organizations and other economic advantages. Although there were groups within Israel who by reasons of doctrine and obsolete political ideas thought that all private enterprise was "exploitive" and "imperialist" and what not, the government and preponderating opinion were wise enough to see that good could come of setting those conditions that would attract foreign investors. And this has certainly proved its value to the growing economy.

Yet even with such aid, this could not have been accomplished without the constant devotion to effort and dedication to the national purpose of a people bent on building their homeland into more than a mere place of refuge. Visitors to Israel have come away impressed with the sense of mission and urgency that have characterized Israelis in all lines of activity. They have seen the government planners in shirt sleeves too busy to stand on ceremony. They have seen men, women, and children walk miles each day under the burning desert sun carrying pails of water to water a plant that will one day become a tall tree. They have seen men man the border

settlements with a plow in one hand and a rifle in the other, while their wives calmly bear babies and bring them up under the threat of gunfire and infiltration.

But today I do not want to dwell too long on the accomplishments of Israel, numerous and impressive though they are. I rather wish to emphasize the significance of these accomplishments for the world outside of Israel. And I want to stress the new and vital role that Israel has undertaken in recent years to strengthen the free world.

Today Israel stands as living proof that rapid economic development and social change can successfully take place within the framework of democratic political institutions. And today Israel stands as a sterling example that East and West can meet with understanding and truly work together as partners in progress.

One of the major question marks in the world today is the future of the newly independent countries of Asia and the presently emerging countries of Africa. They have achieved and are achieving political independence. They have asserted their preference for democratic forms of government. But if political democracy cannot soon secure for these nations the economic gains and the rising standard of living traditionally associated with the democratic way of life, there is the danger that they may decide to dispense with democracy. For two systems are competing today in the race to banish poverty and privation from the underdeveloped areas of the earth. One is the system of force and the other the system of freedom.

Israel stands not only as a bastion of democracy in the Middle East where democracy is faltering and may be failing. But Israel, which itself has faced and overcome most of the problems which plague the newly independent states, has dramatically proven that they can be overcome without sacrificing democratic processes.

One of the major difficulties facing the new countries is the achievement of national unity among populations composed of many different ethnic, cultural, and linguistic groups with diverse customs and diverse interests. Few other countries have as heterogeneous a population as Israel, whose people may have derived from one religious and spiritual heritage but represent many different cultures, customs, and traditions of behavior. Yet in the towns, the villages, and in the army, they have learned to live and work together, to reconcile and blend their differences and to fuse their various contributions into a national culture and consciousness.

What probably strikes the first-time visitor to Israel most strongly is the extreme variety of physical types encountered in the streets of any of the large cities. Side by side in the cafes sit tall, blue-eyed, tow-haired, and pale-skinned people who might have come from the fiords of Scandinavia and slight, blue-black-haired, brown-skinned people who would certainly be indistinguishable in any Indian gathering. Next to a squat, thick-set and stalwart man who may have come from the steppes of Russia walks a curly tressed, liquid-eyed, and copper-toned beauty who may have once peered from behind a tent in Yemen. Not only in the cities but in the slopes of the vineyards and in the fields of cotton one sees working side by side Jews from Johannesburg and Jews from Morocco and an army unit marching by may be formed of men formerly from 40 countries.

Yet Israel has managed to absorb these people and the ideas and institutions they have brought with them from various parts of the world and reshape them to her needs without force and without sacrificing political stability and the freedoms of speech and press and assembly. Late last year Israel had another national election and 12 parties out of the 24 which ran slates are represented in the Knesset, the national parliament. These parties represent a wide variety of points of view and interest groups. It may be noted in passing that the non-Jewish population of Israel, mainly Arabic, are also represented in parliament and are also being brought into the modern national life through training and educational facilities and encouragement in the use of new techniques and materials.

The results of this election are also significant in several ways. For the Mapai, the leading party which has pursued policies oriented to the West, gained in strength and the Communists and leftwing groups which have advocated neutralism declined in strength rather dramatically. The Mapai Party seems to be showing a new look as its leadership has been augmented by a younger generation of men, such as former Chief of Staff Moshe Dayan, former Ambassador to the United States and to the United Nations Abba Eban, and former Director General of the Department of Defense Shimon Peres. These are men who seem to favor nonpartisan, pragmatic approaches to problems rather than holding to the doctrinaire socialism of the older leaders.

And it is in this area of offering pragmatic solutions to existing problems that Israeli economic methods can serve and are serving as models for underdeveloped areas. For Israel has successfully developed a number of economic and social forms of organization to meet the problems of economic development and social change as they arose. Side by side in Israel exist: the communal kibbutz where work is organized on a collective basis; the moshav, or smallholders' settlement, where families work individual farms but buy and sell through central cooperatives; several variants of both of these; and all the forms of private, public, and mixed enterprises.

This is one of the reasons why African and Asian countries, faced with the problem of stimulating economic development among elements of their populations whose social forms have been tribal and communal and cooperative, look to Israeli experience and seek assistance and advice from Israeli experts. In Ghana, Israeli advisers have been assisting with plans to create farming communities modeled on Israeli kibbutzim and moshavim. In Nigeria, Israelis will supervise the initial development of 12 plantations patterned on her cooperative farms. The new African Federation of Mali, formerly French West Africa, is sending its young Senegalese and Sudanese for study visits to Israel and its president has recently asked for Israeli advisers on farm development and advice on the diversification of agriculture. Fifty-six Burmese have spent a year living and working on collective and cooperative settlements in Israel. It may be noted that, although some of these countries contain Moslem population elements and although they are linked to the Arab nations in the Bandung bloc, they have nevertheless resisted the pressure from the Arab bloc against maintaining ties with Israel. This suggests that in the search for solutions to common problems, political differences and religious distinctions may be transcended. And it is to be hoped that ultimately Israel's Arab neighbors will abandon their hostility and work with her in the development of the whole of the Near East area.

It is an oversimplification to say that Israel, having received aid in her time of greatest need, is in turn rendering aid to those who now need it. It is perhaps truer to say that many countries and many peoples of the world have participated in the building of Israel with advice and encouragement and funds. And Israel is now participating as a partner in the building of other countries which face problems similar to those she faced a decade ago.

As we have seen, Israel is peculiarly fitted to serve as a bridge between the West and the underdeveloped countries of Africa and Asia with which she has so much in common She is a small country as most of them are small and she is not alined militarily with any one of the major power blocs. This makes for a certain psychological rapport and allays the suspicion of strings that too often attaches to aid from the major powers. Israel began as they are beginning, with limited natural resources, short supplies of capital, and the social problems of a people in various stages of transition from traditional to modern ways of life. Israel has learned the hard way, as must many of these countries, how to deal with the problems of soil conservation, land reclamation, reforestation, water control, malaria control and the provision of social services to peoples desperately in need of them. And Israel is eager to share the knowledge she has obtained with those countries who can use it.

It is not merely in the field of technical assistance that Israel is working in partnership with the new nations of Asia and Africa, but also in the fields of investment and trade. One of the outstanding examples of joint investment has been that between Israel and Ghana. In 1947, there was incorporated in Ghana a new merchant fleet, the Black Star Line, 60 percent owned by the Government of Ghana and 40 percent by a private Israeli corporation, the Zim Navigation Line. Zim has been managing the line and training seamen from Ghana on the job, while the Israeli Gov-

ernment provided a mission to train merchant marine officers at the newly established Accra Nautical Academy. Ghana has saved so much in foreign exchange that she recently bought out the Zim interests. Another Israeli concern is in partnership with the Ghana Industrial Development Corp. in a building construction enterprise. Israel diamond interests have formed a partnership with the Guinea Government to market the output of Guinea diamond mines. Japan and Israel are planning a joint tuna-fishing operation, and Hong Kong and Israel a shipping partnership.

At the time when both Burma and Israel suffered acutely from a shortage of foreign exchange, Burma bartered rice for Israeli tires, machinery, and tools. Burma has had perhaps the longest technical assistance and trading relationship with Israel dating from the visit of the Burmese Prime Minister, U Nu, to Israel in 1955. Since then Burmese officials, technicians, and students have been studying in Israel and Israeli engineers, architects, doctors, agricultural specialists, and economists have been employed in Burma. Israeli technicians have been helping Burmese to grow wheat and this wheat is exported to Israel in return for industrial products and fertilizers. Israel is also contributing assistance to Burma's defense. Badly in need of military equipment herself, she nevertheless sold to Burma 20 Spitfires and provided pilot and maintenance training. In a communal settlement on Israel's northern frontier have been living a group of Burmese Army officers and their families. They are studying the possibility of introducing the Israeli system of strategic agricultural border settlements along their own insecure northern frontier.

Israel's developing relations with the Asian and African world are indeed of importance to the future of the free world everywhere. In the words of one commentator:

> The Israeli model might well prove to be a sort of economic third force, an alternative from the Western pattern but certainly far more compatible with free world interests than any Communist model.

Because Israel has accomplished the seemingly impossible, she can provide inspiration for the countries who might doubt that development is possible without authoritarianism. The example and efforts of Israel may well be crucial in deciding whether democracy or totalitarianism is the path of the future for Asia and Africa.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. ROONEY (at the request of Mr. SANTANGELO), for the balance of the week, on account of illness.

Mr. RIEHLMAN (at the request of Mr. ARENDS), for the remainder of this week, on account of official business as a member of the Board of Visitors to the Military Academy.

Mr. CHELF, from April 27 to and including May 20, 1960, to serve as a U.S. delegate to the meeting in Naples, Italy, of the Council of the Intergovernmental Committee for European Migration.

Mr. CLARK (at the request of Mr. CLEM MILLER), for April 27 and 28, on account of death in his family.

Mr. KILDAY (at the request of Mr. IKARD), for today, on account of official business, being in attendance as a member of the Board of Visitors, U.S. Military Academy, West Point, N.Y.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. KASEM, for 1 hour, today.

Mr. PUCINSKI (at the request of Mr. MACHROWICZ), to address the House on Tuesday for 1 hour.

Mr. ANDERSEN of Minnesota, for 1 hour, on Tuesday next.

Mr. THOMPSON of New Jersey (at the request of Mr. ALBERT), for 1 hour, tomorrow.

Mr. CLEM MILLER, for 15 minutes, tomorrow.

Mrs. DWYER (at the request of Mr. GRIFFIN) to address the House tomorrow for 10 minutes following the regular business and other special orders heretofore entered.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. DULSKI.

(At the request of Mr. ALBERT and to include extraneous matter the following:)

Mr. DENT.

Mrs. KELLY.

Mr. HOLLAND.

Mr. POAGE (at the request of Mr. IRWIN) and to include extraneous matter.

(At the request of Mr. GRIFFIN, the following Members to extend their remarks and include extraneous matter in the RECORD:)

Mr. SAYLOR.

Mr. HOEVEN.

Mr. HOSMER.

Mr. BROYHILL.

Mr. VAN ZANDT.

Mr. WEAVER.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1751. An act to place in trust status certain lands on the Wind River Indian Reservation in Wyoming.

ADJOURNMENT

Mr. IRWIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

Accordingly (at 5 o'clock and 55 minutes p.m.) the House adjourned until tomorrow, Thursday, April 28, 1960, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2094. A letter from the Acting Assistant Secretary of Defense (Supply and Logistics), transmitting reports submitted by the Departments of the Army, Navy, and Air Force for the period July 1 to December 31, 1959, listing contracts (and modifications thereto), negotiated under the authority of sections 2304(a)(11) and 2304(a)(16) of title 10 United States Code, pursuant to title 10 United States Code section 2304(e); to the Committee on Armed Services.

2095. A letter from the Comptroller General of the United States, transmitting a report on a review of the policies and practices of the Department of Labor and the States regarding unemployment compensation payments to retired Federal employees who are receiving retirement annuities; to the Committee on Government Operations.

2096. A letter from the executive secretary, American Chemical Society, transmitting the annual report of the American Chemical Society for the calendar year 1959, pursuant to Public Law 358, 75th Congress; to the Committee on the Judiciary.

2097. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation entitled "A bill to make American nationals eligible for scholarships and fellowships authorized by the National Science Foundation Act of 1950," to the Committee on Science and Astronautics.

2098. A letter from the Acting Assistant Secretary of Defense (Supply and Logistics), transmitting reports on Army, Navy and Air Force prime contract awards to small and other business firms, pursuant to section 10 (d) of the Small Business Act, as amended; to the Committee on Banking and Currency.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BARDEN: Committee on Education and Labor. H.R. 9070. A bill to amend section 8(b)(4) of the National Labor Relations Act, as amended; with amendment (Rept. No. 1556). Referred to the House Calendar.

Mr. HARRIS: Committee on Interstate and Foreign Commerce. H.R. 4815. A bill to insure effective regulation of D.C. Transit System, Inc., and fair and equal competition between D.C. Transit System, Inc., and its competitors; without amendment (Rept. No. 1557). Referred to the Committee of the Whole House on the State of the Union.

Mr. PRESTON: Committee of conference. H.R. 10234. A bill making appropriations for the Department of Commerce and related agencies for the fiscal year ending June 30, 1961, and for other purposes (Rept. No. 1558). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BYRNES of Wisconsin:

H.R. 11930. A bill to extend and expand the conservation reserve under the Soil Bank Act; to the Committee on Agriculture.

By Mr. ABERNETHY (by request):

H.R. 11931. A bill to amend the act of March 3, 1901, with respect to the time within which a caveat to a will must be

filed in the District of Columbia; to the Committee on the District of Columbia.

By Mr. BARING:

H.R. 11932. A bill giving the consent of Congress to a compact between the State of Arizona and the State of Nevada establishing a boundary between those States; to the Committee on the Judiciary.

By Mr. ELLIOTT:

H.R. 11933. A bill to provide increases in compensation for food service workers and laundry workers under the Veterans' Administration; to the Committee on Post Office and Civil Service.

H.R. 11934. A bill to promote greater equity in the administration of the pay systems of employees in the Veterans' Administration under prevailing rate schedules by providing for certain adjustments in the compensation of such employees; to the Committee on Post Office and Civil Service.

By Mr. HALPERN:

H.R. 11935. A bill to authorize the Secretary of Health, Education, and Welfare to make grants to the States to assist in the provision of facilities and services for the day care of children; to the Committee on Education and Labor.

By Mr. HARMON:

H.R. 11936. A bill to stabilize the sales economy of the United States by prohibiting advertising in commerce of any article produced in a foreign country unless the advertisement clearly states the country of origin of such article; to the Committee on Interstate and Foreign Commerce.

By Mr. HESS:

H.R. 11937. A bill to amend the Internal Revenue Code of 1954 to allow a credit against the individual income tax for certain amounts paid as special tuition assessments to public and private institutions of education; to the Committee on Ways and Means.

By Mr. INOUYE:

H.R. 11938. A bill to adjust the retirement benefits of certain retired district judges for the district of Hawaii; to the Committee on the Judiciary.

By Mr. IRWIN:

H.R. 11939. A bill to amend the Tariff Act of 1930 to permit private carriers to transport bonded merchandise under certain conditions; to the Committee on Ways and Means.

By Mr. KASEM:

H.R. 11940. A bill to prohibit certain judicial acts affecting the internal affairs of labor organizations; to the Committee on the Judiciary.

By Mr. LENNON:

H.R. 11941. A bill to amend section 142 of title 28, United States Code, with regard to accommodations at places for holding court, and for other purposes; to the Committee on the Judiciary.

H.R. 11942. A bill to waive section 142, of title 28, United States Code, with respect to the U.S. District Court for the Eastern District of North Carolina holding court at Fayetteville, N.C.; to the Committee on the Judiciary.

By Mr. MASON:

H.R. 11943. A bill to permit limited deduction of contributions to political committees; to the Committee on Ways and Means.

By Mr. CLEM MILLER:

H.R. 11944. A bill to authorize and direct that the national forests be managed under principles of multiple use and to produce a sustained yield of products and services, and for other purposes; to the Committee on Agriculture.

By Mr. MONTOYA:

H.R. 11945. A bill to provide for the conveyance of certain lands of the United States to the Cuba Independent Rural Board of Education, Cuba, N. Mex.; to the Committee on Interior and Insular Affairs.

By Mrs. PFOST:

H.R. 11946. A bill to amend and extend the provisions of the Sugar Act of 1948, as amended; to the Committee on Agriculture.

By Mr. PRICE:

H.R. 11947. A bill to amend section 303 of the Career Compensation Act of 1949 to provide that the Secretaries of the uniformed services shall prescribe a reasonable monetary allowance for transportation of house trailers or mobile dwellings upon permanent change of station of members of the uniformed services; to the Committee on Armed Services.

By Mr. SHIPLEY:

H.R. 11948. A bill to provide post office boxes without charge to certain patrons of post offices without delivery service, and for other purposes; to the Committee on the Judiciary.

By Mr. STRATTON:

H.R. 11949. A bill to permit the interment of the last survivor of the Union Army and the last survivor of the Confederate Army within the Arlington National Cemetery; to the Committee on Interior and Insular Affairs.

By Mr. THOMPSON of Texas:

H.R. 11950. A bill to provide for the transfer of rice acreage history where producer permanently withdraws from the production of rice; to the Committee on Agriculture.

By Mr. THOMPSON of Louisiana:

H.R. 11951. A bill to authorize the navigation project for the Calcasieu River and Pass, La.; to the Committee on Public Works.

By Mr. VINSON:

H.R. 11952. A bill to repeal the act of May 29, 1958, which authorized and directed the Administrator of General Services to provide for the release of restrictions and reservations contained in an instrument conveying certain land by the United States to the State of Wisconsin; to the Committee on Armed Services.

By Mr. WESTLAND:

H.R. 11953. A bill to provide for the assessing of Indian trust lands and restricted fee patent Indian lands within the Lummi Indian diking project on the Lummi Indian Reservation in the State of Washington, through drainage and diking district formed under the laws of the State of Washington; to the Committee on Interior and Insular Affairs.

By Mr. FULTON:

H.R. 11954. A bill to establish a U.S. Travel Commission and a U.S. Office of International Travel; to the Committee on Interstate and Foreign Commerce.

By Mr. LAIRD:

H.R. 11955. A bill to protect the public health by requiring appropriate warning labels on packages of substances intended or suitable for household use, where the substance or the container thereof may cause accidental injury or illness in the absence of proper precautions; to the Committee on Interstate and Foreign Commerce.

By Mr. MULTER:

H.R. 11956. A bill to amend the Social Security Act to permit the use of social security records to aid in locating runaway parents and other persons against whom criminal prosecutions are pending; to the Committee on Ways and Means.

By Mr. RIVERS of Alaska:

H.R. 11957. A bill to facilitate the selection by Alaska, pursuant to the act of July 7, 1958, of certain public lands under outstanding mineral lease or permit; to the Committee on Interior and Insular Affairs.

By Mr. ROOSEVELT (by request):

H.R. 11958. A bill to prohibit certain judicial acts affecting the internal affairs of labor organizations; to the Committee on the Judiciary.

By Mr. WOLF:

H.R. 11959. A bill to amend the Packers and Stockyards Act, 1921, to strengthen independent competition by providing for competitive enterprise in the retail sales of meat, meat food products, livestock products, and other food items; to the Committee on Agriculture.

By Mr. DENT:

H.R. 11960. A bill to prohibit certain judicial acts affecting the internal affairs of labor organizations; to the Committee on the Judiciary.

By Mr. HOLLAND:

H.R. 11961. A bill to prohibit certain judicial acts affecting the internal affairs of labor organizations; to the Committee on the Judiciary.

By Mr. RIVERS of Alaska:

H.R. 11962. A bill to provide compensation to the Yakutat local community of Tlingit Indians of the State of Alaska for the extinction of their original Indian title; to the Committee on Interior and Insular Affairs.

By Mr. THOMSON of Wyoming:

H.R. 11963. A bill to authorize and direct the Secretary of the Interior to issue a patent conveying certain lands in the town of Powell, Wyo., together with improvements, to the Shoshone Irrigation District, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mrs. CHURCH:

H.J. Res. 699. Joint resolution to establish a Joint Committee on Mutual Security; to the Committee on Rules.

By Mr. LEVERING:

H.J. Res. 700. Joint resolution establishing a joint committee to investigate the cost of living and the widening spread between retail prices and prices paid to farmers; to the Committee on Rules.

By Mr. FULTON:

H. Res. 511. Resolution creating a select committee to conduct a study of the fiscal organization and procedures of the Congress; to the Committee on Rules.

H. Res. 512. Resolution to amend the Rules of the House to require the yeas and nays in the case of final action on appropriation bills; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII,

Mr. FORAND presented a memorial of the House of Representatives of the Rhode Island General Assembly memorializing the Congress of the United States with respect to providing benefits to the aged, ill, and disabled veterans of World War I in the form of pensions or any other means which provide relief so vitally needed, which was referred to the Committee on Veterans' Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII private bills and resolutions were introduced and severally referred as follows:

By Mr. BERRY:

H.R. 11964. A bill for the relief of Wilhelmina Sophia DeBruyne; to the Committee on the Judiciary.

By Mrs. BLITCH:

H.R. 11965. A bill for the relief of Mrs. Beulah J. Rowe; to the Committee on the Judiciary.

By Mr. BROCK:
H.R. 11966. A bill for the relief of Nellie V. Lohry; to the Committee on the Judiciary.

By Mr. CASEY:
H.R. 11967. A bill for the relief of Mrs. Mabel Constance Kennedy; to the Committee on the Judiciary.

By Mr. COHELAN:
H.R. 11968. A bill for the relief of Chong Son Zee and Ng Lee Gean Zee; to the Committee on the Judiciary.

By Mr. FULTON:
H.R. 11969. A bill for the relief of Ennio O. Cappelli; to the Committee on the Judiciary.

By Mr. HEALEY:
H.R. 11970. A bill for the relief of Ilona Salamon; to the Committee on the Judiciary.
H.R. 11971. A bill for the relief of Agostino Aurilio; to the Committee on the Judiciary.

By Mr. INOUYE:
H.R. 11972. A bill for the relief of Mrs. Mine Kitagawa; to the Committee on the Judiciary.

By Mr. MEADER:
H.R. 11973. A bill to grant to Hobart M. Bennett and Stella Bennett all the right, title, and interest of the United States in and to certain minerals; to the Committee on Interior and Insular Affairs.

By Mr. SISK:
H.R. 11974. A bill to authorize the Secretary of the Interior to convey certain land in the Big Sandy Rancheria, Calif., and to accept other land in exchange therefor; to the Committee on Interior and Insular Affairs.

By Mr. TEAGUE of California:
H.R. 11975. A bill for the relief of Helga Hirte; to the Committee on the Judiciary.

By Mr. ANFUSO:
H.R. 11976. A bill for the relief of Antonio Ceci; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

442. By the SPEAKER: Petition of G. Davids and two other citizens, Shreveport, La., relative to vigorously protesting House Joint Resolution 558, and Senate Resolution 83; to the Committee on Foreign Affairs.

443. Also, petition of Jesse L. Turner and others, Chattanooga, Tenn., relative to requesting passage of H.R. 8783, which provides health benefits for civil service retirees; to the Committee on Post Office and Civil Service.

EXTENSIONS OF REMARKS

"A Milestone Measuring the Betterment of Human Relations," Is Topic of Address by Representative John M. Slack, Jr., at Mayor's Commission Anniversary Dinner, Charleston, W. Va.

EXTENSION OF REMARKS
OF
HON. JENNINGS RANDOLPH
OF WEST VIRGINIA
IN THE SENATE OF THE UNITED STATES
Wednesday, April 27, 1960

Mr. RANDOLPH. Mr. President, one of the most significant events in recent West Virginia history occurred last night in the State's capital city, Charleston, where the first annual dinner meeting of the Mayor's Commission on Human Relations was held.

That important and helpful commission was created by the late Mayor John T. Copenhaver in an executive order signed June 7, 1959. Under this commission the late Mayor Copenhaver envisioned a better city wherein all its citizens might live in harmony and brotherhood, enjoying the fruits of citizenship without regard to race, creed, or national origin.

More than 40 civic, business, and professional and religious organizations are cosponsors of the Commission on Human Relations in Charleston, and its officers and members are L. Leo Kohlbecker, chairman; Dr. James H. Walker, vice chairman; Mrs. Irenee May, secretary; John D. Smallridge, treasurer; and Willard Brown, G. E. Ferguson, Mrs. Andrew Gardner, Dewey E. S. Kuhns, William L. Lonesome, Rev. Moses Newsome, Miles C. Stanley, A. S. Thomas, Jr., Rabbi Samuel Volkman, and Houston G. Young, members.

Master of ceremonies for the April 26, 1960, event, held in Charleston's spacious civic center, was Mayor John A. Shanklin, assisted by the chairman of the commission, Mr. Kohlbecker. The invocation was by Rev. F. Elwyn Peace, president of the Charleston Ministerial Association; the prayer of the evening was by Very Rev. Claude Vogel, O.F.M.; and the benediction was pronounced by Rabbi Samuel Volkman, D.D., of the Virginia Street Temple.

Principal guest speaker for the occasion was the venerable statesman of the sports world, Branch Rickey, president of the Continental Baseball League, while other speakers included Gov. Cecil H. Underwood of West Virginia, Hon. John A. Field, Jr., U.S. district judge for the southern district of West Virginia, and Representative JOHN M. SLACK, JR., of the Sixth West Virginia District. The senior Senator from West Virginia likewise was privileged to be a guest of the commission and a participant.

Mr. Rickey, the baseball executive who first sponsored a member of the Negro race as a player in organized professional baseball, still aggressive and mentally alert at the advanced age of 79 years, spoke strongly against prejudice and expressed the belief that three major forces are working against it; namely, proximity, as exemplified by Jackie Robinson's short 6 months of proximity as a minor league player before becoming a major league regular; second, individual accomplishments by members of minority groups; and the third, religion.

Governor Underwood expressed the hope that the commission's first annual dinner meeting would be repeated each year as an event to which the people of Charleston, Kanawha County, and West Virginia would look forward with pride and satisfaction.

Judge Field spoke of the paradox inherent in the fact that a meeting is held to discuss the rights of minority groups even though it is so historically well documented that such groups have made great contributions to America.

Mayor Shanklin gave public expression to his appreciation for the accomplishments of the commission and gave assurance that its members have his wholehearted support for the manner in which they have approached the problem of how to engender good human relations.

Representative SLACK, a native of Charleston and the Member of Congress from the district which includes Charleston and Kanawha County, likewise presented enlightened remarks.

Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD following these remarks the text of the well-considered speech by my capable colleague, Representative SLACK.

There being no objection, the speech was ordered printed in the RECORD, as follows:

A MILESTONE MEASURING THE BETTERMENT OF HUMAN RELATIONS

(Speech by Hon. JOHN M. SLACK, JR., a Representative from West Virginia, at first annual dinner meeting of the Mayor's Commission on Human Relations, Charleston, W. Va., April 26, 1960)

This meeting of the Mayor's Commission on Human Relations comes at a critical point in our national history, and the work of this group carries a growing significance. In simple language, what you are trying to do is to establish greater mutual understanding and trust among several population elements of this community * * * to establish it by friendly persuasion and personal example. Very few human undertakings are more important to the fulfillment of our national objectives today.

There are some relationships among human beings which simply cannot be created and maintained by law, or imposed from the top down. They must be initiated and allowed to grow strong and secure from the grassroots up—in all such relationships the key to success lies in work undertaken at the community level.

Most of us, I am sure, are familiar with the phrase "equal justice under law" which is carved in stone over the entrance to the U.S. Supreme Court. That statement constitutes a guarantee of formal, legal justice for all Americans.

MORE THAN LEGAL JUSTICE

The privilege of full American citizenship, however, contemplates a great deal more than just legal justice. The American ideal, the way of life which has revitalized the thinking of all mankind since 1776, is based on political and social justice. When our Founding Fathers endorsed the famous statement: "We hold these truths to be self-evident * * * that all men are created equal * * * that they are endowed by their Creator with the

right to life, liberty, and the pursuit of happiness" they were not simply striking out at the tyranny of a king. They were sweeping aside in one tremendous statement of belief the 3,000 years of repression and accumulated tyranny which had distorted human relationships throughout the Old World. This was a new world, as Christopher Columbus had told his Queen and they were building on new ground, with a new set of guarantees based on new values for human beings.

As might be expected, there are persons who give only lipservice to the American ideal. They stand on the legal guarantee of "equal justice under law," and strike an attitude of tolerance toward those who would translate social and political guarantees into action. I say to you that tolerance is not enough. For example, organized religion is tolerated today in the Soviet Union. Tolerance alone is personified in the sneering answer of Cain to the voice of Almighty God. "Am I my brother's keeper?" asked Cain.

WE MUST BE OUR BROTHER'S KEEPERS

The cycle of history in which we move today supplies the answer to Cain. We must indeed be our brother's keepers. If we show no interest in our brother's problems, then there is another philosophy which will gladly take over our function—an alien philosophy, dedicated to suppression of all individual freedom, to atheism, to denial of all human values except those that serve the state. The international competition to convince the uncommitted millions of the world's population grows more fierce every year. We cannot win this competition in the long run unless our service to the full range of the American ideal is wholehearted and complete, and we are unified in our march across the pages of history.

Make no mistake about it the cold war may last a century or more because the price of a hot war is now too high to pay and if it does last a century, the determining factor in the choice of philosophies by hundreds of millions of human beings will not be pronouncements by our State Department or laws passed by the Congress.

It will be the tangible results of work at the community level, whereby it becomes known to all nations that an American of any kind or degree walks proudly down the streets of an American community, and bows to no man.

A few years ago the city of Little Rock became world famous for events which cast a long shadow on the American ideal. One day another American community will become equally famous for its leadership in the realm of finding solutions to human problems that arise among neighbors. It could be the city of Charleston, through the work of this commission. If such recognition should come to pass, I say to you that nothing would give me greater pride in my home city and the people I have known all my life.

A century ago Abraham Lincoln told us that our country was engaged in a struggle to determine whether or not we could survive half slave and half free. Today that struggle has been expanded to a worldwide competition. For we are in a new era of empire building, and we must outclass the Soviet system before the eyes of the entire world, not only in economic efficiency and in the race through outer space, but in the creation of ever newer and stronger guarantees of human equality for our citizens.

COMMISSION'S TASK NOT EASY

The members of this commission do not have an easy task, but when you meet difficulties, you may find some comfort in the thought that your obstacles were anticipated almost 200 years ago. Speaking of American liberties, Thomas Jefferson wrote what must be the most violent statement ever recorded by a famous American.

These are the words of Jefferson:

"What country can preserve its liberties if its rulers are not warned from time to time that this people preserve the spirit of resistance? Let them take arms. The remedy is to set them right as to facts, to pardon and pacify them. What signify a few lives lost in a century or two? The tree of liberty must be refreshed from time to time with the blood of patriots and tyrants."

These were the convictions of a man whose leadership pointed our young country toward realization of what had been only a dream for centuries—government of the people, by the people and for the people. Today we believe it is possible to settle our domestic problems without bloodshed. Yet, we must not forget that tyranny is always waiting offstage in one form or another, waiting its cue to enter and offer its solution to cure injustices.

Only eternal vigilance and fearless leadership can ward off tyranny, whether at the national or local level, and no matter whether the issue be economic, social, or political. The work of this commission, then, contributes to the strength and stature of our community, our State, and our Nation.

I join you with great pride in marking your first anniversary. I extend to you my warmest felicitations, and I look forward to the coming years with full confidence that your efforts will one day be recognized as a milestone measuring the betterment of relationships among all residents of this community, no matter what their race, color, or creed.

I thank you.

Senator Randolph Delivers Forthright Address at Charleston, W. Va., on First Anniversary of Commission on Human Relations

---

EXTENSION OF REMARKS

OF

HON. HENRY M. JACKSON

OF WASHINGTON

IN THE SENATE OF THE UNITED STATES

Wednesday, April 27, 1960

Mr. JACKSON. Mr. President, a most eloquent and significant address by the distinguished Senator from West Virginia [Mr. RANDOLPH] on the subject of human relations deserves the attention of the entire Senate. The occasion for the remarks of our able colleague was the first annual dinner of the Mayor's Commission on Human Relations, at Charleston, W. Va., April 26.

As Senator RANDOLPH pointed out, the people of Charleston and their political leaders deserve the acclaim of thoughtful citizens everywhere for their endeavor to advance the values of citizenship and to establish a more just and equitable basis for human relations.

The notable event was honored also by the presence of Branch Rickey, president of the new Continental Baseball League, and the man who broke down the racial barriers in the major leagues with the signing of Jackie Robinson for the then Brooklyn Dodgers. Mr. Rickey described Senator RANDOLPH's speech as an appealing and vigorous advocacy of human rights.

Because of its timeliness, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD the speech by Senator RANDOLPH.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS BY SENATOR JENNINGS RANDOLPH, DEMOCRAT, OF WEST VIRGINIA, AT THE FIRST ANNUAL DINNER MEETING OF THE MAYOR'S COMMISSION ON HUMAN RELATIONS, CHARLESTON CIVIC CENTER, CHARLESTON, W. VA., APRIL 26, 1960

Governor Underwood, Representative Slack, Judge Field, Mayor Shanklin, and our honored guest speaker, Branch Rickey, members of the Mayor's Commission on Human Relations and ladies and gentlemen, I am grateful for the opportunity to join with the citizens and leaders of Charleston in this endeavor to advance the values of citizenship and to establish a more just and equitable basis for human relations.

As you know, during much of the present session of Congress, a number of my colleagues and I have been engaged on another front of this common endeavor, our task being to strengthen the guarantees of certain fundamental rights. I had hoped that we might have done more. These two separate but interdependent aspects—the preservation of civil rights and the betterment of human relations—embody two centrol questions which our era presents for answer.

The first of these, expressed in part in the term "civil rights," is how to govern in a radically new world in which distance is no longer measured by a man's walking, nor time by a man's sleeping and waking. The other is how to teach men to live in this new world which is rich with novel possibilities of both creation and destruction.

BARRIERS OF TIME AND SPACE GONE

The old barriers of time and space have been torn away. The problem is no longer a local, a regional, nor even a national one. Therefore, the work that you have done and are doing in Charleston is a significant part of the larger struggle to give substance to American ideals, and to extend these ideals to the reach of people everywhere. And, just as we have learned that there will be no neutrals in the next war—if there is to be another major conflict—we have learned also that there can be no neutrals in the continuing efforts of citizens to achieve the full humanity of man.

We are often inclined to view the question of human relations in terms of a greater need for mutual respect and the need for tolerance of racial or religious or cultural diversity. But forbearance too often means mere toleration, and at best it is sometimes but a passive and a negative status. Nor does the quality of tolerance solve the moral problem confronting the understanding man when he is faced with riotous intolerence and rampant brutality.

Toleration, I believe, is not enough.

Again, we are often inclined to address the issue of human relations in terms of better group understanding. But the problem of human relations is not that of the relations of men and women as members of a group or a religious belief, but as individuals.

If a man is hurt or wounded, he is pained and he bleeds as an individual human being, not as a member of a group.

The quality of human relations is often no better between members of the same racial, religious, or cultural group than it is between members of different groups, and for the same reason.

ISSUES ARE NOT OF COLLECTIVE CONFLICT

Today the issues joined in the advancement of human relations are not those of collective conflict, but of friction between

the fundamental ideas that men have about man. The overall divisions within the world have always been based upon the ideas and ideals for which men will live and die. And the great wars of the civilized world have been fought, first, over the ideas and aspirations of the church and, later, over the ideas and aspirations of the national state.

The challenge of our time is not wholly concerned with our ideas of the church nor of the national state, but about our belief in man. And this is the area where the problems of human rights and human relations are joined—where the arts of government and education are tested. or this is a struggle not only between nations, but within nations, within communities, and often even within the heart of the single individual.

To paraphrase one of America's leading poets, it is necessary to believe in man, not only as the Christians and Jews believe in man—out of love—but also as the Greeks believe in man—out of pride.

WHAT MAN IS NOW IMPORTANT

The objective viewpoint is that of believing not only in what man may become in this life or another, but in what he is now; in his fundamental worth and dignity and in the place he occupies in this world.

It is the lack of faith in the essential value of man that corrupts and weakens democracy.

It is doubt in the worth and dignity of man that opens the way to tyranny.

And it is contempt for man that causes subjugation and slavery.

Thus, the question of human relations is not primarily an issue of race relations or group relations, but, rather, is a question of the response we make to the proposition that man, merely because he is the child of our Creator, has a fundamental worth and value. Today this proposition, unfortunately, is questioned or qualified by some in the United States largely in terms of race or in terms of religion.

But this has not always been so. In times past, it was qualified by some in relation to one's national origin—Irish, Italian, Polish, et cetera—or whichever was the most recent immigrant group. Earlier, the qualification had reference to the form of worship which one professed. Roger Williams, history will verify, removed himself to the wilderness of Rhode Island in order freely to assert the fundamental right of every man to his own form of worship.

The history of the American ideal has thus been to advance the fundamental belief that man—as man—is a creature of worth and dignity and that all men—as men—partake of these qualities.

The essential human characteristics which we cherish are in all men and women, and we can no more create an aristocracy of human dignity than we can create an aristocracy of human love or human imagination or any of the other essential human characteristics.

Thus, ladies and gentlemen, the challenge of bettering human relations is one of instilling in our hearts a renewed belief in the humanness of all mankind.

Commemorative Postage Stamps

EXTENSION OF REMARKS
OF
HON. THADDEUS J. DULSKI
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 27, 1960

Mr. DULSKI. Mr. Speaker, under leave to extend my remarks, I wish to include an address which I had the pleasure to present on Saturday, April 9, 1960, to the Stamp Society, Adam Plewacki American Legion Post No. 799, Buffalo, N.Y.

The address follows:

Mr. Chairman, distinguished guest, ladies, and gentlemen, first, I should like to say that it is a great privilege and a pleasure for me to be here tonight to take an active part in this great exhibition of philatelic material. I am further honored to be designated an honorary chairman of this event, which is an outstanding civic and community achievement that brings the praise and good wishes of our citizenry to the Plewacki Post for the foresight, planning and the diligent efforts and energy expended to insure the repeated success of this affair.

Since entering Congress, I have become extremely interested in philatelic matters and have diligently labored to obtain for our fair city of Buffalo, the honor of being designated a "first day of issue" city for a commemorative stamp. We had a strong case developed on the Seaway stamp until the State Department got involved in negotiations with Canada, and the visit of the Queen, with the result that Massena, N.Y., stole the designation which I felt was rightfully ours, as the first major U.S. port on the Seaway. Nevertheless, I do not discourage easily, and I have incessantly barraged Mr. Rohe Walter, Special Assistant to Postmaster General Summerfield on philatelic matters with Buffalo's case for this honor and have had our plea presented before the Stamp Advisory Council.

At the present time, I have written assurances that every consideration will be given to the designation of Buffalo as a first day site for a stamp in the near future. The Post Office Department is very much aware of the fact that too many stamps are placed on first day sale in Washington, D.C., and it is their sincere desire to spread these first day cover designations to encompass all of the States in accordance with the belief that our postage stamps represent and belong to the Nation. From a philatelic viewpoint, Buffalo has a strong case. Our city has not been honored by a first day of issue designation in over a quarter of a century and the only first day issues ever to emanate from this city were shared with a half dozen other cities back in the early 1930's when covers had not reached the proportion of today's importance in the philatelic hobby.

We have in our city many fine active philatelic organizations that have indicated to me their strong support for such a designation for Buffalo, and this nucleus, combined with a strong civic and community effort, would make any such designation a noteworthy event.

I have held a series of conferences with the Post Office Department in Washington and they assure me that the Post Office recognizes that Buffalo—through circumstances of historical association—has not been honored by a first day sale in approximately a quarter of a century. They further agree with me that Buffalo, in addition to its importance as a city, is noted for its strong philatelic connotations. I can assure you here tonight, that these conferences shall continue without fail until such time as we shall be able to see the postmark of our fair city impressed upon a cachet envelope on the first day of issue of a new stamp emission.

It is significant to note that this fourth annual Plewacki Stamp Show is honoring and paying tribute to Ignace J. Paderewski. It was only this week that I had the opportunity to pay my respects at the grave of Poland's famous musical artist, statesman, soldier, and freedom fighter. It may interest some to know that he is buried in Arlington National Cemetery by special authorization of President Franklin D. Roosevelt. While standing at his final resting place, I paused to reflect and pay my own personal tribute to the life and deeds of this great and wonderful man who made such generous contributions to his beloved homeland, Poland, and of his contributions to the world in the fields of music, politics, and as an unceasing fighter for freedom in war and in peace.

In keeping with the spirit of Plewacki Post in honoring Paderewski by this fine exhibition, I have added my voice to the nationwide demand that he be honored in the special champion of liberty series as a man who ranks high in the esteem of his countrymen and freedom-loving people throughout the world.

The Post Office Department has evidently heeded this mounting crescendo of voices asking for this honor, and it is now an open secret that on November 6, 1960, Ignace Paderewski will be honored by a 4-cent and 8-cent commemorative issue in the champion of liberty series.

This stamp will not only pay just tribute to a great man, but will also pay homage to the many sons of of Poland who keep alive the fires of liberty in their own subjugated land.

To return to the subject of philately or its more common name of stamp collecting, although not a collector myself due to time limitations, I have learned a lot about your hobby and met many, many interesting people who are in it. Our Post Office issues 24 billion stamps each year, and it seems that a good number of you are dedicated to the acquisition of the entire 24 billion for your own personal collections, leaving none of the general public who may want to mail a letter or two. In my indoctrination into philately, I have visited the Philatelic Agency in Washington with its very fine exhibits and also the Smithsonian Institution, which has a stamp collection that would make any collector green with envy. I have cooperated with the many persons connected with this fine hobby and shall continue to make available the complete services of my office for the advancement of this hobby, with its accompanying educational values and expansion of knowledge of our national heritage as expressed on our postage stamps.

Distinguished Service Award to Hon. A. L. Miller

EXTENSION OF REMARKS
OF
HON. PHIL WEAVER
OF NEBRASKA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 27, 1960

Mr. WEAVER. Mr. Speaker, with real personal pleasure I am happy to report to my colleagues that the Department of the Interior has just recently given splendid and richly deserved recognition of a long and outstanding career of public service compiled by a former Member of the House of Representatives.

For 16 years Dr. A. L. Miller ably represented the Fourth Congressional District of my home State of Nebraska. He is now serving with distinction in a difficult and challenging assignment as Director of the Office of Saline Water. In well-deserved recognition of his leadership, example, and administrative accomplishments to successfully expedite and accelerate this vital program, he has received Interior's highest honor, its Distinguished Service Award.

I know that all the Members of the House of Representatives, his many friends and acquaintances, join with me in congratulating Dr. Miller.

Under unanimous consent I include in the RECORD the citation which accompanied the award:

THE SECRETARY OF THE INTERIOR,
Washington.

CITATION FOR DISTINGUISHED SERVICE—ARTHUR L. MILLER

In recognition of more than 20 years of public service, and for outstanding administrative accomplishments as Director of the Office of Saline Water, Department of the Interior.

Dr. Miller was appointed Director of the Office of Saline Water in February 1959. In this position he is directing, under the supervision of the Secretary, a vitally important research and demonstration plant program for the development of low-cost processes for converting saline water, both sea and brackish, to fresh water. Through his leadership he provided the program with a new sense of purpose and direction, accelerated the pace of research and development, instilled enthusiasm among the staff, obtained the cooperation of public and private organizations, and created an improved understanding and appreciation for the program objectives in the public mind. Dr. Miller streamlined the administrative procedures for the program and effected a reorganization of the Office to carry on the basic research program and meet the demands of the recently enacted demonstration plant phase of operations. On the basis of his recommendation, the selection of processes for saline water conversion demonstration plants was completed by the Secretary ahead of a severe schedule set forth by the Congress in the authorizing legislation. Site selections have also been accelerated under conditions of utmost priority and widespread competition among the States and communities. Dr. Miller was instrumental in obtaining cooperative agreements with several States and concluded an agreement with the Atomic Energy Commission for a joint nuclear reactor-saline water conversion project. Prior to his appointment as Director, he served with the Nebraska Unicameral Legislature, and as the Nebraska State health director. On November 3, 1942, Dr. Miller was elected to the 78th Congress of the United States and was reelected for seven additional terms. He served on the Public Lands Committee and the Interior and Insular Affairs Committee of the House. In recognition of his splendid contributions to the Office of Saline Water and to the Department of the Interior through his leadership, example, and enthusiasm, Dr. Miller is granted the highest honor of the Department of the Interior, its Distinguished Service Award.

FRED A. SEATON,
Secretary of the Interior.

The Needs of the Elderly

EXTENSION OF REMARKS
OF
HON. THOMAS C. HENNINGS, JR.
OF MISSOURI
IN THE SENATE OF THE UNITED STATES
Wednesday, April 27, 1960

Mr. HENNINGS. Mr. President, how to assist our elderly in meeting their often times high medical expenses is a vexing problem of long standing. It is a problem which must be faced.

I have not at this time taken an inflexible position on any one particular plan. The appropriate congressional committees are thoroughly studying the various proposals and I am sure a constructive program will be presented.

Recently I sent a press report to the newspapers of my State commenting on many of the proposals before Congress directed toward aiding the elderly. The Charleston (Mo.) Enterprise-Courier printed an editorial challenging the validity of cost estimates for the Forand bill. I replied to the editorial and the editor of the Enterprise-Courier, Art Wallhausen, then wrote and printed a letter in reply to mine. I ask unanimous consent that the appropriate portion of my press report, the editorial "We Challenge a Senator," my letter to the editor and his letter in response be printed in the CONGRESSIONAL RECORD so they will be available to other Members of Congress.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE NEEDS OF THE ELDERLY

(By Senator THOMAS C. HENNINGS, JR.)

Americans are living longer and, as each year is added to the average American lifespan, the special problems of the elderly become of more concern to the entire Nation. To solve some of these problems, Congress this year is expected to make important changes in laws which apply to those older citizens who draw pensions or receive other forms of public assistance.

Medical expenses for persons drawing social security benefits would be paid in part under one plan being considered by Congress. This limited health insurance plan could be financed by an increase of only one-half of 1 percent in the current Federal payroll tax.

Removal of the age limit at which a person may be pensioned as totally and permanently disabled is also being considered. At the present time, a person must be at least 50 years old before receiving disability payments. Congress is expected to vote to remove this age restriction. If so, some 225,000 persons will benefit.

Congress is also expected to raise the minimum pension for persons drawing social security benefits. Now fixed at $33 a month, the minimum social security figure will probably be raised to about $40.

Another plan under consideration would require Federal standards for nursing homes serving the elderly. Grants-in-aid would be available to nursing homes which met these proposed standards. Another proposal would increase Federal support for housing the aged. An increase of 10,000 units a year has been suggested in public housing measures for the older person. It has also been suggested that nonprofit organizations be provided with loans for building low-cost homes for the aged. Still another suggestion calls for the creation of a U.S. Office of the Aging.

A number of pending bills would raise the ceiling on how much outside income a recipient of social security could earn. Rising living costs have been most burdensome on the elderly, and the $1,200 ceiling on earnings prevents many pensioners from working as much as they are able.

Support for revision of laws dealing with or affecting the Nation's elderly is bipartisan. Only the scope of the various programs is questioned. The aged may be sure the Congress will make every attempt to solve their particular problems.

[From the Charleston Enterprise-Courier, Feb. 25, 1960]

WE CHALLENGE A SENATOR

The current press report from Senator THOMAS C. HENNINGS, JR., outlines several plans being considered by Congress to again liberalize social security coverage.

One of these foot-in-the-door plans to finance health insurance could be financed by an increase of only one-half of 1 percent in the current Federal payroll tax.

We doubt very much whether the Honorable Mr. HENNINGS has bothered to investigate the cost of a medical-aid program for the elderly and needy. We also doubt very much whether the flat statement regarding financing the program with a tax of one-half of 1 percent can be backed up by figures based on life insurance statistics. It looks and sounds more like another sop concocted during a hectic political year to attract and hold votes.

A half dozen nations with similar plans wish to high heaven that they could rid themselves of this or similar aid plans. But the good old U.S.A. insists in experimenting—especially during a political year when the scramble for votes transcends common sense. We defy Senator HENNINGS or anyone else to come up with facts which will support the claim that this program can be financed with a levy of one-half of 1 percent.

SENATOR HENNINGS SAYS ONE-HALF OF 1 PERCENT WILL CARRY MEDICAL PROGRAM

MARCH 17, 1960.

Mr. ART L. WALLHAUSEN,
Charleston Enterprise-Courier
Charleston, Mo.

DEAR ART: The following comments are with reference to your editorial of February 25, in which you question whether the costs of medical insurance for the aged can be provided at the price estimated by sponsors of legislation to establish such a program. Let me say at the outset that congressional study of such legislation is still in the preliminary stages, although there is a wide recognition of the need of the aged for some kind of assistance with their heavy medical expenses.

You will recall that in my press report on this subject, I reported that the costs of certain limited health insurance for the aged could be financed by an increase of one-half of 1 percent of the social security payroll tax. This is the estimate of sponsors of the Forand bill, H.R. 4700, which would provide limited hospital, nursing home, and surgical benefits for recipients of social security payments. You are quite right in pointing out that the cost estimates for such a program, which involve guesses as to the future wage levels, size of the labor force, medical prices, and utilization of medical care, are controversial. The most accurate prediction would be for the immediate year ahead. In response to a congressional request for a study by the Department of Health, Education, and Welfare of the feasibility of hospitalization insurance for social security beneficiaries, HEW Secretary Flemming estimated that the cost of the Forand bill in 1960 would be approximately one-half of 1 percent of the taxable payroll.

In hearing last July before the House Ways and Means Committee, the following exchange is recorded:

Mr. FORAND. Now, Mr. Secretary, do the actuaries' estimates give any justification for claims that the cost would be $2 billion to the program the first year?

Mr. FLEMMING. The answer to that is "No." Our actuary's estimates, as far as the first year costs are concerned, were $1,120 million (or 0.53 percent of taxable payroll).

However, Mr. Flemming estimated that over the period from 1960 to 2050, a higher

average tax would be required: approximately four-fifths of 1 percent. Needless to say, it is important that the cost estimates be as accurate as possible, and you may be sure I shall give this question careful attention if legislation such as the Forand bill is passed by the House and forwarded to the Senate.

In the meantime, variations of the Forand bill and alternative proposals to strengthen private health insurance or State programs are being studied in the Senate. I trust you feel free to give your views on these bills as congressional consideration of them continues.

With best wishes, I am,

Sincerely yours,

THOMAS C. HENNINGS, Jr.

WE REPLY TO SENATOR HENNINGS

Senator THOMAS C. HENNINGS, Jr.
Senate Office Building,
Washington, D.C.

DEAR TOM: Some genius several years ago (under Roosevelt) struck oil, rich oil, when he dreamed up the checkoff system of collecting taxes on payrolls.

Since that time you and all the other so-called leaders in Congress have been working overtime trying to dream up additional taxes (deductions from employers).

The Forand bill seeking medical aid for the aged is just another example.

The tax, you say, will be only one-half of 1 percent, but you must remember that this one-half of 1 percent is in addition to the 6 percent already being collected for social security, and the 2.7 percent already being collected for unemployment compensation, and the 1 to 11 percent being collected to defray the cost of workman's compensation insurance. My God man, do you really believe that this can go on and on, or is this part of a vicious scheme to drive more and more of small guys to the wall?

You might also recall that our sales tax in Missouri began as a very low one-half of 1 percent tax. Then the rate was doubled, and doubled again. It is now 2 percent—and each legislature toys with the idea of upping the rate.

The income tax (you've probably heard of it) also started out as a very low tax. In fact, it was considered a joke for many years—the rates were so low. Now my taxes start at 52 percent, and they can go to 91 percent.

England, Sweden, and several other countries have tried medical aid plans very similar to those embodied in the Forand bill—and the results have been disastrous to the national economy.

However, it is a safe assumption that Members of Congress, including yourself, do not have time to read current history. Congressmen are so all-fired busy dreaming up more vote-getting schemes that time simply does not permit boning up on history—or current events.

TOM, for goodness sake, keep at least one foot on the ground. We in business can't make it as fast as you boys are spending it, and we do not have the borrowing capacity of the Federal Treasury. We, unfortunately are required to pay our bills out of income.

Granted that some old folks do need help. In our small county of Mississippi, the welfare people are currently spending $1,800,000 per year to help old folks and others. But please also grant the fact taxpayers are also in need of some help—help and relief from any additional socialistic schemes which have discouraged initiative, and stunted expansion or new ventures. My payroll simply can't stand any more taxes, and I can cite 50 or more of my friends who are looking for a way out. They are sick to the death of congressional meddling. Most of them would gladly settle for a Mom 'n Pop roadside stand with no payroll worries, and no additional taxes.

So you believe HEW Secretary, Mr. Flemming? And who is Mr. Flemming? Is he an authority in the field of socialized medicine? Is he a recognized authority in the legitimate insurance field? On what does he base his "guesstimate"? On facts or on some figure plucked out of dry air?

The key to Mr. Flemming's testimony last July before the House Ways and Means Committee is one word. That word is "estimates." His actuaries "estimate" the cost for the first year will be 0.53 percent of taxable payroll.

Senator TOM you will have to excuse my old-fashioned, idiotic thinking, colored and prejudiced no doubt by the fact that I have spent the past 30 years in the game of balancing income against expenditures. My thinking has no doubt been influenced by such mundane things as customers and customer reaction to higher prices—prices raised to take care of higher payrolls, higher operating costs, increased taxes, and the like. Such things as buyer resistance to higher prices. They buy less, and that means that there is less money in the till come nightfall with which to pay wages, operating costs, and taxes.

In other words Senator TOM, I admit to being a blithering idiot who never expects to reach the ethereal plane of your inspired thinking or that of your advisers.

However there are other idiots like myself who find it very difficult to agree with Mr. Flemming and his cost estimate of one-half of 1 percent.

You take the old-fashioned idiots who are known as the Insurance Institute which has been in business as many years as Mr. Flemming is old. They insist that legitimate insurance administrative costs alone for similar medical-hospital programs average 3⅛ percent.

Another old line insurance firm spends 1.9 percent on administrative expenses in the field of hospitalization alone.

You take the unemployment compensation figures which certainly are available to Mr. Flemming and to yourself. Uncle Sam collects three-tenths of 1 percent for administrative costs in that very limited field.

No unemployment claims are paid out of the three-tenths of 1 percent, and yet Mr. Flemming insists that his medical aid program for the needy aged can be administered, and pay all costs out of the remaining two-tenths of 1 percent.

Only a man with the vast knowledge of a U.S. Senator could even hope to break even in that situation. Ordinary folks like myself and several million other employers know from experience that it simply will not work.

No, Senator TOM, one-half of 1 percent is merely an opener, a wedge or foot in the door. Actuarial figures which are available both to you and to Mr. Flemming, place the cost nearer 4 to 5 percent of the taxable payroll than one-half of 1 percent, or four-fifths of 1 percent.

This much is true, and in that Mr. Flemming is correct. One could start the program on a tax of one-half of 1 percent, but the program would grow and grow and grow as additional Congresses seek to garner more and more votes in the field of the needy aged.

Within a few years the rate would necessarily rise to 4 or 5 percent, rather than one-half of 1 percent to carry the vast army of freeloaders who have learned how to milk the ADC and other welfare programs.

TOM, the time has come for some of you leaders in Congress to begin to start to use your God-given common sense.

Up to now you have not exhibited even symptoms of ordinary intelligence or horsesense.

I also dare you to print this reply to your letter in the CONGRESSIONAL RECORD, or to let other members of your committee read it.

Nice hearing from you.

ART L. WALLHAUSEN.

Financing Health Care

EXTENSION OF REMARKS
OF

HON. PAT McNAMARA

OF MICHIGAN

IN THE SENATE OF THE UNITED STATES

Wednesday, April 27, 1960

Mr. MCNAMARA. Mr. President, during recent hearings by the Subcommittee on Problems of the Aged and Aging—on the subject of financing health care—we received many excellent statements.

Most of them added more documentation—to the inescapable conclusion—that there must be a system of national health insurance for our elderly citizens.

Among those who testified was one whose name has become almost a watchword in the field of health insurance.

I refer, of course, to the Honorable AIME J. FORAND, Representative from Rhode Island.

Representative FORAND is the author of H.R. 4700—which is more popularly known as the Forand bill—and about which I have received several thousand letters in the past few months.

I am sure that, despite the opposition of the administration and others, we will enact into law in this country a program of health insurance for the elderly—and that it will be based on the social security system.

But whatever form the final law takes we will all owe a debt of gratitude to Representative FORAND for the work he has done in this area.

I ask unanimous consent that the testimony given by Representative FORAND before the Subcommittee on Problems of the Aged and Aging be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

Senator MCNAMARA. We hate to have Congressman FORAND with us and not give him a chance to say a few words for the record and maybe clear up some of the misunderstandings about his legislation.

Congressman FORAND, do you want to talk from here or would you prefer to sit at the witness table?

Mr. FORAND. I will go right down there and face you, Senator.

Senator MCNAMARA. All right, fine.

If there is an expert in this area, it is you. We know of your study and are certainly very happy to have your comments for the record. Go right ahead.

STATEMENT OF THE HONORABLE AIME J. FORAND, U.S. REPRESENTATIVE FROM THE STATE OF RHODE ISLAND

Mr. FORAND. Mr. Chairman and Senator, I am one of those who is not a newcomer to the problem of the aged and I think, for the record, I should say that I have been interested in this problem of the aged since I first went to my State legislature which was in 1923 at the time that the Fraternal Order of Eagles started their movement for old-age pensions, and I have been interested in

it ever since. I am one of the few Members of this Congress that have had experience doing welfare work where again the problem of the aged was brought very, very vividly to my attention, during the almost 2 years that I spent as chief of the Division of Soldiers Relief in the State of Rhode Island and commandant of the Rhode Island Soldiers Home.

Now, I had not expected to take the stand this morning but I read this morning's papers and also I have heard the statements made here today and I think there are a few points that should be cleared up for the record.

First of all, I would like to impress upon all the news media, the newspapers, radio and television, that when they say the program I propose would be Government paid, they are all wrong. It would be paid by those who eventually would be the beneficiaries with the exception of that small group that would be picked up upon inauguration of the program, because what I propose is a self-sustaining program the same as the rest of our social security setup and, while the funds would be handled by the Federal Government just as other social security funds are handled, the money would come from the beneficiaries, the workers and employees and not out of the general fund of the Treasury.

When I introduced my bill in 1957, I made the statement which I have repeated several times since then, that I was not wedded to the language of my bill.

I was offering it as a basis from which to work because I was sick and tired of hearing a lot of words and finding that no action was taken to solve a most pressing problem.

I do not intend to go into the details of the plan. I think it has been explained time and time again and in order to conserve the time of the subcommittee, I shall gloss that over for the moment.

One thing that seems to have escaped the people in view of the fact that we talk about some 12 or 13 million beneficiaries who would immediately receive benefits under my plan is the fact that, while this would take up this group, it is providing an opportunity for the younger people who are working, to be able to take care of paid-up insurance so that when they reach retirement age, they will be the beneficiaries of the system. Not only would it be of great help to these individuals now, particularly those who have aged parents, but the younger fellow, 25 or 35 or 45. The young married man does not know when he is going to leave this world. He does not know how many children besides his widow he will leave behind him. These are people who would benefit as a result of this. He would be providing, through the payment of this insurance, for the care of these others who he would leave behind.

Much has been said about how much this would cost to the individual particularly. So much money would be taken out of his pay envelope.

Well, the truth of the matter is when you figure at the highest possible figure which is a wage base of $4,800 now, it would take only 25 cents a week, the price of a pack of cigarettes. How many people are drawing $4,800 a year in wages? A great many, but not all by a long shot. You know, and I know that there are many who are in the $2,000 and $3,000 bracket. Those individuals who have an income of $2,400 would only pay about 12 or 13 cents a week, and where could they buy this type of coverage at that price?

The commercial insurance people, of course, are opposed to my bill. But I think they are blind. I think they fail to see the point. And, as Senator HUMPHREY said a few moments ago, if this bill went into effect, it would permit these private insurance companies to cut their premiums and increase their coverage because they could eliminate the high risk, those people 65 or over.

They are missing the boat now just as they thought when they were fighting the original social security bill.

Now, the doctors are all opposed to it—I should not say "all"—let me correct that, because I have so many letters in my office from individual doctors to the contrary—many, many doctors have written to me that they are members of the AMA but the AMA is not speaking for them in this matter. But the AMA, which is supposed to represent the doctors, says that the hospitals will be overcrowded if this bill should become law.

Well, Mr. Chairman, I say to you that if the hospitals are to be overcrowded as a result of this, there are two reasons for it: One is the great need now existing for hospitalization and medical care of many of these aged people. The other is that the doctors would not be doing their job because under the provisions of the Forand bill, H.R. 4700, no one can get into the hospital unless a doctor says so. The doctor has to make all arrangements for him. He cannot stay in the hospital any longer than the doctor says he can stay there. So, that is all window-dressing.

Although the administration has not come up with any program as yet, they have done a lot of stalling over these many months. The truth of the matter is that they have been toying with several plans and according to the newspapers and according to Mr. Flemming, the Secretary of HEW, when he was before the Ways and Means Committee, their plan has to do with State and Federal cooperation in actually subsidizing the insurance companies.

That would mean about $400 million out of the Federal fund, out of the general fund each year, rather than from contributions made to the social security fund by those who would benefit.

Further, let us keep in mind, and I believe practically every Member of Congress has a good knowledge of the legislatures of the several States, how long would it take before these several States could work up a program to join this Federal program?

Why, it would take years. In fact, Mr. Chairman, it may interest you and the other members of this committee to know that only last week in the Ways and Means Committee of the House when we were considering public assistance, the question of medical aid to those on public assistance came up.

We tried to check. You will recall, I think it was in 1958, that Congress voted to make an allowance of, I believe it was $5 or $6 per claimant or per client under the public welfare for medical assistance.

To this day there are still 15 States that do not have a medical program under public assistance. Yet they are drawing the money from the Federal Government and we do not know how they are using it.

Now the administration has been talking about studies. They have made so many studies that they meet themselves going back. They have not come up with any program. They do not have one. And I repeat what I have said before: If my plan is not the best plan to take care of this situation, let someone come up with an alternative that is better and if they have it, I will accept it.

Now, the doctors talk about socialized medicine. This would not be any more socialized medicine than the payments already being made under social security. The truth of the matter is that this would operate on the same basis with the Government paying the bill as Blue Shield operates today. The Blue Shield is a doctors' organization. They are the ones who control. They are the ones who set the fees. They are the ones who agree to accept as total payment for a bill the amounts specified in their schedules providing the income of the individual is below a certain level.

This would operate in the same way. Sometimes I feel rather sick at heart to realize how some of these doctors feel and seem to be closing their eyes to the medical needs of the people and just thinking of their pocketbooks. I have one in my own entourage of relatives who had to scrape to go through medical school. Like all other doctors, he got the benefit of the public schools being paid for out of tax money. In addition to that, some employers, God bless them, were kind enough to provide him with employment at perhaps much more than he deserved as far as the wages were concerned, because they knew he wanted to study medicine.

And today, less than 10 years after he has graduated, he owns his own home. He owns a house where he has his office. He has three cars in his family and he is one of those who is out fighting against the Forand bill.

He has forgotten that his own father could not afford to put him through school. His father was working in a cotton mill for low wages. His mother was working in a hospital as a scrub woman, but he has forgotten all that and I say to you, that he is one that represents the thinking of many of our doctors today, unfortunately.

The doctors in their paper, the AMA News, a few weeks ago had an editorial urging their State medical groups to publicize the fact that no one who needs medical attention need go without it because he is without funds. Well, it happened that either on the same day or within a week of the time that editorial appeared in that paper, I received a letter from an aged couple out in the Middle West. The man is 78. The woman is 72. The man cannot work at his age, is rather feeble. His wife was taken to a hospital. The doctors said there was no hope for her. There was no need of keeping her there. He took her home and he is taking care of her. Their income is $98 a month under the social security system. Yet, with his letter, he enclosed two letters from collection agencies, dunning him for the payment of $15 due to a hospital and $40 owed to a hospital.

So, I say to you, Mr. Chairman, no matter what the doctors tell me, I prefer the evidence, the concrete evidence I have in my office. And, if you were to come into my office, I could show you a stack about a foot high of letters containing hospital bills and medical bills that have been paid by the individuals.

Only yesterday, I received a letter from a lady in my own district. She is 78 years of age and has been unable to work for a long time. She had a little home of her own, five room house. She has had to borrow money on that home in order to be able to pay her medical expenses. And she sent me a list of the medical expenses she had been paying—and the medicines she had been buying in the drugstores at these exorbitant prices they are charging for drugs today and told me her home had been taken away from her. All she has left in this world is $100. She had to give up her insurance policies. She is now going on public relief and says she is praying that something along the lines of my bill would pass so it might be of some help to her, but if not for her, because she does not expect to be in this world for long, then for others who find themselves in the same predicament.

Mr. Chairman, I have taken much more time than I should. I hope I have cleared up a few points of misunderstanding. Thank you very much.

Senator MCNAMARA. We are happy to have you here, Congressman.

I think you have perhaps presented us with one of the finest statements we have heard so far in favor of doing something

about this very serious problem we are all facing. You did not take too much time. I am sure we can listen to you all day in what you say on this subject.

Mr. FORAND. You are very kind, Senator. That is something I feel down here, in my heart.

Senator MCNAMARA. I am sure of that.

Mr. FORAND. There is so much to be done in this field. We have got to get going. Stop talking and start acting.

Senator MCNAMARA. Senator, do you have any comment or question of the Congressman?

Senator BRUNSDALE. I think we owe a debt of gratitude to Congressman FORAND for coming over here and talking to us. Thank you.

Mr. FORAND. Thank you very much. If I may be excused, I will go back to my own business.

Senator MCNAMARA. Surely. Thank you again.

Let's Pay the Postman and Civil Servants, Too

EXTENSION OF REMARKS
OF
HON. CRAIG HOSMER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 27, 1960

Mr. HOSMER. Mr. Speaker, almost every year Congress is called upon to deal with the problem of postal and civil service workers' salaries lagging behind the cost of living and creating substantial hardships. A great furor arises, much time is consumed and trouble created for Congress and Government employees alike. Eventually some "better late than never" pay scale revisions are made which like as not are behind the times before they are written into law.

Just last week administration spokesmen opposed the passage of pay raise legislation this year in testimony before the House Post Office and Civil Service Committee. A study is being made, they said, which will not be completed before September, and thus the whole matter should go over until next year. I do not agree with this argument for the reason that there is an apparent need now for upward revisions in these pay scales. What the study will show, undoubtedly, are many discrepancies between pay scales for various Federal employment which should be adjusted and equalized. This can be done as well after current legislation is enacted as before. Savings clauses could be written into present bills to obviate this kind of problem.

While discussing this subject it is well to point out that obvious inadequacies in our present procedures for handling Federal salary scales are responsible for the never-ending inequities which consume the time of Congress and everyone else concerned in dealing with them. These can and should be overcome by appropriate administration recommendations followed up by prompt congressional action. Present procedures for adjustment of pay rates of so-called "blue-collar" Government workers point the way. These are Federal employees such as carpenters, machinists, and other craftsmen whose hourly wages are tied to the comparable wages of their counterparts engaged in similar civilian employment in the same area.

At intervals area wage boards determine prevailing rates of pay in a geographical area and Government pay rates are adjusted accordingly. No lobbying is involved; Congress does not have to pass a law; substantial justice is afforded with regard to pay scales promptly and fairly.

There is no good reason why a similar system, with all its attendant advantages, could not or should not be worked out for postal workers and almost all civil service workers.

One factor that so far has blocked this kind of legislation appears to be the negative attitude of various national associations of Government and postal employees. They argue that such a system might result in lower size pay checks for their members in some small city, for instance, as compared to a member doing the same job in a metropolitan area. They say it is not fair. They demand that all be paid the same.

But should they? Or more properly, in fact, are they? The pay check of a man in the small town where living costs are low represents much more actual, real pay than a pay check for the same amount handed to a man who lives in the high-cost-of-living metropolitan area. I think the unfairness of that proposition and the unsoundness of the position of these national organizations is quite apparent. I think the wisdom and fairness of tying flexible wage rates to prevailing conditions in an area of the country is certified by the fact that it is now done both in private industry and for Government blue-collar workers.

Let us do with the postal workers and the civil service workers what sound principles and common sense indicate we should do. Let us modernize our Federal pay procedures to meet the needs of the times and of the places where our public servants work.

On the subject of current pay bills, the Long Beach Independent-Press Telegram recently carried the following approving editorial:

[From the Long Beach Independent-Press Telegram, Apr. 21, 1960]

LET'S PAY THE POSTMAN

With airmail zooming from coast to coast in 4½ hours and with facsimile transmission in the offing, the U.S. Post Office is keeping pace physically with the jet age. Sadly, it still pays its employees a horse-and-buggy wage.

In 11 years postal workers have received four pay raises totaling 52½ cents an hour. A Long Beach postal clerk in the top pay grade with 10 years experience takes home $159.16 to his wife and two children. Every 2 weeks, that is.

Pay for postal workers ranges from $2 to $2.42 per hour. Figure that up at 40 hours a week. While most of the rest of the economy has been rising on a spiral of wage and price hikes, the postal workers have been practically standing still.

We have supported the postal workers' fruitless efforts in recent years to get a decent pay raise. And we support the current congressional move to give post-office employees a 10-percent pay increase.

Every time a postal pay proposal comes up in Congress, the argument is heard that pay shouldn't be increased unless there is also a substantial increase in revenues.

Although we agree that the Post Office should be put on a sound financial footing, we consider it unfair to tie a Government employee's pay to the price of postage stamps just because he happens to work in the post office.

These workers are getting starvation wages. Congress should give them a solid increase, and the President should sign it into law.

Truth About Farm Income

EXTENSION OF REMARKS
OF
HON. CHARLES B. HOEVEN
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 27, 1960

Mr. HOEVEN. Mr. Speaker, the farm income picture gets twisted around once in awhile, especially when statistics are not handled correctly and accurately.

We have all heard the statement that statistics can be used to prove almost anything, but frankly, I was very much surprised when I read a full-page advertisement appearing in the Wall Street Journal on April 22, 1960, regarding farm income. This advertisement made several statements which I feel do not accurately reflect the current farm income picture.

First of all, the headline on the advertisement was "In 1959 Average U.S. Family Income, $6,470; Average U.S. Farm Family Income, $9,978." The point that immediately struck me was the figure of $9,978 which was alleged to be the U.S. farm family income. In the accompanying tables, though, this income was described as gross farm income. Needless to say, gross farm income is not the most important of the various measuring sticks of income. When all is said and done a farmer, like any businessman, is concerned with net income, the final result of his gross income minus his many production expenses.

I probably would not have quarreled with the advertisement if at least the gross income figures quoted were accurate. They were not. The accompanying chart used in the advertisement, indicated that 1959 gross farm income was $46.3 billion. The latest figures that I have been able to obtain from the Department of Agriculture show that 1959 realized gross farm income was $37 billion, over $9 billion less than that indicated by the advertisement. The Department of Agriculture's calculation of gross farm income includes cash income from marketings, Government payments, value of home consumption, and rental value of dwellings.

What is really the most objectionable and misleading aspect of this entire advertisement, Mr. Speaker, is the impression it gives of farmers never having it so good. This is just not true. We who are close to agriculture know that the farmer is facing many economic difficulties and we are trying to do something about them. This type of misleading material does not help.

In order to keep the record absolutely straight, I would like to cite an excerpt from the latest "Farm Income Situation" published by the Department of Agriculture on April 25, 1960.

On 1960 farm income the Department says this:

Developments since last fall have enhanced farmers' income prospects in 1960. The index of prices received by farmers has risen 5 percent since mid-December—mainly because of higher prices for hogs, cattle, chickens, and eggs—and is now only slightly below a year ago. Prices of farm products during the remaining months of 1960 are likely to average about the same as, or even slightly higher than, the corresponding months of 1959. Consequently, if growing conditions this year are about average, cash receipts from a continued heavy volume of farm marketings may equal those of 1959. Some further increase in farm production expenses seems likely, however, so realized net income of farm operators from farming may fall slightly short of the $11 billion realized last year.

The "Farm Income Situation" also lists average net income of farm operators per farm in 1959 at $2,547. This figure is much closer to the truth of farm income than is th $9,978 figure cited by the advertisement, and remember, the farmer must still pay for all his living expenses and capital improvements out of this income.

In conclusion, Mr. Speaker, let me say that it is my sincere hope that we can soon get at the job of doing something constructive about this farm income situation—and by that I mean, first, getting straight what the real situation is, and second, approaching the problem in a forthright and honest manner.

The Student Loyalty Oath

EXTENSION OF REMARKS
OF
HON. JOHN F. KENNEDY
OF MASSACHUSETTS
IN THE SENATE OF THE UNITED STATES
Wednesday, April 27, 1960

Mr. KENNEDY. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a most thoughtful and well-reasoned article by our colleague, the Senator from Minnesota [Mr. MCCARTHY]. In this article the Senator from Minnesota analyzes with both historical and philosophical understanding the case against the inclusion of special loyalty oaths in educational legislation.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A QUESTIONABLE TREND—THE STUDENT LOYALTY OATH

(By EUGENE J. MCCARTHY)

The National Defense Education Act of 1958 requires a loyalty oath from those who apply for loans and an affidavit disclaiming belief in any organization which advocates overthrowing the Government by unconstitutional means, or their support of any such organization. A proposal to modify the loyalty oath provision of the act is again moving through the committees of Congress.

Last year Senator KENNEDY brought to the floor of the Senate an amendment which would have repealed both the oath and the affidavit. Speaking for his committee, he accepted on the floor of the Senate an amendment restoring the affirmative loyalty oath. However, even this modified proposal was rejected by the Senate.

Now again the opposing lines are being drawn. On the one side are various veterans' groups, patriotic societies, and individuals who argue that no one should hesitate to take a positive oath of allegiance to the country, and that no loyal young American should hesitate to declare his anticommunism. On the other hand, there are those opposed, including some spokesmen for the administration, presidents of colleges and universities, professors, and others who argue that both the oath and affidavit are unnecessary, ineffective, or discriminatory. The middle ground between these two positions is also occupied. In this area are those who for the most part are willing to accept the positive oath of allegiance, but are strongly opposed to the disclaimer affidavit.

To me the central issue in this controversy seems to be not one of loyalty or of security, but rather one of propriety.

No one can seriously believe that the basic security of the Nation will be drastically affected either by the continuation of the oath and disclaimer, by modification of them, or by removing them completely from the law. Certainly, no convinced Communist would hesitate to swear falsely. On the other hand, no one can prove that the integrity of the academic community will be destroyed if the oath and disclaimer are retained in the law. Our educational system is strong; students and educators are resilient; students have demonstrated that they can stand effectively against faculties; faculties seem to survive despite administrations; administrations seem to survive despite the regents, as in the case of State universities; boards of regents seem to survive despite State legislatures. All have had to put up with many difficult and disagreeable things.

What is called for in this matter is judgment on the part of Congress as to whether or not the general welfare of the country has been protected or advanced by the inclusion of the oath or affidavit in the National Defense Education Act. There are several general principles which must be considered here.

First, it is important that the history of the nature of oath taking be considered. The taking of an oath in Western civilization has always been considered as important. It has been an act of great religious as well as civil significance, and the use of the oath has generally been restricted to serious decisions.

Traditionally, oath taking has been surrounded with formal ritual, reflecting the solemnity of the occasion and the importance of the act both to the individual who took the oath and also to the community in the service of which it was taken. The oath taken by the President, the Vice President, the Members of Congress, the judges of the courts, members of the armed services, is a sign and public manifestation that they are making a serious decision; that they are performing a very special kind of act of dedication to the public welfare. It shows that they are taking up vital work of the community. The oath is a reminder to them of the importance of their responsibility, and it is also a public declaration to the people of the country that they are accepting these very special responsibilities.

The fundamental sanction of the oath is the name of God. It is not an unrelated declaration to say that no man should take the name of the Lord in vain.

Oath taking loses something of its significance and of its dignity and, I think, too, something of its effectiveness if it is used commonly or lightly, without preparation, without due cause, without adequate ceremony. The dignity of the oath is lowered when an oath is used in a routine manner, as a mere step in the paperwork of making a loan. The oath should not be taken without reflection, without identification with public service. We should go slowly in extending oath taking to cover minor relationships of the state and its citizens. But making a loan to a student to enable him to go to college is essentially a personal financial contract. It is my opinion that such action taken alone does not merit the dignity of an oath such as is now required in the National Defense Education Act. This proposal comes very close to putting a cash value on patriotism.

The second principle which has bearing on this decision is fundamental to democratic society and democratic government. Democracy implies an affirmation of confidence in the integrity and responsibility of the individual person. In a democracy it is assumed that an individual is innocent of crime unless he is proven guilty. As far as his general acts as a citizen are concerned, it should be assumed that he is loyal until he has been proved to be other than loyal.

Democratic government acknowledges that the individual has personal responsibilities; that he has certain unalienable rights inherent in his nature as a man, and because of this nature, he must be given a measure of freedom and also a measure of responsibility for self-discipline which is outside the power of any group or any institution, including the state. There is a place for loyalty oaths and for oaths of allegiance in democratic society, but such an oath should not be presented ordinarily in a negative context, but rather as a proud and public affirmation of dedication to duty.

The record of history shows quite clearly that it has been the tyrannies—the tyrannical governments, the absolute monarchs, the totalitarian states—those governments which were most uncertain of themselves or which were on the verge of collapse that have made oath taking a rigid, common, if not universal, requirement. In our own generation we need go back only to the Nazi period in Germany. Under that regime every time a citizen of Germany met another citizen on the street, he was expected to raise his hand in salute and say, "Heil Hitler." This was an oath of allegiance or at least a declaration of his allegiance to Hitler and to the Nazi movement. Certainly this was not evidence of a vital living society, of a society made up of free men, but rather it was a sign of uncertainty, of hesitation, and of fear.

Basically, these are the considerations that are involved in the current debate; not in the same degree, of course, but certainly in substance. For the absolute monarch and for the tyrant, oath taking becomes a device to harass, to threaten, and to control citizens. Loyalty oaths of this kind are no real contribution to the security of a nation of free men, but rather a manifestation of insecurity reflecting a fear of government officials and others who seek to intimidate and frighten others and thus to reassure themselves.

I do not suggest that the loyalty oath in the National Defense Education Act is of this order. If it could be isolated, it might well be said to be insignificant, but there is danger that it will establish a trend which will not do honor to democracy or to the traditions of the United States. To extend a requirement for loyalty oaths to more and more relationships which are relatively unimportant or which are personal or which are socially insignificant is to run the danger of undermining our traditions and at the same time of destroying confidence in democratic government and in democratic institutions.

This danger was recognized in the very beginning of our Nation. I am sure that Thomas Jefferson would not have been happy at the prospect of imposing loyalty oaths on students seeking loans to enter the University of Virginia when that institution was established, for he said that he regarded it as "based on the inimitable freedom of the human mind. For here," he said, "we are not afraid to follow truth wherever it may lead, nor to tolerate error so long as reason is free to combat it." And following the Revolution, even the conservative Alexander Hamilton opposed the expurgatory oath which was designed to weed out the Tories in New York. Hamilton said that this oath would have the following effect: "To excite the honest and conscientious and to hold out a bribe to perjury. * * * Nothing could be more repugnant to the true genius of the common law than such an inquisition * * * in the conscience of men."

There is an interesting report on the matter of oath taking in Clarendon's "The Rebellion and Civil Wars in England." According to this history, in the year 1639 when King Charles was proceeding against the Scots, it was proposed that all members of the English nobility make a special protestation of their loyalty and obedience to the King and disclaim and renounce any intelligence or correspondence with the rebels. Two members of the English nobility, Lord Say and Lord Brook, refused to profess their loyalty to the King. They said, "If the king suspected their loyalty, he might proceed against them as he thought fit; but that it was against the law to impose any oath or protestation upon them which were not enjoined by the law; and, in that respect, that they might not betray the common liberty, they would not submit to it."

Finally, I think the decision on this question should take into account the principle that professional groups generally should govern their own members. Just as we assume that in a democracy every citizen will be loyal, so too we expect each profession to determine its own goals and to adopt its own procedures and rules for disciplining its own members. Sound democracy reserves the authority of government intervention only to those cases in which the common good is clearly threatened by failures by other groups or institutions.

We expect, for example, that the American Medical Association will promote medicine without government threat and that its members will abide by the Hippocratic oath and the other standards of the profession. It is common practice to permit the bar association to determine rules for admission and rules for practice and to discipline its own members. Each one who is admitted to the practice of medicine or of the law or to the other professions pledges faithful performance of his duties; indeed, the word "profession" itself is drawn from the action of professing or of taking an oath publicly.

The academic profession in turn has its own goals and its own responsibilities. Colleges and universities have a common purpose; namely, to help students seek and acquire truth. Each institution has its unique traditions and objectives. A student when he enters a college or university makes an implicit pledge of fidelity to the purpose of the university. If he does not adhere to its standards, he is likely either to withdraw or he is subject to expulsion. As a student, his professional responsibility is the concern of the college, and college authorities are expected to keep him alined through a variety of efforts not excluding an appeal for loyalty to the "crimson," or to the "blue," or to the "maroon and gold," as the case may be.

Of course, it might be well if the very act of entering upon the work of gaining a college education were made an occasion of great public significance, and a public declaration of dedication called for. It might be desirable that all students who enter college take such an oath to remind them of the special social significance and social responsibility that go with education and to stir them to more solemn dedication to the fulfillment of the responsibilities that go with learning. But this is not the loyalty oath of the National Defense Education Act.

For the Government to intervene in the professional controls now exercised in our colleges and to take steps which purport to guarantee loyalty of students requires substantial evidence that the colleges have failed in self-discipline. I do not believe that the proponents of the loyalty oath have seriously questioned the loyalty of the academic community, faculty or students, nor do they declare that in fact any pattern of disloyalty actually exists. To my mind, the available evidence argues for continued confidence in the ability and integrity of teachers and administrations and also of American college students. I firmly believe that the basic issue here is really one of the propriety of oath-taking, of respect for the traditions of this Nation, and of the fundamental demands of democracy.

Friendship With Costa Rica

EXTENSION OF REMARKS
OF
HON. JOHN H. DENT
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 27, 1960

Mr. DENT. Mr. Speaker, under leave to extend my remarks, I have recently had a most interesting and enlightening visit from the very able Ambassador of the Republic of Costa Rica to the United States, Manuel Escalante, upon his return to Washington from San Jose.

He presented to me a copy of their newspaper, La Nacion, that carried on its front page the translation of my remarks about Costa Rica. This survey of Costa Rica has made the people of all Central America feel that the Members of the Congress of the United States are interested in them and their problems. The Ambassador informs me that there has been tremendous interest generated in all Latin America by the trip to Costa Rica by myself and four of our Members which has produced a definite desire on our parts to know them better.

My predictions concerning the necessity to assist this stable and serious democracy with no army, has evidently been shared by three stalwart banks. They have found an economic way to partially accomplish what is needed with loans through the Chase Manhattan Bank, the Export-Import Bank, and the World Bank. The fact that of these three institutions, a private bank should make a loan of a substantial amount, shows very clearly that after extensive investigation and detailed economic studies, the potential of Costa Rica has only been sleeping and this initial help will begin the progress of raising their standard of living to keep pace with their educational progress.

This financial help had been applied for many months before our trip, and despite the fact that we are pleased with this step, I have to say that it is not enough and shows only purpose and intention to continue to help this very good friend of ours in a substantial way. The sugar industry of Costa Rica is asking for an official increase of their quota to the United States of 55,000 tons, and they say it is a basic necessity for them, not only for the needed injection of dollars into their economy, but also to allow them to expand and cultivate the agricultural economy of their country.

I have to thank Ambassador Escalante for his detailed explanation of these economic facts and he has convinced me that it is no privilege but the definite program of his country to go ahead and meet their obligations with hard work. He has asked me to express to the other Members of the House and his friends who have visited Costa Rica, the sincere friendship of the Costa Rican people for the United States. On my behalf, I would like to congratulate the people of Costa Rica in their choice of a hard-working Ambassador who understands both our countries.

I believe the matter of revising our estimate under our sugar program is long overdue and without fail this Congress should do something about it at this time. We can take the easy way out by just extending the present law, however, if we want to really do something that will dispel some of the doubt of our sincerity in this hemisphere by acting now.

Our Latin American neighbors are not all sure that we have a proper evaluation of their friendship and the interdependence of our country with our neighbors to the south. We can do worse than concentrate on building our friendship where they count the most and I can think of no better place to start than in Costa Rica and no better proof of our appreciation than to do the things that count most both for ourselves as well as their peoples.

I believe that the majority of the Congress knows the importance of re-evaluation and reshuffling of our own sugar program.

This Congress will be remiss in its duties if it fails to act.

A Bill To Amend the Norris-La Guardia Act of 1932

EXTENSION OF REMARKS
OF
HON. ELMER J. HOLLAND
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 27, 1960

Mr. HOLLAND. Mr. Speaker, at the request of Mr. Thomas Fagan, the president, and the other elected officials, as well as the membership of Local 249, General Teamsters, Chauffeurs, and Helpers, International Brotherhood of Teamsters, one of the outstanding locals in my district, I am introducing this bill designed to take the Federal courts out of running labor organizations. This bill would amend the Norris-La Guardia Act of 1932.

Mr. Fagan said "that since Congress saw fit to pass the Landrum-Griffin bill

last year providing that the union membership—and only the membership—has the right to make the final determination of making local union policy, then the intent of Congress is being disregarded when the courts take over the union affairs."

The Landrum-Griffin bill—

He continued—

specifically states that the ultimate remedy of any internal solution is entirely up to the membership of that union, and that no officer can be removed from office except by membership vote.

I quite agree with Mr. Fagan and I feel that our Federal courts are to hear cases and make decisions and should not have the right to manage the affairs of either business or labor, nor the right to run businesses or labor organizations.

This proposed legislation will enable the Federal courts to devote themselves to their normal judicial functions without the need to consider or undertake the administration of any labor organization. It will also permit the union officers, rather than judicial appointments, to run the labor unions.

I would like to point out that unless this proposed legislation is passed, the present condition merely provides another avenue for those who are opposed to organized labor to eliminate it by bleeding the treasuries for excessive charges to cover the costs of paying the expenses and salaries of these "judicially appointed administrators." According to the latest reports released by the Federal courts, it has cost the treasuries of the local unions nearly $1 million to pay the monitors and the staffs as well as the legal fees.

The antiunion forces, which have flourished during the past 7 years, apparently realize they cannot beat the unions so they will, if possible, try to break them financially. They know if union funds are spent to cover salaries and expenses of judicial appointments and lawyers' fees, there will not be any available to promote organization work—if they cannot beat them, they plan to break them.

I feel the passage of this amendment will at least give the local labor unions a fighting chance to use their money for the interest of the membership.

Twenty-five Years of Soil Conservation

EXTENSION OF REMARKS
OF
HON. W. R. POAGE
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 27, 1960

Mr. POAGE. Mr. Speaker, today, our Nation observes the 25th anniversary of the Soil Conservation Service.

I am confident that April 27, 1935, will be recorded as a turning point in the history of American agriculture, and of world agriculture. When the Congress adopted the Soil Conservation Act that created the Soil Conservation Service as an agency in the U.S. Department of Agriculture, a government for the first time in history established a national policy for the deliberate conservation of its soil and water resources.

Since then we have set a pattern and a policy of conservation which scientists of other countries come here to study and to copy. The Soil Conservation Act signed by President Franklin D. Roosevelt on April 27, 1935, after the 74th Congress had passed the legislation without a dissenting vote, established the United States as a pioneer in the field of soil and water conservation.

Of particular interest to me has been the watershed development and flood-prevention phase of the overall soil and water conservation program. Watershed development has been a key part of the Soil Conservation Service program since its beginning. It set up its first demonstration projects within watershed boundaries. Many of the early soil conservation districts were organized on a watershed basis.

The formal watershed approach to soil and water conservation began in 1936 when the Congress passed the Flood Control Act. On May 15, 1952, I introduced the first bill (H.R. 7868) to establish a flood-prevention program. The idea was not enacted into law for 2 years but in 1953 Congress authorized the pilot watershed program. The next year, Public 566, the Watershed Protection and Flood Prevention Act, was passed and speeded up this work on a broad, national scale. It places the initiative in the hands of the local citizens. It gives them a chance to develop their own watershed plans. When they have completed their plans and organization, the Federal Government may come in at their invitation as a junior partner to help them carry out their watershed program. That is the American, the democratic way of doing things.

Sometimes, of course, just because it is the democratic way, things do not get done as quickly as the local people and we in Congress would like. We have to be careful in spending the taxpayers' money. We have to see that a proposed watershed program is feasible and economical; that it will produce benefits in excess of costs. There are times when a project has to wait until the landowners voluntarily make available easements or rights-of-way where dams are to be built.

However, we do get things done just as fast as money is available. This is especially true where the Soil Conservation Service is providing leadership. We get this important work done without sacrificing any of our essential freedom, and without relinquishing our individual rights.

During the past year, as the people have gained experience, the watershed program is moving faster. At first, as applications for Federal participation came in, progress was slow. But now, with hundreds of applications approved for construction work, we are moving into high gear. We are gaining momentum. The pace is steadily increasing. The requirement for funds is greater than ever. We need and seek the understanding of the Appropriations Committee.

I also want to recognize the other parts of the Soil Conservation Service's responsibilities, such as technical service to soil conservation districts and the Great Plains conservation program. All of these various parts are important and necessary. They all fit naturally into the whole, well-rounded program envisioned by the Congress when it passed the original Soil Conservation Act 25 years ago.

Under that act and the additional legislation adopted since then, the Soil Conservation Service has been doing a tremendous job. It is working with both rural and urban people in their efforts to conserve and develop our essential natural resources of soil, water, plants, and wildlife. On this anniversary the Nation salutes the Soil Conservation Service for its first quarter century of devoted, productive work. It is our sincere hope and expectation that the next 25 years will be equally as productive.

Unless we save our soil it will surely not save us.

Residual Fuel Oil

EXTENSION OF REMARKS
OF
HON. JOHN P. SAYLOR
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 27, 1960

Mr. SAYLOR. Mr. Speaker, now would seem the appropriate time for Members of Congress to advise those responsible for the oil import control program that we are not satisfied with the elevator operation to which the Nation has been exposed since the program took effect last year.

I need not remind Congress that mandatory controls were effectuated by the President because of the failure of the oil shippers to adhere to requirements of the so-called voluntary control program. The latter plan was a consequence of a study and recommendation by a Cabinet committee concerned with the debilitation of domestic fuel industries by excessive oil imports. The recommendation was implemented by Congress through the national defense amendment to the bill extending the Reciprocal Trade Agreements Act.

There were doubts, Mr. Speaker, about the effectiveness of the voluntary program. Some of us were not convinced that it would work. Eventually the administration and Senate leaders agreed that this means of safeguarding the strength of domestic fuel industries was acceptable and had to be made workable.

The failure of the voluntary program is now a matter of record, and the mandatory program will also go into the books as a complete failure unless established rules are enforced beginning no later than July 1 of this year. The reasons are obvious.

International oil companies cannot be left to their own devices. It was only a short time after the President signed the trade agreements bill in 1958 that

importers began to flood the country with foreign residual oil. The 1954 levels, as recommended by the Cabinet Committee and translated into the Trade Agreements Act, were immediately ignored. The final residual oil import figures for 1958 were 182 million barrels, with the surge increasing in the early months of 1959.

It was this disregard of the voluntary program that prompted President Eisenhower to proclaim the mandatory program—based on 1957 levels—effective April 1, 1959. For a short time it appeared that shippers would respect the official allocation levels, but their avaricious tendencies became apparent long before the end of 1959. The year's totals—from January 1 through December 31—amounted to 223 million barrels, or 50 million barrels in excess of the 1957 levels. Unfortunately, the Department of Interior, caught in this swirl of foreign residual oil, agreed to a 17-percent increase in allocations for the first half of 1960. Even this generous concession was not satisfactory to the importers, however, and with the advent of the new year, shipments of residual oil immediately began to spiral upward once again. In the last week of January the daily average went to 946,000 barrels in contrast to the new allotment of 425,000 barrels. Within a short time almost all of the allowable volume had moved into this country, leaving the shipping companies to plead for another raise in controls to prevent a cutoff in the last 2 months of the January-June picture.

I do not excuse the Department of Interior acceding to the greedy demands of the international oil peddlers; their diabolical scheme should have been recognized when shipments jumped sharply in the early weeks of the year. Inasmuch as the control program had been in operation for a comparatively short time, however, the Interior Department may be partially excused on the grounds that it had no previous experience in administering such a program. No such excuses will be acceptable to the Congress in the months and years to follow.

To suggest that incoming shipments should be restricted to a day-to-day or week-to-week, or even month-to-month allotment would be impractical.

Secretary Seaton's announcement that a 3-month allocation period would be substituted for the half-year schedules would seem to be a logical development. I believe that, in this way, imports can be controlled effectively.

What I now want to learn is exactly how much oil is to be admitted during the first 3 months of this new experimentation. I suggest that it would be in defiance of congressional intent to set import levels in excess of the 1957 record. Of equal importance is the plan of enforcement. The Interior Department will be in default if it fails to accompany its schedule publication with a qualified warning that any breach of the allocations will not be tolerated. If the Secretary feels that a provision for penalizing violators should be written into law, I am confident that Congress will recognize his request. Certainly there is no disputing the implied will of Congress in its enactment of the national defense amendment. Members of the Senate were given unequivocal insurance that oil import levels would be set on the 1954 statistical tables.

Mr. Speaker, today I am arranging for a delegation from the House, representing affected States, to visit with officials of the Department of Interior responsible for setting up and administering the oil control program. I invite colleagues concerned with the recent departure from a previously announced course of action in the oil control program to accompany me to this conference.

The national defense amendment was created to provide protection for domestic industries that would be required to carry the energy load in an emergency. Unless the spirit of this act is carried out, further destruction of America's coal- and oil-producing industries is inevitable. The volume of imports admitted in 1959 over the 1957 limit was equivalent in energy value to 12 million tons of bituminous coal. There is no doubt that the coal mines of Pennsylvania, West Virginia, and Virginia would have participated in business approximating this tonnage had not the importers chosen to ignore the standards set by the U.S. Government. We are in a bad way when international traders are permitted this latitude. To submit to their arrogance is unprincipled; it is shameful; it is odious.

I ask my colleagues to join me in a meeting with the Department of Interior so that we may state in unqualified terms the wishes and expectations of the legislative branch of this Government.

Development Center of the United Cerebral Palsy of Northern Virginia

EXTENSION OF REMARKS
OF
HON. JOEL T. BROYHILL
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 27, 1960

Mr. BROYHILL. Mr. Speaker, among the hundreds of organizations, large and small, that are engaged in trying to mitigate human misery, once in a while a relatively small one is particularly noteworthy because of the importance of the work it is doing, and because of the devotion with which members of the organization approach their task. I would like to call attention to one of these, the Development Center of the United Cerebral Palsy of Northern Virginia.

There can be no more worthy a goal than that of this center—the alleviation and cure of the much dreaded cerebral palsy that affects so many of our children.

A baby afflicted with cerebral palsy is born every 53 minutes, but if a special development center in nearby northern Virginia has anything to do with it, children stricken with this dread crippler will have a much easier time of it. And, eventually, cures for this feared scourge may be found through research efforts spurred by the center.

The devotion to the task by those participating in the activities of the center can best be illustrated by tracing the development and operation of this wonderful organization.

In a sense, the story of the genesis and progress of the center, which is located at 111 North Cherry Street in Falls Church, is nearly as exciting as the work being done there.

Some 10 years ago a small but determined group of northern Virginians, alarmed by statistics that 1 out of every 300 children born is afflicted with cerebral palsy and by the fact that no facilities were available locally to fight the Nation's No. 1 multiple crippler, decided to do something about it. The nucleus of this group was made up of parents, relatives, and friends of the children who had been stricken with this type of brain injury.

Although victims of cerebral palsy were to be found in great numbers in the area, these leaders were shocked to realize that there was a complete lack of facilities there for treatment and education on the subject. Through their efforts, United Cerebral Palsy of Northern Virginia, a nonprofit, nonsectarian, voluntary organization came into being.

Focal point for operations of the group is the Northern Virginia Cerebral Palsy Development Center for preschoolchildren. Provided rent-free by the city of Falls Church, it is the only facility of its kind in northern Virginia. It operates solely through contributions from area residents.

United Cerebral Palsy of Northern Virginia also contributes to National and State research activities on cerebral palsy, particularly at the University of Virginia, and conducts an extensive educational program for parents, volunteers and the general public.

A visit to the Cerebral Palsy Development Center is an inspiring yet sobering event. Here one sees, face to face, the grim manifestations of this dread crippler. Here one witnesses men and women dedicated to the task of easing the lot of these afflicted, and striving desperately to restore usefulness and happiness to stricken children.

In truth, a whole new world of opportunity and joy is opened up for the 24 youngsters who are fortunate enough to share the facilities of the center. They come from assorted families in the area, since wealth or poverty play no part in the selection of students.

At the center, pre-school children who had little or no hope of attending regular school, yet who might be considered educable, receive daily training, therapy, companionship, and friendship. These ingredients are essential to a program of emotional, educational and physical development.

Some of the students were unable to swallow, or talk, or walk, or even stand, when they first enrolled at the center. Long hours of patient training, under the guidance of experienced teachers has resulted in slow but sure progress

for these students. More than 10 percent have been rehabilitated to the point where they have been able to move on to regular schools.

At present, the center maintains a staff of two full-time and four part-time employees. In addition to these professionally trained staffers, many volunteers have cheerfully donated their services to the cause.

Although in the short span of 5 years enrollment has increased from 4 to 24, much more remains to be done. Scores of other cerebral palsy children in northern Virginia could benefit from the wonders the center has to offer.

Those who are interested in the development center know that they have just scratched the surface, and are currently engaged in an expansion program. I want to take this opportunity to wish them well, and to assure them of my full support.

Third Meeting of Canada-United States Interparliamentary Group—Joint Press Statement

EXTENSION OF REMARKS
OF
HON. EDNA F. KELLY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 27, 1960

Mrs. KELLY. Mr. Speaker, last week it was the honor and pleasure of the United States to serve as hosts to the Canada-United States Interparliamentary Group. Under the terms of the authorizing resolution 24 legislators from each of the two countries comprise the group. For the United States 12 members are from the House and 12 from the Senate.

It is my privilege to serve as chairman of the House delegation. But I must state that my work was made easier by the splendid cooperation of the chairman of the Senate delegation, Senator GEORGE D. AIKEN, of Vermont. He always was available for guidance and assistance no matter how pressing his other commitments.

The steering group of the House, in addition to myself, included Hon. FRANK M. COFFIN, of Maine, Hon. CHESTER E. MERROW, of New Hampshire, and Hon. WALTER H. JUDD, of Minnesota.

I want to express my appreciation to the other members of the House delegation—Hon. WAYNE N. ASPINALL, Colorado; Hon. SIDNEY R. YATES, Illinois; Hon. LEONOR K. SULLIVAN, Missouri; Hon. FRANK IKARD, Texas; Hon. GERALD R. FORD, JR., Michigan; Hon. W. R. POAGE, Texas; Hon. DON L. SHORT, North Dakota; and Hon. THADDEUS J. DULSKI, New York. Hon. MELVIN PRICE, Illinois, also participated. Senators also participated to the extent their time permitted. Both bodies had heavy floor schedules last week. Despite that, participation by U.S. members was excellent.

The staffs of the Committee on Foreign Affairs and of the Committee on Foreign Relations as well as Canadian staff members handled the maze of details that contributed to the success of the meetings.

Secretary of State Herter spoke informally at the opening plenary session. Other members of the executive branch also devoted time to background work. To all of them I say, "Thank you."

Our former colleague, Mr. Wigglesworth, now our Ambassador to Canada, made a special trip to Washington with Mrs. Wigglesworth to attend the final dinner. Both the United States and Canadian delegates were more than pleased by the presence of Ambassador and Mrs. Wigglesworth.

The luncheons and the dinner on Friday evening were attended by other Members of the House. To all I want to extend my appreciation for taking part in making our guests feel welcome.

The Washington meetings were followed by a trip to SAC headquarters in Omaha and to Norad headquarters in Colorado Springs. The latter is a joint United States-Canada command for the defense of North America. The commanding officers of both commands, Gen. Thomas Power and Gen. Laurence S. Kuter, together with their staffs, provided the members of the group with a splendid presentation of their respective responsibilities.

The Speaker of the House of Commons, Hon. Roland Michener, and the Speaker of the Senate, Hon. Mark R. Drouin, together with colleagues from both bodies, actively participated in all the discussions and functions. One of the delightful sides of the meetings with our Canadian opposites is the pleasant air of informality that pervades them. There are no difficulties of communication or bothersome details of protocol.

The meeting was divided into three panels—one on boundary problems, one on economic problems, and one on defense. Delegates from both countries exchanged their views and contributed to the education of the others. We explored the nature of the particular subject in an endeavor to understand better these mutual problems and related ideas. It is surprising how informal talks corrected misunderstandings.

To make known to my colleagues the range of discussion, under unanimous consent I insert at this point the press release agreed to by all the delegates at the conclusion of the Washington meetings:

THIRD MEETING OF CANADA-UNITED STATES INTERPARLIAMENTARY GROUP—JOINT PRESS STATEMENT

The Canada-United States Interparliamentary Group, composed of 24 members of the Parliament of Canada and 24 Members of the Congress of the United States, today concluded 2 days of discussion on matters of common interest in the two countries.

The group continued its procedures of having informal, off-the-record discussions and refrained from making recommendations, leaving it to each national delegation to make such reports and recommendations to its respective authorizing institutions as it determines.

The group met in plenary sessions on Thursday morning and Friday afternoon and held two sets of committee meetings on Thursday afternoon and Friday morning. Committees discussed the following subject areas: (1) Defense cooperation and disarmament, (2) boundary problems, (3) economic problems of common concern.

The Committee on Defense discussed certain aspects of defense policy, and the use of North American productive facilities for defense purposes, which have implications of mutual importance to the United States and Canada. The Committee also discussed the prospects for disarmament and the need for planning that will facilitate an orderly transition from military production to production for peaceful purposes, including public works.

There was general agreement that while seeking with all vigor for an understanding with the Communist bloc based on mutual trust and confidence, the West must maintain adequate defenses until the Soviet camp accepts an inspection and control system of sufficient scope and efficiency to justify the commencement of active measures of disarmament.

The Committee considered the changing character of the threat to North America and the effect of this on the operations of the North American Air Defense Command (Norad). It was recognized that in addition to the military problems which will have to be faced during the next few years, the adoption of new weapons systems and concepts of defense will cause local economic readjustments which in some areas may be severe.

The Committee noted that during the last year there had been considerable progress in the program of defense production sharing between the United States and Canada. This was reflected in the fact that Canadian industry in 1959 received U.S. defense contracts valued at $96.3 million; it was noted, however, that Canadian defense equipment purchases in the United States in the same period amounted to $116.6 million. The Canadian members of the Committee expressed the view that the progress achieved to date was in no small measure due to the consideration given to the problem by the Interparliamentary Group at its meeting in June 1959. There was general agreement that a continuing effort was needed in both countries to achieve and maintain an adequate balance in defense purchasing between Canada and the United States.

After deciding which subjects should be discussed, the Boundary Problems Committee came to the following conclusions, which it approved for transmittal to the plenary session:

1. Passamaquoddy tidal power project: It is important to determine whether the Passamaquoddy project is economically feasible. Meanwhile, judgment should be reserved awaiting further studies by the International Joint Commission. The Committee feels that this topic should be retained on its agenda.

2. Hudson-Champlain-Richelieu Waterway: Now that the St. Lawrence Seaway is in operation the two Governments should consider referring to the International Joint Commission the question of the economic feasibility of further development of this waterway, taking into account the possible increase in trade between Canada and the United States which might result.

3. Columbia River Basin development: The Canadians welcomed statements by U.S. delegates that no particular project of interest to the U.S. delegates should be allowed to stand in the way of a treaty on this subject based on the principle of optimum development of the Columbia River Basin with mutual sharing of the benefits. Once this principle has been adopted by the two Governments particular projects will fall into their appropriate order.

4. Chicago diversion: This subject was again thoroughly and vigorously discussed and no change of the positions of the respective delegates emerged. The Canadian

delegation appreciates the waste disposal problem facing Chicago.

5. Pollution in the Great Lakes: Both delegations expressed concern about increasing pollution both from lake cities and shipping. It was agreed that it would be useful for the two Governments to study remedial measures.

6. Yukon-Alaska problems: Canadian delegates expressed concern that a proposed high dam at Rampart, Alaska, may prejudice maximum development for the benefit of both countries of the Yukon River power potential. Canadian delegates raised the questions of some form of free port facilities for Canada in the Alaska panhandle and corridors across it. U.S. delegates suggested that additional information about these matters be furnished to them before the next meeting of the group and that they be placed on the agenda for the next meeting.

The Economic Problems Committee approved the following summary for transmittal to the plenary session.

1. COMMON TRADE PROBLEMS, ESPECIALLY WITH WESTERN EUROPE

The Committee agreed that economic progress abroad and the changing pattern of trading relations in Europe were creating new opportunities and serious problems for Canada and the United States. It was recognized that the interests of our two countries diverged to some extent in the face of these developments, partly because of political considerations and partly because of the greater dependence of Canada on international trade and the narrower range of its exports.

The merits and demerits of solutions based on different methods of computing tariffs and of tax relief were briefly explored. No firm agreement was reached concerning the respective cases for the "Inner Six" and "Outer Seven," but a consensus did appear on the need for the United States and Canada to cooperate closely and to work toward new arrangements with their European allies on a North Atlantic basis.

2. BILATERAL PROBLEMS

(a) *The Canadian oil problem*

Attention was drawn to the difficulties being experienced in the Canadian oil industry (particularly in Alberta) due to lack of markets for increasing oil supplies. Canadian delegates described various possible solutions, notably that of increasing domestic consumption, recognizing that some of these have foreign policy implications. Reference was also made to recently issued Canadian regulations governing oil and gas exploration in the Yukon and Northwest Territories.

(b) *Metals and minerals*

The Committee recognized the intimate and important relationship between United States and Canadian production and markets for such commodities as lead and zinc, aluminum, copper, nickel, and uranium.

A U.S. delegate described the depressed lead and zinc condition in his country and foresaw no significant change in conditions over the near future in respect of either production or importation.

The delegates then considered the uranium and aluminum situations. In view of recent developments, the discussion on uranium was mainly in terms of the prospects which might emerge in a few years time, which did not now appear very auspicious for producers. On the other hand, the outlook for aluminum was regarded as more promising.

A U.S. delegate drew general attention to the increasing significance of Latin American markets for both Canada and the United States, and to the implications of prospective competition from expanding Latin American production of commodities such as oil, gas, and iron ore.

(c) *Wheat*

There was considerable detailed discussion of the surplus wheat problem confronting both the United States and Canada. No new approach was advanced for the problem, and there was general agreement that current arrangements, unsatisfactory though they might be, were still the best available in the existing situation. Both delegations were anxious to insure continuing close bilateral consultations in order to avoid damage to established foreign commercial markets; Canadian delegates expressed their gratification at the way in which this consultation had developed.

At the first plenary session, U.S. Secretary of State Herter welcomed the Canadian delegates and wished the meetings success. In the plenary sessions recommendations by delegates from both countries laid stress on the necessity for the people of each country to learn more about the other. The suggestion was made that the educational systems in the United States and Canada might well take account of this need.

The Canadian delegation extended an invitation to the U.S. delegation to visit Canada sometime during the month of August 1960, and to visit industrial and mining areas.

On Saturday and Sunday, the Group will fly to the U.S. Strategic Air Command Headquarters at Omaha, Nebr. and to the Joint Canada-United States Air Defense Command at Colorado Springs, Colo., to receive briefings and make inspections at these installations, and will return to Ottawa and Washington Sunday evening.

These meetings of the Canada-United States Interparliamentary Group help to promote a unity of purpose, a unity of thought, and a unity of spirit, to the end that our Western way of life and government is preserved for future generations.

Secretary of Labor James P. Mitchell Urges Railway Labor and Railway Management To Adopt a Common Viewpoint by Recommending a Fundamental Overhauling of the Interstate Commerce Commission and Gradual Elimination of All Government Subsidies in Transportation in America

EXTENSION OF REMARKS

OF

HON. JAMES E. VAN ZANDT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 27, 1960

Mr. VAN ZANDT. Mr. Speaker, Secretary of Labor James P. Mitchell, in an address at the Railway Employees' Department Convention, Chicago, Ill., April 27, 1960, suggested to railway labor and railway management that they join in recommending a fundamental overhauling of the Interstate Commerce Commission and gradual elimination of all Government subsidies in transportation in America.

Pointing out that the railroads no longer have a monopoly, Secretary Mitchell said "so the regulations that govern them must be accommodated to the new competition." Urging that an overall approach on the part of the Federal Government to transportation is an essential, Secretary Mitchell continued by stating:

We need a fresh approach to economic policies, regulation, subsidies, and taxation. And certainly for the railroad industry no one is in a better position to suggest the right changes than the men and women of the railroad industry, both those who work and those who manage.

Secretary Mitchell pointed out that the railroad industry while a major element today in a total system of transportation infinitely more complex and variable is but only one element, and that the relative position of the railroads in competition with other modes of transportation has declined.

It is my belief that Secretary Mitchell's address will be of great interest to my colleagues and for that reason at this point I wish to incorporate it in my remarks:

ADDRESS BY SECRETARY OF LABOR JAMES P. MITCHELL AT THE RAILWAY EMPLOYEES' DEPARTMENT CONVENTION, CHICAGO, ILL., APRIL 27, 1960

I am pleased to have this opportunity to comment upon the present situation of the American transportation system, especially that of the railroads and the men and women who make their living in that industry.

It will be the judgment of history that in recent decades other modes of transportation have successfully challenged the former monopoly of the railroads so that this basic mode of transportation now finds itself increasingly in need of a workable, dynamic competitive position.

Not too many years ago a person traveled from one place to another in America by rail, or he stayed home. An industry shipped its goods and received its materials by rail, or not at all. The railroads tunneled mountains, crossed rivers, spanned plains, and what moved for any distance moved over them.

Today the railroads are a major element, but only one element, in a total system infinitely more complex and variable. It is true that both passenger and freight traffic on the railroads has increased absolutely; it is also true that the relative position of the railroads as a mode of transportation in competition with others has declined.

With the steady growth of the American economy has come a network of high-speed highways that link major metropolitan areas and small towns. Powerful diesel trailer trucks, capable of delivering large loads, move over this network of roads and offer a reasonable alternative to shipment by rail, certainly for the short haul.

With a rising standard of living, automobile ownership has grown to the point where the average American has, parked outside his house, an attractive alternative to traveling by rail.

Airlines offer a faster long haul alternative to railway passenger travel, with service intentionally emphasized. With the advent of the jet cargo plane in a matter of years, perhaps sooner, some of the long haul, high-revenue freight traffic of the railroads will be further challenged.

There is nothing to indicate that the growth and progress of formidable competitors to the railroads is going to diminish; I think the opposite is true.

Since this change in American transportation already has had serious effects upon railroad employment, the membership of the rail unions is justly concerned about the future.

I would like to suggest today some of the ways in which that concern might be translated into more effective action than has been evident in the past.

The question before all of us who are interested in a sound railroad industry and a sound transportation system is how we can derive the maximum good from change—that good being a stable, unified transportation system with efficient components that offer both employment stability and competitive advantage, with a minimum of cost to the individual citizen and his family, and to the communities in which those families live.

It should conserve and use the vast investment already made in the lifetime training and experience of its employees, of the many billions of dollars in plant and equipment.

How do we get such a system?

More to the point here: how do the people of American railroading help the industry to hold position?

It makes good sense to me to begin the answer by confronting the difficult truths of change—to start with the premise that if a competitive position is the basic need of today's railroads then it is to the interest of everyone who looks to the railroads to contribute to the finding and holding of such a position.

An acceptance of this first of facts might lead railroad labor and railroad management to the acceptance of new postures; where the rail unions have been in the past an articulate opposition to changes that endanger the welfare of their membership, there may now exist the need for them to join with management to present an equally articulate opposition to whatever endangers the competitive position of their industry. Management might join with the unions to formulate recommendations toward a public transportation policy more in keeping with the realities of 1960 and not so reflective of the vanished realities of 1920.

I do not think that a competitive position for railroads can be achieved if the collective-bargaining table continues to be the only instrument for communication between rail unions and rail management.

This may seem an awkward time to suggest such a thing; actually there is no better time. The railroad unions of America have represented their memberships before management with great credit and success. Rail management, faced with the difficulties of competition, has faced many volatile decisions; the record of a century of service has been a good one.

But now both must realize that the field has widened, that the railroad industry finds itself one part of a competitive transportation system that seeks to obliterate the inefficient and unattractive. If labor and management face the need for new and progressive positions in such a changing world, they face that need together.

To the question of Government regulation, for example, the railroad industry might, and I think should have, a single, strong answer—an industry answer, not one labor and one management answer.

The present structure of Government regulation is based upon a time in economic history when the rails had, in effect, a monopoly in transportation. By protecting the public welfare in the regulation of railroads, the Government protected the public interest in the only mode of transportation that mattered.

As the rails are no longer a monopoly, so the regulations that govern them must be accommodated to the new competition. An overall approach on the part of the Federal Government to transportation is an essential. We need a fresh approach to economic policies, regulation, subsidies, and taxation. And, certainly for the railroad industry, no one is in a better position to suggest the right changes than the men and women of the railroad industry, both those who work and those who manage.

I suggest that a fundamental overhauling of the Interstate Commerce Commission and the laws that govern transportation is necessary so that Federal regulation produces equality of competition and not an index to the competition of yesterday. A joint recommendation on this subject from labor and management would go a long way toward achieving that end. If a joint recommendation is not possible, certainly separate recommendations would be in order.

And what of Government subsidies?

The Government subsidizes the building of ships and the losses of American-flag lines. It deepens and develops inland waterways. It subsidizes airlines through the construction of terminals and the carrying of mail. It has subsidized truckers through building public roads. The railroads remain the great unsubsidized portion of the American transportation system.

I suggest that we seek the gradual elimination of all Government subsidies in transportation in America and consider the introduction of user charges so that each mode of transportation carries its fair share of the burden of public expenditures from which they now profit unequally.

A joint recommendation from labor and management in the railroad industry would go far toward achieving this end also; and again, separate recommendations, in the event a joint one is not possible, would most certainly be in order.

Now, the development of these kinds of recommendations, offered on behalf of the entire industry, is an entirely different objective than that of collective bargaining, and it requires a different kind of labor-management approach.

I believe that the railroad industry position on matters like Government regulation and subsidies and user charges would be a strong one, and would contribute to an improved competitive posture for railroads, if it represented the best joint thinking of both labor and management, if it were a total industry position.

Certainly the health of the industry is a matter for common concern, and as the industry benefits from a better situation so do all of the people within it.

Certainly economic change does not wait; lack of flexibility means lost jobs and a continuously deteriorating position.

No one in the railroad industry can afford to have his head stuck in the sands of 30 years ago.

It doesn't mean much to win a collective bargaining battle and lose the whole competitive war.

Collective bargaining "business as usual"—without a real effort to join outside the bargaining table and develop competitive measures—could mean no business at all.

We have big markets in America; we are going to have bigger ones. The railroads' share of them will determine whether or not jobs will continue to be lost, or won back—and that share depends upon the extent to which labor and management can develop a cooperative method for finding a better competitive posture.

One of the things we face in this country is a growing urban-suburban transportation problem which is going to get worse before it gets better. A few years from now the entire eastern seaboard from Richmond to Boston will be, in terms of transportation need, virtually a single urbanized area with metropolitan centers at intervals. I would think that here would be an area where the railroads, with their rights of way, their terminals in the centers of the metropolitan areas, their established links between suburb and city, could step forward with a comprehensive transportation plan that takes account of their advantages.

If, before such a plan could become operative, Government regulations at several levels needed to be cleared away, then why shouldn't rail labor and rail management offer a recommendation to accomplish that?

At an even more immediate level, there are questions of attractive service, of adequate equipment and of productivity that can snarl up a bargaining table while railroad competitors keep moving ahead—but the answer is not in referring these questions to bargaining but to a different kind of meeting, one in which the leaders of rail labor and the officials of rail management come without the need for combatting each other but with the need for cooperating with each other.

And that need grows with the economy.

The railroad industry has benefited for many years from the provisions of the Railway Labor Act. It has been a good law, and is still a good law for dealing with subjects that can be settled by legal machinery. But it involves deadlines; it involves procedures that move in a regular and orderly sequence toward decision. I wonder how far a piece of legal machinery, no matter how trustworthy for other purposes, should be trusted to resolve questions in which not only the competitive posture of an entire industry but the lives and jobs of many thousands of people are involved?

It seems to me that is letting the law manage men; I think we would all prefer to see men manage themselves.

The single question of work rules and practices that were practical in their day but that might now be obsolete cannot be approached without the most careful consideration and deliberate study—a consideration and study that cannot take place under the gun of a deadline.

It takes a long time and a lot of patient effort to solve any problem in which the welfare of human beings is involved; I would be hesitant about referring that kind of problem to a process that is going to click right along toward what has to be a comparatively immediate solution.

Labor and management in the railroad industry might think about this as they consider how to meet their problem of change, and as they contemplate a mechanism to assure themselves, and the public, that their relationship will be fruitful.

I would like to suggest four ground rules within which collective bargaining and additional cooperative discussion between labor and management in the railroads might take place—a discussion designed to formulate a total transportation policy for the entire industry as it stands in competition with other modes of transportation, a discussion from which might come recommendations on Government regulation and subsidies, and a discussion from which might come understanding and agreement on specific industry problems like adequate equipment, improved services and higher productivity.

The first of these ground rules is that compulsion of an involuntary nature is not a solution to railroad problems. Compulsory arbitration can solve none of the problems I have implied; it can only create new ones.

Secondly, working men and women have something akin to a property right in work procedures and customs engaged in for many years and resulting from bargaining agreements, and these rights should be modified or forfeited by consent, not compulsion.

Thirdly, management, cannot manage or exist without the ability to maneuver flexibly to meet competitive challenges. The status quo is not an answer to the challenge of change; standing pat is often an optical illusion for going backward.

Finally, both labor and management bear a public responsibility that will make itself felt, sooner or later.

The rejection of compulsion, the rejection of forced change, the rejection of standpatism, and the acceptance of the crucial impact of public responsibility—within these four ground rules, it seems to me, rail labor and rail management can fruitfully explore the problems, some of which now divide them, with the objective of creating a common understanding and a joint policy to keep the American railroad industry in a competitive position, break new ground for it, protect employment, and produce the one thing that will make the difference: the best service for the best price.

Thank you.

SENATE

THURSDAY, APRIL 28, 1960

The Senate met at 10 o'clock a.m., and was called to order by the President pro tempore.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

O Lord Most High, before whose infinite majesty and greatness we bow in deep humility, we come acknowledging our littleness and our dependence. Thou art full of grace and truth.

Thou hast promised to teach judgment to the meek and to impart divine secrets to the pure in heart. Entering in through the lowly doors of our fallible petitions, wilt Thou fill the house of our lives with the melody of Thy will and Thy peace?

We thank Thee for this world of beauty in the midst of which we walk, for the dawning light out of darkness, for all the bountiful gifts of love and of friendship, for sunny memories of remembered yesterdays, for the stirring challenges of these epic days, and for every hope that beckons us on to radiant tomorrows.

In the midst of the tests and tasks of these baffling times, keep our hearts singing:

> This is my Father's world,
> O' let us ne'er forget,
> That though the wrong
> Seems oft so strong,
> God is the Ruler yet.

Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the reading of the Journal of the proceedings of Wednesday, April 27, 1960, was dispensed with.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. JOHNSON of Texas. Mr. President, under the rule, there will be the usual morning hour; and I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. JOHNSON of Texas, and by unanimous consent, the Committee on Post Office and Civil Service was authorized to meet during the session of the Senate today.

On request of Mr. MAGNUSON, and by unanimous consent, the Committee on Interstate and Foreign Commerce was authorized to meet during the session of the Senate today.

On request of Mr. JOHNSON of Texas, and by unanimous consent, the following committees or subcommittees were authorized to meet during the session of the Senate today:

The Special Investigating Subcommittee of the Committee on Agriculture and Forestry;

The Subcommittee on Flood Control, Rivers, and Harbors, of the Committee on Public Works;

The Fiscal Affairs Subcommittee of the Committee on the District of Columbia.

Mr. MAGNUSON subsequently said: Mr. President, I desire to make an announcement. Several Senators had arranged to be present at the meeting of the Interstate and Foreign Commerce Committee. There are several nominations before that committee in which they are interested. However, in view of the situation on the floor of the Senate, I have decided to postpone the meeting.

AUDIT REPORT OF NATIONAL FUND FOR MEDICAL EDUCATION

The PRESIDENT pro tempore laid before the Senate a letter from the executive vice president, National Fund for Medical Education, New York, N.Y., transmitting, pursuant to law, a report of an audit of that fund for the year ended December 31, 1959, which, with the accompanying report, was referred to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. CANNON, from the Committee on Armed Services, without amendment:

H.R. 10474. An act to authorize the construction of modern naval vessels (Rept. No. 1296).

By Mrs. SMITH, from the Committee on Armed Services, without amendment:

H.R. 9464. An act to remove the requirement that, of the Chief and Deputy Chief of the Bureau of Ships, one must be specially qualified and experienced in naval engineering and the other must be specially qualified and experienced in naval architecture (Rept. No. 1297).

By Mr. SALTONSTALL, from the Committee on Armed Services, with amendments:

H.R. 9465. An act to authorize the extension of a loan of a naval vessel to the Government of the Republic of China (Rept. No. 1298).

By Mr. BRIDGES, from the Committee on Armed Services, without amendment:

S. 2969. A bill to authorize the award posthumously of appropriate medals to Chaplain George L. Fox, Chaplain Alexander D. Goode, Chaplain Clark V. Poling, and Chaplain John P. Washington (Rept. No. 1299).

INCREASED EXPENDITURES FOR HEARINGS BEFORE COMMITTEE ON ARMED SERVICES

Mr. RUSSELL, from the Committee on Armed Services, reported an original resolution (S. Res. 310) increasing the limit of expenditures for hearings before the Committee on Armed Services, which was referred to the Committee on Rules and Administration, as follows:

Resolved, That the Committee on Armed Services hereby is authorized to expend from the contingent fund of the Senate, during the Eighty-sixth Congress, $10,000 in addition to the amount, and for the same purposes, specified in section 134(a) of the Legislative Reorganization Act approved August 2, 1946.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. RUSSELL, from the Committee on Armed Services:

Lt. Gen. William H. Tunner (major general, Regular Air Force), U.S. Air Force, to be placed on the retired list in grade of lieutenant general; and

Maj. Gen. Ralph P. Swofford, Jr., Regular Air Force; Maj. Gen. Edward H. Underhill, Regular Air Force; Maj. Gen. Donald N. Yates, Regular Air Force; and Maj. Gen. Joe W. Kelly, Regular Air Force, to be assigned to positions of importance and responsibility designated by the President, in the rank of lieutenant general.

By Mr. THURMOND, from the Committee on Armed Services:

William T. Alexander, and sundry other officers of the Naval Reserve, for temporary promotion to the grade of rear admiral; and

Col. Andrew B. Cannon, and sundry other officers, for temporary appointment in the U.S. Air Force.

By Mr. JOHNSTON of South Carolina, from the Committee on Post Office and Civil Service; 12 postmaster nominations.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. HENNINGS:

S. 3436. A bill to amend the Federal Firearms Act so as to regulate more effectively the shipment of firearms, known as pistols and revolvers, in interstate commerce, and thereby to assist local jurisdictions in controlling the use of such weapons by juveniles and irresponsible persons; to the Committee on the Judiciary.

(See the remarks of Mr. HENNINGS when he introduced the above bill, which appear under a separate heading.)

By Mr. MORSE:

S. 3437. A bill to provide for the establishment of a municipal arts council representative of local nonprofit organizations and institutions, including educational organizations and institutions, in the District of Columbia with active programs in the arts, to set aside for such local cultural

activities 1 mill out of each $1 of tax revenue of the government of the district of Columbia, and for other purposes; to the Committee on the District of Columbia.

(See the remarks of Mr. MORSE when he introduced the above bill, which appear under a separate heading.)

By Mr. SCOTT (for himself and Mr. CLARK):

S. 3438. A bill to provide additional lands at, and change the name of, the Fort Necessity National Battlefield Site, Pa., and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. SALTONSTALL (for himself, Mr. AIKEN, and Mr. PROUTY):

S. 3439. A bill authorizing the President of the United States of America to present a gold medal to Robert Frost, a New England poet; to the Committee on Banking and Currency.

(See the remarks of Mr. SALTONSTALL when he introduced the above bill, which appear under a separate heading.)

By Mr. SCHOEPPEL:

S. 3440. A bill for the relief of Giuseppa Lanza Lascuola; to the Committee on the Judiciary.

By Mr. MURRAY (by request):

S. 3441. A bill to provide additional lands at, and change the name of, the Fort Necessity National Battlefield Site, Pa., and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. McGEE (for himself and Mr. O'MAHONEY):

S. 3442. A bill to authorize and direct the Secretary of the Interior to issue a patent conveying certain lands in the town of Powell, Wyo., together with improvements, to the Shoshone Irrigation District, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. DWORSHAK:

S. 3443. A bill for the relief of Marjorie D. Vogel; to the Committee on the Judiciary.

By Mr. CAPEHART (by request):

S. 3444. A bill to prohibit the exercise of certain judicial power in connection with administration of the internal affairs of labor organizations; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. CAPEHART when he introduced the above bill, which appear under a separate heading.)

RESOLUTION

INCREASED EXPENDITURES FOR HEARINGS BEFORE COMMITTEE ON ARMED SERVICES

Mr. RUSSELL, from the Committee on Armed Services, reported an original resolution (S. Res. 310) increasing the limit of expenditures for hearings before the Committee on Armed Services, which was referred to the Committee on Rules and Administration.

(See the above resolution printed in full when reported by Mr. RUSSELL, which appears under a separate heading.)

REGULATION OF FIREARMS IN INTERSTATE COMMERCE

Mr. HENNINGS. Mr. President, as chairman of the Senate Subcommittee To Investigate Juvenile Delinquency and chairman of the National Penitentiaries and Reformatories Subcommittee, I have observed over the years the constant problem created by the accessibility of pistols and revolvers to youngsters and irresponsible adults.

I also had occasion, as a district attorney and as trial prosecutor in a metropolitan area of 2 million people, to witness the tragic aftermath of the wide accessibility of firearms to so many people.

What has particularly disturbed me has been the manner in which local firearms laws have been abused and ignored by shipments in interstate commerce.

The present Federal laws on firearms have little effect on the majority of these weapons transported in interstate commerce; indeed, the National Firearms Act expressly excludes pistols and revolvers, while the Federal Firearms Act does little more than establish licensing procedures for dealers in firearms. At the hearings of the Subcommittee To Investigate Juvenile Delinquency held in New York last September, we were greatly assisted by the testimony of the Honorable John E. Cone, justice of the New York State Supreme Court. Judge Cone, who is also chairman of the committee to ban teenage weapons, said, in discussing the existing Federal laws:

> Certainly it is of no value if weapons outlawed within the borders of this State or city are advertised in numerous magazines and then may be lawfully shipped from some other State to purchasers in New York.
>
> Both the National Firearms Act of 1934 and the Federal Firearms Act of 1938 leave sufficient loopholes for such traffic in dangerous weapons to be carried on.

Many of us are seriously alarmed at the fact that a youngster may for a few dollars order by mail, without any formality or requirement, the most deadly hand weapons devised by man, in circumvention of local laws governing such purchases. It is only after a tragic accident or crime that the local enforcement agencies realize that the juvenile or other irresponsible person had such a weapon.

For example, and one all too frequent and typical, in Los Angeles recently a young man 18 years old shot and killed his 14-year-old brother because, as he put it, "My brother was an inferior person." Upon investigation, police found that this youngster was under psychiatric care, and that he had read an advertisement in a magazine advertising that revolvers could be bought by mail order. He sent in his money and a few weeks later received his revolver, without the knowledge or consent of local authorities.

I have some quotations before me from a number of advertisements that offer guns by mail. They appear in many current magazines.

I should like to quote from a few of these advertisements that offer "guns by mail" to indicate the attraction they have for any youngster, let alone a mentally ill one.

I read from one of them:

> British Webley combat revolver only $10.95. Famous World War II weapon of the British Tommies. Get them while they last. Shoot double or single action—converted to .45 caliber—ammo sold everywhere.

Here is another:

> How'd you like to be the most accurate and fastest gun alive? Sensational new .22-caliber pistol—10 shots—order now. Send $5 down, balance c.o.d.

Here is a good illustration:

> Luger automatic. Be the proud owner of this exciting automatic and the envy of your friends. Order now while they last. Be a two-gun man. Two for $5.95.

All the old advertising technique hokum.

Dozens of periodicals read by our youngsters contain in each issue advertisements of pistols and revolvers of every caliber and make, including war surplus weapons from countries all over the world; and most are similar to the ads which I have just read.

I have spent 8 years as a prosecutor in the felony courts of St. Louis, and as district attorney in a metropolitan area of over 2 million people.

I can say, from my own experience, observation, and consultation with many police officials, and other district attorneys and justices, that a firearm in the possession of a law-abiding citizen is of little value if he is the victim of a robbery or other assault on his person or property, and in this statement, I am borne out by experienced chiefs of police and other enforcement officers. In fact, possession has often led to tragic deaths of innocent people who rely on the fact that a weapon is accessible and reach for one to protect themselves or their property.

The Subcommittee To Investigate Juvenile Delinquency has studied the problem of firearms and its relationship to juvenile crimes. We have consulted with law enforcement officials in 69 major urban centers in the country. We have consulted with people experienced with youthful offenders, with people in the Federal Government who enforce the present Federal firearm laws, and we have consulted with many other people and organizations concerned with this problem. These consultations, our studies, and months of painstaking work have culminated in the drafting of a bill which has been ready for introduction for the past several weeks. Because of the civil rights debate, the press of other important business before the Senate, and my own work in connection therewith, it has not been possible to place the bill before the Senate until now.

I am happy to say that Representative MOORHEAD has already introduced my bill in the House of Representatives.

This bill in no way conflicts with the second amendment to the Constitution, as the purpose of this clause, as stated by the Constitution and court interpretations, was to insure the continuation of and to render possible the effectiveness of a militia. The right to bear arms is not affected by filing shipping reports.

This is a reasonable and good bill, geared to meet the most outstanding problem in the area of firearms control. This bill will bring control where, at present, there is chaos. This bill is designed to inform local authorities of the existence in their community of weapons in the hands of juveniles, and to aid them in the enforcement of their local laws. I, therefore, introduce this bill for appropriate reference, and, Mr. Pres-

ident, I ask unanimous consent that a memorandum which I have prepared concerning this proposed legislation be printed in the RECORD at this point.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the memorandum will be printed in the RECORD.

The bill (S. 3436) to amend the Federal Firearms Act so as to regulate more effectively the shipment of firearms, known as pistols and revolvers, in interstate commerce, and thereby to assist local jurisdictions in controlling the use of such weapons by juveniles and irresponsible persons, introduced by Mr. HENNINGS, was received, read twice by its title, and referred to the Committee on the Judiciary.

The memorandum presented by Mr. HENNINGS is as follows:

MEMORANDUM RE THE NEED FOR FIREARMS CONTROL LEGISLATION

This measure simply requires the filing of shipping reports on all interstate shipments of pistols and revolvers. It is not intended as a measure to prevent or limit the legitimate use of these firearms; indeed, I would be opposed to such legislation. However, investigations by the Subcommittee To Investigate Juvenile Delinquency have indicated a serious problem of law enforcement, which results from the accessibility of weapons to juveniles, particularly pistols and revolvers which are available through mail-order channels. At the present time, local authorities often find it difficult to enforce local firearms laws, because of a lack of information about firearms shipments into their communities.

The measure I am presenting today will set up a reporting procedure for such shipments. The Treasury Department will be a central depository for shipping information and will make such information available to local communities.

Under the present Federal firearms law, dealers and shippers must keep records on interstate firearms shipments for at least 10 years, but this is of little value since there is no central information center. It is obviously impossible for the local authorities to check with each and every shipper in the country to find out if a weapon was sent into their jurisdiction and yet they need this information if they are to enforce their local laws for purchasing and possessing firearms. Any local community which feels that it has no need for such firearms information is not affected by this bill since it need not request it from the Treasury Department. This information, however, would be available for them, if desired. The value of such registration information is shown by a report which I received from Col. Jeremiah O'Connell, former chief of police of the city of St. Louis, Mo., who was able to trace a weapon to its owner and solve the murder of a police officer. Without information of the type called for under this legislation, the murderer may never have been apprehended. Colonel O'Connell said:

"I am very much in favor of this particular legislation. A few months ago one of our officers was shot, during the commission of a holdup in a tavern. He later died as results of his wounds. Later a car was found abandoned a short distance from the scene and a revolver was found in same. In a matter of hours, we were able to trace this particular gun through several dealers in various States and finally to St. Louis.

"Further investigation here as to ownership, etc., played a major part in the solution of this crime, and the subsequent life sentences to both participants."

The bill provides the following:

Section 1 requires that persons who cross a State line and after procuring a pistol or revolver return to their home communities, report to the Treasury Department their names and addresses as well as a description of the weapon. They are given 5 days within which to make their report. However, if the crossing of a State line occurs in the course of a trip or a vacation, reporting is not required if the weapon is returned to its original point of departure within 90 days. The first section of the bill also incorporates a definition of "unserviceable," and constitutes a means whereby the conversion of athletic starter pistols into deadly handguns can be controlled.

These ingenious devices are imported by the thousands with solid, unbored, removable barrels. A simple operation permits such pistols to be transformed into lethal weapons by the substitution of a regular pistol barrel for the harmless solid one. To indicate the problem that these weapons have created, I would like to quote from the testimony of the Honorable Stephen Kennedy, commissioner of police, and James Liggett, chief of detectives, of New York City, given before the Senate Subcommittee To Investigate Juvenile Delinquency in our hearings in New York last September, as follows:

"Firearms dealers, we learned, were engaged in importing a cheap starter pistol from West Germany. Now this was done purely on an economic basis and as far as I can ascertain it is legal in every respect. There is no question about that at all.

"The completed weapon is sent in two shipments. One shipment contains a revolver with a plugged up barrel that is detachable and is imported as a Colt type revolver incapable of being fired.

"That is in quotes. While another shipment contains the bored barrel for such revolver, the rifle barrel. The importations are made under license issued by the Internal Revenue Department, and proper records are made of all transactions.

"As I said before, it is perfectly legal in every respect. The dealers then employ either their own licensed gunsmiths or by contract obtain other licensed gunsmiths to detach the plug barrel and screw in the appropriate bored barrel, the rifle barrel, thereby converting the parts into a workable lethal firearm. One of the products is known as Rohn and it is made of the poorest metal or plastic-type substance, and it is advertised in newspapers and magazines as being sold for anywhere from $6.50 to $8 or $10, I have forgotten the exact amount.

"But it is within the pocketbook range of the young person. That is the thing that is disturbing about it. Now these things come in as starter pistols and I didn't know we had about 80,000 starters in this country. If you would care to see one of those I have one here with a ballistics man who would be very happy to demonstrate it for you.

"Senator HENNINGS. We will be glad to see it.

"Mr. KENNEDY. Chief, will you bring up that starter pistol?

"These things when they are advertised in the newspapers and magazines really are attractive to the average young person even when the person hasn't got evil designs in their use.

(Chief of Detectives James Liggett.)

"Senator HENNINGS. We are very glad to have you here, Chief.

"Will you just briefly tell us about this?

"STATEMENT OF JAMES LIGGETT, CHIEF OF DETECTIVES, NEW YORK CITY

"Mr. LIGGETT. This is manufactured in West Germany, and it is brought to this country allegedly as a starter's pistol, and it should discharge a .22 blank cartridge. Now this particular barrel that I hold here has a solid base at the end of the barrel.

"We have a hole here in the upper part of the so-called barrel to eject the gases and are usually the construction of a starter's pistol. Now this when it arrives in New York arrives in this fashion and construction and has all of the appearance of a starter's pistol and it is not in violation of law in New York State to possess the same, nor does it require registration in the Federal jurisdictions as well.

"However, in a separate shipment there is forwarded a rifle barrel which may be substituted for this block barrel."

Section 2 of the bill would require that all dealers, shippers, and importers of pistols and revolvers report to the Treasury Department a description of any handgun sent in interstate commerce together with the name and address of the recipient of the weapon.

Section 3 of the bill authorizes the Secretary of the Treasury to provide to local authorities, upon their request, reports as to the weapons sent into their jurisdictions as well as the names and addresses of the recipients.

Local authorities must have the means to protect the public from brutal and deadly attacks by unrestrained youths and adults who today wield pistols and revolvers, as well as other dangerous weapons.

I do not maintain that this bill will completely prevent the use of firearms in juvenile crimes. It is not a cure-all for what is a serious and complex problem; but it is a necessary step to enable local authorities to control the use of these weapons by irresponsible persons.

I am introducing for appropriate reference this bill which will amend the Federal Firearms Act, and will provide a means by which local authorities may more effectively do their job.

MUNICIPAL ARTS COUNCIL FOR DISTRICT OF COLUMBIA

Mr. MORSE. Mr. President, I introduce, for appropriate reference, a bill providing for a Municipal Arts Council for the District of Columbia.

First, this bill would establish for the District of Columbia a Municipal Arts Council for the purpose of furthering cultural activities in the Nation's Capital.

Operating within the District of Columbia Recreation Board, the Arts Council would include representatives from the major art fields of music, drama, dance, literature, architecture, photography, graphic and craft arts.

The 21 individuals on the council would be appointed by the District Commissioners from local organizations and educational institutions where programs in these fields are carried on.

The District of Columbia Recreation Department, established in 1942, receives about $2.7 million a year for its activities. Of this amount, only about $16,000 is earmarked for the arts, nearly all of it going for the Watergate concerts, with Local 161 of the Federation of Musicians putting up an equal amount. The rest of the money goes for sports activities.

I think it is long past time for Congress to give equal emphasis to the arts in Washington, D.C. This council would help accomplish that purpose.

Second, my bill embraces the set-aside of one mill from each District of Columbia tax dollar for cultural activities as provided in the bills introduced in the House last year by Representative McDOWELL and in the Senate by the Senator from Montana [Mr. MURRAY].

This set-aside would provide about $175,000 a year for such programs.

It seems to me that to use such funds to best advantage, there should be an advisory council with special interest and knowledge in this field.

There is some prospect that a Federal Advisory Council on the Arts may be set up to act in the same capacity for national cultural programs.

However, we need such a council, too, for the city of Washington, and that is what my bill proposes.

It is not enough that Washington should be the political capital of the United States. We must accompany political leadership with cultural leadership if we are to make this city a true national capital.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 3437) to provide for the establishment of a municipal arts council representative of local nonprofit organizations and institutions, including educational organizations and institutions, in the District of Columbia with active programs in the arts, to set aside for such local cultural activities 1 mill out of each $1 of tax revenue of the government of the District of Columbia, and for other purposes, introduced by Mr. MORSE, was received, read twice and by its title, and referred to the Committee on the District of Columbia.

PRESENTATION OF GOLD MEDAL TO ROBERT FROST

Mr. SALTONSTALL. Mr. President, on behalf of myself, and the Senators from Vermont [Mr. AIKEN and Mr. PROUTY], I introduce, for appropriate reference, a bill to authorize the President of the United States to present a gold medal to Robert Frost in recognition of his poetry, which has so distinguished his own country and is now renowned throughout many parts of the world.

Robert Frost is a New England poet, in the profoundest sense of its natural setting and its people. His deep love and understanding of this region—his identity with his native area—provide the essence for his work. Frost's poetry refines the unique character of New England with language of universal meaning which can be understood across the land and across the seas—by men who have never seen bending birches stand out against a background of evergreen, an apple orchard covered by snow in winter, or a runaway colt.

Robert Frost's poetry communicates the wisdom of man and nature joined in a continuing struggle for life. His philosophy teaches the importance of toughness and gentleness combined, extolling the coexistence of the resolute strength of the farmer mending his stone wall following the ravages of winter and the sensitivity of the early-morning mower who leaves a tuft of lovely flowers uncut. He praises the rugged individual and the rigors of country life, writing of those who choose the road less traveled by.

In a world beset by new anxieties and further challenges to the dignity of man, Frost's poetry returns us to the basic truths of life, reassures us of mankind's persistent humanitarianism, and replenishes us with simple reminders of nature's helpfulness and beauty.

We have adequate precedent for such a medal, Mr. President, with similar awards in medicine to Jonas Salk, music to Irving Berlin, nuclear technology to Admiral Rickover. Robert Frost is now 86 years old, a visitor to the White House, consultant to the Library of Congress. He is mentioned perennially as a Nobel Prize recipient.

I hope my colleagues will join us in support of well-deserved recognition from the Nation's highest lawmakers and Chief Executive to Mr. Frost for his literary gifts to all of us.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 3439) authorizing the President of the United States of America to present a gold medal to Robert Frost, a New England poet, introduced by Mr. SALTONSTALL (for himself, Mr. AIKEN, and Mr. PROUTY), was received read twice by its title, and referred to the Committee on Banking and Currency.

PROHIBITION OF EXERCISE OF CERTAIN JUDICIAL POWER RELATING TO ADMINISTRATION OF INTERNAL AFFAIRS OF LABOR ORGANIZATIONS

Mr. CAPEHART. Mr. President, on April 20, 1960, I suggested from the floor of the Senate that perhaps the Senate Committee on Labor and Public Welfare or the Committee on the Judiciary should study the problems arising from the unions' monitoring system and the lack of free elections.

The senior Senator from Oregon [Mr. MORSE] has stated that such hearings could not be held until legislation was pending before these committees.

Accordingly, I have been requested to introduce a bill with the hope that the matter will come before the appropriate committee for hearing.

I ask unanimous consent that the bill be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 3444) to prohibit the exercise of certain judicial power in connection with administration of the internal affairs of labor organizations, introduced by Mr. CAPEHART, by request, was received, read twice by its title, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act of September 14, 1959, Public Law 86-257 (73 Stat. 534; 29 U.S.C. 482(b) and the following) be amended by inserting at the end of section 482(b) thereof the following proviso:

"No court of the United States shall have jurisdiction to issue or continue in effect any judicial order appointing a receiver, trustee, master, monitor, or administrator, whether so denominated or otherwise, to manage or administer, or supervise the management or administration, of the affairs of any labor organization except that nothing contained herein shall be construed to prevent the appointment of a receiver for the sole purpose of preserving the funds, property, or assets of a labor organization pending the conduct of an election of officers or vote upon the removal of officers pursuant to section 482(b) hereof. The term 'labor organization' as used herein means any organization of any kind, or any agency or employee representation committee or plan, in which employees participate and which exists for the purpose, in whole or in part, of dealing with employers concerning grievances, labor disputes, wages, rates of pay, hours of employment, or conditions of work."

AMENDMENT OF MUTUAL SECURITY ACT OF 1954—AMENDMENTS

Mr. LONG of Hawaii. Mr. President, on behalf of myself, and my colleague, the senior Senator from Hawaii [Mr. FONG], I submit an amendment, intended to be proposed by us to the bill—S. 3058—to amend further the Mutual Security Act of 1954, as amended, and for other purposes, which I ask to have printed and lie on the table.

The purpose of the amendment is to add a chapter VII to the mutual security bill to authorize a Center for Cultural and Technical Interchange Between East and West. The amendment embodies S. 3385, which I introduced on April 19 with 48 cosponsors.

The PRESIDENT pro tempore. The amendment will be received, printed, and lie on the table.

Mr. GRUENING. Mr. President, I submit four amendments to the Mutual Security Act.

The first amendment—which bears the Roman numeral I—is patterned after the amendment submitted by me last year and relates to defense support, technical cooperation, and special assistance. It would require, with respect to these programs, the submission of firm budgets within 90 days after the Mutual Security Appropriation Act is enacted. It is printed at page 628 of the Senate hearings on the Mutual Security Act of 1960. On the following page you will find the letter to me from the Comptroller General of the United States.

You will note that the Comptroller General would go even further. He would curtail the President's use of the discretionary funds permitted him under sections 451(a) or 501 of the act. These I do not propose to curtail, although I must admit that the Comptroller General has made a strong case for some revision of those provisions also.

The second amendment—which bears the Roman numeral II—and is to be found on pages 628–629 of the hearings—relates to military assistance only. It would require the submission, during the annual requests for authorizations and appropriations, a clear and detailed explanation, on a country-by-country basis,

of the force objectives toward the support of which military assistance is proposed to be furnished and other data, enumerated in the proposed amendment, all designed to let the Congress know clearly where we are going and how much it will cost to go there.

I call this amendment "the required planning" amendment.

This amendment has been suggested by the Comptroller General, as will be seen by his statement in the middle of page 629 of the printed hearings. Of this proposal, the Comptroller General has said:

Although the Department of Defense has taken measures to project the program costs 3 years into the future, the present budget justification submitted to the Congress by the executive agencies does not contain information which we consider necessary to provide the Congress with a fully informed basis for appropriating funds and for reviewing program performance.

My third amendment—which bears the Roman numeral III—is exactly the language contained in the House-passed bill. I call my colleagues' attention to H.R. 11510—the House-passed Mutual Security Act of 1960—and to pages 10 and 11, where my proposed amendment appears as subsection (e).

It is a simple amendment.

It only requires for nonmilitary public works programs and projects abroad the application of the same standards as for domestic public works programs and projects as prescribed by the Bureau of the Budget.

My fourth amendment—which bears the Roman numeral IV—takes this concept one step further and requires specific congressional authorization for large foreign public works programs and projects and for such other large endeavors as airfields, highways, railways and so forth. "Large" is defined in the proposed amendment as any program or project the total cost of which will be $1 million or more.

Mr. President, I ask that these amendments be received and printed and lie on the table, and that the texts of these amendments be printed in the CONGRESSIONAL RECORD at the appropriate points in my remarks.

The PRESIDENT pro tempore. The amendments will be received, printed, and lie on the table; and, without objection, the amendments will be printed in the RECORD.

The amendments are as follows:

Amend section 401 by adding at the end thereof an appropriately lettered new subsection as follows:

"Section 537(f) is amended to read as follows:

" 'Within ninety calendar days after the enactment of the Act making appropriations for the fiscal year 1960 and subsequent fiscal years for carrying out the purposes of this Act, there shall be submitted to the cognizant committees of the House and Senate detailed budgets on a country-by-country basis setting forth, with respect to defense support, technical cooperation, and special assistance, the specific purposes in detail by amounts for which the funds available will be obligated during the respective fiscal year, and such funds shall be available only for the purposes thus specified: *Provided*, That this subsection shall not apply to funds affected by the use of sections 451(a) or 501 of this Act, or to reasonable variations in the use of funds within a country for purposes other than those specified in the detailed budgets.' "

Amend section 401 by adding at the end thereof an appropriately lettered new subsection as follows:

"Section 537(f) is amended to read as follows:

" 'During the annual presentation to the Congress of requests for authorizations and appropriations of military assistance under this Act, there shall be submitted a clear and detailed explanation on a country-by-country basis of the force objectives toward the support of which such assistance is proposed to be furnished; the projected costs of equipping and the annual recurring costs of maintaining such force objectives, together with the estimated costs of present plans for modernizing such force objectives; an explanation of the degree to which such force objectives had been equipped, maintained, and modernized under programs already approved; the accomplishments to be achieved with the funds currently being requested, and estimates of the timephased costs for carrying out the remainder of the program.' "

Amend section 401 by renumbering subsections e, f, g, h, and i as f, g, h, i, and j, respectively. Insert after subsection (d) the following new subsection:

"(e) Section 517, which relates to completion of plans and cost estimates, is amended as follows:

"(1) Insert '(a)' immediately after "SEC. 517." Following section 517(a) as renumbered, insert the following new subsection:

" '(b) All nonmilitary flood control, reclamation and other water and related land resource programs or projects proposed for construction under titles I, II, or III (except section 306) of chapter II, under section 400, or under section 451 of this Act, shall be examined by qualified engineers, financed under this Act, in accordance with the general procedures prescribed in circular A–47 of the Bureau of the Budget, dated December 31, 1952, for flood control, reclamation and other water and related land resource programs and projects proposed for construction within the continental limits of the United States of America. In all cases the benefits and costs shall be determined, and a copy of the determination shall be submitted to the Speaker of the House of Representatives and the Foreign Relations Committee and the Appropriations Committee of the Senate. No such program or project shall be undertaken on which the benefits do not exceed the costs and which does not otherwise meet the standards and criteria used in determining the feasibility of flood control, reclamation, and other water and related land resource programs and projects proposed for construction within the continental limits of the United States of America as per circular A–47 of the Bureau of the Budget, dated December 31, 1952.' "

(Language contained in House-passed bill, H.R. 11510—"Mutual Security Act of 1960"—on page 10, lines 8 through 25 and on page 11, lines 1 through 10.)

Amend section 401 by renumbering subsections e, f, g, h, and i as f, g, h, i, and j, respectively. Insert after subsection (d) the following new subsection:

"(e) Section 517, which relates to completion of plans and cost estimates, is amended as follows:

"(1) Insert '(a)' immediately after 'SEC. 517.' Following section 517(a) as renumbered, insert the following new subsection:

" '(b) Each nonmilitary program or project for the purpose of flood control, hydroelectric power development, reclamation of land, highway construction or improvement, airport construction or improvement, railway construction or improvement, harbor construction or improvement, navigation improvement, housing or hospital construction and programs and projects related to such activities herein specifically enumerated which are proposed for construction under authority of title I, II, or III (except section 306) of chapter II, under section 400 or under section 451 of this Act and for which the estimated total cost is $1,000,000 or more shall be separately authorized by the Congress and no funds for such projects shall be appropriated without such prior authorization.' "

Mr. SALTONSTALL submitted an amendment, intended to be proposed by him, to Senate bill 3058, supra, which was ordered to lie on the table and be printed.

Mr. JOHNSTON of South Carolina submitted amendments, intended to be proposed by him, to Senate bill 3058, supra, which were ordered to lie on the table and to be printed.

Mr. ELLENDER submitted amendments intended to be proposed by him to Senate bill 3058, supra, which were ordered to lie on the table and be printed.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows.

By Mr. MUNDT:

Resolution adopted by the Senate Committee on Agriculture and Forestry on April 27, 1960, for submission to the U.S. Tariff Commission, relating to lamb and mutton imports.

WATER IN OUR FUTURE

Mr. MANSFIELD. Mr. President, in his opening remarks before the annual district convention of Rotary clubs, at Missoula, Mont., last week, the Commissioner of Reclamation, Floyd E. Dominy, suggested that his coming to Montana was becoming a habit, and that perhaps there were others who were better qualified to speak on water and reclamation. I think the Commissioner was being unduly modest. There is no agency head in Washington whom we would rather have come to Montana, and there is no one more qualified to speak about our water resources and their conservation and utilization.

The people of Montana are fond of Commissioner Dominy. He is almost like a native-born son. He has been good to the Treasure State in his various capacities at the Bureau of Reclamation.

On Saturday, Mr. Dominy delivered another of his fine speeches concerning water before the annual district convention of Rotary Clubs. A paragraph from the text of the speech summarizes the importance of our natural resources:

From the beginning of time, man's place of settlement, and to a large degree his success and progress, individually and as a tribe or nation, has been determined by the availability of land and water and the way in which they were used.

Mr. Dominy also expressed support for the continued expansion of our irrigation lands; and he did so in a manner which is most helpful in combating the erroneous statements to the effect that irrigation adds to our crop surpluses.

Mr. President, I ask unanimous consent to have printed at the conclusion of my remarks the text of the speech by the Commissioner of Bureau of Reclamation, Floyd E. Dominy, speech before the annual district convention of Rotary clubs, at Missoula, Mont., on April 23, 1960.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

WATER IN OUR FUTURE

(Address by Commissioner of Reclamation, Floyd E. Dominy, before the annual district convention of Rotary Clubs at Missoula, Mont., Apr. 23, 1960)

This coming to Montana to make a speech is getting to be a habit with me. When your good Governor Al called me about participating here tonight I tried to argue him out of it because I had already said about everything I could about Montana water resources in four previous talks in the State over the last year. But Al insisted and so here I am.

But tonight, instead of discussing water problems in Montana, I want to talk about the importance of water in the lives of people everywhere. We folks here in the West are more generally aware of the importance of water than most people because we have had to face up to ways and means of putting it to work for our very survival. Because it is an immediate and ever pressing problem, we are inclined to think only of the present and only of our own immediate situation. Too often we forget the past, push aside the future, and ignore the problems of others. Yet water, while one of the most common components of our daily lives, is one of the most necessary and vital to life. We cannot and must not ignore its part in charting the course of civilization.

From the beginning of time, man's place of settlement, and to a large degree his success and progress, individually and as a tribe or nation, has been determined by the availability of land and water and the way in which they were used.

History is replete with the story of man's growth—with the rise and fall of different civilizations—in terms of his epic concern with water. In the Old Testament, most ancient of records, are such references as this one from Deuteronomy, "A good land, a land of brooks of water, of fountains and depths that spring out of valleys and hills." Or there is one from Hosea, "I did know thee in the wilderness, in the land of great drought."

There is, in the Moslem's Holy Koran, an admonition that "No one can refuse surplus water without sinning against Allah and against men."

All life depends on water. Some tell us that the origin of life on our planet is believed to be the sea. Today, after millions of years of evolution, man's tissues are still bathed in a saline solution closely akin to that solution from whence the first protoplasms of life emerged.

Every organic process requires a watery medium. The embryo floats in a liquid from conception to birth. Water acts as a lubricant, helps protect tissues from external injury and even gives flexibility to the muscles, tendons, cartilage, and bones. So you can see the five or so pints of water each of us in the Temperate Zone requires as a daily intake are essential to our very existence.

Life would be very easy if we could figure our daily per capita requirements on that amount of actual intake. But it isn't that simple—comparing intake with requirements. There are the gallons and gallons of water we demand daily through our domestic water systems for the supercleanliness of this modern civilization, for our garbage disposals, our automatic laundries and dishwashers, and many types of home air conditioners.

Then there are the tons and tons of water which virtually every industrial plant of any consequence requires for successful operation. Many steel plants require 270 tons of water for every ton of steel produced. It requires 2,500 tons of water for a ton of synthetic rubber. There are innumerable similar examples.

Or let's take a look at water needs for agricultural production. Each pound of dry vegetable products, to reach your table, requires from 300 to 700 pounds of water in the growth process. Sugar beets require about 1 ton of water for every pound of refined sugar.

A dairy cow only consumes about 4 pounds of water in making 1 pound of milk, but it requires 4 tons of water to produce the feed she eats every day. It figures out to about 26 gallons of water to a pint of milk. Or remember the next time you eat a beefsteak that it takes about 3¾ tons of water to back up the feed and moisture intake of a fattening steer. That figures out to approximately 900 gallons of water for every pound of steak.

A Presidential commission estimated in 1950 that our total daily water needs in this country at that time were 185 billion gallons, and predicted that our needs by 1975 would be an astronomical 350 billion gallons daily. But the Department of Commerce has just reported that our water needs in 1960 are already up to 323 billion gallons and by 1975 we will be using 450 billion gallons. The greatest increase in use is by industry, but both domestic and agricultural needs are also increasing sharply.

Thus the competition for water is growing keener every day. The increased demand for water is geared not only to a higher per capita use, but to a constantly growing population. The present census will show a national population of over 180 million people in the United States. By 1975, only 15 years hence, demographers estimate a national population of 230 million people, an increase of 28 percent.

Now what about irrigation versus other uses of water? It is generally recognized that water for domestic use has the highest priority. The only competition here is between growing municipal needs and long-established irrigation water rights. Municipalities having the right of eminent domain may exercise that right to acquire existing rights for the higher domestic use purposes if it is so required. Just compensation must be paid for such rights, however.

In these days of concern about water supplies, there is beginning to be quite a bit of discussion, and some actual analysis, centering around the value of water for various competing uses other than domestic consumption. We welcome these analyses because they lead to a better understanding of the problem, and they stimulate thought and action.

Until usable statistics are available, I am inclined to be cautious of general statements that irrigation farming is a less productive user of water than an ordinary industrial plant. Granted that statistics will show vast differences per unit of water used in numbers of workers employed, value added and income from manufacturing as compared to irrigation farming, the natural assumption is that the manufacturing industry can support many more people per acre-foot of water.

Not to discredit this type of work, but rather to encourage and broaden it, I hasten to advise that a decision cannot be reached solely on the basis of first stage effects alone. One needs to include in his purview the contingent economic activities as well as the basic element. This means all the trade, transportation, processing and related business that is inspired by the production of a basic raw commodity in a community.

Another important consideration is the availability of resources to combine with the water and the proximity of a market. Land and trained agricultural labor in plentiful supply such as exists here in the northern plains and intermountain area offer important basic ingredients for economic development which can hardly be ignored in establishing a pattern of water use.

The Water Supply Act of 1958 provides authority to plan for and construct capacity in water storage and supply systems for deferred municipal and industrial uses. This provides cities which are willing to accept the responsibility of financial sponsorship some turning room for future growth. But since it does entail eventual financial responsibility for that reserve capacity, an overzealous approach is certainly to be avoided.

From our experience in the West the theorem can be drawn that irrigation development provides a sound basis for initial economic development. Transportation, trade and processing industries follow. Light industry accompanies these outgrowths. From these nuclei the important urban centers of the West have been built, and a well-balanced, diversified economy ultimately prevails.

Questions are often asked as to the advisability or necessity of adding acreage to our irrigated areas in the present time of crop surpluses. There should be no one better informed of the benefits of a changeover from dryland to irrigated production than you people right here in Montana. Wheat is the principal crop Montana contributes to the surplus but there is very little wheat grown on irrigated land. Actually, irrigation frees farmers from the fetters of a one-crop economy by permitting diversification. There is no long-lasting or critical surplus problem in meats, vegetables, and fruits. These are among the principal products of irrigated farms.

Bear in mind also that all reclamation development today is not bringing new lands into production. A significant share of our effort is in the nature of a rescue and stabilization operation for lands which are presently irrigated but which lack a stable supply. Only a few years ago, when Colorado was hit by a critical drought 2 years in a row, the Colorado-Big Thompson project saved most of the South Platte River Valley from real disaster. The great bulk of the irrigation water supplied by the Central Valley project in California is a supplemental supply for keeping land in production as the ground water supply declined.

But fully as important as consideration in dividing up the available water supply among the competitive uses should be our concentration on developing a greater supply. Actually, in a normal year according to Geological Survey estimates, the United States receives sufficient rainfall to cover the entire Nation to a depth of 30 inches. About 21 inches of this is lost through natural transpiration. Much of this amount is not wasted because it supports our vast forests, rangelands, and nonirrigated farms. And in water-short areas of the West, at least, we are doing something about nonessential transpiration losses by seeking to eliminate waterwasting weeds and plants.

The remaining 9 inches which would otherwise flow away to the ocean represent

our manageable supply. This can be translated into a supply of about 1,160 billion gallons a day as contrasted to our estimated daily needs by 1975 of 450 billion gallons. But much of it cannot be used because it falls at the wrong time and in the wrong places.

Our job, then, is to turn more of the available water into a useful and dependable supply. One way is by a reduction in waste. It is a curious anomaly that here in the West, where water is in the shortest supply, we have some of the greatest water wasters of all in the users themselves.

Some irrigators with a plentiful water right have a tendency to pour the water on their fields to the extent that it is available and usually much more than is necessary to produce a crop. On the other hand, we have had some examples during dought periods of how curtailed and careful use of water can produce just as good, and in many instances better harvests than overuse of water.

Another major water waster is evaporation. Each year the Western States alone lose about 25 million acre-feet of water from exposed fresh water surfaces, principally ponds, lakes, and reservoirs. The loss represents the capacity of a reservoir approaching the size of our largest manmade storage pool, Lake Mead. While there is no expectation that evaporation losses will be completely eliminated, we are pushing ahead with research into the use of a surface chemical cover which gives great promise of effecting substantial reduction in evaporation from still water surfaces.

Another fascinating facet of potential future water development is limited manipulation of the hydrologic cycle. Within recent years, scientific and physical means of modifying weather have been demonstrated in one way or another. It is quite possible that there will be a real breakthrough in future decades which could mean greater storage of winter snow in the mountains and even controlled precipitation, to a degree at least, during the growing season.

Movement of water from areas of plenty to areas of need is another area of potential future improvement. While the average annual precipitation nationally averages 30 inches, it varies in specific localities from a mere inch or so to 90 to 100 inches and more. A basic precept of Bureau of Reclamation operations is to store and otherwise conserve surplus water and move it to where it is needed. In the Central Valley of California, to mention one example, we are moving water in river-sized quantities as far as 500 miles. On the Colorado-Big Thompson project we are accomplishing the same purpose by moving water from the Pacific to the Atlantic watershed by a tunnel piercing the Continental Divide.

A prime element in movement of water is pumping. As the need and market value of water increases we can afford to pay more for pumping energy to develop the water supply. On the other hand, if really low-cost power results from nuclear development it will open the way to movement of water from one locality to another that now appears utterly fantastic.

Another possibility of additional usable water is the demineralization and purification of presently unpotable supplies. This is not a new idea. The seafaring Phoenicians knew about and practiced distillation of sea water in their far-reaching travels. Purification apparatus has been a standard part of ocean survival kits for the military for some years. The Congress has appropriated funds, first for basic research and more recently for demonstration plants to test promising methods. The Office of Saline Water, a sister agency within the Department of the Interior, now has several such pilot plants in construction. The present cost of sea water demineralization is not much above that which water-short communities are willing to pay for a domestic supply and it is not unlikely that this decade will see development of large-scale plants for this use. It appears to be many years before demineralization will be economically feasible as a source of irrigation water.

All of these potential and impending developments are important in our future. Of prime importance right now, today, is the maintenance of an orderly program, both planning and construction, to meet the needs of the future.

Our program is based on the multipurpose concept of water uses. Like the packinghouse, which now uses practically everything but the squeal of the pig, we are concentrating on squeezing every possible benefit out of the available water supply from the time it falls on the mountain peaks until it transpires into the atmosphere or finds its way into the ocean.

The administration and the Congress have been most understanding and generous in their support of resources development work but the Federal Government cannot and should not be expected to assume the whole burden. State and local agencies must join in and there must be the closest coordination between all participants. All governmental agencies are creatures and servants of you, the public, and hence the burden ultimately falls on you.

You must be informed as to the necessity of a continuing effort. You must be aware of the necessity of coordination and cooperation between the several agencies and levels of government. You must be aware of the necessity of following democratic processes of give and take, of compromise to reach the most equitable solution to knotty and controversial problems. Only then can your government be responsive to your will.

In conclusion, I want to get outside the bounds of the United States for a moment to mention the importance of resources development elsewhere. Rotary is an international organization seeking to further the cause of peace and brotherhood, of human dignity and fellowship, by an understanding of one another's problems and lending a hand where possible.

The principal obstacle to reaching these goals appears to be the absolute government which subordinates the individual to the State. Another companion obstacle is the abject conditions of poverty and want in too much of the world in which such types of government fester and grow.

In many of these marginal countries, the individual is too preoccupied with a desperate battle simply to stay alive, to survive, to be concerned about whether his nation is absorbed into the Communist orbit or remains a part of the free world.

Many of these countries, I regret to say, are in the biblical belt, the cradle of civilization. Over the years and centuries, they have so used and depleted their resources that there is very little on which to base a free, self-supporting economy and consequent free peoples and governments. The Bureau of Reclamation, through the International Cooperation Administration, has been responsive to the requests from many countries to provide some guidance and ideas. We are helping in the training process and preliminary work to develop water supplies of various underdeveloped nations, and thereby restore their economies and self sufficiency.

Our experiences in these countries make us doubly aware of the importance of maintaining an orderly course in the development for perpetual use of our own great store of natural resources. And we are equally aware of the importance of continuing to lend a helping hand to other nations of the world in the true spirit of fellowship and brotherhood. To do otherwise would jeopardize our own future and that of all mankind.

BRITISH BLUE STREAK CANCELLATION: A NEW OPPORTUNITY FOR FREE NATIONS

Mr. MANSFIELD. Mr. President, the British Government has announced the abandonment of the Blue Streak, its major missile-development project. According to the press, the decision was based on such factors as enormous cost and the rapid rate of obsolescence in the missile field.

This decision highlights a serious dilemma confronting the Western nations. At the same time, the decision may also point the way to a great opportunity for all.

The dilemma, Mr. President, is that advanced scientific experimentation and development in what might be called the field of space and speed have outgrown the capacities in brainpower, manpower, and material resources of almost any nation which seeks to pursue these undertakings on a unilateral basis. Yet national stature, indeed, national vitality itself, may hinge to a large degree on significant national participation in this most advanced scientific activity.

The termination of the British Blue Streak project, for all practical purposes, leaves only the Soviet Union and the United States with major undertakings in the field of space and speed. But the scope of this field is so enormous that we cannot, and, I presume, neither can the Russians, regard its ever-expanding demands for talent and resources without a measure of awe and concern.

Ideally, I suppose, the resources of both nations—all nations—would be combined in a common endeavor to push back these common scientific frontiers of space and speed. While that time of cooperation may come, it is not now.

The order of the day is still competition in these matters. It is—now that the British have withdrawn—an actual competition between the United States and Russia. But in a larger sense, it is also the symbolic and ultimate test of the capacity of peoples to organize themselves for the progress of the human race under a free political order in contrast with a Communist system.

If the competition is seen in that larger sense, the present organization of the free peoples must be recognized as poor and inadequate. It is reasonable to assume that the Soviet effort in speed and space draws freely on the scientific talents, not only of the Russian people, but also of the people of Czechoslovakia, East Germany, Poland, or wherever they may be found within the Communist bloc. By contrast, the effort among the free peoples is confined largely to the United States, with a sprinkling of foreign scientists who can be prevailed upon to come and work for this country. In short, the free peoples are using only a fraction of their potential brainpower in any cohesive fashion in the field of space and speed. In this connection, we may well ask what will happen to the able British scientists and technicians who were engaged in the Blue Streak project now that it has been canceled? Will their specialized talents be employed in meeting this highest challenge to the

capabilities of free nations, or will they be diverted to other fields?

Similarly throughout NATO, in each of the member nations, there are scientists and technicians no less skilled than those of Britain or this Nation. In all of these other countries, there are men and women who are expert in propulsion, design, communications, electronics, physics, astronomy—in the entire array of scientific specializations which are involved in space and speed. Are they being used to further the progress of the free nations in the critical field of space and speed or are they diverted to other less significant functions?

It is well to note, in this connection, that the initial release of atomic energy was at least as much the work of European brainpower as it was of our own, for the two were merged and organized with great effectiveness in the Manhattan project during World War II. Without the contribution of that outstanding group of Europeans that achievement might have been long delayed.

This, then, may be the great opportunity to which I referred at the outset of my remarks—the great opportunity which the cancellation of the British Blue Streak may have opened for the free nations as a whole. That cancellation may bring home to us and to all the free nations the great desirability, and perhaps the compelling necessity, of a joint undertaking. What is called for now, I believe, is an initiative on our part which seeks to bring about the mobilization of the advanced technical competence, the facilities and resources, the scientific drive and enthusiasm wherever they may exist in an effort to intensify achievements in space and speed.

As I noted earlier, ideally, that effort should embrace all the nations of the world, and the door should not be closed to any nation which will participate in good faith in a common effort. But if that cannot be at this time, then I see no reason why those who are prepared to go forward jointly should not do so. This Nation, no less than others, will be better off if the scientific devices which carry mankind's influence beyond the earth's atmosphere bear the label of an ever-growing number of nations willing to contribute to a common effort.

Knowing something of the problem of organizing for scientific development in space and speed within our own Government, we should not underestimate the difficulty in enlarging this undertaking to embrace others. It may be that, as a beginning, it should be attempted with Canada and the United Kingdom but there would be much to be gained if, from the outset, the effort could include the NATO members and other nations.

If we should not underestimate the difficulty of such a joint enterprise, neither can we underestimate its urgency. To those who cannot see the handwriting on the wall, I respectfully suggest that it is already written large on the moon. The question which may well be involved here, Mr. President, is whether the world is to spin as a dead planet in swift silence through endless time and space, or whether this brief human experience in freedom on earth shall be carried to the stars.

CONGRESS SHOULD CONSIDER COMING BACK TO WORK AFTER THE CONVENTIONS

Mr. PROXMIRE. Mr. President, for the past several weeks it has been apparent that the Congress would be in a race against time to achieve, in this session, a legislative record that would keep pace either with the immense challenge of the time or with the promises the Democratic Party made in its 1956 platform.

Because much of our major work was postponed from 1959 to this year, because the vital 8 weeks from mid-February to mid-April were absorbed by action on the civil rights bill, because we appear to face a July 9 adjournment deadline, so that Representatives and Senators can attend the political conventions—for all these reasons it seems that Congress must compress into the next 10 weeks an immense amount of legislation.

It is barely possible that we can, and will, pass the most significant measures. But, Mr. President, even if we do so, I wonder whether such procedure is wise.

Ernest S. Griffith, in his classic "Congress—Its Contemporary Role," delineates a series of criteria for good legislation.

For most of these criteria, it is essential that there be ample time for debate, detailed amendment, public and congressional reflection, public reaction, public debate, and minority argument.

Mr. President, the quintessence of our legislative process is this time factor. And it is exactly what this Congress is sure to lose by rushing through this mountain of imperative legislation that confronts us in the closing weeks.

For this reason, Mr. President, I very reluctantly suggest that our leadership give thoughtful consideration to recessing the Congress over the two political conventions and reconvening at the end of July to finish the job. I doubt if any Member of Congress could suggest anything less popular with his colleagues at this point, or anything more lacking in political advantage.

Of course, for my colleagues who have to run for reelection—and this includes one-third of the Members of the Senate and all of the Members of the House of Representatives—this will be peculiarly and particularly difficult. I recognize I am asking for an extraordinary sacrifice. I am not one of those who is running for reelection, and therefore would not be making a sacrifice of the same degree.

On the other hand, from the standpoint of the size of the legislative load that confronts us, the imperative importance of taking the time to do justice to this legislation, and the painful shortness of time between today and July 9, I say we have a duty to consider this grim alternative carefully.

Mr. President, the prospect that this Congress may end up with a pathetically feeble record in the public interest is eloquently argued in this morning's New York Times, and I ask unanimous consent that this excellent editorial be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

WHAT NOW IN CONGRESS?

Now that the civil rights bill—such as it is—has become law and an election-minded Congress is looking forward to early adjournment, the legislative prospects for the remainder of the session are but thin and feeble.

This depressing outlook does not stem from lack of need for inspiration and action in many fields, ranging from health and social security at home to massive assistance for underdeveloped nations abroad. It stems rather from a lack of dynamism on the part of both the Eisenhower Administration and the leaders in Congress. What is safe is popular. Not much that is imaginative or striking or pioneering is likely to emerge from either end of Pennsylvania Avenue in the remainder of this 2d session of the 86th Congress.

The routine appropriations will be passed, but probably at lower levels than the national interest demands in such vital areas as the national defense, space and missile development, and the various forms of foreign aid. Of all strictly domestic matters, a massive breakthrough on Federal aid to education is without question the most important and most urgent. Yet the prospects of a really adequate measure are not bright. The Senate has passed a relatively good bill; the House has yet to act.

Some improvements in social security and the minimum wage are desirable and may have a chance. Last year the Senate approved an important measure to assist depressed areas, but even the smaller House bill on this subject, which has not yet come to the floor, far exceeds the administration's proposals. The President vetoed two housing bills last year, and may do the same if a third, pending in the House, should pass.

The generally negative record could be relieved if there were action on a few of dozens of other matters—such as agricultural subsidy reform, on which the President again expressed himself vigorously yesterday; or reviving the clean elections bill that passed the Senate in January and promptly went into deep-freeze; or preserving natural areas and expanding the national parks system while there are still areas suitable to be preserved.

There is no dearth of legislation to be enacted or programs to work for; but there is dearth of conviction. And the distractions of the campaign are being felt with increasing and inevitable force in these last few weeks before the conventions.

THE PRESIDENT'S REFUSAL TO REAPPOINT TO THE FEDERAL POWER COMMISSION LONE CONSUMER CHAMPION

Mr. PROXMIRE. Mr. President, yesterday I brought to the attention of the Senate the fact that President Eisenhower had announced at his news conference that he did not intend to renominate Mr. William R. Connole to the Federal Power Commission. The President gave as his only reason his belief that he could find a "better man for the job." I quoted articles yesterday from Time magazine and Petroleum Week, as well

as an expression from Mayor Dilworth, of Philadelphia, representing a group of mayors of our largest cities. All of these were full of high praise for Commissioner Connole, citing not only his excellent technical and legal knowledge in the power field, but the fact that he is the only one of the present Commissioners who represents the consumer point of view on the Commission and who believes in the effective regulation of independent gas producers. What this means, Mr. President, is that Mr. Connole believes in carrying out the provisions of the Natural Gas Act as passed by Congress and upheld by the Supreme Court.

This morning's Washington Post carries an editorial also asking the President to reconsider his intention to drop Connole, or "at the very least," to be certain that his replacement is "an equally stout defender of the consumer." This editorial further quotes from Fortune magazine, another publication not noted for its antipathy to big business, in which that publication states that if it is true, as has been widely suggested, that Connole is the only man who really believes in regulation of independent gas producers, then the other four Commissioners, not Connole, should resign their positions.

Mr. President, I ask unanimous consent that this editorial from the Washington Post, entitled "Dropping a Dissenter," be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

DROPPING A DISSENTER

It is disquieting that President Eisenhower will deny reappointment on June 22 to William R. Connole, the only member of the Federal Power Commission who has shown a glimmer of independence. It is true that Mr. Connole placed himself in an ambiguous position by discussing a pending case with Thomas (Tommy the Cork) Corcoran. Nonetheless he has shown a devotion to his responsibility unmatched by his colleagues.

Last September Fortune magazine quoted a high official as saying that four of the five FPC Commissioners did not believe in continued regulation of independent gas producers. If this were so, Fortune commented, then "those four should resign." But ironically, the man who is scheduled to be replaced is the one Commissioner who has made it clear that he believes the job of the FPC is to regulate.

In 1954, a unanimous Supreme Court decision not only upheld Mr. Connole's dissenting position but also reproached the FPC for failing to take its regulatory chores seriously. Yet the FPC has since seemed to operate as if the Supreme Court were mistaken and has all but lobbied in Congress for a bill to exempt independent producers from regulation. This equivocation has not only disheartened consumers but also has increased the confusion in the industry.

For these reasons, it would be distressing if Mr. Eisenhower were to fill Mr. Connole's post and another vacancy on the FPC with spineless regulators. To be sure, Mr. Connole was one of three Commissioners approached by Tommy the Cork, but it should also be noted that Mr. Corcoran, a gas company lawyer, chatted with every Commissioner then on the job. In view of his overall record, Mr. Connole deserves reconsideration. If this is impossible, at the very least his replacement ought to be an equally stout defender of the consumer on a Commission that apparently does not believe that the Natural Gas Act means what the Supreme Court says it means.

TWENTY-FIVE YEARS OF PROGRESS THROUGH THE SOIL CONSERVATION SERVICE

Mr. SYMINGTON. Mr. President, yesterday was the 25th anniversary of the establishment of the Soil Conservation Service. I wish to salute the Soil Conservation Service and congratulate the nearly 2 million farmers who participate in this program. Their accomplishments in conserving our natural resources have been of benefit to all our citizens and will be even more important to future generations of Americans.

In the past 25 years the Soil Conservation Service has established the concept that scientific knowledge can be and should be applied to every acre of land, so as to protect and develop that land resource. The SCS has also led the way in developing the watershed approach to flood prevention and to efficient management of our precious water resources.

One of the main reasons the Soil Conservation Service has been able to build such an impressive record is because of the traditional democratic approach of local leadership and control. The individual farmers have the opportunity to join together in forming their local soil conservation districts. After this, the Federal Government steps in to help by providing technical service and assistance to members of the local district.

May I congratulate and pay tribute to the thousands of rural citizens who have, over the past 25 years, provided the leadership in the public interest of soil conservation. Nor should we overlook the foresight and leadership on the part of Members of Congress and the executive branch in getting this program started. It was President Roosevelt himself who took the lead, recommending to the Governors that each State should enact the soil conservation law to help implement the new national conservation program.

In view of our rapidly growing population and its increasing demands on our natural resources, it is not enough to speak of the past and praise the record of those who have brought us through the first 25 years of conservation work. Our own responsibility to future generations demands that we stand on the foundation built during the past quarter century and that we work ever harder to build on these accomplishments in the future.

Therefore, Mr. President, I congratulate the Soil Conservation Service and those who who have worked in it for their accomplishments, and pledge my continued support and effort for even greater conservation achievements in the years ahead.

The PRESIDING OFFICER. Is there further morning business?

VICE PRESIDENT NIXON ADDRESSES NATION'S NEWSPAPER EDITORS

Mr. KEATING. Mr. President, the Nation's newspaper editors, convening here in Washington last week, were treated to a series of appearances by various candidates for the Presidency. According to many reports, the highlight was provided by the address and question-and-answer performance of Vice President NIXON.

In his prepared speech, and perhaps even more emphatically in his fielding of the editors' questions, the Vice President demonstrated his grasp of the problems confronting America and his understanding of the need for vigorous and forward-looking programs to meet those challenges.

Particularly heartening was the Vice President's cautious but reasoned optimism about the forthcoming summit conference. Drawing on the knowledge he has gained on his far-ranging world travels, as well as the information supplied him as a key member of the administration team, he discussed with candor and sense the potential of the meeting of the heads of state.

His words are of special importance in the light of the announcement that the Vice President may stand in for President Eisenhower if the Chief Executive finds that "domestic requirements" demand his attention back in this country. Mr. President, although this decision may be attacked by partisans in some quarters, I regard it as a perfectly normal and acceptable delegation of the powers of the Presidency as set forth in our Constitution. It is of course possible Mr. Eisenhower will have to return to review complex legislation enacted by Congress.

The Vice President is specifically entrusted with the responsibility of aiding the President in all his endeavors and it is of the utmost importance, in our complex world today, that they work together in close harmony. If President Eisenhower decides that his most pressing duty at the moment lies in the United States while the summit conference is in progress, then it is his obligation and responsibility to turn over the reins of the negotiations in Paris to the Vice President.

Mr. President, returning to the editors' conference, I thought especially vital was the Vice President's emphasis on the need for the United States and other free world powers to enter into the summit negotiations with heads held high and with a spirit of confidence. We can and must take the offensive—not be on the defensive—in our dealings with the Communists, he pointed out.

Certainly, Mr. President, a positive approach to the problems of summitry presents the best means for this country to draw together the talents and energies of the free world in the interest of securing the peace. Rather than being fearful of the Communists or their propaganda efforts, we should carry out our foreign relations with an assurance based on our confidence in the will and resolve of the American people. In this way we can best mobilize the allegiances and support of our allies and the neutral nations of the world in the quest for peace.

The Vice President spoke eloquently of the Mutual Security program, which

is so vital to the success of our relations overseas and the building of the strength of the free world. His words can well be heeded in this body as we come to grips with proposed legislation on this subject this week.

In addition to his skillful handling of the problems of our foreign affairs, Vice President Nixon also dealt with a variety of domestic issues in his appearance before the American Society of Newspaper Editors. His performance all down the line was applauded, according to the Washington Post and Times-Herald writer Edward T. Folliard, in his article on April 24. In the final paragraph of his piece Mr. Folliard summed up the impression made by the Vice President in these words:

> The editors, including southern Democrats, could be heard expressing admiration for the way in which the Vice President handled himself.

Mr. President, because of the eloquence and importance of Vice President NIXON'S comments at this meeting, I ask unanimous consent that the text of his address and the transcript of the question-and-answer period, which appeared in the New York Times of April 24, 1960, be printed at this point in the RECORD.

There being no objection, the address and transcript were ordered to be printed in the RECORD, as follows:

TEXT OF ADDRESS

The first subject I would like to discuss today is one that is commanding major attention throughout the Nation. The second is one that deserves such attention.

I can dispose of the first subject quickly. Is religion going to be an issue in this campaign?

The answer to that question is that religion will be an issue exactly to the extent that the candidates and those who support them continue to make it an issue.

There is only one way that I can visualize religion being a legitimate issue in an American political campaign. That would be if one of the candidates for the Presidency had no religious belief. While the candidates in this campaign have differences on other issues, they are all men who recognize and cherish, both in their personal and public lives, the religious and moral principles which are the very foundation of our American ideals. As far as I am concerned, this fact removes any excuse for continued discussion of a so-called religious issue in this campaign.

That is why I intend to put the emphasis today and throughout the campaign where I believe it belongs—on the issues which the American people should be considering—the vitally important questions which affect the very survival of our Nation and our civilization.

The second subject I would like to discuss today is such an issue—how should Americans appraise the impending summit conference?

PROPOSES A YARDSTICK

Let us begin by considering the question of what yardstick should be used in judging the success or failure of this conference.

It is too generally supposed that the success of an international conference can be measured only in the amount of agreement that is reached, and agreement is too often equated with peace. This can be a serious and even fatal intellectual trap. The summit at Munich resulted in agreement—but the agreement meant war, not peace. It meant war because it was based on the fiction that there was a limit to Hitler's ambition.

Consequently, as we approach this meeting, let us recognize that the success of a conference should be measured not in terms of whether there was an agreement but on whether the agreement was on the right things.

I do not mean by what I have said to endorse the view that meetings like this one can produce no constructive results and should therefore be avoided.

I believe it is vitally important for the United States and our allies to approach this conference as an opportunity rather than as, at best, something of a hazard from which the optimum result would be to leave us no worse off than before.

OBJECTIVES PROPOSED

We should look upon the coming talks with the Soviets as a chance to champion and to achieve some affirmative fundamental objectives.

First, this conference provides an opportunity for us to make at least a beginning on practical arms control.

In this connection, we should concentrate on trying to get agreement on measures which would reduce the risk of war by miscalculation. Our Geneva proposal for prior notification of space vehicle launchings is the kind of step that might be agreed upon. We should also explore every avenue for breaking the log jam which bars the way to an enforceable nuclear test suspension agreement.

Fears have been expressed that the Soviets may try to make propaganda capital of their unspecific and completely unguaranteed proposals for general disarmament. If they do, there is no excuse whatever for us to be on the defensive against this kind of propaganda offensive. This conference will provide a world forum in which we can set the record straight.

We should emphasize that adoption of our general disarmament program with its effective controls will assure disarmament by deeds and not just by words.

OPEN SOCIETY THE GOAL

We must make evident to the entire world that if the Soviets are willing to consider some progress toward the kind of open society which we in the West maintain, both disarmament and peace itself can become realizable objectives rather than hopeless dreams.

The closed society of the Soviet Union is, in fact, the major barrier to the disarmament which the great majority of the people in all nations want.

Second, this conference provides an opportunity for defusing the Berlin crisis and for laying the groundwork for negotiations which would lead to a formal and definitive solution of that problem.

We must make clear at all times our steadfast determination that we can never enter into an agreement which would in any way jeopardize the right of the people of Berlin to choose and retain the kind of government they want.

Any Communist action, such as a separate Soviet treaty with East Germany, which purported to threaten our rights or those of the free people of Berlin will torpedo any prospects for progress toward the disarmament and reduction of tensions which Mr. Khrushchev insists he wants and which we also want.

Third, this conference affords a unique opportunity to demonstrate the confidence and unity of the Western alliance.

Mr. Khrushchev seldom misses an opportunity to express his confidence in the ultimate triumph of his system. Here is an area where we can and should go him one better.

MILITARY POWER STRONG

Our military position is strong and will remain so. The Soviets, in spite of their missile boasts, are conscious of the restraint our strength imposes on any aggressive designs they might have.

But it is in terms of nonmilitary strength, the area of so-called peaceful competition which Mr. Khrushchev discusses at every opportunity, that we have reason for the greatest confidence.

We can have no doubt after the President's recent trips through Asia and Latin America that the peoples of the world do not want totalitarianism. The leaders and people of the newly developed nations know that their own independence will die if the free West does not survive.

We should never cease to stress our faith that the future belongs to governments and ideologies firmly based on the principle of self-determination—a principle which applies to all people who want to be free whether in Europe, Asia, or the Americas.

We can make clear that we welcome the peaceful competition to which Mr. Khrushchev has challenged us. We should call on free people everywhere to mount the increased effort that this competition will require.

The summit conference, in other words, provides an opportunity for us to mobilize the moral and physical energies of the free world for the economic and technological struggle which will go on through the last half of the 20th century.

Moreover, as the great forces of history are shaped the West is in a singularly providential situation as the summit approaches.

HAILS WEST'S LEADERSHIP

Never in the years since World War II, when this fight for the survival of freedom and the dignity of mankind was forced upon us, has the West had such an array of leadership. At the head of the four nations most directly involved, the three that will sit at Paris and Germany, whose people are most immediately threatened, are men who command immense public confidence and prestige, both at home and abroad. As the time for this conference nears, De Gaulle of France, Macmillan of Great Britain, Adenauer of Germany, and our own President Eisenhower are fortified by the strongest national support which the West has yet produced.

We can rightly approach the summit with full confidence that the spokesmen of the free world, rather than Mr. Khrushchev, represent the tide of history.

And, as far as our own Nation is concerned, there has never been a time when Americans of both parties were more united than they are in this instance.

Mr. Khrushchev could make no greater miscalculation than to assume that President Eisenhower will be hamstrung in exerting strong leadership at Paris because we happen to be having a presidential election in the United States this fall.

In this connection, I recall a revealing conversation involving Mr. Khrushchev at the dinner in his honor given by the President at the White House. I introduced Senator LYNDON JOHNSON to Mr. Khrushchev by saying, "Senator JOHNSON, as you know, is the leader of the opposition party in the Senate." Mr. Khrushchev responded by saying, "Well, I've never been able to see any difference between your two parties in the United States."

He was certainly right in one respect. There is no difference between the two parties in their support of the President's uncompromising stand for the right of people everywhere to choose the kind of government they want and against those who by their aggressive policies would imperil or deny that right.

The summit finally provides an opportunity for us to clarify our position toward the Communist bloc during the kind of peaceful competition which Mr. Khrushchev invites.

MORAL DIFFERENCES CITED

We can and will make clear that the moral difference between our system and the Soviet system is fundamental and cannot be narrowed in any way by the dialogue of peaceful competition. We can establish once again that we will not trade away our belief in that fundamental right of peoples to freely choose their own form of government.

At the same time we can make equally clear that we have come to Paris to make a determined effort to reduce the risks of atomic war and that we are ready for real progress toward control of armaments and an end to the recurring crises threatening atomic war.

We should demonstrate our willingness to participate in discussions which might attain these objectives at this summit conference and at other summit conferences in the future if they are needed—as I believe they will be.

What chance is there that any or all of these objectives can be partially or wholly attained at the summit? This depends primarily on Mr. Khrushchev.

Never before in history has a man had more responsibility for the fate of mankind in his hands than Mr. Khrushchev will have at this conference.

ALTERNATIVES FOR KHRUSHCHEV

As I said in my farewell radio-television address to the Soviet people, "If he devotes his immense energies and talents to building a better life for the people of his own country, Mr. Khrushchev can go down in history as one of the greatst leaders the Soviet people have ever produced. But if he diverts the resources and talents of his people to the objective of promoting the communization of countries outside the Soviet Union he will only assure that both he and his people will continue to live in an era of fear, suspicion and tension."

What will Mr. Khrushchev's attitude be at Paris? There are strong reasons to believe that Mr. Khrushchev may actually want to make progress at this conference toward disarmament and in reaching settlement on some of the explosive issues which confront us. I think this may be his attitude not because he is motivated by what he scorns as sentimental idealism but because, realist that he is, he is concerned by some hard facts of international life.

What are the circumstances that tend to convince Mr. Khrushchev that disarmament and reduction of tensions are in his self-interest?

SOVIET HAS PROBLEMS, TOO

Mr. Khrushchev never fails to obtain satisfaction from pointing out the weaknesses and divisions he believes plague the West. We must remember as the summit approaches that he, too, has problems.

There is the demonstration of freedom in action which free Berlin affords to the people of East Germany.

There is the unceasing restlessness of the satellites, some of which are under an intolerable state of occupation by foreign troops.

There are the natural desires of his own Soviet peoples for an increasing share of their limited productivity, so much of which now goes into armaments.

And while it is probably too early to conclude that he may be troubled by his Chinese ally, it is appropriate to call to your attention that our distinguished guest, President de Gaulle, has suggested that he may well be deeply concerned by the nightmare which is taking form on his long common border with China.

Finally, Mr. Khrushchev is bound to be influenced by the fact that he has seen, as we have, the diabolical enormity of nuclear weapons. Some of the Soviet nuclear devices have been among the "dirtiest" radioactively speaking that have ever been exploded.

On the basis of my conversations with him, I am convinced that he is proud of what communism has done in the Soviet Union. He would prefer not to risk destruction of that progress.

ADENAUER'S VIEW NOTED

And, as Chancellor Adenauer put it, while Mr. Khrushchev and his Communist colleagues will never cease to work for their basic objectives of a Communist world, they would prefer that the world over which they rule will not be one of ruined cities and dead bodies.

In other words, Mr. Khrushchev believes he can accomplish his objective of world domination without war, that he can win more and lose less by peaceful competition than by resort to war.

These, then, are the stark realities which will be working at Paris in behalf of progress toward disarmament and the settlement of differences without war.

It is because the hard facts of international life are on the side of peace and disarmament that I believe that we can look to this conference and to the future, not with starry-eyed complacency, but with justifiable confidence that responsible world leaders will slowly but inevitably develop more effective methods for settling differences between nations without war.

QUESTIONS AND ANSWERS

GEORGE W. HEALY, of the New Orleans Times-Picayune. I take it that your thesis is still the thesis that you expressed in Moscow, that you would rather talk with people than fight with them, is that correct, sir?

Answer. That is correct.

FROM THE FLOOR. Mr. Vice President, at this time we are on the record. You talked about China by reference to Mr. Khrushchev and his feeling about that long border. Presumably, you have a keenly personal interest in the next 8¾ years, and by that time China should be much more powerful with reference to Russia and the rest of the world than it is now. How can our Government and the Chinese Government, and how can our people and the Chinese people, develop greater intercommunications?

Answer. I think we perhaps can analyze that question first by putting it in terms of when the United States should recognize the Communist government of China and support its admission to the U.N. The answer to that question is that we should do that when that government qualifies for recognition and for admission to the U.N. as a peace-loving nation in its international policies. I know that there are those that suggest that it is impossible for us to reach any definite agreement on disarmament without recognizing this government and have it participate in that agreement. I should point out, however, that it is possible to have relations with nations, even though you do not recognize them. That we have been having negotiations, for example, over the last 2 years with that government on the American prisoners that we believe they are holding illegally.

Looking to the future, I would say that while the United States must maintain its position, that we will resist the recognition and resist the admission to the U.N. of the Chinese Communist Government because it, by its actions, has made it an outlaw government, not deserving recognition and not deserving admission; that our policy will change when they change their policies. But until they change theirs, we cannot change ours. Looking to the future, I would say that certainly there will be certain facts and circumstances which will be motivating them toward a change in direction of their policies just as there may be facts and circumstances which you have alluded to, which may be motivating us.

SHOULD GO AHEAD

So, in some areas, we should go ahead with our disarmament and other talks and discussions with the Soviet Union at this time, recognizing that the Chinese Communist Government can be brought in even though we do not recognize it, and we should constantly keep before the world our position that our failure to recognize and our opposition to support them for admission to the U.N. is based on sound principles of international morality and that that policy can and will be changed once the Chinese Communist Government merits its change.

DWIGHT E. SARGENT, of the New York Herald Tribune. Mr. Vice President, I shall keep the speech part of my question at a minimum. There has been a good deal of discussion in the press, as I am sure you are all aware of the dimensions of your conservatism and the proportions of your liberalism. This has taken place in the context of whether or not it would be wise for you to go along with liberal aims in order to get more of an independent vote, or a shift in the other direction. Realizing full well the flexibility of these terms and the danger of using them, I would like to ask you, sir, if you have anything other than a middle-of-the-road comment to make on this discussion.

DISTORTION NOTED

Answer. I would say that if we could have more speeches like that through the questions, we will have a very good day today. [Laughter.] The answer is that, as you well implied in your question, the use of the terms "conservative" and "liberal" have been so distorted that unless you get to specific programs it is most difficult to classify and divide by one of those terms. As far as I personally am concerned, I believe there is probably nobody in public life today who has, by his votes and by his speeches, more clearly defined where he stands on the economic issues confronting this country and the foreign policy issues confronting this country than I have. I say that having in mind the fact that many of you have written that that is not the case. [Laughter.]

The balance of this time I know some of you may want to question me specifically on issues which you may have some doubt as far as my views are concerned. But turning to the basic question of conservatism versus liberalism, to the Republican Party's position and to my personal position, I would make these additional comments: I believe in economic conservatism. I am an economic conservative because I believe conservative economic policies provide the surest and best road to progress for the great majority of the American people. [Applause.]

REPLIES TO CRITICISM

I have often heard people suggest that because President Eisenhower, for example, opposes the program like the Forand bill, which would establish compulsory health insurance so that people over the age of 65 could have medical care and hospitalization, that because he does that he has no concern for those people and is more concerned about the dollars than the program cost. My answer to those critics would be twofold.

1. Whose dollars are they talking about? Not his but yours. And he has a responsibility to consider the cost of programs in dollars. He also has a great responsibility to consider the cost of those programs insofar as whether the results to be achieved might be outweighed by the damage that would

result. So, sticking again to this one example in order to prove the point, what is the position of a conservative with regard to better housing, with regard to all of the progress that Americans want? Our position is that we are conservative not because we are against the progress, but because we are for it. We oppose the programs of our liberal friends not because we oppose the ends to which those programs are directed, but because we know the means they advocate, however well intentioned they are, would, in the end, cost more in dollars principal than the results achieved would merit.

And further, I would say that as a conservative I think the greatest mistake we could make, and this refers to both Republican and Democratic conservatives, for fortunately we have both, the greatest mistake we could make would be to leave to those who advocate the so-called liberal point of view a monopolistic concern for the problems of people, concern for better health, better housing, better schools, and all these other things in which people are interested.

DEEPLY CONCERNED

So, in summary, let me state the position this way: As a conservative, I am deeply concerned that the American people continue to have progress, economic, spiritual and moral, to the maximum extent. As a conservative I oppose liberal programs or radical programs, as the case might be, in those cases where those programs are designed and pretend to meet these ends, in those cases where I know they will not work and at the end they would produce more harm than good.

As a conservative, I point to the record of the last 7 years, and I say that in those 7 years when we have had economic conservatism in operation, in those 7 years the American people have had more progress in building schools, in building more hospitals, in raising the relative income of 65 million American workers, than they have had in any 7 years in the history of this country.

I think that is a good record. I think he should build upon that record.

The only quarrel that I would have, might I say, with my conservative friends, would be this: I completely reject the idea that conservatism means that we simply dig ourselves in in cement and resist all changes because of our fear of what change would be.

The rule of life is change. There is going to be change. Our people are a progressive people. They want to move forward.

So conservatism at its best must be progressive. It must look at these great social and economic problems of which we are confronted, oppose the phony schemes and the panaceas, but come up with constructive alternatives which will meet those problems and solve those problems, and produce for the future, while still preserving the best from the past.

This is middle of the road; it is generalities, but it is where I stand.

DE GAULLE VIEW RECALLED

PRESTON ROBINSON, of the Deseret News and Salt Lake Telegram. This morning in his press conference, Mr. de Gaulle discussed the reduction of tension between the East and West. He alluded to that for the summit.

Along those lines, do you think it would be a good idea for us to make a strong protest at the summit about Communist subversion in Latin America?

Answer. It would not be proper for me to indicate in answer to a question what I believe the President should advocate at the summit on a matter that has not yet been discussed, a least in a meeting in which I have participated.

I would only indicate this:

I believe at the summit it is not only proper, it is necessary, and I am sure this will be the case, that the leaders of the West make extremely clear to Mr. Khrushchev that when he talks about peaceful competition it cannot mean, in effect, peace for the Communist world and turmoil for the free world.

COEXISTENCE DISCUSSED

It must be made clear to him that in those instances where the Communist Party of the Soviet Union—and this, of course, is always his excuse—that it isn't he or his government that is doing it, but it is the Communist Party that is doing it, but that where the Communist Party in the Soviet Union supports or encourages subversion against established governments in the free world, that this inevitably is going to increase tensions and inevitably is going to raise a bar to the solution of the problems that he talks about.

I would add one other thing: Mr. Khrushchev often uses the term "peaceful coexistence," as well as "peaceful competition."

I have often said that peaceful coexistence is a negative concept. There is nothing wrong with coexistence if you define the term in its proper sense.

But by definition, Mr. Khrushchev means by peaceful coexistence, as I have indicated a moment ago, that what has happened in the Communist world is done, and that the tide of history has forever moved in that area and no change can now occur, but that as far as the free world is concerned, the revolution must continue until the Communist aim of a world dominated by communism is achieved.

CANNOT ACCEPT DEFINITION

We cannot accept that definition of peaceful coexistence, because, certainly, the position that I have stated here today is a sound one. The people of the Soviet Union, of any country, select any kind of government they want, Communist, socialistic, democracy—call it what you like.

But we stand firmly on the principle that the people ought to have the right to choose. This is true of Latin America; it is true of Asia and Africa, and we must also say that it should be true of all countries in the world.

This is a sound position, and to the extent that the Latin American problem does fit into that general context, I believe that is the position that should be taken by the leaders at the summit in Paris.

FROM THE FLOOR. A North Carolina editor recently challenged the American Government, and people with this statement, that an individual who makes no effort to pay off a debt is not a good risk, or even honest, and he suggested that we now begin a real effort, the American Government, and I think he said people—I certainly would include the people—to make that effort.

I heard a leading Republican indicate a possible figure of $5 billion a year that the American Government and people might set as a goal to pay off this debt.

I would like to ask you if you think that is an entirely unreasonable objective?

REASONABLE OBJECTIVE

Answer. As a goal, yes a goal to shoot for, it is a reasonable objective, and an appropriate one. As a goal that can be attained, it may be very unrealistic. It would be very much easier for me to say that $5 billion a year paid off on the national debt is both something we should do and something we can do, and if we have another Republican President, that is the way to accomplish it.

But I am also aware of the realities of international life, as everybody in this room is. Next year, fortunately, we are going to be able to pay off, unless the Congress does things to the President's budget we do not anticipate, we are going to be able to pay off, or apply on our national debt, perhaps $3 billion, or maybe $4 billion.

And the amount that the American people are going to be able to set aside for paying on their debt will depend to a primary extent on what happens in the international arena.

Above everything else, the United States must never place itself in the position, militarily, economically, or otherwise, that those who would destroy our freedom and the freedom of others are looking down our throats. This means that we must pay whatever cost is required to maintain our present level of strength, vis-a-vis the Soviet Union, and that is enough regardless of what they may have that in the event of an attack being launched against us, we can destroy their warmaking capabilities.

I am unable to say right here today, even Dr. York, who is an expert in this field, will be unable to predict, what military costs will be as we move into the future.

DISARMING SEEN KEY

But I will say this: That if we do not make progress toward disarmament, and this state of world tension continues as it is, I can visualize that those costs, both militarily at home and economically abroad, are going to continue to remain high.

Oh, yes, we can cut some out and we shall try, of our domestic expenditures. We can make Government more efficient. But I could say nothing more misleading to this audience than to assure you that over the next 5 years, for example, we can pay $5 billion a year of the national debt. We should set it as a goal, but the primary goal must be the security of America.

And once we can take care of that security, then if we have enough left we can apply it on the debt.

GEORGE ESTABROOK of the Washington Post and Times Herald. Mr. Vice President, you have been represented as having a few differences with Secretary Benson on what ought to be a proper farm program. I wonder if you can tell us whether these representations are correct, and, if so, what are some of your ideas on a new farm program?

Answer. As a matter of fact, I noticed that one of your visitors referred to the Nixon farm program as being a phantom. Consequently, I am very happy to get the opportunity to answer this question before this audience.

DECISIONS SUPPORTED

One, with regard to the differences with Secretary Benson, as far as my position in that administration is concerned, and this may be of interest to you from a general standpoint, I think that the first requirement for a Vice President is to support the policies of the President and the policies of the President's Cabinet where they have been approved by the President.

If you have differences, you should argue them out within the Cabinet. Once the decisions are made, then those decisions are your decisions as well as his.

Insofar as the present farm program is concerned, and where we should go from here, let me put it this way:

The one thing we can all be sure of is that we must have a change from what we have. Why? Because under the present farm program, a program which has not been changed substantially for the last 5 years, since there have been opposition Congresses in control, under that program costs on the farm program and the surpluses continue to go up and the income of farmers for major farm commodities has continued to go down. This is wrong. Something should be done about it.

We come to the second point: What do we do about it? This administration has, for the last 5 years, over and over, recommended to the Congress what it believes is right and what it believes should be done about this program to get away from it, to reduce the surpluses, to reduce the costs, and at the

same time to raise the income of the farmers, as it should be raised, so that they get their fair share of America's increasing prosperity, something they are not getting today.

But what has happened? The Congress over and over again has said, "No, we will not take this program."

GUIDELINES NOTED

So my attitude is this: The President has sent to the Congress a message in which he has put in the recommendations of his Secretary of Agriculture, but in which he goes further. He lays down broad general guidelines in which he says, "If the Congress passes a measure differing from Secretary Benson's recommendations, but within these broad general guidelines, I will sign that measure so that we can break this logjam which has been responsible for not making progress in meeting this difficult problem."

Until the Congress acts or fails to act on that program, it would be inappropriate for me to take any other position, except to say I support the President's guidelines, I believe they are proper ones, and I believe that any program enacted by the Congress, or any program that the Republican candidate for the Presidency later may propose, should meet those standards, general standards, that the President lays down.

J. R. WIGGINS, retiring president of the ASNE. I wish to ask the Vice President one question.

The progress and prosperity and the fate of the unevenly developed countries in the world, and of some of the other countries outside the Communist orbit, depend primarily upon two American policies: One is the infusion of large amounts of foreign capital into the economy of these slow developing countries; and, two, the maintenance of trade policies in this country that will permit them to find markets outside of the Communist regimes. I would like to ask the Vice President to comment on this problem.

Answer. I know some of my answers have been lengthy. As you can imagine, this is one that could take a great deal of time. But in order to give you an idea as to my concern in this field and of my philosophy, let me try to state my position as concisely but as directly as possible.

NONMILITARY THREAT

I noticed that one of my friends, who is a candidate for the office that I hope to seek, talked about the missile gap. I have already stated to you that I think it is vitally important and necessary that the United States maintain its military strength at levels which I have described. I would say further, however, that more important than that, from the standpoint of the freedom and security of 170 million Americans, is for the United States to recognize that our greatest danger is that we will lose the world, not because of military weakness but because of our failure to mount in the areas of the nonmilitary conflict of the world struggle.

You spoke of the so-called newly developing countries of the world. I have visited most of them. I have also had the opportunity to see parts of Latin America. I can assure you that in Asia, in Africa, and to perhaps a lesser extent, but to a great extent, Latin America as well, the future of every American is being decided today. Our missiles are important to avoid a war that may be fought in the future, or to win it if it is fought, if it can be won, and to avoid it if possible.

What your question relates to is a war that is going on right now. Unless the United States recognizes the aspects of this war, that it is economic in character, that it is ideological in character, that it is political in character, and develops programs to meet it in all these aspects, we will go down to a defeat which will take longer, but which will be just as certain as if a great atomic war were started against us at a time that we were defenseless.

RECALLS AID ARGUMENTS

So what should I do? I say I don't imagine there is anything more unpopular today than for a man in public life to get up and say that he is for technical assistance, loans for countries abroad, so-called foreign aid, and the like. It is much easier to get up and say, "Well, I am not going to build a dam in Afghanistan until we get the one down in such and such a county in Texas." It is much easier to get up and say, "Why should we give technical assistance and aid to the hungry in India when we are not doing enough for those in West Virginia."

Believe me, we are all concerned about the hungry in West Virginia and the dams in Texas and California, and the like. But I can assure you that if we leave to the people of Africa—and there will be 26 countries in Africa in 10 years, more than in Latin America—if we leave to them the people of Asia, the people of South America, the grim alternative that in order to get the economic progress that they desperately need and want they have to get it at the cost of freedom or stay where they are, they are going to take it at the cost of freedom.

I said in my opening remarks that the people and leaders of these countries do not want totalitarianism. Believe me, they don't. That is why they received President Eisenhower as they did. But, on the other hand, they want progress. As Prime Minister Nehru told me when I was there in 1953, the per capita income in India is one-twentieth what it is in the poorest State in the United States. You have never seen poverty until you have seen it in some of these countries. So, if they stand there and the only way to go forward is to get progress without freedom, that is what they will take.

FREEDOM AND PROGRESS

But it isn't necessary to leave them that grim alternative. It is possible to have progress with and through freedom. I don't mean by this the tremendously big handout, improperly organized, inefficient, full of graft, but I mean a sound program, one that is designed to meet the problems of these countries, one that is designed to fill the vacuum as the colonial powers move back and as they get their self-government and their independence, but fill it so that these people can see the vision of the future, not just one way but another way, a vision where they can have progress but still retain independence and at least a degree of freedom to the extent that they want it.

And that is what foreign aid, so-called, is all about in the technical area. That is what the developmental loans are all about. That is why I would trust that in this campaign both the presidential candidates would lead strongly in this area so that the American people will rise to this challenge, meet it effectively, and support in the Congress the funds that are necessary.

I would say one further thing with regard to trade. I had a very interesting talk recently with several labor leaders who came to see me and expressed their interest in legislation presently before the Senate. They expressed their opposition—not their opposition, but their concern about the competition of goods produced in Japan and other foreign countries by cheap labor. I said, "Does this mean that the CIO–AFL, which traditionally has taken the position of support of reciprocal trade, is now changing its position?" Their answer was "No." But they said, "We have to be more responsible and they must be more responsible, the foreign nations, in at least voluntarily establishing quotas so that we do not have terrible damage and hardship worked upon domestic industries in the United States."

VOLUNTARY ACTION

I think they are correct in that respect. I think there must be developed and negotiated through our State Department at diplomatic levels voluntary action on the part of potential competitors in this respect.

But let's make no mistake about it. If the United States should turn now away from its traditional policy of reciprocal trade, if they should turn to Japan, for example, and say, "We are going to have to raise artificial tariff barriers, we are going to have to establish by law quotas against your production," then you don't have to worry about Communist China, because Japan will have no choice but to turn that way, itself.

So that is what reciprocal trade is about when we consider it in the world context.

So in conclusion, in answer to your question, I would state again that I think the President's leadership in this area has been farsighted. There is nothing about which he has a greater concern than in this area. I would hope the next President of the United States would continue that leadership, because, believe me, what happens in this area of economic assistance, technical assistance loans, and trade, will determine the fate of the world and of the United States.

WOULD SHUN COMMUNISM

We can win. We can win because, as I have indicated, the leaders of these nations are oriented our way. They are more at home with us than they are with the Communist leaders. They do not want the grim drabness and uniformity that anyone who visits the Soviet Union can see characterizes Russian life.

But, on the other hand, they must offer to their people progress. We cannot give them the progress, but we can help them develop the means to provide it, and that is why I feel so strongly that this is just as important as getting the missiles that Dr. York thinks are necessary, it must be an essential in the U.S. foreign policy in the next 10 years.

Mr. WIGGINS. Mr. Vice President, I do not need to say on behalf of the members of this society, that we are deeply indebted to you for speaking to us again at another of our annual meetings. You have brought us an informative and most interesting message and we thank you.

THE LIGHT THAT ILLUMINES THE PATHWAY

Mr. BYRD of West Virginia. Mr. President, the Bible reveals the mind of God, the state of man, the way of salvation, and the happiness of believers. Its doctrines are holy, its precepts are binding, its historic pages are true and its decisions are immutable. Read it to be wise, believe it to be saved, and practice it to be holy. It contains light to direct you, food to sustain you, and comfort to cheer you. It is the traveler's map, the mariner's compass, the pilgrim's staff, the soldier's sword, and the Christian's charter.

In its beautiful passages paradise is restored, heaven is opened, and the gates of hell disclosed. Christ is its grand subject, our good is its design, and the glory of God is its end. It has brought more hope to the sons of men than all of the sciences combined. It would be impossible for man to completely destroy it, because enough of its passages are committed to memory to make it possible to completely restore it within the space

of a day. It should fill the memory, rule the heart, and guide the mind. Just as it is the foundation of the Republic, it should be our Nation's guiding star. We should read it prayerfully and reverently and we should always treasure the scintillating jewels of wisdom that are gleaned from its passages. It demands the highest responsibility of us, and it will reward the greatest labor, and be sure that it will condemn all who trifle with its sacred contents.

Mr. President, the men and women who created this Republic believed in the Holy Bible. It was the light that illumined their pathway. May this Nation always revere it as did our forefathers. Only then will our beloved country remain the land of the free. For men and nations there come succor, comfort, and strength from the reading of that most well-known work, the 23d Psalm. It has been upon the lips of youth the world over. It bespeaks praise and confidence in the omnipotent, omniscient, omnipresent Almighty God:

The Lord is my shepherd; I shall not want.
He maketh me to lie down in green pastures; He leadeth me beside the still waters.
He restoreth my soul: He leadeth me in the paths of righteousness for His name's sake.
Yea, though I walk through the valley of the shadow of death, I will fear no evil: for Thou art with me; Thy rod and Thy staff they comfort me.
Thou preparest a table before me in the presence of mine enemies: Thou anointest my head with oil; my cup runneth over.
Surely goodness and mercy shall follow me all the days of my life: and I will dwell in the house of the Lord forever.

THE NEW AFRICA AND THE UNITED NATIONS

Mr. MARTIN. Mr. President, Hon. Francis O. Wilcox has won the admiration of every Member of the House and Senate who has had the privilege of working with him during his many years of service as head of the staff of the Senate Committee on Foreign Relations and in his present position as Assistant Secretary of State. I am proud to request permission to have his timely article "The New Africa and the United Nations" printed in the RECORD at this point.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE NEW AFRICA AND THE UNITED NATIONS

(Address by the Honorable Francis O. Wilcox, Assistant Secretary of State for International Organization Affairs, at the University of Kentucky, Lexington, Ky., Mar. 25, 1960)

I returned from Africa profoundly impressed by the far-reaching changes that are taking place there. These changes, which involve the transfer of political power to African leadership, constitute one of the most important developments of the 20th century.

The whole continent is astir as the march toward self-government and independence continues with amazing speed. In most countries there is no longer any question as to whether independence will come; the only question is how soon. It is fairly safe to say that more new sovereign states will be created in Africa during the next few years than have ever been created before during any comparable period in world history. The 1960's may well be the African decade.

The challenge presented by these developments is of major importance to the United States and to the United Nations. I would like to examine with you tonight the main elements of that challenge.

THE CHALLENGE OF AFRICA

The sheer size of Africa staggers the imagination, confounds the scholar, and, I have had occasion to discover, wearies the traveler. It is as large as the United States, Western Europe, India, and the Chinese mainland put together. Within its borders live over 200 million people, including virtually all the races and religions of mankind. There are some 700 indigenous languages currently in use, with many of the educated leaders having mastered at least one modern European tongue.

This world within a world is so diversified that one is tempted to describe it by paradox. It is the home of the world's shortest and tallest human beings, the Batwa, or pygmies, and Batussi, who live side by side in the Trust Territory of Ruanda-Urundi. The continent is burgeoning with natural resources; it is a treasure trove of diamonds; gold and scarce minerals, and oil has been discovered in large quantities in the middle of one of the most desolate spots on earth, the Sahara. Despite these riches, you can find there some of the world's worst slums and abysmally low living standards. Over large areas of the continent there is acute race conflict, but, at the same time, a number of white Europeans, nominated and elected by black Africans, are now serving in legislatures and cabinets in the self-governing states of former French West and Equatorial Africa. Illiteracy is widespread, but there is a fervent desire for education and most of the newly independent countries are devoting large proportions of their time, effort, and money to teaching their citizens.

Is anything certain in all this enormous, complex region? I think so. Africa is on the march. The achievement of political independence and economic growth is the burning aspiration of the overwhelming majority of the people of the continent. From the outside, this appears as the last stage of an important historical process, inevitably and a little disorderly, but for the people concerned it is a matter of great urgency.

As more and more African states become independent, they tend to look to the United States and the United Nations for assistance in solving the prodigious problems which confront them. I believe that the future position of the United States and the free world is closely tied up with the success of their efforts. Certainly, the failure of these people to achieve economic and social progress under free governments of their own choosing would be a serious setback to free world interests.

Where does the United States stand with respect to these developments? Some critics have attempted to claim that our position has been marred by ambiguities and reservations; others have accused us of going too far too fast. It seems to me that our attitude has been clear. There is no wavering in our conviction that the orderly transition from colonial rule to self-government or independence should be carried resolutely to completion. We have said so repeatedly, and I am happy to say it again. Our history and traditions could not permit us to react otherwise.

Everywhere I went in Africa I found an encouraging reservoir of good will for America. The people of Africa look upon the United States as a friend and as a Nation that can naturally sympathize with their aims and aspirations. They would be greatly surprised and deeply disappointed if we did not extend a helping hand in their hour of need.

THE IMPORTANCE OF THE AFRICAN STATES IN THE UNITED NATIONS

It is inevitable that the rapid evolution of what could once be described as the Dark Continent should have a profound effect on the United Nations. One measure of Africa's place in the world organization is that nearly one-third—35 in all—of the 123 resolutions adopted by the 14th General Assembly last fall dealt specifically with African affairs. These resolutions ranged from such difficult problems as French nuclear tests in the Sahara and race conflict in South Africa to less difficult but basic questions such as the training of indigenous civil servants in the Trust Territories.

If the United Nations has come to devote more and more time to discussion of African problems, world problems in general have been influenced increasingly by the presence in the U.N. of African States. There are now 10 African States in the United Nations: Ethiopia, Ghana, Guinea, Liberia, Libya, Morocco, Sudan, Tunisia, the United Arab Republic, and the Union of South Africa. They will be joined later this year by at least five and possibly six or more new members: Cameroun, Togo, the Belgian Congo, Somalia and Nigeria, and probably by the Mali Federation, and the Malagasy Republic (Madagascar) whose leaders are now negotiating in Paris for full independence within a modified French community.

Not only is the continent of Africa on the move; this revolution has called forth corresponding movement within the United Nations itself. It seems clear that within a very few years, African states will become the largest single regional group in the United Nations. You will remember that there were 51 original members of the United Nations. There are now 82, and in another few years membership will probably total over 100, with perhaps as many as 30 coming from the African Continent.

There are some who argue that the prospective enlargement will mean that the United Nations will no longer be a useful instrument for promoting the national interests of the United States or promoting the cause of world peace. This strikes me as an unduly pessimistic view. That the General Assembly will become more unwieldy is undeniable. That the future growth of the United Nations will strengthen the anti-colonial forces is likewise quite apparent. That the drive of the underdeveloped countries for a greater voice in international affairs and greater benefits to them will be enhanced is also evident.

But there is no real cause for alarm. In practice, while there is a tendency for the African and Asian states to band together on certain issues, the states of Asia and Africa do not regularly vote together as a bloc. The so-called Asian-African bloc—which is a misnomer—is made up of states with differing interests arising from diversity of history, culture, traditions, and geographic location.

There is great opportunity within the framework of the United Nations for cooperative efforts between ourselves and the African states to advance our mutual interests. True, African members thus far have been mainly preoccupied with colonial problems, and the support of independence for the remaining dependent areas in Africa. They have tended to keep out of the controversies which have divided the West and the Communist bloc. However, we can expect that the African states will focus their attention increasingly on problems of world-wide concern as the remaining dependencies attain sovereignty.

We must not assume that the addition of numerous African states means that the

United States will be outvoted in the United Nations. On issues vital to our interests and those of the free world, widespread support will continue to be forthcoming. There is, in fact, a broad identity of common interest which we share with the states of Africa. If we take into account in sufficient measure the aspirations and the objectives of so many of the newly emerging states, we can utilize the United Nations for constructive leadership. The United Nations has demonstrated time and time again a remarkable capacity for flexibility and adjustment in the face of new circumstances.

In the expanded United Nations, there will be more than ever before a premium on constructive policies. It is up to us to continue to bring forward such policies. We should not forget that the United Nations is in many ways a mirror of our political influence in the world—a barometer of relations among states.

I am confident that with patience and resourcefulness our position in the United Nations—this year and in the future—will continue to promote our interests and serve the cause of world peace.

THE CHALLENGE OF AFRICAN ISSUES IN THE UNITED NATIONS

Since its beginning, the United Nations has been deeply involved in the consideration of colonial and trusteeship questions in Africa and throughout the world. For our part we have sought to participate constructively in these discussions. Since the days of Woodrow Wilson, the United States has been largely responsible for universal acceptance of the idea that administering power should be accountable to the international community. I am convinced that the trusteeship system has had major impact on the development of the African Continent. It has set the sights of the administering powers on higher international standards of administration. It is no accident that five of the seven African Trust Territories will have become independent by March 1961, and that important progress will also have been made by the non-self-governing territories.

In stating this, I do not wish to detract from the solid achievements of the United Kingdom, France, Belgium, and Italy in bringing their dependent peoples to the stage of independence.

If colonialism is now rejected by virtually all Africans, one may well ask whether its role has been lacking in constructive achievement. Some observers of African affairs insist that it has. It seems to me that the reverse is true. It is becoming more and more apparent that the system has played a necessary role in the political, social, and economic development of the continent. It has provided one of the essential channels through which the knowledge and skills of the more developed countries could be made available to the peoples of Africa. In a recent statement, former Ambassador Charles T. O. King of Liberia, explained that Liberian poverty stemmed from the fact that his country had always been independent and had therefore never reaped the material benefits of colonialism. The difference, he continued, was comparable to that between the home of a man who has had to accomplish everything by his own sweat and toil and that of a man who has enjoyed a large inheritance.

There inevitably comes a time when a dependent people wishes to manage its own affairs. Once this stage is reached, and it has been attained in large areas of Africa, the wise administrator looks for a new relationship. That a modern and mutually beneficial relationship has been created so often is indeed a tribute to the good sense of both partners.

It is, of course, essential that any future relationship between Africa and the Western nations be freely chosen by the African nations themselves. Nevertheless, it is our earnest hope that the people of Africa will recognize the affinity of interests which they share not only with the United States, but also with former administering powers of Western Europe. In other words, we hope that the colonial relationship can be replaced by a new relationship of friendship and cooperation based upon equality, mutual respect, and mutual benefit.

One example among many is the new relationship being evolved between France and the Mali Federation, which I recently had occasion to observe. After the independence of Mali in 1960, France will itself propose Mali's candidacy to the United Nations. It appears to me that this promises well for Mali's future, because it is a reflection of the sentiments of mutual good will and understanding which characterize relations between France and Mali.

THE ALGERIAN QUESTION

I would be less than candid if I did not admit that there were a number of other questions not so easily resolved and which cause us great concern. The Algerian question is a case in point. In Algeria a minority of European extraction lives amid a Moslem majority. These two communities which almost literally cannot survive without each other find it difficult to live side by side under the terms which have prevailed in the past. A Moslem nationalist movement has for the past 6 years been fighting for the ultimate goal of Algerian independence. France denies that the nationalist organization speaks for the mass of Algerians and, while trying to adapt the administration of Algeria to the changing times, is fighting to prevent the severance of Algeria's ties with France. In these circumstances, clearly no solution is possible without good faith and restraint by all concerned.

We have great sympathy for and much in common with France, our oldest ally. At the same time, we believe it is important that effect be given to the aspirations of the people of Algeria by peaceful means. We are anxious to see an end to violence and bloodshed. We favor a just, peaceful, and democratic solution.

The bitterness of conflict, the shadow of fear, and the gnawing worry of uncertainty all add to the inherent complexities of the problem. Last September President de Gaulle made a far-reaching and significant declaration concerning the problem of Algeria. In this declaration the principle of self-determination was recognized specifically as being applicable to Algeria. We welcomed this declaration, in the words of President Eisenhower, "containing explicit promises of self-determination for the Algerian peoples." While recent difficulties in Algeria have not enhanced the prospects, the United States nevertheless continues to hope that circumstances will evolve in such a way that a just, peaceful, and democratic solution for Algeria will soon be realized.

RACE QUESTION IN SOUTH AFRICA

A quite different problem exists on the southern tip of the continent.

The race question in the Union of South Africa is basic, extremely complex, and undoubtedly represents one of the United Nations thorniest problems. The present population of the Union is estimated at nearly 14 million, divided into 3 million Europeans, about 9 million Africans, 1¼ million "coloreds"—i.e., descendants of mixed marriages—and around one-half million Indians. The Union Government has officially espoused the doctrine of apartheid or separate development. In theory, apartheid eventually will be made fully effective by the removal of the Africans to their own self-administered reserves, but, in the meantime, the black man is subject to a number of discriminatory practices.

This racial discrimination has been extensively debated at the United Nations, and for the last 2 years resolutions critical of the Union's policy were adopted by overwhelming majorities. What is most serious in this situation, is that the policy of apartheid is buttressed and formally approved by statute. While recognizing the shortcomings of the Union of South Africa in the field of human rights, we have always been reluctant to single it out for criticism when so many other nations in the world, including our own, have not been beyond reproach.

We need all the understanding possible to cope with the problems found on the opposite tips of the continent. On the one hand, the sentiments of those who feel oppressed and discriminated against are easy to understand. On the other hand, one can appreciate the feelings of people who established themselves in a new land at a time when our ancestors were doing the same thing on the soil of America, but who now find themselves a minority in a restlessly stirring continent. But understanding need not mean approval, and I doubt that any policy based upon the long-range domination of one racial group by another can very long endure.

This calls to mind the fundamental principle which was stated so well by the New York Times not long ago: "If all God's chillun don't have wings, as the old spiritual says they do, then none of them have wings."

These are not the only areas in which racial conflict exists or can be foreseen. But the gratifying thing to me is that it is so little prevalent. Over vast stretches of the continent, the white man is accepted without bitterness or hatred, and individuals are judged in accordance with their personalities and intentions. This surely speaks well for the character and personality of the peoples of Africa.

THE CHALLENGE OF ASSISTANCE TO THE NEW AFRICAN STATES

Other major African problems were aptly defined by U.N. Secretary General Hammarskjold recently. Following his 24-country African visit, the Secretary General told a news conference on February 4: "On the continent of Africa there is the problem of personnel. There is the problem of money. There is the problem of education, and there is the problem of, let us say, moral support in the reshaping and shaping of a nation."

What can the United States and the United Nations do to assist in these fields?

The requirement for trained personnel is acute in many parts of Africa. Civil services have until recently been staffed largely by trained European administrators and technicians. Inevitably, many of these will leave once the countries they have helped to administer become independent. Even when they are willing to continue on the job, the new African governments have a perfectly understandable desire to staff their bureaucracies with indigenous personnel as rapidly as feasible. In those rare cases such as Guinea where the attainment of independence was abrupt and angry, prodigious problems can be posed for the African administrations.

It has been argued that personnel shortages in Africa stem from shortcomings of the educational systems provided by the administering power. This is only part of the truth. It seems that everyone, African and European alike, underestimated the rapidity of political developments on the continent. European educators therefore usually stressed quality rather than quantity of education. The attitude of everyone concerned has been changing radically, and there is an intense desire on the part of Africans everywhere for education and a willingness on the part of Europeans to provide it.

With few exceptions, there is everywhere in Africa a clear lack of capital development

and even of funds for basic government operations. The United Nations, for example, has long been concerned over the budgetary deficit which Somalia will face after independence, a deficit amounting to approximately $5 million a year for at least the next 10 years. The problem of Somalia has been extensively debated and is generally known because it was a U.N. trust territory, but the fact is there are a good many other African countries in similar financial straits.

Until very recently, U.S. assistance to African countries was but a minute proportion of our total world commitments. The emergence of so many independent African states presents us with real challenges and to meet them the United States and the United Nations are actively planning new programs of assistance.

One approach is to expand our bilateral assistance. Congress has been asked to include in its appropriation for ICA for 1961 the sum of $20 million for a special program for tropical Africa. This sum would be over and above the normal expenditures of the International Cooperation Administration in Africa for technical assistance and capital development. We plan to use most of these funds in assisting African leaders with basic educational planning and program development, teacher training, language training, vocational and agricultural training programs, and related fields. It would also be used to encourage regional cooperation for the development of Africa's resources.

UNITED NATIONS ASSISTANCE

We are also encouraging and supporting the utilization of the United Nations as a constructive force in the advancement of Africa.

In 1959, for example, the U.N. sent over 600 technical experts to Africa. It also gave fellowships to over 400 Africans, enabling them to study abroad in order to acquire the know-how that will help Africa to provide its own experts in the future. I believe this program should be substantially increased.

In addition, the United Nations Special Fund, established in 1959, launched in its first year of existence seven projects for Africa, with a total value of $5.5 million. These projects in Ghana, Nigeria, Guinea, Libya, and Egypt, together with one regional project, will help encourage further investments of public and private funds on the continent.

Another new program, and one that is still in its experimental stages, is generally known as the OPEX program. This program will provide experienced operational and executive personnel from abroad to serve as government officials in new countries where such assistance is requested because of a dearth of experienced people. Many requests for this type of assistance have been received by the United Nations from Africa and it is expected that this program will be of real value to those countries.

The specialized agencies of the United Nations are also doing increasingly important work in Africa. I might mention in particular the World Health Organization, the International Bank for Reconstruction and Development, the United Nations Educational, Scientific and Cultural Organization, the International Labor Organization, and the Food and Agriculture Organization. There are still others besides these which put their specialized knowledge and skill to work to solve the pressing problems of underdevelopment.

More and more countries have been increasing their contributions to the United Nations assistance programs, but still greater contributions will be required if the U.N. is to meet the expanding needs in Africa. We have hopes that the necessary financial resources will be forthcoming. We are sure that if the U.N. can play its full role in assisting the development of the young countries of Africa, the benefits will accrue not only to Africa but to the U.N. and to ourselves and the world in general.

What is equally important to define and implement is what Mr. Hammarskjold called "moral support in the reshaping and shaping of a nation." I think it can be explained by citing the words of one Ghanaian statesman: "What we want from the United States is sympathy for our aspirations and understanding for our mistakes."

U.S. UNDERSTANDING OF AFRICAN PROBLEMS

It has seemed to me that the United States was uniquely equipped to understand African problems and aspirations and to lend this moral support. For example, there has been considerable discussion in this country recently about Africa's capacity to sustain democratic governments.

I would like in this connection to quote briefly from an article entitled "Will Democracy Work in Africa", by the outstanding Tanganyika political leader, Mr. Julius Nyerere. Mr. Nyerere points out: "A country's struggle for freedom * * * leaves no room for differences. * * * It is this nationalist movement which fights for, and achieves, independence. It, therefore, inevitably forms the first government of the independent state. It would surely be ridiculous to expect that a country should voluntarily divide itself for the sake of conforming to a particular expression of 'democracy' which happens to be seen in terms of a government party and an opposition party; and to expect a country to do this in midstream and during a struggle which calls for the complete unity of all its people."

Mr. Nyerere's statement may well recall some of our own experiences after the American Revolution when for a short period we had only one political party in our country. I would hope, however, that the one-party system where it exists in Africa will be designed to serve as a transition to a more advanced stage of democratic government.

Most of the political forces in Africa today—the urge for independence, the attempt to form representative governments, and the campaign for African unity—can be illuminated by a return to our own history. There is something of a parallel here which has not escaped many African statesmen, who often speak in terms of a "United States of Africa" or who otherwise mention the American experience to throw light on their own difficulties. Nothing would disillusion the African more than to find that the lessons he has learned in American universities have been forgotten by Americans.

There is another factor, apart from shared historical experience, that should facilitate understanding between the Africans and ourselves. That is the very important fact that 10 percent of the American population is of African origin. Indeed, there are more people of African origin in the United States than there are in any other country or territory in the world except Nigeria. It is understandable that our people have watched African developments with strong interest. Among our own Negro fellow-citizens there are many men and women who can play useful roles in building bridges between the United States and Africa.

As I have pointed out above, there has been a great deal of interest in the idea of a federated Africa or a "United States of Africa." Most African leaders with whom I talked expressed the view that this is an ideal that does not have much practical significance at the present time. In fact, each emerging state is now confronted with a formidable array of urgent domestic problems which it must resolve. These matters must take priority over the complicated issues involved in a united Africa. Consequently, even though there may be a tendency for certain states in particular regions to federate, or at the very least to work closely together on problems of mutual interest, I doubt very much if any significant progress toward a united Africa can be made in the near future.

SPECIAL PROBLEMS OF NEW AFRICA

In looking to the future of Africa, there are several very real dangers which the new countries will face and which most responsible African leaders readily acknowledge. Let me refer briefly to each of these.

First of all, there will be the temptation not to use to the fullest the administrative competence and the technical know-how available among the white elements of the population. We can all recall just how much political appeal the maxim "throw the rascals out" had during certain periods in our own history. By the same token, political extremists in Africa—disregarding their nation's welfare—may well insist upon the premature withdrawal of white men from positions of responsibility.

Such a trend could have disastrous consequences. It could result in lower standards of administration when better government should be the goal. It could engender hostility and animosity instead of the teamwork between the Europeans and the Africans that is so desperately needed. It could create instability and thus discourage foreign aid and private investment, both of which are essential to real progress.

Another danger lies in the ever-present threat of Communist subversion and intrigue. It is true that in the countries I visited I heard few reports of any effective Communist activity. Indeed, at the present time, there are relatively few individual Communists or organized Communist parties on the continent. Such Communist parties as to do exist in the independent African states are small and severely circumscribed by governments jealous of their newly won independence. I am convinced, however, that in the future Communist leaders will redouble their efforts to increase their influence among the young people, in the trade union movement, and in other strategic segments of the African population.

The major Communist threat to Africa at the moment is an external one. By that I mean the persistent attempts of international communism to penetrate and subvert the newly emerging nations of Africa. Although African governments generally are aware of the problem and seem determined to curtail subversive activities, we must not underestimate the ability of a few dedicated Communists to cause serious trouble. It is clear, if this threat is to be met, that necessary steps must be taken to avoid the kind of political and economic instability that so often leads to Communist subversion.

Finally, there is a danger that some of the new African states, encouraged by a spirit of intense nationalism and by intertribal rivalries, might engage in a competitive arms race that would lower their economic vitality and increase the risk of wars on that continent. Now arms control is very much like weight control—as every Western nation should admit. It is much easier to stay thin than it is to take off excess weight once it has been added.

It is, of course, the right of every sovereign state to determine the ends for which its productive energy and its resources will be used. It would be a tragic thing, however, if these new states—whose resources are so meager—were to embark upon the kind of arms competition that would divert their productive capacity from constructive ends.

This is something which the African states will have to decide for themselves. It is possible, however, if they only have the courage to grasp the nettle while there is still time, the United Nations might be helpful in finding an answer to their problem.

CONCLUDING COMMENTS

The challenge put to us by current African developments if formidable. Almost everywhere Africans are bodly assuming their increased responsibilities. It seems to me there are several courses of action we should follow in order to be helpful.

First, I think it is imperative that we increase our own knowledge and understanding of the problems of Africa. This is a job not only for the press, radio, and television, which during the past year have done much to focus public attention on the developing African scene, but also for our great universities. Unless the news is presented against a solid background of information it is likely to be misinterpreted and misunderstood.

It is in this connnection that the work of American universities in the past decade has been so outstanding. Ten years ago, only 2 universities in the entire United States offered course on Africa; there are now 29, of which 6 have major African area studies. The new African Studies Association now boasts over 600 members. Books, learned articles, and speeches have been produced in large quantities and in excellent quality, but much more is needed.

We have a great deal to learn and time is growing short. Africans who travel in the United States still find fixed in the American mind certain stereotypes evoked by words such as "witchcraft" and "primitive." It is true, of course, that there is much in Africa that is still primitive, but cities like Salisbury, Dakar, and Leopoldville are as modern as many American cities.

Secondly, if we need to know much more about Africa, it is at least as true that Africans need to learn much more about the United States. Certainly there is little awareness in Africa of our attempts to solve our own race problems and far too much emphasis on the materialistic rather than the human side of our culture. Frequently, too, one encounters a rather unrealistic belief in American omnipotence followed by disillusionment when we fail to measure up to their expectations.

There are a number of ways by which we can attempt to solve this problem. We can do this in the long run most effectively by expansion of our student exchange program. In 1955, there were 851 students from sub-Saharan Africa studying in American universities, by 1959, the number had risen to 1,190. Does this sound impressive? There were in 1959, 47,245 foreign students in American universities, of which the African share was less than 2 percent. This is much too small a number, although we have managed so far to substitute quality for quantity. Among the more illustrious graduates of American universities are the Prime Minister of Ghana, and the Premier of the eastern region of Nigeria.

Third, although education of the young is the most pressing job, we should also expand our leadership grants to outstanding African statesmen, administrators, and technicians. We have done a good deal in this field, but the need far outweighs available resources.

Fourth, a step-up in the tempo of our information activities in Africa is also essential. We now have an impressive number of centers operated by the U.S. Information Service in Africa. There are currently 15 central posts, 9 branch posts, and 3 reading rooms, working through local public information media and telling the U.S. story through films and libraries. In some countries, USIS carries on English-language teaching, and in many other ways extends African knowledge of America.

Fifth, it is important to expand the economic assistance which can be made available for Africa. We are convinced that it is in the U.S. interest to increase direct assistance to Africa and a sum of $20 million has been requested by ICA for this purpose for next year.

I believe that our own efforts can be complemented in an important way by an expansion of United Nations activities in Africa. There is growing support in Africa for the kind of assistance made available by the United Nations. The Secretary General stated that this was his impression following his recent 24-country tour; I found the same sentiment everywhere I traveled. Multilateral aid has much to recommend it. It is easier for experts representing the world community to give advice on economic matters that will require a country to take unpopular political measures, increasing taxes, for example. Moreover, multilateral aid tends to mitigate some of the worst features of the shopping between East and West that some countries have learned to carry on. It cannot replace bilateral assistance, but we believe it has unique qualities which make it peculiarly adaptable to African countries.

Increased aid through the United Nations would have a beneficial political aspect as well. We can expect a certain amount of unrest in Africa. Frontiers were often established arbitrarily by European powers without much regard to ethnic or linguistic factors. For example, despite prolonged United Nations efforts, there is no mutually accepted frontier between Ethiopia and the new State of Somalia. As a result Africa, like other continents, will be beset by many formidable political and economic problems. The United Nations can be of great assistance in their solution. I believe that a U.N. presence, primarily to furnish economic and technical advice and assistance, in particular cases, can be an element of considerable political stability as well.

Finally, I would like to sum up my impressions in the following way. As one travels through Africa today, one can vividly sense the spirit which gave rise to our own Declaration of Independence with its ringing concepts of human dignity and equality. Fortunately, the transition to independence is nearly everywhere being carried out with the assistance and the approval of the administering powers.

The new political and economic responsibilities which the emerging African nations have assumed are nothing short of staggering. Many of their problems seem almost insurmountable. There will be some mistakes made. There will be some stumbling done. But let us be hopeful and charitable in our attitude, and let us remember our own halting beginnings.

I returned from Africa awed, disturbed, and optimistic. I was awed by the size and complexity of the giant that is moving on to the world stage; disturbed by the magnitude of the problems that remain to be resolved; and encouraged by the growing amount of racial harmony that I encountered.

No one can doubt that the newly emerging states of Africa have an extremely difficult task ahead. A new state cannot be built in a day. It will take time—and energy and money—and sweat and blood and tears. But as they move on toward their goal of human betterment they know they have the sympathetic interest and the support of the Government and the people of the United States.

I am confident that the peoples of Africa will succeed in establishing their rightful place in the family of nations, and that they will make a significant contribution to the United Nations and the cause of world peace.

ORDER OF BUSINESS

The PRESIDING OFFICER. Is there further morning business?

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MUTUAL SECURITY ACT OF 1960

Mr. BUTLER. Mr. President, has the morning hour been concluded?

The PRESIDING OFFICER. Is there further morning business? If not, morning business is concluded. Without objection, the Chair lays before the Senate the unfinished business, which is S. 3058.

The Senate resumed the consideration of the bill (S. 3058), to amend further the Mutual Security Act of 1954, as amended, and for other purposes.

Mr. BUTLER. Mr. President, I move that there be stricken from the bill all language beginning with the semicolon and the word "and" on page 17, line 2, down to and including the word "purposes" in line 8 of page 17.

Mr. President, section 404 of the bill, S. 3058, as reported to the Senate, is a new section to the Mutual Security Act, as amended, the main purpose of which is to authorize use of mutual security funds for development of the Indus Basin under the supervision of the International Bank for Reconstruction and Development. The section would also authorize waiving our 50–50 shipping provision.

Under the multilateral agreement for this project the U.S. money contributed to the Indus fund will not be subject to the 50–50 shipping provision. It is claimed this is necessary in view of the multilateral character of the project and the fact that the other contributing nations are also foregoing any preferential strings on their contribution. At the same time the committee reports that it expects the 50–50 shipping provision will be waived only if or to the extent that compensating increases cannot practicably be made over a period of time in other mutual security shipments carried on American vessels to this or other regions.

It is the waiver of our 50–50 shipping provisions that concerns me greatly. It has been made clear by the State Department that this maritime statute creates no immediate problem and may, in fact, never create any problem.

In a letter attached to State Department release No. 199, dated April 19, 1960, which amplifies the testimony of Mr. Dillon before the Congress. It is stated that—

We do not foresee need to exercise this authority in the near future.

The lack of any immediate need is explained as because—

We anticipate ability to compensate within the regular mutual security program for the required proportion of the tonnage deriving from implementation from the Indus Basin project.

The State Department then goes on to say—

If the present programs of assistance under the Mutual Security Act were to continue at approximately present levels over the period of time that will be required to complete the Indus Basin project, we could probably be reasonably confident that no necessity to waive the provisions of the cargo preference legislation would arise.

Moreover, as the committee has pointed out, compensating increases created by this project can come from other mutual security shipments. This fact is understood and accepted by all concerned—including the executive department and the industry. The only question at issue here is whether at some time in the future the mutual security programs may not be sufficient to carry along this Indus project under such a procedure, and to this extent there might be a future problem. It is only in connection with this possibility of a future problem that this waiver authority is requested, and the question before us is whether this authority—for 10 years hence—should be granted now by the Congress to the executive department. There seems to be some suspicion on the part of the executive branch that if a future problem should arise a future Congress would not be willing to take whatever reasonable action might be called for at that time.

I remind my colleagues that this is not the first time the administrative agencies have urged the Congress to wipe out this protective maritime statute on the ground that special programs might suffer harm. Many different patterns of foreign assistance have developed over the years from the early days of the Marshall plan—the expanded mutual security programs, special relief projects, sales for foreign currency, barter programs, and others. Each time any new type of program is conceived of or adopted the claim is made that the Cargo Preference Act should not be applied, and all sorts of dire pictures are conjured up to show that these programs could not be worked out unless cargo preference were done away with. Yet, as the Senate well knows, each time these claims were made the facts would not justify the contention, and, as we know, this shipping provision has not hurt these programs whatever. On the other hand, it has kept the U.S. maritime industry alive and provided jobs for our seamen and other workers, and has contributed millions of dollars of taxes to the Treasury.

I, for one, am not convinced that there is any solid reason for turning this power over to the executive department now. I am not convinced that this request for such authority has been justified or that there is any good reason for the Congress to give up its control over the situation at this time. There is no question in my mind that the fears of the State Department are unfounded. Even if a problem should arise at a later time is there really any question that the Congress would fail to take any reasonable action which may then be necessary?

I doubt that I need call the attention of my colleagues to the extent taxpayer dollars have gone into foreign assistance programs over the years. In the past, this has generated employment and stimulated productivity in the United States. Then, some few years ago, the accent switched to offshore procurement in the mistaken notion that this was stretching our aid dollars. But it did little for the American economy. Now there develops a new concept, as embodied in section 404 of the pending bill. This philosophy is a dangerous one, for it says in effect that whenever foreign countries assume, however small, a share of the burden in contrast to our large share in the development of the so-called underdeveloped areas, American laws should be set aside. Set these laws aside, we are told, because some international body such as the World Bank will be in charge of administering a project, and the World Bank demands that it have authority to allow the use of moneys given it by us in accordance with its own requirements, standards, and procedures. So far in the pending bill the effort is to set aside our maritime law. When will the request be made that our farm policy be set aside? When next will our safety and health legislation be scuttled? When will our social security and labor legislation be jettisoned?

In the postwar period we have erected a monument to international charity in the cause of purchasing friends and containing the Soviet Union. It is one thing to ask our people to assume this burden; it is quite another to require the setting aside of our national laws as a prerequisite for this benevolence. It is time that we remained unyielding in our principles, however charitable with our resources we may choose to be.

I see the present section 404, therefore, as the first serious step in the wrong direction, and I implore my colleagues to strike out the waiver authority contained therein so that our basic American statutes and standard of living be not eroded by the demands originating under a philosophy totally alien to the United States.

On this amendment, I ask for the yeas and nays.

The yeas and nays were not ordered.

Mr. BUTLER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded, and that it be in order for the Senator from Hawaii [Mr. LONG] to call up his amendment at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG of Hawaii. Mr. President, I call up the amendment to S. 3058 which I offer for myself and my colleague [Mr. FONG]. The original bill embodying this proposal was S. 3385 sponsored by 49 Senators. I ask that the amendment be stated.

The PRESIDING OFFICER. The amendment will be read.

The Chief Clerk read as follows:

At the end of the bill it is proposed to insert a new chapter as follows:

"CHAPTER VII—CENTER FOR CULTURAL AND TECHNICAL INTERCHANGE BETWEEN EAST AND WEST

"SEC. 701. This chapter may be cited as the "Center for Cultural and Technical Interchange Between East and West Act of 1960."

"SEC. 702. The purpose of this chapter is to promote better relations and understanding between the United States and the nations of Asia and the Pacific (hereinafter referred to as "the East" through cooperative study, training, and research, by establishing in Hawaii a Center for Cultural and Technical Interchange Between East and West where scholars and students in various fields from the nations of the East and West may study, give and receive training, exchange ideas and views, and conduct other activities primarily in support of the objectives of the United States Information and Educational Exchange Act of 1948, as amended, title III of chapter II of the Mutual Security Act of 1954, and other Acts promoting the international, educational, cultural, and related activities of the United States.

"SEC. 703. In order to carry out the purpose of this chapter the Secretary of State (hereinafter referred to as the "Secretary") shall provide for—

"(1) the establishment and operation in Hawaii of an educational institution to be known as the Center for Cultural and Technical Interchange Between East and West, through arrangements with public, educational, or other nonprofit institutions;

"(2) grants, fellowships, and other payments to outstanding scholars and authorities from the nations of the East and West as may be necessary to attract such scholars and authorities to the Center;

"(3) grants, scholarships, and other payments to qualified students from the nations of the East and West as may be necessary to enable such students to engage in study or training at the Center; and

"(4) making the facilities of the Center available for study or training to other qualified persons.

"SEC. 704. (a) In carrying out the provisions of this chapter, the Secretary may utilize his authority under the provisions of the United States Information and Educational Exchange Act of 1948, as amended.

"(b) The Secretary may, in administering the provisions of this chapter, accept from public and private sources money and property to be utilized in carrying out the purposes and functions of the Center. In utilizing any gifts, bequests, or devises accepted there shall be available to the Secretary the same authorities as are available to him in accepting and utilizing gifts, bequests, and devises to the Foreign Service Institute under the provisions of title X, part C of the Foreign Service Act of 1946, as amended. For the purposes of Federal income, estate, and gift taxes, any gift, devise, or bequest accepted by the Secretary under the authority of this chapter shall be deemed to be a gift, devise, or bequest to or for the use of the United States.

"(c) The Secretary shall make an annual report to the Congress with respect to his activities under the provisions of this chapter, and such report shall include any recommendations for needed revisions in this chapter.

"SEC. 705. There are authorized to be appropriated, to remain available until expended, such amounts as may be necessary to carry out the provisions of this chapter."

Mr. LONG of Hawaii. Mr. President, the concept of an East-West Cultural

Center has been before the public and before this body for such a long period of time that I think it is hardly necessary for me to discuss it in detail at this time.

Briefly, the bill would authorize the Secretary of State, in cooperation with such educational or other nonprofit institutions as he might wish to call upon, to establish in the State of Hawaii a center for cultural and technical interchange between East and West. The bill requires that at least once annually the Secretary of State submit to the Congress a report on the activities carried on, the scope of the program, and the progress made.

We believe that enactment of this provision as part of the mutual security program will constitute a significant contribution toward increasing the friendship and mutual understanding between our country and the nations of Asia and the Pacific which presently are outside the Communist ring of influence. That is the sole purpose of the bill. It is not designed merely to build up the University of Hawaii. The University of Hawaii is a State university, and is the responsibility of the State of Hawaii. But we are offering its facilities and all our cooperation for this endeavor which we believe has a very important bearing on our foreign relations. Friendship and mutual understanding are the foundation stones of peace.

Mr. President, that, in a few words, is the purpose of this amendment.

Mr. MANSFIELD. Mr. President, will the Senator from Hawaii yield?

The PRESIDING OFFICER (Mr. LUSK in the chair). Does the Senator from Hawaii yield to the Senator from Montana?

Mr. LONG of Hawaii. I yield to the Senator from Montana.

Mr. MANSFIELD. As I understand, this proposal was advanced last year, and at that time was approved by both Houses of Congress.

Mr. LONG of Hawaii. That is correct.

Mr. MANSFIELD. I also understand that at the behest of the Congress, the State Department last year conducted a very thorough investigation into the possibilities of an East-West Cultural Center, in Hawaii, and recommended that such a center be established.

Mr. LONG of Hawaii. That is correct.

Mr. MANSFIELD. If my memory serves me correctly, that investigation by the State Department and by representatives of other agencies of the Government was undertaken over a period of from 4 to 6 weeks.

Mr. LONG of Hawaii. That is correct.

Mr. MANSFIELD. And they examined every facet of the proposal to create a center which would serve as an educational meeting place, so to speak, for Americans and for people from the Far East; and they determined that the most logical place for an East-West Cultural Center of this sort would be Hawaii, which traditionally has been the meeting ground, as well as the melting pot, for the peoples of the Pacific.

Mr. LONG of Hawaii. The Senator from Montana is entirely correct.

Mr. MANSFIELD. I thank the Senator from Hawaii.

Mr. President, I wish to pay special tribute to the two Senators from Hawaii [Mr. LONG and Mr. FONG], and also to the Member of the House of Representatives from that great State, Representative INOUYE, for their unfailing attention to this matter and their outstanding efforts to bring to successful fruition this great dream.

Mr. JOHNSON of Texas. Mr. President, will the Senator from Hawaii yield to me?

Mr. LONG of Hawaii. I yield.

Mr. JOHNSON of Texas. I wish to join the Senator from Montana, the distinguished majority whip, in congratulating both of the Senators from Hawaii on their very worthwhile efforts in connection with what I consider to be one of the finest pieces of legislation ever to be considered by the Congress.

I have had numerous conferences with both of the Senators from Hawaii, in connection with this matter; and I have talked about it to the chairman of the Foreign Relations Committee. The State Department has made a very thorough study of this field. I believe that if favorable action is taken on the amendment, which is sponsored by many of the Members of this body, the Congress will long remember this day.

Mr. DIRKSEN. Mr. President, will the Senator from Hawaii yield to me?

Mr. LONG of Hawaii. I yield to the Senator from Illinois.

Mr. DIRKSEN. Mr. President, I remember with great interest my visit to the American University at Beirut, in Lebanon. I think it was one of the most interesting and rewarding experiences I ever had, because there we find young people from all the countries of the Middle East taking training and securing important knowledge and wonderful understanding of American traditions and culture. That university has rendered significant service and has done very much to create good will and to explain what I am pleased to refer to as the American tradition. I know several of those who have been the distinguished presidents of the American University at Beirut. Having had that opportunity to see how an educational institution of that kind can impress itself so deeply upon the minds and hearts of peoples of different faiths and different nationalities in the entire Middle Eastern portion of the world, I can readily envision the effect which the proposed East-West Cultural Center will have, once it is established and becomes a functioning institution in the State of Hawaii. I am sure it will gather unto itself scholars of great talent and attainment from Asia, and from the West, as well; and, through that commingling and intermingling of understanding, talent, research, and other parts of its curriculum, I believe the funds required for that purpose will be well invested in the extension of the good will of this country and in the development of good will for this country.

Mr. LONG of Hawaii. I thank the distinguished Senator from Illinois for his very fine statement.

Mr. FONG. Mr. President, will my colleague yield to me?

Mr. LONG of Hawaii. I am glad to yield.

Mr. FONG. Mr. President, I am very happy to join my colleague in sponsoring this amendment to the Mutual Security Act.

The people of Hawaii are strongly back of this proposal to create at the University of Hawaii this center of East-West culture.

As the Senate knows, the people of Hawaii have created from various and diverse peoples a very homogeneous, progressive, and important society and community. They have worked extremely well together, and they have shown all the world that peoples of various races can successfully work and live together.

In proposing the establishment of this cultural center, the people of Hawaii feel a sense of history. They feel that in the field of international relationship they can give to the American people real help that will be of greater value than anything the country has thus far seen from the people of Hawaii.

The people of Hawaii feel that because of the fact that they have been able to live together amicably and in unity and concord, they will be able to disseminate this message of good will to all the peoples of the world.

In my travels in the Far East, and especially in the trip I made last November, I was constantly asked by the people there how Americans live and what really transpires in America, insofar as democracy is concerned.

The establishment of this East-West Cultural Center in Hawaii, will give to representatives of all the countries of Asia and the Pacific a chance to come to Hawaii and see how the Americans there live and function in our democratic society.

In Hawaii, where the people live in such outstanding amity, visitors from the countries of Asia and the Pacific can really be shown that people of various ancestral backgrounds can work successfully together for the common good.

At this point, I should like to read an editorial which was published in a Korean newspaper at the time when word reached Korea that the Asian Cultural Center was about to be proposed for establishment in the State of Hawaii. The editorial was published in the Korean Republic, in Seoul, Korea, on December 4, 1959; and it reads as follows:

ASIAN CENTER IN HAWAII

Ideas of great inspiration do not come along very often—perhaps once in a generation.

We think one is developing now in connection with the suggestion that a center for Asian studies be established in Hawaii, the 50th State of the American Union.

The center would fill an important and increasing need. Many universities of the West offer various Asian studies, but there is a natural tendency to specialize, and there is no center that covers all the major languages and cultures.

Through such an enterprise, Asians would come to know more about themselves and each other. All countries and all peoples of the region presumably would be represented among both faculty and students.

Hawaii is the ideal location for the center. Its climate is a compromise, and acceptable to those from both temperate and tropical zones. But of even greater consequence is Hawaii's racial tolerance and integration.

Of all places in the world, Hawaii is that which gives the most dramatic answer to the contentions of the racists. Not only has intermarriage taken place on a large scale, but peoples of diverse colors and creeds live and work together in harmony and without discrimination.

Now that Hawaii is a State, this will have mounting impact on the evolution of racial problems on the mainland. The Asian center could spread the ripples of similar influence in the direction of the Far East, where national differences pose many difficulties.

It might be well to establish the center on international ground, much as is the case with the United Nations in New York, and to place the joint administration in the hands of the United States and the participating free Asian nations.

The experience of such an endeavor would represent a long step in the direction of more effective international controls and security.

Concept of a Hawaii center of Asian studies and research should stir the imaginations of all who care about the amalgam of East and West and should bring the project to the point of implementation in the earliest possible future.

I should like to say also, Mr. President, that the people of Hawaii have already started contributing money for this East-West Cultural Center. The Legislature of Hawaii has appropriated quite a large sum to supplement the prospective appropriation that they anticipated will be made by the Congress of the United States. Many citizens, including the students of the University of Hawaii, have asked for public contributions, and it is expected that a good many trusts, estates, and foundations will contribute generously toward helping the establishment and operation of the East-West Center.

I should also like to say that the Governor, the legislature, and almost everyone in Hawaii feel very, very strongly about the establishment of the East-West Cultural Center, and they all look forward to better international race relationship among the people of the world through the establishment and operation of the East-West Cultural Center.

I am very happy to join my colleague in this amendment, and I thank him for yielding to me.

Mr. LONG of Hawaii. I appreciate the comments of my colleague from Hawaii.

I want to voice my gratitude for the support which the proposal for the East-West Center has received from both sides of the aisle and from all sections of the country. Legislation to establish in Hawaii a center where East and West can meet originated last year with the distinguished majority leader and with Hawaii's delegate to Congress, Mr. John Burns.

Theirs was the inspiration to have the Federal Government support a new departure in international relations. The idea was developed into a legislative proposal at this session of the Congress through the wholehearted and enthusiastic cooperation of the majority leader, Senator LYNDON JOHNSON, Congressman DANIEL K. INOUYE, and my colleague, Mr. FONG.

Much credit goes to the University of Hawaii for developing this inspiration into a concrete program for cultural interchange and technical training. The State Department studied these plans and in so doing made many excellent suggestions, now incorporated in the plan. The State of Hawaii has appropriated money for the center and its citizens are making donations to share in the costs of the program.

There has been a widespread interest in this proposal, both in this country and in Asia. It has been recognized as an imaginative and yet practical program for making ourselves better acquainted with the countries of Asia. We have much to offer to our neighbors in the Pacific and much to learn from them. This International Center at the University of Hawaii will make possible an interchange between East and West which will bring rich returns in friendship and mutual understanding.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. LONG of Hawaii. I yield to the distinguished Senator from Arkansas.

Mr. FULBRIGHT. Last year we spent much time in considering the proposal. At the time we authorized a study of it by the State Department. I have considered the proposal at length. I think it is an excellent suggestion. It is designed to meet a problem which is difficult to handle under our existing mainland institutions.

I shall be very glad to accept the amendment and take it to conference, and I believe we can persuade the House to accept it, because it is in line with our foreign policy.

I should like to add one further word. Shortly after the Senator made his proposal last year, within a few months, the Russians took up the idea, and they have actually created an institution in Moscow to serve a similar purpose.

I shall be very glad to accept the amendment.

Mr. President, I wish to thank all those who have supported this idea. I am confident, because of its importance, that the Senate will act upon it favorably.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. LONG of Hawaii. I yield to the distinguished Senator from Ohio.

Mr. LAUSCHE. Mr. President, I think the thought embraced in this amendment is sound basically. I should like, however, to suggest to the chairman of the Foreign Relations Committee that there are in the amendment some weaknesses which ought to be attended to, probably in conference. I refer to the size and duration of the Federal Government's financial support, which is not at all stated in the amendment. The continuing responsibility of the Secretary of State with regard to the operation of the center is a matter which ought to be considered.

Mainly, attention ought to be given to the fact that there is an open-end appropriation allowed for the construction and operation of the proposed institution. No specific amount is designated which will be allowed for the operation of it.

I merely leave the thought with the chairman of the Foreign Relations Committee that probably, on the basis of prudent business management of Federal funds, there ought to be more specific declarations in the amendment dealing with the items which I have mentioned than those now contained in it.

Mr. FULBRIGHT. We shall certainly consider in conference the points which the Senator from Ohio has made. This amendment will be in conference, and the House will raise these very points. I may say I do not think there is too much danger about the authorization. It is only an authorization. Before any money is actually made available, this matter will have to pass both appropriations committees and both Houses.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. LONG of Hawaii. I yield.

Mr. JOHNSON of Texas. I think the observation of the Senator from Arkansas [Mr. FULBRIGHT], the distinguished chairman of the Foreign Relations Committee, is well taken; and I hope the suggestion made by the Senator from Ohio [Mr. LAUSCHE] will be given consideration when the bill goes to conference, because it will be in conference. Before any money is appropriated, the Appropriations Committee, headed by the Senator from Arizona [Mr. HAYDEN], will give serious consideration to any request.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Hawaii [Mr. LONG], for himself and the senior Senator from Hawaii [Mr. FONG].

The amendment was agreed to.

Mr. JOHNSON of Texas. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DIRKSEN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Maryland [Mr. BUTLER].

Mr. BUTLER. Mr. President, I ask for the yeas and nays on the pending amendment.

The yeas and nays were ordered.

Mr. SMATHERS and Mr. FULBRIGHT addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida.

Mr. SMATHERS. I shall be glad to yield to the chairman of the Foreign Relations Committee.

Mr. FULBRIGHT. Is the Senator from Florida going to speak on the Butler amendment?

Mr. SMATHERS. No. I have an amendment very much akin to the amendment offered by the Senator from

Hawaii, which has just been adopted, which was creating the Cultural Center in Hawaii. My particular amendment calls for a study to be undertaken by the Secretary of State to consider the establishment of a similar cultural center in Puerto Rico for this hemisphere.

From preliminary discussions with members of the Foreign Relations Committee and other Members of the Senate, I gathered the information that there was no particular objection to this kind of a study, for the purpose of looking into the feasibility of setting up the same kind of a program, a North-South Cultural Center, in the Latin-American area, where I think there is just as much need for an exchange of ideas and students as there is in the East-West area. If the able Senator from Maryland will yield to me, so that I may bring up my amendment and have it disposed of, I will be most grateful.

Mr. DIRKSEN. Mr. President, if the Senator will yield, I may say it is not going to be disposed of that quickly. Perhaps these cultural centers come cheaper by the dozen, as they say, but one at a time is enough, I think.

Mr. SMATHERS. My amendment proposes only a study. It is designed as an educational approach to better understanding and relations with our neighbors to the South.

Mr. DIRKSEN. I know how these studies eventuate into something concrete very rapidly. The difference between the Senator's proposal and the one the Senate has just acted on is that Hawaii is a State of this Union. Puerto Rico is not. None of the Latin American republics is a part of this Union. I think we ought to take a little time to consider the matter before we encumber this mutual security bill with a whole collection of cultural centers; and I wish to express my opposition to it right now.

Mr. AIKEN. Mr. President, do I correctly understand that the proposal of the Senator from Florida calls for a study?

Mr. SMATHERS. It calls for a study as to whether it is feasible to have a similar type of operation to the one to be set up in Hawaii.

Mr. AIKEN. Mr. President, will the Senator from Florida permit me to say that in Latin America there has been a feeling we are paying a great deal more attention to Asia and to Africa than we are to our nearest neighbors. I would dislike very much to see the proposal submitted by the Senator from Florida defeated, because I fear it would not have a good effect on our relations.

Mr. SMATHERS. I would implore the able minority leader to change his position. If it is not a feasible proposal, I think we can trust the Committee on Foreign Relations and those who will be assigned to study it to do what is intelligent and what is proper and to not involve us in a long succession of expenditures.

As the able Senator from Vermont has said, we continue to run into a very real problem in that we always seem to pay much more attention to other areas of the world than to Latin America. Those of us who are greatly interested in the Latin American area find this to be so. If we could have the study, I think it would make a great deal of sense. If the committee, after studying the matter, does not think the proposal makes sense, that will end it.

Mr. DIRKSEN. I will say to the distinguished Senator from Florida, the similar matter was considered as a separate resolution, quite aside from the mutual security bill last year, and was sponsored by 48 Members of the Senate. That is quite a different thing. I would suggest that the Senator offer a resolution as a separate resolution, let it go to the appropriate committee and be studied, rather than to seek to make it a part of the mutual security bill, which is presently before the Senate.

Mr. SMATHERS. I will say to the able Senator, it is my understanding—and, of course, the chairman of the committee can tell us the exact fact—that the resolution which was offered last year was finally made a part of the Mutual Security Act. Is that correct?

Mr. FULBRIGHT. That is correct.

Mr. SMATHERS. I think this is the proper time and the proper forum. I implore the able minority leader not to oppose it. I know the Senator is interested in Latin America, as we all are.

I think if we do not at least make the study, our action would be improperly interpreted in that area of the world, and would make it a little more difficult for us to accomplish in that important area the things which the State Department is trying to accomplish.

I do not believe this proposal will involve any great expenditure of money at this particular time. I am confident that what is needed for the study will prove to be an investment of inestimable value. The problems which beset Latin America are many. Our relations with the area have deteriorated. The hour for solution of these problems is here. This proposal is one means toward this end.

I ask the able minority leader to consult with the Senator from Vermont and with other Members on his side of the aisle, and to change his position. I think most of the Senators believe this is a sound and sensible approach.

Mr. DIRKSEN. Mr. President, I speak only for the minority leader. I ask the distinguished chairman of the Committee on Foreign Relations, what are his notions about this matter?

Mr. FULBRIGHT. As the Senator from Illinois knows, I have a great interest in this kind of activity, because I think it promotes our foreign policy very effectively. I favor a study of this kind.

I also invite attention to the fact that this proposal would not limit the study merely to the creation of a new institution. It could either be a branch of an existing institution of higher learning or a separate institution.

Already in Puerto Rico we have a very modest operation under the technical assistance point 4 program, in which existing institutions are utilized most effectively. I have visited them. Representatives of over 20 countries were attending.

The conflicts which sometimes trouble our internal affairs, growing out of race, do not exist in Puerto Rico. It has been an ideal place for bringing in people from the Caribbean area and from other areas. There were representatives from Asia and from Africa. There is no other place, except of course Hawaii, now. Without this the work could not continue.

I do not foresee that this will be a vast undertaking involving millions and hundreds of millions of dollars. The study itself will be a very modest one, by the Department. Even if it should eventuate into a new institution or assistance to an existing institution, I do not think it will involve a great deal of money. It will serve a very good purpose.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. JOHNSON of Texas. Mr. President, more than 2 years ago, in an address which I made before I believe the American Association of Newspaper Editors or the Chamber of Commerce of the United States—I do not recall exactly which organization at the moment—I urged the attention of the Committee on Foreign Relations to a study in both fields. I urged study of an East-West Institute and one such as the Senator from Florida has now proposed.

I had hoped that we could take action on the East-West Institute first, and follow that immediately with a proposal in connection with Puerto Rico or some other suitable location. Now that we have taken action on the East-West Institute in the Senate, I should like to see the suggestion embodied in the proposal of the Senator from Florida carried out. I see no harm which could flow from the suggestion. I can foresee great good which might result.

In any event, no authorization is involved. No appropriation is involved. It would be a mere direction to the committee and to the Department to undertake consideration of the idea. If the Department, after adequate consideration, comes to the conclusion it did in connection with the East-West Institute, then we can again consider the matter on its merits. If, on the other hand, the Department feels it is not a proper time to undertake such a proposal, or that good results would not flow from it, the Department can so recommend.

I see no reason why we should not accept the idea of the Senator from Florida. I hope the Senate will do that. I hope my friend from Illinois will permit the study to be made, because I think that is the best, the most feasible, and the most orderly way to approach the matter. If we do not approach it in that way, I think we will be confronted with amendments to bills even before we have had proper hearings and before the Department has given the matter proper consideration.

I am very much in sympathy with the suggestion made by the Senator from Vermont, that our actions may be misconstrued and the wrong impression may flow from our action if we should deny the committee and the Department an opportunity merely to engage in this study.

Mr. DIRKSEN. Has this matter been presented to the Committee on Foreign Relations?

Mr. SMATHERS. No. Not formally. It has been discussed informally on several occasions.

Mr. JOHNSON of Texas. I cannot speak with authority on that, but my memory is that when we made the original recommendation for the East-West Institute we also said we thought it would be a good idea to establish something similar elsewhere. I know that was in the original idea advanced to the country.

Mr. DIRKSEN. The chairman of the committee indicates this was not presented to the committee.

Mr. SMATHERS. I think that is correct as a formal matter, but over the last 5 or 6 years, I will say, this matter has been discussed informally.

Last year, when there was first talk about the East-West Institute, there was some mention made, as the able majority leader has pointed out, of the need for a North-South operation, but it was said, "Let us do one thing at a time." The study plan was suggested. I think it would eliminate the prospect of embarking on some harebrained scheme which would cost a lot of money.

Mr. DIRKSEN. Mr. President, if the Senator will yield further, I will conclude with one observation.

I have seen these studies for the last 25 or 26 years. They are just like great towering oaks, which grew from little acorns. They start out as studies. That has been the history of government.

In the instant case, with the East-West Cultural Center, the matter has been considered and has been formalized. A bill was introduced. The bill had 48 sponsors. That came to the Senate with some background.

Although this matter has never been presented to the full committee, I am not going to stand in its way, except to utter my own personal objection. I shall let the Congress do as it will with the matter. I think the time has come for some caution. Having consummated, we hope, one institution, I think we can wait before we venture down this other trail.

I am not wholly unsympathetic to the idea. I have inspected some of the institutions in Puerto Rico, and I think that country needs encouragement. I believe that relations between Latin America and the United States richly merit encouragement of the project. But this program will run into money before we are through. Let us make no mistake about that. That is one reason why I have taken some exception to that provision of the bill.

There was a proposal for a study of a program for a youth corps, to be trained to administer international aid. The original proposal, which was before us last year, even provided that we should take under advisement the prospect of allowing service in a youth corps administering American aid abroad to take the place of service in the Armed Forces. That, also, is a beautiful ramification.

These proposals all have ramifications. I prophesy now that what is proposed today as a study will be back here a year or two hence in the form of a request for very substantial appropriations.

Having made my case and uttered my objection, I let the matter rest there.

Mr. SMATHERS. Mr. President, I appreciate the able minority leader's statement. I think the whole purpose of the proposed study is to try to create better relations and a better understanding between the various areas of this part of the world, so that we shall not eventually have to appropriate large sums of money for so-called economic aid programs and other programs to remedy misunderstanding and ill will which may develop. I know that the Senator is greatly interested in this area, and I am delighted that he has so spoken. I would not want anyone in that area to feel that he is not interested.

Certainly I share his hope that this approach will not result in any waste of money. I do not believe it will. On the contrary, if we provide a center where the people of Latin America can meet and exchange confidences and try to understand each other's problems, in the long run there will be less need for money, less need for sending old tanks, guns, and things of that character to those countries. I think we can eliminate that kind of program and substitute for it the kind of program now proposed. The proposed program is much less expensive and much more valuable to us.

Mr. AIKEN. Mr. President, I should like to refer to the question asked earlier, as to whether this subject has been considered by the Foreign Relations Committee up to this time. The specific proposal has not been considered, but the general subject has been discussed time and time again.

For millions of Latin Americans the image of the United States is formed in Puerto Rico. They look to Puerto Rico. We have made any number of friends through our handling of Puerto Rican affairs over recent years.

I should very much dislike to see this proposal voted down. It provides for a study of the situation which has been presented by the Senator from Florida.

It has been said that such a study would cost money. The greatest need of the developing nations of the world today, including Latin America, Africa, and Asia, is trained leadership. We are taking many thousands of young people from those developing countries into the United States and training them. We are taking them in such numbers that we are now receiving complaints from American boys and girls that they cannot even get into their own universities. They point to the fact that we are taking students from other countries when they cannot get into the same universities.

So it seems to me that if, in Hawaii and Puerto Rico, we can develop and train the leadership which those developing nations so badly need, instead of being a costly venture, it will be a profitable one, because it will help to increase the general commerce and economy of the whole world; and if we cannot get our share, that is our fault.

Mr. SMATHERS. I thank the able Senator.

Mr. LAUSCHE. Mr. President, I regret that I must express opposition to this proposal. This subject has not been discussed in the Foreign Relations Committee, and I feel rather certain that if it had been discussed, and if it had been anticipated half an hour ago, when we passed on the Hawaiian Institution, that suddenly there would come before the Senate a proposal to establish a north-south program, there might have been some different approach to the Hawaiian proposal.

I am compelled to say that I was astounded that, as quickly as the door was opened by the establishment of a Hawaiian Institution, there was presented to this body a proposal which was entirely unexpected by Senators in attendance, a proposal to establish a north-south program.

Two years ago when the Hawaiian proposal was made I expressed doubts about it. Moreover, I am of the belief, as I have previously stated, that the language contained in the Hawaiian proposal is rather uncertain and loose. It provides for grants, fellowships, and other payments to outstanding scholars and authorities. In subparagraph (3) it provides for grants, scholarships, and other payments to qualified students.

How does this subject become a part of mutual security, with the appropriation of the funds contemplated by the Mutual Security Act? A further question is raised in my mind as to the propriety of including it within this bill.

Two years ago, when the proposal was first made, I expressed doubts about it. I insisted that a study should be made. The study made by the State Department, and its views, do not suggest positively even the establishment of an institution in Hawaii.

As I have said, 1 minute after the Hawaiian door was opened, this unexpected proposal was made for a North-South Institution. I wonder if the Senator from Illinois [Mr. DIRKSEN], judging from his manifest surprise, would have supported the Hawaiian Institution if he had known that so suddenly this new program would be presented.

Let me say to my colleagues that I have learned a lesson from this experience today. I have doubts about the correctness of passing upon the Hawaiian Institution in connection with the mutual aid bill. I should have known that the moment that proposal was adopted the gate would be open, and that there would be other proposals.

I venture a wager today that if I am in the Senate for the next 3 years, there will be further proposals along this line. Now it is north-south and east-west. Later someone will come forward with some other type of orientation. In a measure, Pandora's box has been opened, as has frequently been said in conection with subjects of this type.

The objective may be good, and the ultimate result to be obtained may be good. However, there is no justification for adding this proposal to the package and getting the Senate, indirectly by compulsion, to vote upon the proposal in combination with the Senate's desire to vote on the mutual security bill. I do

not believe we are acting soundly and prudently, in accordance with the procedures that should guide the Senate in the disposition of the appropriation bills, by acting in haste upon this proposal.

Mr. President, I ask for a yea-and-nay vote on the amendment if it is to be submitted or offered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Maryland [Mr. BUTLER].

Mr. BUTLER. Mr. President——

Mr. FULBRIGHT. Mr. President, I wish to say something about the Butler amendment before it is voted on.

Mr. BUTLER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BUTLER. The Senator from Florida addressed the Chair and asked that the pending business be laid aside so that the amendment he proposed to offer could be considered. I agreed with the Senator to the setting aside of my amendment, to afford him an opportunity to get a vote on his amendment if he desired to have that action taken.

Mr. SMATHERS. That was my understanding.

Mr. FULBRIGHT. I do not object to that, but I do not want to delay a vote on the Butler amendment. However, if there are to be several speeches——

Mr. LAUSCHE. Mr. President, I point out one great reason why we should not act in this way, because the Senator from Arkansas says he does not want the amendment to hold up consideration of the bill. The bill is the important subject. The amendment is being attached to it as a kind of caboose to ride along with the general bill.

Mr. SMATHERS. I thought I asked for unanimous consent, when I started to offer my amendment, that the amendment of the able Senator from Maryland be laid aside in order that my amendment might be considered. The Senator from Maryland was gracious enough to extend that courtesy to me, and it was my understanding that the Chair had ruled on my request. I do not propose to delay the matter any longer. If we can get a vote on it, that is perfectly agreeable.

The PRESIDING OFFICER. The Chair did not understand the Senator from Florida to ask unanimous consent that that be done.

Mr. FULBRIGHT. Mr. President, I should like to get a vote on the amendment offered by the Senator from Maryland [Mr. BUTLER], as well as a vote on the amendment of the Senator from Florida [Mr. SMATHERS].

Mr. BUTLER. Mr. President, I ask unanimous consent to withdraw my amendment.

Mr. LAUSCHE. Mr. President, I ask for a yea-and-nay vote on the amendment of the Senator from Florida.

The PRESIDING OFFICER. The Senator from Maryland has asked unanimous consent to withdraw his amendment. Is there objection?

Mr. BUTLER. Before the Chair rules, I should like to make a parliamentary inquiry. If the amendment is withdrawn by unanimous consent, it may be offered later. Is that correct?

The PRESIDING OFFICER. Yes; it may be offered later. Without objection, the unanimous-consent request of the Senator from Maryland is agreed to.

Mr. SMATHERS. Mr. President, in order to bring this matter to a head, I send to the desk my amendment and ask that it be read.

The PRESIDING OFFICER (Mr. MANSFIELD in the chair). The amendment will be stated.

The LEGISLATIVE CLERK. At the end of the bill add a new chapter as follows:

CHAPTER VIII—HEMISPHERIC CENTER FOR CULTURAL AND TECHNICAL INTERCHANGE

Statement of purpose

SEC. 801. The purpose of this chapter is to promote better relations and understanding between the United States and the other nations of the Western Hemisphere (hereinafter referred to as "the hemisphere") through cooperative study and research, by establishing in Puerto Rico a hemispheric center for cultural and technical interchange, either as a branch of an existing institution of higher learning or as a separate institution, where scholars and students, in various fields from the nations of the hemisphere may meet, study, exchange ideas and views, and conduct other activities primarily in support of the objectives of the United States Information and Educational Exchange Act of 1948, as amended, and title III of chapter II of the Mutual Security Act of 1954 and other Acts promoting the international educational, cultural, and related activities of the United States.

Establishment of center

SEC. 802. In order to carry out the purposes of this chapter the Secretary of State (hereinafter referred to as "Secretary"), after consultation with appropriate public and private authorities, shall, on or before January 3, 1961, prepare and submit to the Congress a plan and program for—

(1) the establishment and operation in Puerto Rico of an educational institution to be known as the hemispheric center for cultural and technical interchange through arrangements to be made with public, educational, or other nonprofit institutions;

(2) grants, fellowships, and other payments to outstanding scholars and authorities from the nations of the hemisphere as may be necessary to attract such scholars and authorities to the center.

(3) grants, scholarships, and other payments to qualified candidates from the nations of the hemisphere as may be necessary to enable such students to engage in study at the center; and

(4) making the facilities of the center available for study to other qualified persons on reasonable basis.

Authorization of appropriations

SEC. 803. There are authorized to be appropriated, to remain available until expended, such amounts as may be necessary to carry out the provisions of this chapter.

Mr. LAUSCHE. Mr. President, I wish to point out to my colleagues that the amendments as drawn directs the Secretary of State to prepare and submit to Congress a plan and program, first, for the establishment and operation in Puerto Rico of an educational institution; second, a plan for establishing grants and fellowships to scholars and authorities from other nations; third, that he shall prepare a plan for grants and scholarships for students.

This does not envision a study. It tells the Secretary of State to set up a plan and get it before Congress for action. This is an example of how improper it is to proceed in this hasty way to get legislation passed.

Mr. DIRKSEN. Mr. President, will the Senator yield?

Mr. LAUSCHE. I yield.

Mr. DIRKSEN. This directs the Secretary of State to do it. In one section the word is "shall," and the last section of the bill is an authorization for an appropriation. This is not provision for a study at all. I got the idea that it was only for a study. This is identical with what we have done. It authorizes an appropriation.

I move to recommit the proposal to the Committee on Foreign Relations.

Mr. SMATHERS. This is exactly the same idea that we had in the bill last year.

The PRESIDING OFFICER. It is the understanding of the Chair that it would not be proper to offer a motion to recommit an amendment being offered to the bill.

Mr. DIRKSEN. I withdraw my motion.

Mr. SMATHERS. Mr. President, will the Senator from Ohio yield?

Mr. LAUSCHE. I yield.

Mr. SMATHERS. In preparing the amendment we took the identical language and attempted to follow as closely as was humanly possible the procedures that were followed last year in calling for the study with respect to the cultural center between East and West in Hawaii. The language in the pending amendment is exactly the same.

Mr. President, I modify my amendment by striking out the reference to the request for an appropriation.

The PRESIDING OFFICER. The Senator has a right to modify his amendment. There is no objection.

Mr. LAUSCHE. Mr. President, if an objection will stop the Senator from modifying his amendment——

The PRESIDING OFFICER. No. The Senator has a right to modify his amendment, any objection notwithstanding.

Mr. SMATHERS. As I understand, the vote will now come on the question whether a study should be made by the Department. By this vote, we authorize the State Department to make a study as to whether a cultural center should be established in Puerto Rico to foster better relations between Puerto Rico and the United States.

Mr. LAUSCHE. Mr. President, I ask for the yeas and nays on the proposal of the Senator from Florida.

The yeas and nays were not ordered.

Mr. JOHNSON of Texas. Mr. President——

Mr. LAUSCHE. I suggest the absence of a quorum.

Mr. JOHNSON of Texas. Mr. President, I suggest to the Senator from Illinois and the Senator from Florida that the authorization of the appropriation provided in section 803 of the amendment be stricken. That language now reads:

There is authorized to be appropriated, to remain available until expended, such amounts as may be necessary to carry out the provisions of this chapter.

In view of the concern which arises from that language, to the effect that it may perhaps authorize money to be appropriated for a center which has not yet been created, I suggest that in section 802, line 4, the word "shall" be stricken, and the word "may" inserted in lieu thereof. The Secretary would then be authorized to make a study, but it would not be compulsory upon him to do so.

Mr. SMATHERS. Mr. President, I so modify my amendment.

Mr. JOHNSON of Texas. As I understand, the amendment as now modified provides, in effect, that the Secretary of State, after consultation with the appropriate public and private authorities, may, on or before January 3, 1961, prepare and submit to Congress a plan which Congress may then consider.

I submit that the language in last year's bill in connection with the East-West Institute went even further than the language now proposed goes, and that there is no authorization for any such center in the amendment as modified.

Mr. LAUSCHE. What is the language of the bill now?

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I will yield to the Senator from Ohio in a moment. I yield first to the Senator from Vermont.

Under the language of the amendment as modified, Congress, in effect, says to the Secretary of State, "Please submit to us on or before January 3, 1961, a plan or a program for a North-South Cultural Center, similar to the East-West Cultural Center, on which we have just acted."

Then Congress in its wisdom can act as it sees fit.

Mr. LAUSCHE. The Senator has not answered my question.

Mr. JOHNSON of Texas. I yield to the Senator from Vermont.

Mr. AIKEN. Does the amendment as modified provide for the authorization of funds adequate to make a study?

Mr. JOHNSON of Texas. I would assume that the State Department has such funds available.

Mr. AIKEN. Would the majority leader also assume that by changing "shall" to "may" we are not inferring that we do not care whether a study is made or not?

Mr. JOHNSON of Texas. Not in the slightest. I think we give the Secretary discretion in the matter. I have no doubt that when Congress makes a request in the form of an amendment of this kind, the Secretary of State will be cooperative in the matter.

The minority leader raised a question. In attempting to meet his objection, I felt it would be the better part of wisdom not to make the provision mandatory upon the Secretary of State; but I have no doubt that he will make the study which we request.

Mr. AIKEN. The wording would still indicate that Congress feels it is desirable for the Secretary of State to make the study?

Mr. JOHNSON of Texas. I think it would.

I now yield to the Senator from Ohio.

Mr. LAUSCHE. The Senator from Texas used general language in describing the general meaning of the bill. I should like to know what language will be in the bill. I will then determine for myself what it means.

Mr. JOHNSON of Texas. I will read the language to the Senator:

> In order to carry out the purposes of this chapter, the Secretary of State (hereinafter referred to as "the Secretary"), after consultation with appropriate public and private authorities, may—

Mr. LAUSCHE. That is the change? The word "may" is substituted for "shall"?

Mr. JOHNSON of Texas. The Senator is correct. I continue:

> on or before January 3, 1961, prepare and submit to the Congress a plan and a program—

Then there is spelled out the request of Congress.

Then there is the following:

> AUTHORIZATION OF APPROPRIATIONS
>
> SEC. 803. There are authorized to be appropriated, to remain available until expended, such amounts as may be necessary to carry out the provisions of this chapter.

I know it is the intention of the Senator from Florida to authorize an appropriation only for a study, but the minority leader felt the language might authorize an appropriation for the Center, and that is not the intention of the Senator from Florida. So the Senator from Florida has modified his amendment by striking out that entire section, and now there is no authorization for an appropriation.

If the Department has funds available, the Secretary of State may, after consultation with appropriate public and private authorities, prepare and submit to Congress a plan and a program.

Is there anything else the Senator from Ohio would like to have me state?

Mr. LAUSCHE. No. I shall suggest the absence of a quorum, and then ask for a yea and nay vote on the amendment.

Mr. JOHNSON of Texas. I will not yield for that purpose now if some other Senator wishes to ask a question. If not, and if the Senator from Ohio desires the yeas and nays on the amendment, I will be glad to ask for the yeas and nays and have a vote on the amendment now.

Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified, offered by the Senator from Florida [Mr. SMATHERS]. The yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD. I announce that the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ], the Senator from Nevada [Mr. BIBLE], the Senator from West Virginia [Mr. BYRD], the Senators from Virginia [Mr. BYRD and Mr. ROBERTSON], the Senator from Colorado [Mr. CARROLL], the Senator from Pennsylvania [Mr. CLARK], the Senator from Mississippi [Mr. EASTLAND], the Senator from Rhode Island [Mr. GREEN], the Senator from North Carolina [Mr. JORDAN], the Senator from Oklahoma [Mr. KERR], the Senator from Louisiana [Mr. LONG], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

I further announce that the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

I further announce that, if present and voting, the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ], the Senator from Nevada [Mr. BIBLE], the Senator from West Virginia [Mr. BYRD], the Senator from Colorado [Mr. CARROLL], the Senator from Pennsylvania [Mr. CLARK], the Senator from Rhode Island [Mr. GREEN], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Oklahoma [Mr KERR], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Missouri [Mr. SYMINGTON], and the Senator from Ohio [Mr. YOUNG] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BEALL] is necessarily absent.

The Senator from New York [Mr. JAVITS] is absent by leave of the Senate, to attend, as Chairman of the Economic Committee, a meeting of the NATO Parliamentarians Conference, at Strasbourg, France.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are absent on official business, as members of the Board of Visitors of the U.S. Military Academy.

The Senator from New Jersey [Mr. CASE] is detained on official business. If present and voting the Senator from New York [Mr. JAVITS] would vote "yea."

On this vote, the Senator from New Jersey [Mr. CASE] is paired with the Senator from Nebraska [Mr. HRUSKA]. If present and voting, the Senator from New Jersey would vote "yea," and the Senator from Nebraska would vote "nay."

The result was announced—yeas 71, nays 5, as follows:

[No. 168]

YEAS—71

Aiken	Gruening	Morse
Allott	Hart	Morton
Bartlett	Hartke	Moss
Bennett	Hayden	Mundt
Bridges	Hennings	Murray
Brunsdale	Hickenlooper	Muskie
Bush	Hill	Pastore
Butler	Holland	Prouty
Cannon	Jackson	Proxmire
Capehart	Johnson, Tex.	Randolph
Carlson	Johnston, S.C.	Russell
Case, S. Dak.	Keating	Saltonstall
Church	Kefauver	Schoeppel
Cooper	Kuchel	Scott
Dirksen	Long, Hawaii	Smathers
Dodd	Lusk	Smith
Douglas	McCarthy	Stennis
Dworshak	McClellan	Talmadge
Engle	McGee	Thurmond
Ervin	McNamara	Wiley
Fong	Magnuson	Williams, N.J.
Frear	Mansfield	Yarborough
Fulbright	Martin	Young, N. Dak.
Goldwater	Monroney	

NAYS—5

Curtis	Gore	Williams, Del.
Ellender	Lausche	

NOT VOTING—24

Anderson	Clark	Kennedy
Beall	Cotton	Kerr
Bible	Eastland	Long, La.
Byrd, Va.	Green	O'Mahoney
Byrd, W. Va.	Hruska	Robertson
Carroll	Humphrey	Sparkman
Case, N.J.	Javits	Symington
Chavez	Jordan	Young, Ohio

So Mr. SMATHERS' amendment was agreed to.

Mr. JOHNSON of Texas. Mr. President, I move to reconsider the vote by which the amendment was adopted.

Mr. MANSFIELD. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER (Mr. HOLLAND in the chair). The question is on agreeing to the motion of the Senator from Montana to lay on the table the motion of the Senator from Texas to reconsider.

The motion to lay on the table was agreed to.

Mr. JOHNSON of Texas. Mr. President, I yield to the Senator from Maryland, who has been extremely courteous, as he always is.

Mr. BUTLER. Mr. President, I reoffer my amendment to strike out, on page 17, line 2, beginning with the semicolon and the word "and," all the language down to and including the word "purposes" on line 8; and I ask for the yeas and nays.

The yeas and nays were ordered.

JOINT MEETING OF THE TWO HOUSES—ADDRESS BY KING MAHENDRA OF NEPAL

Mr. JOHNSON of Texas. Mr. President, the other body has notified us that they desire our presence as soon as possible. They are hopeful we can be in the other Chamber at 12:20 p.m. I do not want to ask any Members of the Senate to withhold any insertions or statements, but unless there is an emergency matter which needs to be acted upon now, I would like to ask consent that the Senate stand in recess until the call of the Chair.

Mr. President, I ask unanimous consent that the Senate stand in recess, subject to the call of the Chair, and I ask Senators to gather at the rear of the Chamber.

There being no objection, at 12 o'clock and 17 minutes p.m., the Senate, preceded by the Sergeant at Arms, Joseph C. Duke, and the Chief Clerk, Emery L. Frazier, and the Vice President proceeded to the Hall of the House of Representatives for the purpose of attending the joint meeting to hear the address to be delivered by King Mahendra of Nepal.

(For the address delivered by the King of Nepal, see House proceedings of today.)

RESUMPTION OF LEGISLATIVE SESSION

The Senate returned to its Chamber at 1 o'clock and 17 minutes p.m. and reassembled when called to order by Mr. HOLLAND.

RETIREMENT OF SENATOR MURRAY, OF MONTANA

Mr. MANSFIELD. Mr. President, it falls to me to announce to the Senate that the distinguished senior Senator from Montana [Mr. MURRAY], my partner and colleague of many years standing, has decided not to seek reelection. May I say that he has done his share and more for the Nation and for the State of Montana, having served more than a quarter of a century in this body—longer than any other in the history of our State. He has earned the right to lighten his burdens of public service, if that is his wish, and it is not for me to presume to deplore his decision.

Nevertheless, I cannot make this announcement of his impending retirement without also noting my deep personal regret when I contemplate the fact that the senior Senator from Montana will not be in his accustomed seat as the next Congress convenes. I will feel his absence in a very personal way. We have been inseparably associated in representing the State of Montana ever since I came to Congress 18 years ago, and particularly in the past 8 years during which I have been in the Senate. For almost two decades we have worked together with the cordiality and cooperation of friends. We have worked together with that full measure of agreement of men trying to do the best they are able to do for the Nation and for their State.

I have learned much from the senior Senator from Montana, in these years of association, something of the meaning of dedication to the public welfare. He did not spare himself. His dedication has been complete and unequivocal. He has served in keeping with the finest traditions of the Senate.

He succeeded a great Senator, Thomas J. Walsh, a man of enormous stature and capability. Nevertheless, he has added his own dimension to the office of senior Senator from Montana. He has fought the good fight many times over, sometimes against great odds and at great personal cost, to bring about a greater equalization of opportunity as among all the States and all the people of the United States. The people of Montana have known the measure of this man, and in choosing him again and again to represent them through five terms in the Senate they have paid their tribute to his greatness.

I shall miss the presence of the senior Senator from Montana. In my heart, I shall hold him as the senior Senator as long as I live. The Senate and the Nation, too, will miss him. But even as he leaves us for a well-earned rest, he will leave with us a bright and unforgettable remembrance. That remembrance will light the path of fruitful public service for others to come, as it has for me, and even as each of us must strive to do in turn.

May I say to my friend and colleague that you have not only been a great Senator but, perhaps more important, a wise, a tolerant, an understanding, and a fine gentleman.

As a mentor and teacher to me, you have furnished an example of unselfishness and dedication to duty that I will always cherish and remember. Your friendship has been inspirational and to you I owe a debt of gratitude I will never be able to repay.

Mr. President, I wish to read to the Senate at this time the news release from the office of the senior Senator of the State of Montana:

> In response to the repeated urgings of members of my family, I have decided to withdraw my petition for renomination to the Senate and have asked Montana's secretary of state to remove my name from the ballot.
>
> My sons have persuaded me that in my 25 years of active service in the U.S. Senate, I have amply discharged my obligations to my State and to my fellow Montanans and that I have won the right to spend by remaining years in less arduous pursuits.
>
> To all my friends in Montana who have supported me these many years and who, I know, would have reelected me had I remained in the campaign, I extend my warm thanks. I promise them in my capacity as a private citizen I shall continue to support programs for the conservation of Montana's resources and the upbuilding of its industries. I shall always be proud of the confidence placed in me by the people of Montana who elected me in five consecutive elections to a seat in the U.S. Senate. I have striven to deserve that confidence and it is my hope that the record I have made here is one in which Montana can take pride.

I will say to my distinguished colleague, the people of Montana and of the Nation all take great pride in your record of outstanding accomplishments over the last 25 years. I know I speak for all of them when I say we are sorry you have made this decision, but we anticipate your contributions will be many in the future.

Mr. JOHNSON of Texas. Mr. President, it was with a feeling of deep regret that I heard the announcement made by the junior Senator from Montana [Mr. MANSFIELD] concerning the decision of the senior Senator from Montana [Mr. MURRAY] to retire from the Senate at the end of this term. My feeling of regret is tinged with deep pride over the memories of his long and distinguished career. This is a pride which is shared by every Member of the Senate on both sides of the aisle.

Mr. President, JIM MURRAY is a man as rugged as the mountains of Montana. He has the breadth and the vision of the great West. His eyes are fixed now, as they have always been, on the stars. He has devoted a lifetime to serving his people, and those good people have reciprocated his devotion with affection and with constant support.

JIM MURRAY's name always will be associated with the State of Montana—always will be associated with the development and the expansion of the West.

JIM MURRAY has fought the good fight. He has fought it for the conservation of our resources. He has fought it for the prosperity and the happiness and the peace of all our people. He has always been at the head of the line in any fight for greater rights for the underdog.

Mr. President, JIM MURRAY has always fought with courage, which has gained him the respect of friend and foe alike. We know that he will continue to seek

the goals in which he believes. He may become a private citizen in the sense that he is retiring from the Senate, but he will always belong to the people of this country, whom he has served.

Mr. President, during the 12 years I have been in this body I have known no Senator who has given me greater cooperation or who has been more constantly devoted to the interests of all America. JIM MURRAY is a fearless man. JIM MURRAY is a great humanitarian. JIM MURRAY is a genuine liberal.

Mr. President, as I have said, it was with a heavy heart that I learned of this decision, but as long as I live I shall always remember the kindness, the gentleness, the wisdom which this great man has contributed to me and to the body in which we serve together.

Mr. DIRKSEN. Mr. President, in these delightful associations we have in the Senate Chamber there are characteristics which have different appeals to different people.

JIM, I want to make this a little personal today. As these school youngsters come to talk to us a little bit, they ask, "How long do you work? What are the hours of work of a Senator?" My answer is that a Senator has no hours, for he has no boss. A Senator works according to the inclination and the impulses of the spirit.

I want to say to you, JIM, that you have certainly, in my judgment, been one of the most diligent of public servants I have ever encountered. You have devoted yourself with great fidelity to all the tasks that have fallen to your lot as you saw them, serving your country and your State in a most noble fashion. Your diligence has always appealed to me.

Secondly, I found great appeal in your consistency. When Henry Steagall was chairman of the House Committee on Banking and Currency he once said to me, as a Member of the House, that the most consistent man he knew in public life was William Jennings Bryan. As I think back, I believe that was probably true.

I believe the senior Senator from Montana has been one of the most consistent persons I know. We often misquote Emerson when we talk about consistency being the hobgoblin of small minds. What Emerson really referred to was a foolish consistency.

The senior Senator from Montana has been a consistent person. I have not always agreed with him, but I have paid him great tribute because of the fact that he saw before him a principle and a path of duty marked out, and, without quailing, without shirking, he has walked nobly in the path of duty.

Finally, I pay tribute to his understanding heart. Solomon said to the Lord when he was called to rule over Israel, "Give therefore Thy servant an understanding heart." That is one of the greatest things that can come to a man.

The senior Senator from Montana will remember that it was once one of my political duties to go out and campaign against him in Montana. When I came to Miles City, Billings, and other places I found literature that was highly offensive, and I quickly made a point of it. I said I thought it was a terrible thing that literature of that kind should emanate from my side of the political fence, in an effort to demean the Senator from Montana and indicate certain things that were in derogation of both his character and the duty he had performed here. I eschewed it at once, and did so both publicly and privately.

I remember one occasion when we had dinner together in Miami. The Senator from Montana shook hands with me, and said, "You are a gentleman." I say that the senior Senator from Montana is a gentleman with an understanding heart. He is a dedicated and diligent person, and consistent as he sees his duty.

We shall miss him sorely in this body. We salute him as he continues to manifest a deep, durable, and abiding interest in those causes which he thinks are conducive to the welfare of his fellow men.

Hail to the senior Senator from Montana.

Mr. RUSSELL. Mr. President, it is difficult for me to realize that a full quarter of a century has passed into history since JAMES E. MURRAY came to the Senate. I believe there are only four present Members of the Senate who were here at the time Senator MURRAY entered the Senate. They are the senior Senator from Arizona [Mr. HAYDEN], the senior Senator from Virginia [Mr. BYRD], the senior Senator from Wyoming [Mr. O'MAHONEY], and myself.

It has been my high privilege, a privilege that I shall cherish as long as I live, to have been intimately acquainted with this great American over a period of 25 years. His colleague [Mr. MANSFIELD] said truly that in this body and in the highest councils of the Nation during periods of great distress, when our institutions of government were under trial, he did his share, and more than his share, in contributing to the upbuilding and preservation of our common country.

Senator MURRAY has a wide variety of interests. Only this week he appeared before the Subcommittee on Appropriations for the Department of Agriculture, over which I am privileged to preside, and again presented his great interest in the development of research in soil and water conservation. That has been one of his interests, but he has had a wide variety of interests, and has pursued them all with intelligence and vigor over a long period of time.

Of course, he knows the problems of the West. He is a part of the history of the West, the building of the West. He has contributed much in that direction.

JIM MURRAY is national in his outlook. Indeed, he is international in his outlook. He became familiar with the problems of every other section of the country, and in his heart he found sympathy and understanding for the problems of every section of the country, including my own beloved southland.

Neither time nor the proprieties of this occasion would permit me to recount in detail the many personal recollections that flash through my mind concerning my associations with Senator MURRAY, the contributions he has made, and the constant fight he has waged in behalf of his political philosophy. He has remained constant in the faith.

I can only say that I shall greatly miss Senator MURRAY when he retires. He has abundantly earned retirement and ease, and the plaudits of his constituency and of his countrymen everywhere. However, that will not prevent those of us who have been associated with him for so long from missing him.

It is too bad that there does not exist the position of Senator Emeritus, so that men of the type of JIM MURRAY could occupy that status and be called upon for counsel in an official capacity over the years.

I can only say to my friend, whom I love and respect, that he leaves this body with every good wish that I could possibly bestow. I hope heaven will vouchsafe to him the life of happiness which his services greatly merit.

Mr. AIKEN. Mr. President, for 14 years after I became a Member of this body it was my great privilege to be associated in committee work with the senior Senator from Montana. During a part of that time he was chairman of the Committee on Labor, of which I was a member.

I have always found JIM MURRAY to be one of the most kindly and considerate men I have ever known or served with. He was always ready to help people. He was ready to do the things which might have seemed small to the public as a whole, but very large to the individual who needed help.

He has been a great representative of the State of Montana. He has been very zealous in his watchfulness over the resources of that State—its land, its forests, its mines, and its grazing. He has been a great friend of farmers, stockmen, miners, and particularly laboring people of all kinds, regardless of what kind of labor they were engaged in.

He has always been cooperative in every respect. Last week when we were favored by a visit from 24 members of the Canadian Parliament, JIM MURRAY came to one of our meetings. He was very welcome, indeed, inasmuch as he is the only Canadian-born Member of this body. The Canadian visitors certainly appreciated his taking the time to come and extend greetings to them.

I was sorry to hear the statement which was released by the senior Senator from Montana. I agree with the comment which has been made about him by the junior Senator from Montana [Mr. MANSFIELD], whom I also consider one of my best friends in this body. I share the general regrets of all Senators that JIM MURRAY has decided to retire from the Senate.

Mr. HILL. Mr. President, there come times in life when the mouth cannot speak that which the heart would utter. Such a time comes to me as I contemplate the decision of my dear friend and great colleague, Senator JAMES E. MURRAY, of Montana, that he shall retire from the Senate. The decision saddens my heart.

I have served in the Senate with JIM MURRAY for more than two decades. Through the years he has been not only my colleague, a steadfast rock of devo-

tion to public service and a constant source of wisdom and encouragement, but he has been more than that; he has been my good friend, a tried and true comrade.

In committee and on the floor of the Senate he has fought the battles to conserve the Nation's natural resources of water and soil and mineral, to develop these resources for the benefit of all the people, and to see that control of them is retained in the hands of the people. He has been in the forefront of the cause.

As a member and as former chairman of the Committee on Labor and Public Welfare, he has worked tirelessly to improve our schools, to help our teachers, to increase safety conditions for our workers, to aid our veterans, to improve conditions for our handicapped, to help the migratory worker and the unemployed, to protect the consumer, to advance the arts and sciences, and to improve and protect the health of our people.

JIM MURRAY came to Montana when the West was still raw pioneer country. In this pioneer setting there grew in him the conviction, the loyalty, the dedication to human needs and human concerns that he has carried with him through his years of service to the people of his State and of the Nation.

As his distinguished colleague, the junior Senator from Montana [Mr. MANSFIELD] has told us, JIM MURRAY was elected to the Senate in 1934, to fill the vacancy created by the death of Thomas J. Walsh, one of the great liberals of the West. In the ensuing decades he has nobly maintained Montana's heritage of liberalism. The people of Montana have expressed their appreciation and their warm affection by returning him four times to the Senate.

I have spoken of the magnificent public record which JAMES MURRAY of Montana has built during his long service in the Senate. But it is of JIM MURRAY, the man, that I wish to speak—of his integrity, his moral courage, his high honor, his devotion to public duty, his loyalty to his friends, his human warmth and love of his fellow man—in a word, his character.

Let me say to you, JIM, that you will never really leave us. As so often over the past years, so in the years to come we will turn to you for the guidance, the wise counsel, the encouragement and support with which you have always been so generous in the many great battles and the grave crises through which we have gone together. You will never leave us. You will always live in our hearts. God bless you.

Mr. KUCHEL. Mr. President, as the senior Senator from Montana retires this year from membership in the Senate of the United States, he will take away with him the friendship of every one of his colleagues, and their good wishes for many years of health and happiness in the years ahead. He will take with him more than simple friendship. He will take with him the prideful recollections of his participation in many great and thrilling accomplishments, in some of which he played a leading role.

There are four Members of the Senate who represent two great new States in the flag of our country. They sit here, if I may say so, in great part because of the courage and the enthusiasm by which the senior Senator from Montana, undaunted by temporary setbacks, continued to push for statehood for Alaska and statehood for Hawaii.

May I speak as a Californian? With my colleague, I am proud of the State where I was born. I come from a part of the semiarid West. Today I may in all truth say that 16 million Americans who live in my State of California can be truly grateful for the manner in which the Government of our country, in discharging its constitutional responsibility, has extended a helping hand to them in the conservation of their natural resources and in the fulfillment of reclamation projects which have made life possible in my State and in all the States of the West as well. Had it not been for the unyielding faith of JIM MURRAY in doing what could be done to advance the cause of reclamation in western America, as a member and as chairman of the Committee on Interior and Insular Affairs, I suggest that we would not have the thriving, viable economy which we enjoy in his area of the country and in mine today.

For 8 years I have had an opportunity to serve on the Committee on Interior and Insular Affairs. I say, as you leave the Senate, JIM MURRAY, I have a profound gratitude for the many acts of courtesy and kindness and generosity you have visited upon all of us, and I include myself as a Member from the minority side of the aisle.

I repeat, as I close, that you take with you, JIM MURRAY, into what we hope and pray will be happy and healthful years of retirement, the fondness of every one of us over here on this side of the aisle.

Mr. HOLLAND. Mr. President, I join my distinguished colleague from California, coming as I do from Florida—the other great State to the southward that shares many of the same feelings and aspirations and assets that are found in California—in speaking my adulation and praise and in recording the affection I feel and the very deep respect I entertain for Senator MURRAY, of Montana.

I have not been in the Senate as long as some of my colleagues. I am now in my 14th year. I wish to say for the record that one of the first Senators to welcome me with kindness and hospitality when I came here nearly 14 years ago was JIM MURRAY. There was no special reason for it except that he felt that way. I come from a State which is far removed from his, and with problems much different from those of his State, and we both knew that he is one of the greatest and most sincere liberals of all time while I make no claim for inclusion in that group, since I am a conservative Jeffersonian Democrat. Nevertheless, he went out of his way to greet me with all possible courtesy, kindness, and hospitality. Our first meeting, so far as I am concerned, has grown into very deep affection.

Senator MURRAY has frequently given the kindest of consideration to claims from my State for the advancement of such causes as a great national park; better care of the Seminole Indians, long neglected in my State; and other problems too numerous to mention.

I shall simply speak of two events that I shall always recall whenever the name of JIM MURRAY is mentioned. One of them occurred on the convention floor in the great city of Chicago in 1952. An effort was being made by some very zealous and wholehearted members of my party, whose sincerity I do not question for a moment, to place some of the delegates from my section of the country in a position which, I thought, would handicap them greatly and would handicap our party greatly in the election which lay ahead.

I recall that when a standing vote was called for, I was one of those on the platform who had been arguing as vigorously as I could for the cause in which I believed, even though many of my dear friends believed in the opposite. I remember that I clearly saw that in the Montana delegation there was one tall form who rose to vote his conviction that coercion and compulsion would get us nowhere, and that we had to find some way of keeping together the members of our party from all parts of the Nation.

I have no feeling other than kindness for the other members of that delegation, but I shall never forget that Senator MURRAY was the sole member of the delegation representing his great State who stood up where all could see to show his belief that there was soundness in the cause which we of the South were presenting, and that it merited his approval.

The other thing I shall always recall is a great meeting of the members of our party in Florida at the city of Miami. We asked JIM MURRAY, as one whose views were generally more liberal than the average views of the people of our State, to come down and appear before various panels and to expound the philosophy which is so dear to him, and which he has lived up to so sincerely throughout his whole membership in the U.S. Senate.

I shall never forget the gentle, conciliatory, effective, splendid way in which he announced to a large group of listeners the principles in which he believed. He spoke to people who, in some matters, were of his same philosophy, but who, he knew, frequently could not go so far in the direction of liberality as he saw it and as he himself has gone so sturdily.

JIM MURRAY is a man who has been willing to stand up for his beliefs, and he has done so in many, many other instances. I relate for the record only these two.

I feel the deepest affection and the most sincere respect possible for my very dear friend, the senior Senator from Montana.

He knows he has always been welcome in our State, and has always been revered by many thousands of our people, regardless of party. We shall always have such feelings toward him, and we shall always hope that he will come back again and again to find there the evidence of the appreciation which our people so genuinely and so lastingly feel toward him for the great service he has rendered our country.

Mr. JACKSON. Mr. President, I should like to supplement the remarks of the able senior Senator from Florida.

JIM MURRAY has always been a kindly, tolerant, and understanding man. As one who has served with him for 8 years on the Committee on Interior and Insular Affairs, and has served under his able leadership, I know whereof I speak. It can be said that he has been, indeed, during his long career in the Senate, a guardian of the Nation's great human and material resources. In performing the role of a guardian, he has been fair, just, and sympathetic with the concerns of others.

We in the State of Washington have a great fondness for JIM MURRAY. In many ways, we consider him our truly good neighbor. From time to time he has spent many months in our State. He has had substantial business interests in the State of Washingtor over the years.

I know I can say on behalf of the people of my State that we will miss JIM MURRAY's distinguished service in this body. We shall, however, look forward to the opportunity, as a close neighbor, to see him from time to time and to have the benefit of his advice and counsel.

I extend to JIM MURRAY my sincere wishes for many years of happiness. The record he has made in this body constitutes a high goal toward which we can strive.

Mr. YARBOROUGH. Mr. President, in rising to say some words of thanks to JIM MURRAY for what he has meant to me, I do not speak as one having long years of experience in the Senate, but as one who has been inspired by the example of the distinguished senior Senator from Montana for many years before I came to the Senate. Inspiration has come from the example he has set.

While I have been a Member of the Senate only 3 years, I served with the distinguished Senator from Montana on one committee, the Committee on Labor and Public Welfare, before which comes much proposed legislation for the benefit of the people of the United States. In my experience I have never seen a measure come before that committee or before this body when JIM MURRAY did not put the welfare of the people above the forces which always seek to enlarge themselves at the expense of the people. JIM MURRAY has always stood on the side of the people.

In the years before I came to the Senate I observed his record in Montana, from a vantage point in my home State.

Mr. President, there are many reasons why men give up the ease of private life to seek public life. Seeking public office is always difficult of fulfillment, but to fulfill one's duties after he has entered public life is even more difficult. JIM MURRAY's example is one of the reasons I gave up private life.

The work which is done by the senior Members of this body serves to inspire the younger Members of the Senate to fight with them for the benefit of the people. JIM MURRAY is that kind of man. The example of his life is an inspiration to people all over the Nation. It causes people all over the Nation to have greater confidence in the U.S. Senate. It causes many young men to desire to serve in this body, to hope to render some measure of that type of service which the senior Senator from Montana has so nobly rendered.

My State has long had a feeling of kinship with Montana. It began in the days when the first herds of longhorns were driven up from my home State on the Rio Grande, up into Montana, which borders on Canada. Some of the men who drove the herds northward from Texas stayed in the North; others drifted back to Texas, bringing with them stories of that wonderful land in the North. They caused routes of migration from South to North, though the usual route of migration in America was from East to West.

As the returning cowboys brought back to Texas the stories of that great North country, they first passed the stories along by word of mouth. Later Charley Russell painted the story of Montana and the West in words and pictures. And when we read those picture books of Charley Russell's Montana, we began to really conceive of what kind of country the cowboys from the Southwest talked of. So the people of my State have watched Montana and its people with a closer interest than that of the people of many of the other States of the Union.

As we examine the list of approximately 1,600 Senators who have served this Nation, we realize that Montana has furnished four whose names loom large in the history of our country: Thomas J. Walsh, Jim Murray, Burton K. Wheeler, and our own distinguished majority whip, Mike Mansfield. But, Mr. President, the name of none of them will exceed in the pages of history the name of JIM MURRAY.

In his retirement, a committee chairmanship will change, for JIM MURRAY is chairman of the Interior and Insular Affairs Committee. When we hear of the exercise of power, however, we never hear of JIM MURRAY throwing his weight around, or anyone talk of MURRAY using his authority in any harsh manner. He has distinguished his service as the chairman of that committee, not by any oppressive exercise of power, but by the good he has done and by the steady flow of good legislation from that committee for the benefit of all the people of the Nation.

For years, I heard of Senator MURRAY from a very good friend of mine, now passed away, Adolphus Ragan, who went up the trail from Texas, and lived in Montana. He knew Burton K. Wheeler, Thomas J. Walsh, and Jim Murray, and, during the winters, when he would return home, would tell us of the great leaders that Montana had developed in the Democratic Party, in the Senate of the United States, and in the Nation.

In the fight that JIM MURRAY has made for clean politics in this State, against great forces that were arrayed against him, through all types of unfair campaigns against him he has triumphed, and has given us an example not only in the best traditions of the West, but also in the best traditions of the Senate and the American people. He has rendered outstanding service that has ennobled this body and has helped the Senate maintain its great traditions in the hearts and the minds of the American people.

Mr. President, on behalf of the people of my State, I thank Senator MURRAY not only for the many important bills he has helped enact, and not only for the great good he has done in connection with the enactment of beneficial, forward-looking and progressive legislation, but, more than all that, for the things of the spirit, for the kind of temperament he has brought here, for the kind of halo he has placed on the Senate, for his honesty, integrity, and fair and square dealing throughout his service in the Senate. He will be remembered by the people of my State for his outstanding fairness to all persons who have appeared before any of the committees on which he has served.

Mr. PROUTY. Mr. President, as one who is in only his second year of service in the Senate, I have had only a relatively brief acquaintanceship with the distinguished senior Senator from Montana [Mr. MURRAY]; but I do know a great deal about his record of public service, which began some 50-odd years ago, in Montana.

Senator MURRAY first achieved national prominence during his tenure as a Member of the Senate Committee on Labor and Public Welfare. His leadership there and his activities on that committee are responsible in no small way for many social gains which have been achieved in this country.

As all of us know, Senator MURRAY later moved to the chairmanship of the Senate Committee on Interior and Insular Affairs, so that he could keep his watchful eye on the great American heritage of bountiful natural resources. It has ever been his aim to prevent their despoliation.

Mr. President, I join all my colleagues in extending to Senator MURRAY my best regards and best wishes for the future.

Mr. FULBRIGHT. Mr. President, I deeply regret the announcement by the distinguished Senator from Montana [Mr. MURRAY] that he will not return here.

Senator MURRAY came to the Senate before I began my 16 years of service here. During that period he has been one of the foremost supporters of what I regard as some of the most important measures in the Congress.

As a person, I do not think anyone could excel Senator MURRAY, of Montana, in the great attributes for which he has been praised in the course of the many tributes which my colleagues have paid to him today. Senator MURRAY is a man of great integrity, enlightenment, and foresight.

Two of the particular areas in which Senator MURRAY's service has been of outstanding importance are areas in which the people of my State, including myself, are especially interested; so I express my great gratitude to Senator MURRAY for all he has done in the field of the conservation of natural resources and the

improvement of human resources and in the field of flood control and power development.

JIM MURRAY's leadership in the field of conservation has been of special importance to my State. The great developments there in the field of flood control and power development are among the most important activities of the Federal Government; and I do not know of anyone who has contributed more in those respects than has Senator MURRAY.

Mr. President, another field of the greatest importance is education. In Senator MURRAY's leadership in this field, and also in his collaboration with the Senator from Alabama [Mr. HILL] and other leading Senators, the Senator from Montana has been a great power for good.

I deeply share the feelings of regret which my colleagues have expressed here today, following the news that Senator MURRAY has found it necessary not to seek re-election. Of course I know that this time must come to all of us.

Following Senator MURRAY's announcement, I know that all of us feel more than ever the need for experience on the part of Members of the Senate, and recognize the great contributions which the Members of the Senate who have had much experience here have made to our work while we have been in the Senate.

I wish Senator MURRAY well, and I hope that he has ahead of him many years of good health and great happiness.

Mr. ALLOTT. Mr. President, in this, my first term of office in the U.S. Senate, I have had an opportunity to serve with Senator MURRAY, first for 4 years on the Senate Committee on Labor and Public Welfare, and then, also for 4 years, as a member of the Committee on Interior and Insular Affairs, of which Senator MURRAY has been a most capable chairman.

I regret very much to learn of Senator MURRAY's decision not to seek reelection. Yet I am not unmindful, either, of the great toll that conscientious work in the Senate takes of any Senator. No one can in any way blame Senator MURRAY for feeling that at this time he must pay some attention to his family and to his own life, and that after all these years of service he is entitled to a life of some peace and comfort, without the great burden of work which must be borne by one who serves in the Senate.

All of us who live in the West have, I believe, a very particular common bond of interest. Perhaps it is necessary for one to be of the great mountains and of the great plains, in order to understand exactly the problems which all of us have in common.

I shall always remember Senator MURRAY as the chairman of my committee who has constantly and continually fostered legislation having for its purpose, not only reclamation, but also conservation in all its forms. In that respect I speak of conservation in its most important forms, not only the conservation of our minerals and our timberlands, but, even more important, the conservation of our very land itself. In all of these activities, Senator MURRAY, our great chairman, has always led the way.

I am also particularly thankful to him because of his great work in trying to save, perpetuate, and recreate in this country our minerals industry, in which the West, in particular, has a very great interest. I am sure that because of what he has done, those who will come after him will carry the flag a little bit further on, so that eventually the minerals industry of our Nation will be saved, and so that in the field of the development of our minerals, in the field of conservation, and in the field of water, there will be great and important developments from which the entire Nation will benefit.

Mr. President, we shall greatly miss Senator MURRAY. I, for one, am very happy to have had this opportunity to serve with him on the Committee on Interior and Insular Affairs.

Mr. BARTLETT. Mr. President, the decision was his, and his alone, to make, and he has made it. However, other Senators have a right to make decisions in connection with the announced retirement of the senior Senator from Montana, and it is apparent that those decisions are unanimous decisions.

We are unanimous in our regret that the public services of this dedicated man will no longer be available to the Nation. We are unanimous in our regret that our close personal associations will be less close. We are unanimous also in saying that no man has more richly earned retirement.

JIM, the majority leader used the word "consistent" in speaking, a while ago, and that was a good word to apply to you, because you have been always consistent in your devotion to the principles which you embraced so long ago. You have been as solid as the rocks of your Montana mountains.

Hundreds of thousands of people, perhaps more, are living in the West now who would not have been there had it not been for legislation you piloted to a successful conclusion; and those in the West lead better lives, more comfortable lives because of what you have done.

Your ideals and ideas have always been progressive and forward looking, and this Nation owes you a great debt. You have always worked for your Montana, but you have worked also, always, for the entire West, and for the entire Nation.

The junior Senator for Texas [Mr. YARBOROUGH] spoke about the benefits which have come to his State because of you; and I will say that my State might not be a State at all if it had not been for your work and your help in the cause of Alaska statehood.

I can recall when I first came to Washington in 1945, as a Delegate in Congress from Alaska, you were for Alaska statehood, and you were a leader in the strong struggle, until success crowned our efforts.

I know all Alaskans would want to join me when I express the hope that the years ahead for you will be many and happy.

Mr. McNAMARA. Mr. President, I join with my colleagues in the Senate in paying tribute to this great American, the senior Senator from Montana [Mr. MURRAY], who has announced now that he will not seek reelection to this body. It was certainly with mixed emotions that I received the news today. JIM MURRAY, after a lifetime of service to the people who need help the most, is not to seek reelection.

Long before I came to the Senate, which has been comparatively recent, I knew JIM MURRAY very well. I knew that he was carrying on the fight for the needy, for the underdog, throughout this great Nation of ours.

Perhaps he is best known in connection with the Wagner-Murray-Dingell bill, which he sponsored, and which was not too popular back in 1943. He took much abuse in subsequent campaigns from people who opposed the Government's doing something for the needy of the Nation. But, Mr. President, many of the proposals that were advocated in 1943 by Senator MURRAY in that bill have since become law. Some of the programs he advocated at that time many of us are very proud of now—the hospital construction program, as advocated to the Nation under that proposed legislation; public health centers; nursing education; rehabilitation. These were all parts of the Wagner-Murray-Dingell bill. These are all good for America. The people all owe a great debt of thanks to Senator MURRAY for his leadership in this field.

We are on the threshold, I may say, of another proposal advocated by this great American in 1943 as a part of that bill—health insurance for elderly citizens. We have not accomplished that goal yet, but it was a part of the plan.

I have been privileged to follow in Senator MURRAY's footsteps, in some small degree, because I have been a member of the Labor and Public Welfare Committee, which he has served for so long.

I think many of us overlook the fact that these great contributions grew out of the early efforts of JIM MURRAY, and these were all programs that were needed by people who do not have spokesmen in great numbers in many legislative halls. JIM MURRAY has stood up for thousands of unpopular causes. He has fought losing fights time and time again. But he stood up long enough to win them, too, and to see many of his proposals become law and of great benefit to the Nation.

More recently, I may say, Senator MURRAY sponsored the Murray-Metcalf Federal-aid-to-education bill. The U.S. Senate has already passed the Federal-aid-to-education bill. Let it be said for the record that Senator MURRAY was the first advocate of Federal aid to education.

Senator MURRAY has been represented as a liberal. I think he is a liberal. The term "liberal" means various things to various people, but JIM MURRAY is the kind of liberal for which there is only one definition. He is pro people, and this is high praise for any American.

Certainly his services to the Nation and the State of Montana have been great and varied. I personally am sorry he is to leave the Senate, but I am happy he has reached this decision while he is still well enough to enjoy some of the fruits of his labors.

I know the people of my State join with others who have spoken here today in wishing JIM MURRAY a long life and much happiness in the years ahead.

Mr. McGEE. Mr. President, representing the neighboring State of Wyoming, I want to speak partly for my State and our neighborly experiences, but more largely for the country as a whole.

I do not suppose I have experienced more confusion across the country, in geography, about any other factor than I have in regard to the location of the State of Wyoming. I have been called "the Senator from Montana" more times than I have been called "the Senator from Wyoming." I confess to Senators that I am proud of the mistake, because it symbolizes JIM MURRAY.

Of the many, many things which have been said in this Chamber this afternoon about JIM MURRAY'S long service, two phrases have been used around which I should like to weave my brief remarks.

The first is that today the Nation loses a great public service. Second is that we have to pick up the flag.

Let me talk about those two phrases for a moment. I submit that the Nation is not about to lose, in any measure, great public service, because of the depth of the record already written by Senator MURRAY. This can never be construed in the negative. In fact, it emerges now as a pride to the country in search of direction, in search of goals. Thus in all truth the country has a public service reservoir from which to draw for its energies in the days which lie immediately ahead.

Increasingly in our country now, thoughtful people are wondering where we may be going. They are asking if we may not have lost our direction. There are those who suggest that we have confused "gimmicks" with progress, "gadgets" with culture, and personal luxury with national prosperity. There are those who suggest that perhaps the time is at hand to search our souls, to select our priorities, and to rededicate our goals.

I will say in all candidness today, we have a magnificant record and example which supplies all the impetus, the ideas and the goals America may ever need. We have always had it at our command. The most telltale thing of all, which will not diminish, which the Senator from Montana has made most indelible for our country, is the need to consider people. What is wrong with America's standing for people, as we look for a goal to supply us with direction? If that be true, then to what extent must we pick up the flag?

Mr. President, I submit that the flag has not been dropped. I submit that Senator MURRAY at this moment is waving the flag vigorously as a challenge to those of us who will continue to carry on in this Chamber. We do not have to pick up the flag. We look at what is pending. We look at what he has carved out in the way of guidelines to keep our country going in the proper direction, toward the proper goals.

Mr. President, Senator MURRAY'S record of leadership includes, first, the Full Employment Act of 1946; second, a career-long concern for the development of natural resources; and, third, significant leadership in the field of education.

I think that one of the most significant aspects of Senator MURRAY'S retirement, however, is one which needs to be stressed, in that his leadership has been most effectively asserted during even the brief time which I have had the honor to serve as his colleague. His retirement will leave many of the projects which he has started undone. Among these projects, all of which are of vital importance to the future of the West and of the Nation, are:

First. The enactment of S. 2549, the Resources and Conservation Act of 1960. This legislation will not only be the crowning result of Senator MURRAY'S concern for resource development, but the coordination and unification which it would bring to the national drive for resource development is sorely needed in the public interest. I was glad to cosponsor this bill with Senator MURRAY and to assure him in my testimony during the hearing which he conducted on it of my continued support.

Second. The program for the national forests. Senator MURRAY'S consistent leadership in providing funds for this great renewable resource has been an example to me of what can be done in a complex and challenging field. As a member of the Senate Appropriations Committee which followed the trail blazed by Senator Murray and the Senator from Arizona [Mr. HAYDEN] in making available funds for this program, I know how indispensable his vigorous leadership was.

Third. The Mansfield-Murray water resource development resolution, Senate Resolution 48. The Mansfield-Murray resolution has set in motion a national study of the relationship between the development of our water resources and the national interest. I am proud to be a member of the Senate Select Committee on National Water Resources, and the scope of our studies has convinced me of the breadth of the vision which the authors of this resolution share.

Fourth. The Murray-Metcalf Act, S. 2. The provision of adequate funds to assist in the education of the Nation's youth is a necessity. Those of us who feel that the children from the poorer States should have an equal educational opportunity with those from the States with more money to spend realize that the aims of this act will some day be achieved. I was honored to cosponsor this act also.

If it is important for the Nation's future that the objectives of these unfinished projects be accomplished, it is equally important that those of us who have learned their importance from JIM MURRAY and who come from the same section he represented so ably should carry on the fight.

In regard to these specific guidelines, JIM MURRAY is waving the flag for all of America. He challenges those of us who remain here to pick up where he is now ending and to carry on without interruption to meet the goals which lie ahead.

I will say to JIM MURRAY this afternoon, as one of his colleagues who has come to respect him deeply and to love him dearly, that I for one—and I am sure there are many others—pledge myself to carry on. There shall be no letdown. There shall be no letup. We will follow on the paths JIM MURRAY has set out for us for tomorrow, for they will be even more important than the paths of yesterday we have already traversed.

Mr. LONG of Hawaii. Mr. President, the people of Hawaii certainly share in the national pride in regard to the wonderful career of the senior Senator from Montana. We also have good grounds for appreciating deeply his influence in the Congress of the United States and in the Nation as a whole. I wish to pinpoint it to a single fact which is in the RECORD—that is, the fact of the admission to the sisterhood of States of the 49th State, already referred to by the Senator from Alaska, and the 50th State, Hawaii.

I repeat, it is a matter of fact, but it is not always known exactly why Senator JAMES E. MURRAY was such an ardent advocate of statehood. I did not understand it for many years. It was my privilege to work with him in the Department of the Interior for approximately 10 years. I saw his developing interest. Increasingly I became aware that he was not primarily concerned with the fact that we were a great sugar-producing community, or a pineapple-producing community, or that the islands were noted around the world for their beauty. I realized fully the basis of his interest and his devotion to the concept of statehood when in the fall of 1955 he paid us a brief visit.

It was my privilege to be a member of a small welcoming committee. We thought we were going to plan his time for him. We assumed that, like most visitors, he would wish to see the mountains of the big island, towering Mauna Kea and Mauna Loa; that he would wish to go to the valley island, Maui, also known for its beauty; that particularly he would wish to see the garden island, Kauai; and that perhaps he would like to see the friendly island, Molokai. Then we listed also a trip to Pearl Harbor, to view some of the results still visible and evident of the attack on Pearl Harbor in 1941.

Senator MURRAY did not go to any of those places. I will tell Senators what he told us, for I think it exemplifies the basis of his greatness as a statesman and a leader more than anything else. References have already been made to it. He said, "I want to go where there are people." So the places some of us had the privilege of seeing with him were those where the people were. In a way we saw them anew through his enthusiasm. We went through a sugar mill. We went out in the fields and saw those who were producing the raw product. We went through the pineapple fields. We went through the camps. We particularly visited schools and hospitals. Especially was he concerned about the religious life of the islands. Wherever we went he engaged men and women and, in some instances, children in conversation.

In other words, Senator MURRAY has been a great leader because he has recognized there is only one real basis for

the greatness of a nation. A nation's greatness is not in its wealth, although that is necessary, but is in the kind of people the nation produces.

We believe that is the reason he became the strongest and most influential leader in this effort, which finally resulted in the admission of Alaska and Hawaii. In behalf of the people of Hawaii, I again say, "Thank you for that."

We have a word in Hawaii, and we are pleased that it is becoming a national word, increasingly. It has national currency. I refer to the word "aloha."

When the senior Senator from Montana came to visit us in 1955, to meet the people and see for himself, we greeted him with the word "aloha." It is a word of salutation or greeting, but it is also a word that is used when we are saying goodby, when we are saying, "Farewell till we meet again." It is in that sense this afternoon that I say to him anew, "Aloha nui loa."

Mr. DOUGLAS. Mr. President, as I have been sitting here thinking over the personal and political life of JIM MURRAY a phrase from Carlyle's "Life of Sterling" came into my mind. As I remember, it runs as follows:

> A shepherd of his people, some small Agamemnon after his sort—such every gifted man longs to be, and should long to be.

I thought, how true, in a double sense, this was of our dear friend from Montana. Many men have the desire to be a shepherd or servant of their people. JIM has not only had that desire, but he has also been blessed by being able to carry out this mission and to exemplify it in practice.

He has been a true servant of the people of the United States. The people in the Mountain States and in the West may think of him primarily as their servant—and he has been a good servant of theirs. He has helped to harness the power of the swift flowing rivers, as they come out of the Rockies and the coast range, for the benefit of the people of that region, and indirectly, I believe, for the benefit of the people of the United States.

He has tried to conserve the forests and to put water on the desert. I know JIM will forgive me if I say that at times I think he has put some water on land that should not have been irrigated; but it was always done with the best of purposes.

He has been the defender of the mineral interests; and although as a child of 4 and again as a boy of 8, I was a great admirer of William Jennings Bryan, I have never been able, in this day and generation, to share his passionate enthusiasm for silver.

The senior Senator from Montana has been a marvelous servant for his section and State, but he has been more than that. He has been a servant of the people of the whole United States. I think back over all the battles which our dear friend has fought. We always found him on the side of those who did not have many advantages. The rich and powerful can generally look out for themselves. It is the poor and the unfortunate who need defenders. JIM MURRAY, with his great heart, has always been in the lists for them.

I think of his work in the field of labor legislation. I had the privilege of serving with him for 8 years on the Labor Committee. He was always foremost in the battle for those who were relatively weak.

I think of the long battles which he has waged both in the field of health and in the field of education. We may not agree with every single proposal he has advanced in these spheres, but we must recognize that the general direction of his action has been correct, and that investment in the health and education of people is both materially productive and spiritually desirable.

In his unobtrusive way, he has helped to build a large part of the structure of what is good in America. This is a noble privilege.

Perhaps most important of all was the fact that, more than any other person, he was responsible for the passage of the Employment Act of 1946, which for the first time made it the responsibility of the American Government to try to reduce unemployment and to keep it at its lowest possible level. This has been a leading guideline for public policy. While the moral responsibility for such responsibility may be evaded from time to time, it cannot be denied.

JIM MURRAY can take proper pride in his achievements, and we also take pride in his achievements. He has done all these things in an extremely kind and generous manner. The Romans had a phrase for it:

> Fortiter in re, suaviter in modo.

We can translate that either literally or loosely. I prefer to translate it rather loosely:

> Resolute in action, gentle in method.

JIM MURRAY has made many enemies by his advocacy of causes which would help the people. His enemies have in many cases treated him extremely unkindly, but I have never heard JIM say an unkind word about those who were his traducers. I have always marveled at the gentleness with which he treated opponents, and the consistent kindliness of his actions. In this respect, as in so many others, he has set an extraordinary good example for us all.

The time will come for all of us to depart from the Senate. We may succeed in postponing it for a while, but the time will come. For every man the political bell tolls. The senior Senator from Montana is going out like the true thoroughbred that he is. I think he knows that he is going out with something that is very precious, that is, not merely the esteem, but the love of all of us. We love him, and we feel very blessed that we have had the privilege of associating with him.

Mr. PROXMIRE. Mr. President, I have known the senior Senator from Montana by reputation for several decades. Of course, I have known him directly and personally for only about 3 years. I am sure, however, that the many thousands of people in Wisconsin who admire, love, and revere JIM MURRAY would want me to pay tribute to him today.

It has been said repeatedly on the floor of the Senate today—but I wish to emphasize it—that the senior Senator from Montana has been—that is right—the No. 1 champion in the U.S. Senate of development of our natural resources. This is natural. He comes from the great State of Montana, a State in which the development of natural resources is extremely important.

I think it should be emphasized particularly that JIM MURRAY is a champion of the development of human resources. Several Senators have mentioned his deep and abiding interest in education. It was said that he was the author of the Murray-Metcalf bill. We must observe the fact that the Murray-Metcalf bill did not pass; but let me say to the Senator from Montana that the greatest Senators who ever served in this body have been known primarily for what they strove to do. In most cases, their work was unfulfilled when they left.

I feel very deeply that this kind of substantial Federal assistance for education is enormously important not only for the children, but also the very survival of our country. I think that when it is achieved, as I am sure it will be achieved, Senator MURRAY will deserve great thanks from his Nation for the battle he has made for it.

The philosophy of Senator MURRAY has been discussed this afternoon by a number of Senators. I would say that this philosophy fundamentally is the feeling that this Nation, if it has the will and the desire to do so can accomplish just about anything it wants to do; that we need not leave the future of our Nation to the blind work of economic forces or any other forces.

I am reminded of a quotation from Shakespeare's Julius Caesar, "The fault, dear Brutus, is not in our stars, but in ourselves." It seems to me that this idea, this understanding, this conception is what has motivated the philosophy of JIM MURRAY; that we can strive to develop our natural resources, that we do not have to leave them to what might happen; that we can also strive to work and develop our human resources, whether it is to put people to work or to put them in schools, and not suffer the terrible waste of idle men or idle minds.

No man in the past generation has worked, has striven, and has fought for all the people better than has the senior Senator from Montana. He has done this sometimes when it has been difficult, against private interests, rich and powerful and the entrenched, who have indeed been entrenched in his State.

JIM, I want to join the many other Senators who have expressed their deep regret that you are leaving us.

My love will always be with you.

Mr. JOHNSTON of South Carolina. Mr. President, I join with other Senators who have spoken on the retirement of JIM MURRAY. I have been in the Senate for 16 years. I have always found him in every instance fighting for the things that he thought would serve not only the natural resources of this Nation but

also that would build up a better economy and a better relationship between capital and labor.

I have found him in many instances fighting for causes for the common man, the laboring man. I commend him for what he has done in that particular field. As has been said, he has accumulated in his lifetime a considerable amount of wealth. A great many individuals, when they have accumulated wealth forget the ordinary man, the laboring man. Not so with Senator MURRAY. He has always stood up and fought the valiant fight for the laboring man. He has always remained on the Committee on Labor and Public Welfare. I served with him on that committee 15 years ago. I remember well how he fought then the battles of the laboring people of this great Nation of ours. Also, he has fought to provide better educational facilities throughout this Nation.

As he comes to the close of his career, I know he can look back upon what he has done and feel a certain amount of pride that he has accomplished something for our Nation and for struggling humanity. I think he can say with St. Paul: "I have fought the good fight."

I congratulate you on what you have done for this Nation and your State of Montana.

Mr. MAGNUSON. Mr. President, I have become so accustomed to JIM MURRAY, it is very difficult for me even to stand here and realize that he is going to leave the Senate. It is almost second nature to me.

We have been good friends. We have fought a great many good fights together. I need not add to what has already been said about him here.

I do not know whether I regret that he is leaving the Senate. I feel almost like one of his family. I want him to live for a long, long time. I hope that this decision will do that for him. I want him to live and to see some of the things that he has done here coming to fruition.

Rewards in politics are pretty intangible, JIM. But you can go anywhere west of the Mississippi River and look at the things you have done. You can point them out. I have been with you on some occasions when you have done so.

I will miss going to Montana to campaign for you. I will miss your coming over to Seattle as a Senator, but you will come over to see us anyway.

I cannot add much to what has been said here today, except that I want to wish you good health. That is most important. I think you can leave the Senate and enjoy many years of your life. You will never leave me. I will be around. God bless you.

Mr. GRUENING. Mr. President, I deem it a great privilege to associate myself with the many beautiful, eloquent, and deserved tributes which have been paid this afternoon to our great colleague, JIM MURRAY.

I doubt whether there could be any greater or more heartfelt expression of regret that he has found it necessary to announce that at the end of his present term he is leaving the Senate, where he has served with such great distinction, such great public spirit, such great devotion, such great pertinacity, not merely for the things that he believed in but for the things that were good for our Nation as a whole, for the conservation of its basic resources, for their maximum development, and all through for the preservation and enhancement of that even greater resource, the human resource.

When the history of the Senate is written, the record of JIM MURRAY will stand out as one who steadily and incessantly has fought the good fight for all the eternal values that we Americans cherish.

He has not been just a Senator from Montana; he has not been just a great western Senator, although he has been that; he has been a national figure. Although he comes from the Mountain States, his interest and the beneficence of his work and the things that he has done and the things that he has brought about through the causes he has espoused have redounded to the benefit of the entire American people.

It has been my privilege to serve under him as a member of the Committee on Interior and Insular Affairs, for the short time I have been a Member of the Senate. But for many years before that time I have known and admired JIM MURRAY. I have known him to be one of the men one can count on to preserve everything that is best in the American tradition, and to work for it quietly, modestly, without fanfare, but with a devotion which no one could ever challenge.

We shall miss JIM MURRAY very much. I myself greatly regret his decision to leave the Senate. He has done so much for the West and so much for the conservation of the resources of the country that his leadership will be greatly missed. He has done much for Alaska. He was one of the earliest and ablest protagonists of statehood for Alaska—as he was also for Hawaii. Never did Alaska ask for anything which it deserved to have that JIM MURRAY could not be counted upon to support.

I hope his leaving will, as my good friend, WARREN MAGNUSON, has said, prolong his years and let him see that the fruits for which he worked so many years, will come to full ripening.

We shall miss you, JIM. We are grateful to you for all the many kindnesses you have done for us as individuals and for your great and enduring service to our Nation as a whole.

Mr. FONG. Mr. President, I rise to join my colleagues in tribute to a great legislator, the distinguished senior Senator from the great State of Montana. I have not had the good fortune to know Senator MURRAY for a long time because I have been a Member of the Senate for only 8 months. But listening to the tributes which have been paid today to the great Senator from the great State of Montana, were I Senator MURRAY, I would walk away from this Chamber holding my head high, knowing that I had, in the eyes of my colleagues, performed my duties well and had accomplished my task as a representative of a great State.

Hawaii was annexed to the United States as a territory in 1898. Immediately thereafter, we strove to become a State. For 50 years we implored Congress to admit us into the Union. But every time we tried, we failed.

Then we began to wonder, in Hawaii, whether our motto had meaning. Hawaii's motto was given to her by the King of Hawaii, after the British flag which had flown over the islands for approximately 6 months after the islands were seized was lowered and Great Britain restored sovereignty of the islands to Hawaii. That motto is "Ua mau ke ea o ka aina i ka pono"—the life of the land is preserved in righteousness. We in Hawaii wondered because of our inability to achieve statehood, whether Hawaii's motto had any meaning.

Then after coming to the U.S. Senate, before the Committee on Interior and Insular Affairs, chairmanshipped by Senator MURRAY, and upon achieving statehood, the people again felt that there was life and spirit in their motto.

I say to the great Senator from the great State of Montana that the people of Hawaii are very grateful for all that he has done for them, because he has restored to them their great faith they have in their motto. You have made it certain that "the life of their land is preserved in righteousness."

For 8 months I have served under you, Senator MURRAY, as a member of the Committee on Interior and Insular Affairs. As a minority member of the committee, I have received from you every kindness and every consideration. I consider you one of the great Senators of this great land. The great State of Montana should be congratulated for keeping you in the Senate for 25 years. You have served the people well, and you will take away with you the aloha of all of us.

I wish you a long, long life, good health, and much happiness. I know you deserve the rest that you are now requesting.

Mr. GORE. Mr. President, last year I organized a series of forums on public affairs for Democratic Members of the Senate. For 12 weeks some of the leading scholars and authorities of our country appeared before this group for a dinner and an evening of frank and searching discussion. For the most part, it was the younger Members of the Senate who attended; but among the most regular in attendance, and an active participant in those searching, inquiring, and provocative discussions, was the senior Senator from Montana.

I cite this fact because it is illustrative of the career of this able, forthright, courageous public servant. His has been a record guided by vision. His has been a liberal, a progressive record of action.

The people of the Tennessee Valley are grateful today for the record and the service of the senior Senator from Montana. So are the people of many other valleys in America. The people who are most grateful of all are those who have suffered in the valley of despair, because they found in the heart of the senior Senator from Montana, sympathy and understanding. They

found in his voice a champion. They found in his record action to ameliorate their difficulties and hardships.

It is a dramatic incident when one of any age, however long he has been a Member of this body, voluntarily decides to lay aside his toga. Few places afford one such an opportunity for service. Too few places are available to mortal man where his voice is so magnified, the the strength of his arm more multiplied, the power to accomplish good so available, as on the floor of and in membership in the U.S. Senate.

A time comes, however, when some men, by grace of decision and judgment, for reasons satisfactory to themselves, make such a decision. When it is made, it leaves those of us who have the privilege of serving with them heavyhearted.

Thus it is today. But it also gives us occasion to reflect upon the glory of public service and the rewards which come from the inner satisfaction of having served conscientiously and having borne witness to the truth for the benefit of our fellow men.

Mr. RANDOLPH. Mr. President, Charles F. Kettering, after he had lived more than threescore years and 10, was asked about his plans. He replied that his life was in the future, because he would spend it there.

I am certain that we want to feel that the retirement of our beloved colleague from Montana [Mr. MURRAY] is one which is indicative only of a point in his public service where he feels that his dedication to the past and the present in nowise would diminish his belief in or his desire to participate in the tomorrow.

It was more than a quarter of a century ago that I, as a Member of the House of Representatives, first had the personal privilege of knowing Senator MURRAY. Today, I can think, with the poet, "Age is opportunity, no less than youth itself, though in another dress."

Mr. President, the physical raiment, as it were, of Senator MURRAY is subject to change; but his gentle spirit is ever buoyant.

He has devoted his vigorous life to the conservation and development of the human and natural resources of America. And now, after the good fight, I want Senator MURRAY'S future paths to pass through pastures green, and beside the calm waters. We shall remember him as a public official who acted with high purpose.

Mr. DWORSHAK. Mr. President, few Members of this body have received tributes as eloquent as those which have been paid today to the distinguished Senator from Montana [Mr. MURRAY], following the announcement that he will retire from this body at the end of this year.

The fact that Senator MURRAY has been elected six times by the people of his State to serve in the U.S. Senate attests to his popularity as well as to the high esteeem and respect in which he has been held for more than a quarter of a century.

Coming from an adjoining State, I have long been aware of Senator MURRAY'S exceptional services in the Senate. Naturally, having many mutual interests with the people of the State of Montana, I have watched the vigorous activity over the years on the part of the senior Senator from Montana. I have served for 10 years with him on the Senate Committee on Interior and Insular Affairs. It is only through such service on a committee that one can learn the true value of another Member.

I can look back several years to the time when the domestic mining industry was in dire circumstances, and when members of the Interior Committee, without regard to partisanship, recognized the need to do something to stabilize that industry. At that time, it was the fine leadership of Senator MURRAY which inspired us to carry on. Although we achieved little against great obstacles, the people of Montana and of the entire Northwest know that Senator MURRAY fought vigorously to promote their interests and to serve them devotedly.

During the past 2 years I have served as the ranking minority member of the Committee on Interior and Insular Affairs; and, naturally, I have had an unusual opportunity to observe the fairness, the understanding, and the tolerance which have actuated Senator MURRAY in serving as the chairman of that committee. It made no difference whether one agreed or disagreed with Senator MURRAY; in any event, one always knew that, as chairman of the committee, Senator MURRAY would see that equity and fairness were meted out. He did not permit partisanship to influence his fair and impartial services as the chairman of that committee.

I know that Senator MURRAY'S decision to retire from the Senate was reached after very long consideration. I am sure that many of his colleagues will greatly regret his departure from this body and the termination of his many years of public service. But I also know that in the Northwest, and, in particular, in my State of Idaho, the people will extend to Senator MURRAY their best wishes for health and happiness and for many fruitful years of retirement.

Mr. MUSKIE. Mr. President, I do not wish to delay unduly the proceedings in the Senate this afternoon. However, I have had the privilege of listening for almost 2 hours as the tributes to Senator MURRAY have poured forth from Senators on both sides of the aisle; and I wish to take this opportunity to state how impressed I am by the high esteem in which Senator MURRAY is held by all his colleagues in the Senate.

As a Member of the Senate, it has been my privilege to know Senator MURRAY for only a short period of time. However, for a long time I have looked upon his career and upon him with awe, with respect, and now with affection, and admiration.

It has been said that the road which stretches ahead of a man is a challenge to his heart long before it tests the strength of his legs. I hope that when I have reached the end of my career in public service, whenever that time may come, I shall be able to look back upon the road I have traveled with as much reason for satisfaction because of the way I have traveled it as can Senator MURRAY.

To our beloved friend, Senator JIM MURRAY, I say God bless you and God speed you.

Mr. MOSS. Mr. President, like every other Senator in this body, I feel the impact of the announcement today that Senator JAMES E. MURRAY will not seek reelection and will not be longer in this body.

Senator MURRAY is indeed one of the giants of the Senate. Long before I ever thought that I might have the opportunity of being in the Senate, I watched his career and admired him from afar. The things that I knew about him or read about him, in those years, certainly were all confirmed when I did come to the Senate of the United States.

Senator MURRAY has been a kind, thoughtful, and helpful mentor to me. After I was elected, and before I took the oath, I came to Washington, and Senator MURRAY turned over to me office space in his quarters. He made available to me his staff to do what I needed to do in those few days before I had assumed my position. That act of kindness characterizes the consideration Senator MURRAY has had for all of his colleagues, especially for young or new incoming Senators. I shall be ever grateful to him for that act of kindness.

I have felt it was my good fortune to be assigned to the Interior and Insular Affairs Committee, under the chairmanship of Senator MURRAY, one of the great committees of the Senate, and certainly one of the great leaders of the Senate. Senator MURRAY has, for a quarter of a century, exerted his leadership in this body.

While I speak of Senator MURRAY, I should like to say a word for his devoted staff. A great man must have loyal persons around him to help him. He must have devoted and competent people. Senator MURRAY has gathered about him, in his office and on the committee staff, competent and devoted public servants. All of those persons have helped him to make the great record that Senator MURRAY has made in this body. I know the impact this announcement must have upon them. All of us here in this body recognize the competent and devoted staff and assistants that have worked with Senator MURRAY.

Mr. President, it would be a great satisfaction to come to a period in life when one could look back on an achievement such as that attained by the Senator from Montana. Much has been said about it on the floor today, and certainly I would echo and concur in the assessment that has been made of his contributions. He has been a fearless fighter for principle, a true, dedicated liberal, a mighty representative of his State, and a mighty pillar of the Senate of the United States. We will all remember him long and remember him with a grateful heart.

Mr. LONG of Louisiana. Mr. President, it has been my pleasure during my 12 years in the Senate to know the senior Senator from Montana and, during some of that period, to serve on his committee. He has exemplified the traits which some of us regard as the characteristics that should belong to a great Senator.

For one thing, those of us serving on his committee who proposed particular legislation found that Senator MURRAY was entirely fair and considerate to us and gave us an opportunity to have our proposed legislation favorably considered and voted upon, even though he himself might be opposed to it at the time.

Senator MURRAY has been a great stalwart of liberal legislation, that which advanced the welfare of the least favored people. He has been a great advocate and sponsor of legislation to develop the natural resources of this Nation.

It was with great regret that I learned the distinguished senior Senator from Montana had decided he will not seek reelection to the Senate.

Mr. THURMOND. Mr. President, I just learned a few minutes ago that a distinguished and able Senator, the senior Senator from Montana, will not seek reelection to the U.S. Senate this year. When I first came to the Senate, in 1955, I had the pleasure of meeting Senator MURRAY, and I have held him in the highest esteem since that time.

Senator MURRAY is a man of lofty principles and high character. He is full of energy in his work. He possesses a very acute mind, and takes sound positions on matters before the Senate.

I have not agreed with him on all issues, as probably no two men do; but I have admired him as a Senator, as a man, and as a great American.

I take this opportunity to express to him my personal regret that he is leaving the Senate, and to wish for him eternal happiness in the years to come.

Mr. FREAR. Mr. President, it is with mixed emotions that I learn of the decision of the senior Senator from Montana.

Senator MURRAY has been a most diligent Member of the Senate, always active in support of legislation which would favorably affect his State. The junior Senator from Delaware dislikes the thought of seeing less of his fine and able colleague, but wishes for him many years of enjoyable, relaxing life.

Mr. EASTLAND. Mr. President, the announcement of the senior Senator from Montana that he will not be a candidate for reelection is received with sadness not only by me, but also by every Member of this body. He will leave the Senate after more than 26 years of hard and faithful service.

With both his hands and his great heart he has inspired and shaped legislation that has been of vital concern to every man, woman, and child in these United States.

No living Member of Congress can better assert the claim of being a godfather of States than can JIM MURRAY, with the stars of Alaska and Hawaii in the diadem of his achievements.

The people of Montana and all of the arid States of the West are forever in his debt for his ceaseless and fruitful efforts to supply the water and power so necessary for the life, growth, and development of this great region.

Generations yet unborn should bless his name for the great part he has played in the conservation of our forests and other natural resources and the preservation of our wilderness and scenic areas of the country for all posterity.

For one who has remained so long in the U.S. Senate and accomplished so much, it is impossible in a few words to even begin to enumerate the landmarks of legislative history in which he has played so large a part.

He was elected to fill the unexpired term of one of the truly great alltime Senators, Thomas J. Walsh, and in every respect he carried out and fulfilled the traditions set by his illustrious predecessor.

JIM MURRAY is one of the ablest and most popular men who ever graced this body.

As he returns to private life our wish for him is a long and continuous period of happiness and contentment. He can leave this body with the full assurance of a job well done in service to his State and to mankind.

Mr. SYMINGTON. Mr. President, the Senate of the United States will not be the same when the senior Senator from Montana—the great Senator MURRAY—is no longer among its active leaders.

His announcement today that he plans to retire at the end of this session leaves an empty feeling in all of us who have been fortunate enough to know him and be associated with him.

History has been written by Senator MURRAY; and the United States, which he has served so long and so well, has benefited immeasurably from his good works.

I take this occasion to extend my best wishes for many more productive years to the practical progressive, the realistic liberal, the senior Senator from Montana.

Mr. CHURCH. Mr. President, today, I was saddened to learn that the distinguished senior Senator from Montana [Mr. MURRAY] had announced his decision not to be a candidate for reelection.

Ever since I first came to the Senate, being the junior member of the class of 1957, JIM MURRAY has extended to me every possible courtesy. Always he has accommodated me, as he does all others, in his gracious and helpful way. I have leaned upon him for advice and for guidance, and I shall greatly miss him when he leaves the Senate.

Mr. President, Senator MURRAY has rendered many years of public service that will not soon be forgotten. He has been a great conservationist. He has been a champion of the West in every aspect of its development.

In taking leadership in sponsoring proposed legislation of major consequences to the entire country, Senator MURRAY has given of himself in the best traditions of a U.S. Senator.

Mr. President, it will be difficult, if at all possible, to replace JIM MURRAY in the Senate of the United States.

I know that all the people of Montana honor JIM MURRAY for the service he has rendered, and share with me and with his other colleagues, our sense of real loss in the announcement that he will not be a candidate for reelection.

Mr. President, I have prepared a statement in tribute to Senator MURRAY; and I ask unanimous consent that the statement be printed at this point in the RECORD, in connection with my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR CHURCH

Those of us who are elected to the Senate from Western States, who are fortunate enough to serve upon it, are ever mindful of the status which the Committee on Interior and Insular Affairs enjoys among our committee assignments. We know the political potency of the argument, whether from using it or suffering its lash ourselves, that membership on this committee is not easily attained, and once attained is not to be relinquished willingly. No more powerful appeal for reelection may be made in the Western States than the one that "my opponent will not be able to take my place on the important Interior Committee." It is made by Republicans and Democrats alike.

I myself eagerly sought assignment to the Interior Committee, and felt myself lucky indeed when I achieved it.

Senate committees are shaped and influenced by great chairmen. The reputation of the Interior Committee as one which gets things accomplished which can be measured and felt by the people of the country is a monument to the greatness of my beloved chairman, JAMES E. MURRAY. My heart is heavy with the news of his retirement.

JIM MURRAY came to the Senate in 1934. The New Deal was then ending its second year, and JIM MURRAY from his first day here was a stalwart worker in the great humanitarian movement which had its genesis in that era. When, 22 years later, I joined him in the Senate, his fire for decency and humanity, for good government, and for wise development of resources, both human and material, burned as brightly as ever.

The man who helped establish the Soil Conservation Service 25 years ago is today in the forefront of the effort to improve and better this Service, as he fights to give to the program the research facilities it needs.

This great American is the author of a bill, one which I proudly cosponsor, which will provide a program of Federal aid to education to help us meet the educational challenge of the space age.

This unselfish citizen led the fight to give to all Americans their birthright of suffrage and representation; statehood for Alaska and Hawaii stand as enduring tribute to this leadership.

But there is no excuse for me to review, to a Senate which well knows it, the illustrious career of a man whose deeds rank him with those great westerners—Oregon's McNary, Montana's Tom Walsh, Idaho's William Borah, Utah's Elbert Thomas, and, among chairmen still with us, and active, Carl Hayden, Warren Magnuson, Dennis Chavez, and Joseph C. O'Mahoney.

Rather, I think it fitting for me to pay him my personal respects, and to recount a few of the many courtesies and kindnesses he has shown to me.

From the day of my arrival in the Senate I was indebted to JIM MURRAY. For, as the most junior of the juniors in the class elected in 1956, it was weeks before I was assigned space in the Senate Office Building for myself and my staff. With the generosity that is the hallmark of the man, I was welcomed, bag and baggage, into JIM MURRAY's own office. The fumbling of a new Senator's green staff in his own well-ordered quarters seemed to bother him not at all. I appreciated his hospitality, and we all loved him for it.

On the committee, there was never a question of seniority or privilege, or of partisanship. The committee staff was the staff of all of us; we were welcomed to every subcommittee with the privilege of participation and consultation, whether formally assigned or not; informality and gracious helpfulness has characterized all the business of the committee and his relationships with all its members.

I shall cherish the remaining months of this session and service with JIM MURRAY. I know that I am highly privileged to work closely and to know intimately a great American; and all of us will savor the experience the more as the day of his retirement draws nearer.

Mr. MANSFIELD. Mr. President, there is little more that can be added to the heartfelt tributes which have come from Senators on both sides of the aisle this afternoon.

I can only again express my deep regret that my distinguished senior colleague, Mr. MURRAY, has arrived at the decision not to seek reelection, and say to him that in my mind he will always be a real partner, a true colleague, and the senior Senator from the State of Montana.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DODD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. Moss in the chair). Without objection, it is so ordered.

THE FATE OF SUPPLEMENTAL AIR CARRIERS

Mr. DODD. Mr. President, in recent months there has been a growing controversy about the adequacy of the military airlift facilities which would be needed to transport troops to world trouble spots in time of emergency. The capacity of the Military Air Transport Service to adequately perform this vital function is seriously in doubt.

On April 12 the Reed Committee released a report on the Military Air Transport Service. I have studied this report with great interest.

Today I wish to comment on one aspect of it.

Under present procedures, whenever the Government needs transportation which MATS cannot handle, all certificated air carriers, large and small, are eligible to compete on a low bid basis. One of the Reed Committee recommendations would change all this. It would prohibit the small supplemental air carriers from competing by giving preferential treatment to the large trunk lines.

I am not yet prepared to say whether I think the interests of national defense require an increase or a decrease in the present role of commercial carriers with respect to Government cargoes. But I am convinced that to whatever extent our Government awards military personnel and freight cargoes to commercial carriers, it should award them on a competitive basis and it should allow all certificated carriers to participate in the bidding.

The Reed Committee report would eliminate from this competition that class of air carriers which now represents the only ready commercial airlift geared to respond to a national emergency in a matter of hours, not days or weeks—the supplemental air carriers, approved and certificated by the Civil Aeronautics Board, and currently flying over 100 aircraft in day-to-day military air movements.

In awarding certification to these supplemental air carriers, the Civil Aeronautics Board stated:

> The supplemental air carriers represent a significant part of the Nation's air transport system and there is a continuing need for their services. They have rendered invaluable service to the military, both in the Berlin and Korean airlifts, as well as in domestic charter operations. The continued existence of their fleet is of real value in terms of national defense and the future ability of the supplementals to serve the military depends upon their ability to operate their planes in commercial activities when not engaged in service to the military. The Board's policy toward these carriers should be directed toward their survival and continued healthy growth, subject to the overall objectives of the act and a proper relationship to the certificated air carrier system.

The Reed report would exclude these carriers and drive them out of business. It would allow less than a handful of the major airlines to participate in MATS business.

On April 21, Lt. Gen. William A. Tunner, retiring general of MATS, speaking before the House Committee on Armed Services, said he thought a few of the recommendations made by the Reed Committee must be examined in line with the practical aspects of conducting military operations under emergency conditions.

The general stated:

> The Reed Committee also recommends that certificated route carriers be granted the right of first refusal to all Department of Defense traffic over their routes. This would, of course, eliminate from competition some very fine supplemental carriers who have contributed a great deal in time of emergency to the Department of Defense airlift needs.

He also said with reference to the Reed report:

> The elimination of competition will tend to restrict the growth of the air carrier industry as a whole and it is likely to have a disastrous effect, particularly on the small business concerns of this country.

I agree with General Tunner, and I trust that Air Force Secretary Sharp will recognize the elimination-of-competition aspect of the report, and the first refusal rights for major route carriers as a pure boon to the big airlines—and not sound recommendations for the solution of MATS problems.

I have personally inspected the facilities of the military traffic division of the Supplemental Air Carrier Conference, a national trade association here in Washington, and I am satisfied that the supplemental air carrier industry provides an alert, efficient and dedicated relationship with the military in the prompt transporting of troops, and this industry should be encouraged whenever possible and feasible.

In summary, I oppose the Reed recommendation for three reasons:

It would destroy the supplemental air carriers which in important respects are better equipped to respond to a national emergency than the major trunklines which would benefit from their elimination. It would eliminate competition, which is highly desirable where Government contracts are involved. And it would provide another example of small, independent, unsubsidized business being gobbled up by giant competitors, this time through Government action.

I earnestly hope that this Reed Committee recommendation will be disapproved by the Department of Defense. If it is not, I believe there should be a thorough congressional investigation into the entire matter.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had agreed to the concurrent resolution (S. Con. Res. 92) creating a Joint Committee on Arrangements for the Inauguration of the President-Elect and the Vice President-Elect on January 20, 1961.

The message also announced that the House had agreed to the amendments of the Senate to the bill (H.R. 4781) to amend the Watershed Protection and Flood Prevention Act to provide that its loan provisions shall be applicable to certain other projects, and for other purposes.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 10569) making appropriations for the Treasury and Post Office Departments, and the Tax Court of the United States for the fiscal year ending June 30, 1961, and for other purposes; agreed to the conference asked by the Senate on the disagreeing vote of the two Houses thereon, and that Mr. GARY, Mr. PASSMAN, Mr. CANNON, Mr. CANFIELD, and Mr. TABER were appointed managers on the part of the House at the conference.

MUTUAL SECURITY ACT OF 1960

The Senate resumed the consideration of the bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Maryland [Mr. BUTLER]. On this question the yeas and nays have been ordered.

Mr. FULBRIGHT. Mr. President, I do not wish to proceed without more Members of the Senate present. This is a very complicated amendment and involves aspects of the program which I am sure all Members of the Senate do not fully understand. I do not wish to proceed unless we can get the Senators to the Chamber. I therefore make the point of no quorum, and I ask for a live quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll and the following Senators answered to their names:

[No. 169]

Aiken	Goldwater	Martin
Allott	Gore	Monroney
Bennett	Gruening	Morse
Brunsdale	Hart	Morton
Bush	Hartke	Moss
Butler	Hayden	Mundt
Capehart	Hennings	Muskie
Carlson	Hickenlooper	Prouty
Case, N.J.	Hill	Proxmire
Case, S. Dak.	Holland	Randolph
Chavez	Jackson	Russell
Church	Johnson, Tex.	Saltonstall
Clark	Johnston, S.C.	Schoeppel
Cooper	Keating	Scott
Curtis	Kefauver	Smathers
Dirksen	Kuchel	Smith
Dodd	Lausche	Stennis
Douglas	Long, Hawaii	Talmadge
Dworshak	Long, La.	Thurmond
Eastland	Lusk	Wiley
Ellender	McCarthy	Williams, Del.
Engle	McClellan	Williams, N.J.
Ervin	McGee	Yarborough
Fong	McNamara	Young, N. Dak.
Frear	Magnuson	Young, Ohio
Fulbright	Mansfield	

The PRESIDING OFFICER (Mr. Moss in the chair). A quorum is present. The question is on agreeing to the amendment offered by the Senator from Maryland [Mr. BUTLER].

Mr. FULBRIGHT. Mr. President, I wonder if we could have the attention of the Senate on this amendment, which is a little complicated and somewhat technical. I believe it is easy to be misled by it, because there has existed for some time a provision in the Mutual Security Act requiring that 50 percent of the shipments under the act must be made in American bottoms. That has been applicable to shipments from the United States of materials supplied by the United States.

In the bill there is a new provision relating to the Indus River project. This project was negotiated primarily by the International Bank for Reconstruction and Development, headed by Mr. Eugene Black. He made an effort and was successful in enlisting the assistance of five other countries: Australia, Canada, Germany, New Zealand, and the United Kingdom. They contribute to the program. In addition, the International Bank, from its own funds, is making substantial amounts available. So that that is a further non-American participation in the program.

The administration very strongly recommends defeat of this amendment. I have a letter from Mr. Dillon to Mr. Casey of the American Merchant Marine Institute, and I shall be glad to read it, in which Mr. Dillon says that they wish to have the right to a waiver, and that they will not exercise the waiver of the 50–50 clause unless it becomes necessary to do so.

I see no reason why we should not trust the President and Mr. Dillon when they indicated that they would not arbitrarily exercise such a waiver.

The bill gives the right to the exercise of a waiver, however, because the program will go on for 10 years. We do not know how the program will develop. It may be impossible to meet the 50–50 provision. However, in addition, and overriding all of that, if we add this self-serving provision to the bill, we would be inviting the other countries to do likewise. I suppose they would be justified in saying, "Well, we ought to have a percentage of the personnel, as well as the shipping." I believe this would make it an unmanageable operation. It is going to be directed and controlled by International Bank procedures. It is not going to be a MSA operation. It will not be directed and controlled by the MSA.

Mr. Dillon wrote Mr. Casey, president of the American Merchant Marine Institute, as follows:

> In seeking an amendment relating to the Indus Basin project we have asked for permissive authority whereunder the President could waive the requirements of the cargo preference legislation with respect to this particular project if he found that the provisions of the cargo preference act could not be fully satisfied without seriously impeding or preventing accomplishment of the Indus Basin project.

I submit that this is an improper application of the 50–50 concept. The purpose of section 404 is to make possible an international approach to the development of the Indus Basin, and this would be defeated if the amendment offered by the Senator from Maryland were accepted.

The letter continues:

> As you are aware, the very fabric of the planning for this project rests upon its multilateral character and upon the voluntary agreement, by all of the contributors to the Indus Basin development fund, to refrain from applying to their contributions the national preference requirement—of whatever nature—which would normally govern the use of such funds. Were the United States to apply preferential conditions to its contribution, we could not logically oppose the application of counterconditions on the contributions of other nations. The welter of conflicting national conditions which might be expected to ensue would complicate the administration of the Indus project to the point where the present proposal would no longer be operable.

This is one case where we have succeeded in getting the assistance of other countries. If it is desired that this country do the whole job, which would mean a much greater expense to us, in order to give the shipping interests a 50–50 break, of course the Senate can indicate its desire. However, it would be a very improvident thing to do.

I wish the RECORD to show the amounts involved. There are several categories of moneys. For us it is dollars; for the United Kingdom, pounds; for Canada, dollars; and so on. The total is $307 million. Of the $307 million in grants, the United States provides $177 million. The United Kingdom gives $58.4 million; New Zealand, $2.8 million; Germany, $30 million; Canada, $23.2 million; Australia, $15.6 million. That makes $307 million, of which, it will be noted, we give a little more than half.

In the loan we have made to Pakistan, of dollars, I do not believe we have applied the 50–50 requirement, because Pakistan uses that money in any way it can for its own development. That is a hard currency loan, not a grant.

Then there is a loan of $80 million in hard currency to Pakistan. That is a loan by the International Bank.

In local currency of the United States, we have made loans and grants equivalent to $235 million. This is the amount I first mentioned. It is in the local currency, which in that country is rupees. The rupees have already been generated largely by the shipment of surplus agricultural commodities, and there is no way in the world to apply the 50–50 principle to them. If the 50–50 arrangement were to be applied to those commodities it was necessary to do so when they were shipped in the first instance.

What we are doing in this part of the bill is to make available the existing foreign currency we already own in the country. We lend India $33 million, and the Bank lends India $23 million, making $56 million. But the only amount which is a grant, to which traditionally the 50–50 arrangement applies in the strictly governmental programs, is the $177 million which we are granting, and which is a part of the first item.

I submit that this amendment would be a very great divergence from the traditional application of the 50–50 program. I hope the Senate will not insist upon the elimination of the waiver provision. The waiver is a right given the President. It provides that under certain conditions the 50–50 arrangement can be waived by him. As the Under Secretary says, the 50–50 arrangement will apply so long as it is feasible. But the President is given the right, when the arrangement becomes infeasible, to waive the 50–50 provision.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. SALTONSTALL. Do I correctly understand that this provision is limited, in the first place, to the Indus Basin development?

Mr. FULBRIGHT. Yes.

Mr. SALTONSTALL. It is limited to that one transaction. The 50–50 provision is not waived in other parts of the world?

Mr. FULBRIGHT. Oh, goodness, no. It applies only to this one program. We have been beaten too often by the Senate on the whole program even to think about that. It is only on this one multilateral program.

Mr. SALTONSTALL. The reason for asking the question in this connection is that it is not only the United States that is involved, but many other countries are involved with the United States in this common transaction.

Mr. FULBRIGHT. That is correct. It is a 10-year program.

Mr. SALTONSTALL. So if we impose restrictions with respect to the Indus Basin development, other countries can impose restrictions also, and it will be very difficult to fulfill the overall contracts.

Mr. FULBRIGHT. I believe that is so. It would be an invitation to them to do that. Here we have, or are about to have, a genuine multilateral program, in which we get assistance, and in which we do not have to carry the whole burden.

That is something we ought to encourage. Wherever we have the opportunity to enlist assistance from some of our prosperous allies, we ought to encourage it, instead of discouraging it.

Mr. SALTONSTALL. As the Senator has said, the President would use the privilege of giving up the 50–50 program only if he found it was absolutely necessary.

Mr. FULBRIGHT. That is correct. He so states in the letter. To the extent possible, if in this particular instance it would be necessary to go below 50–50, an attempt will be made to compensate by other shipments under mutual security in other areas. In other words, the level will be raised above 50 percent on shipments possibly to the Middle East, to South Asia, or wherever it is possible to do so. The letter states that that will be done to the extent possible. But where it becomes utterly impossible, then the President wishes the right to waive. If he exercises the right of waiver, he must report that fact to Congress and we can then do whatever seems desirable.

Mr. SALTONSTALL. I thank the Senator from Arkansas.

Mr. FULBRIGHT. I always seem to find myself defending the administration, and that is not a natural role for me. However, in this case the program has been administered very fairly. These figures were supplied to me only this morning.

The total expenditures for freight charges from 1948 through June 1959, for all vessels—and this is under the whole mutual security program—were $1,661,621,000. Of that amount, U.S.-flag vessels received $1,170,582,000. That is 70.5 percent of all those shipments.

I do not know why one would become suspicious of an administration which has gone 20 percent above the requirement of the law concerning the total dollar amount of shipments. Why should there be the suspicion that the administration is trying to undercut the American merchant marine? If anyone should ask me, $1.170 billion is quite a subsidy.

Mr. SALTONSTALL. I am asking the question because I have always been a strong advocate of the 50–50 program. The Indus River development involves many other countries.

I can see that we are involved with several other countries in a very complicated contract. If we insist upon restrictions of our own, it will be difficult for other nations to fulfill their part of contracts they have with us. I wanted the assurance which the Senator has given me that there will be no yielding on the 50–50 program.

Mr. FULBRIGHT. That is not involved at all. Nothing in the report would lead to any such idea.

For the fiscal year 1959—just last year—the total expenditures under the mutual security program for all vessels amounted to $81 million. U.S. vessels received $48,700,000, which is just over 60 percent of the total. That is well above the minimum required by law.

The estimate for the fiscal year 1960, for all vessels, is $85 million, and the total for U.S. vessels is $50 million, an amount which, again, runs to 60 percent.

I think it might be interesting to state for the record, to show that the American merchant marine has not been badly treated, the total operational differential subsidies under the Merchant Marine Act. To June 1959 the amount was $994,443,995. I do not think there should be any real complaint about that. That is simply for operational differential costs.

The cost for the fiscal year 1959 was $154 million. I submit that the advocates and friends of the American merchant marine have nothing to apologize for. They have done an extraordinarily good job, and they deserve appreciation for their lifelong devotion to the American merchant marine. I do not know of anyone who has done so good a job for his particular activity as these people have for the merchant marine. I wish I had as good a record on some of the items in which I have been interested. If I could come anywhere near being so successful in some of the programs in which I have an interest, I would be very proud.

That is not all. The construction differential, estimated residual cost to the U.S. Government, during the same period, 1937 to 1959, was $204,860,850. In this fiscal year alone it was more than $21 million. The total operational differential plus construction differential during the period from 1937 through June 30, 1959—and we obtain this figure by adding together the amounts for those two different kinds of subsidies—came to $1,149,304,845. I cite that, not because it is directly pertinent, but only to show that there is no reason for fear on the part of the merchant marine that it will be scuttled because of a waiver in connection with this one single project under this program. This may be a small matter, but I think it is psychologically very important that we get started with the idea of having participation by the other countries in the entire aid program.

In my opinion, we are not able to do the complete job; and even if we were able to do the complete job, I would not want our country to attempt to do it. I think we need the assistance of Germany, England, Canada, and the other countries I have mentioned. I hope we shall have assistance from the French and the Italians in bearing the cost. Recently Mr. Dillon went to Europe, to try to promote this very arrangement, by means of conferences with representatives of those countries. I think he has made some progress.

Certainly, Mr. President, in attempting to set up a multilateral program, the worst thing we could possibly do would be to insist on preferences for some of the groups in this country.

Mr. KEATING. Mr. President, will the Senator from Arkansas yield to me?

Mr. FULBRIGHT. I yield.

Mr. KEATING. I find myself in somewhat the position of the distinguished Senator from Massachusetts. I have always felt that this 50–50 provision was a sound one. I assume that in that respect my view differs from the view of the distinguished Senator from Arkansas. But certainly I do not want to do anything to discourage other nations from participating in the effort which our country is making to help the less well developed nations; I believe that would be a tragedy.

For a long time I have advocated that other countries do more in that respect. We have helped to get them on their feet, and I believe we have reason to expect them to do more in helping themselves and in helping others.

Let me ask whether this is the first project in our mutual security programs in which we are receiving cooperation from Great Britain, Germany, and the other nations the Senator from Arkansas has mentioned, with which we in the Congress have dealt under the mutual security programs?

Mr. FULBRIGHT. I cannot recall any other, unless we include programs such as that of the International Bank which is an international program: But there, certainly, we do not try to provide for special preferences. So far as I know, under the mutual security operations there is no program of a similar nature.

I may say that the whole negotiations for this were really carried on by the Bank; and the Bank deserves the credit for getting the agreement for Germany, England, and Canada to participate.

Mr. KEATING. Is it correct that the funds which we might appropriate pursuant to this Indus Basin development project, to further it, would be turned over to the Bank, for administration?

Mr. FULBRIGHT. That is correct.

Mr. KEATING. And likewise the funds contributed by the other countries would be turned over to the Bank, would they?

Mr. FULBRIGHT. That is correct.

Mr. KEATING. Therefore, is not this the first time that we in the Congress have been confronted with a proposal for our country to participate in what might be called a joint venture with other nations in this regard?

Mr. FULBRIGHT. With the exception I have mentioned, I believe that to be true. Certainly it is true as regards a direct development project. Certainly the one I have mentioned is a joint project, as the Senator knows.

Mr. KEATING. Certainly I would feel uneasy if I voted for the amendment, if I thought it would upset what we have done in the past. But the Senator from Arkansas has assured us that that is not the intention.

Mr. FULBRIGHT. But the Senator from Maryland has submitted the amendment to strike out the waiver. So I hope the Senator from New York will vote against the amendment, and thus will vote to retain the language which now is in the bill.

Mr. KEATING. If the language now in the bill is retained, and if the amendment of the distinguished Senator from Maryland is rejected, then, as I understand it, the President still will follow

the 50–50 provision, unless he is satisfied that to do so would seriously impede or prevent the accomplishment of the purposes of this act.

Mr. FULBRIGHT. That is correct. If the Senator has any confidence in the discretion and program of the President, I am sure the Senator can rely upon the President not to act arbitrarily.

Mr. KEATING. Of course, I have great confidence in the President. Nevertheless, it is our responsibility to lay down guidelines which are to be followed.

The figures the Senator from Arkansas has cited demonstrate how this administration has carried out the mandate that at least 50 percent must be carried in American bottoms.

Mr. FULBRIGHT. That is correct.

Mr. KEATING. The Senator has shown that a considerably larger amount than 50 percent has been carried in American bottoms.

Mr. FULBRIGHT. That is correct.

Mr. KEATING. Therefore, I think that is strong evidence that the President would administer this provision in such a way that he would not depart from the 50–50 arrangement unless he was convinced that it was essential to do so in order to carry out the purposes of the development program.

Mr. FULBRIGHT. I agree completely with what the Senator from New York has said.

Mr. KEATING. How long will this development project last?

Mr. FULBRIGHT. It is a 10-year project. That is one of the things that bothers the administration. Of course we do not know whether in 5 years, in this particular area, it will be possible to compensate, through shipments to other areas, under the MSA, if any decline below 50 percent should occur in regard to the Indus River Basin. We are informed that insofar as possible the administration will compensate by means of other shipments. For instance, suppose there are other shipments into the area, not for the Indus River Basin. We are told that the Executive will try to increase those amounts, so as to make the overall amount at least 50 percent. Only when that can be done will it resort to the waiver.

Mr. KEATING. In that respect, was there not considered a waiver of a character different from this one, which provided for such a situation, and called for compensation by means of the shipments to other areas? Was not that provision placed in the bill?

Mr. FULBRIGHT. The statement about such compensation is contained in the letter from Secretary Dillon to Mr. Casey. In the letter Mr. Dillon stated what he would do. I intend to request that the letter be printed in the RECORD. The material on this subject is in Mr. Dillon's letter to Mr. Casey; in the letter Mr. Dillon explains his reasons for it, and explains what he expects to do, and so forth.

Mr. President, I ask unanimous consent to have printed at this point in the body of the RECORD, so the RECORD will be complete, the letter, dated April 11, 1960, from Mr. Douglas Dillon, Under Secretary, to Mr. Casey.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF STATE,
Washington, D.C., April 11, 1960.

Mr. RALPH E. CASEY,
President, American Merchant Marine Institute, Inc., Washington, D.C.

DEAR MR. CASEY: I refer to your letter of April 6 regarding the meeting with representatives of the maritime industry on April 5 at which we discussed the proposed amendment to the Mutual Security Act relating to the Indus Basin project. I found the meeting helpful also and hope that it clarified the subject for you.

As I stated at the meeting the executive branch has no intention whatsoever of seeking to depart from the established policy set forth in the cargo preference legislation. In seeking an amendment relating to the Indus Basin project we have asked for permissive authority whereunder the President could waive the requirements of the cargo preference legislation with respect to this particular project if he found that the provisions of the cargo preference act could not be fully satisfied without seriously impeding or preventing accomplishment of the Indus Basin project.

As we have explained to the Congress and to you and your associates, we do not foresee need to exercise this authority in the near future. If the present programs of assistance under the Mutual Security Act were to continue at approximately present levels over the period of time that will be required to complete the Indus Basin project, we could probably be reasonably confident that no necessity to waive the provisions of the cargo preference legislation would arise.

Yet the fact that we anticipate ability to compensate within the regular mutual security program for the required proportion of the tonnage deriving from implementation from the Indus Basin project may tend to obscure the importance which attaches to the requested authority to waive the requirements of the cargo preference legislation with respect to this particular project. As you are aware, the very fabric of the planning for this project rests upon its multilateral character and upon the voluntary agreement, by all of the contributors to the Indus Basin Development Fund, to refrain from applying to their contributions the national preference requirements—of whatever nature—which would normally govern the use of such funds. Were the United States to apply preferential conditions to its contribution, we could not logically oppose the application of counterconditions on the contributions of other nations. The welter of conflicting national conditions which might be expected to ensue would complicate the administration of the Indus project to the point where the present proposal would no longer be operable. You will recognize that the amount of time and effort which have been devoted to the achievement of the present solution to the Indus problem have been enormous, and that we may not again be able to arrive at an acceptable solution, should we lose this opportunity. For these reasons, we would not wish to attach any condition of preference to our Indus contribution—although there is no reason to believe that substantial amounts of Indus tonnage would not move on U.S.-flag vessels. Should this amount prove to be lower than that required under the cargo preference legislation, we believe that compensating adjustments in other MSP-financed cargo traffic patterns will obviate the need in the near future to request actual use of the waiver authority. Even if the program of assistance to south Asia declines substantially, we believe that compensating adjustments could hold application of the waiver authority to minimal levels.

As you note in your letter the progress of legislation is such that a bill containing the proposed amendment has been reported by the House Committee on Foreign Affairs. I do not believe that the executive branch should nor appropriately could, withdraw its request for this amendment.

Obviously the matter is one for the Congress to determine and it will have to decide whether it wishes to deny the authority sought. I believe that the authority does not seriously threaten the interest of the maritime industry and that the existence of such authority will provide a useful assurance should the contingency arise which requires its exercise in order to accomplish the important purposes sought through the Indus Basin project.

I believe that you and your colleagues do appreciate the significant objectives which the Indus River Basin project would promote. As you know the delay in the solution of this problem has long prejudiced relationships between India and Pakistan. Progress on this project should be of major significance in reducing international tensions as well as providing major economic benefits in south Asia.

In sum, we have no intention of departing from the established policy on cargo preference. We will exert every effort to avoid any need to exercise the waiver authority which is sought but we believe its possession would be of significant advantage to the U.S. Government.

Sincerely yours,

DOUGLAS DILLON,
Under Secretary.

Mr. KEATING. Mr. President, will the Senator from Arkansas yield further to me?

Mr. FULBRIGHT. I yield.

Mr. KEATING. Was not that provided on page 7 of House bill 11510, as passed by the other body? I refer to the language to the effect that compensating allowances are made in the administration of other programs, in the case of shipments to the same area which the provisions of section 901(b) are applicable.

Mr. FULBRIGHT. That is in the House bill.

Mr. KEATING. Yes; I am referring to the House bill. Would the Senator from Arkansas feel as strongly opposed to language such as that, as he does about the amendment submitted by the distinguished Senator from Maryland?

Mr. FULBRIGHT. Quite so. The administration's letter comments on that, in that, as I explained, the administration will do what it can. But it cannot tell how much the volume of aid will be under the mutual security program to this area, and whether, if it declines—and we hope it will decline—they will be able to compensate.

But the clear statement of the administration is that, if possible, they will compensate in accordance with that language. But they do not wish it to be mandatory.

The point is that, in addition, if it becomes impractical, we want the President to have authority to waive it, if that is necessary—but only in an extreme situation. So the President will have to compensate by means of other shipments into this area, if that is possible. However, they may not be sufficiently large. We hope—I certainly hope—shipments under mutual security into this area will decline.

Mr. KEATING. What is meant by the words "same area?" Can the Senator from Arkansas tell me?

Mr. FULBRIGHT. I think southeast Asia is meant. In other words, there would not be compensation for shipments to South America, let us say. It would have to be for shipments into southeast Asia, where they would compensate in increasing the amount above the 50–50 percent.

Mr. KEATING. Does the Senator from Arkansas feel that to make that arrangement mandatory would be to tie their hands too much?

Mr. FULBRIGHT. That is correct. Not only does the Senator from Arkansas feel that way; it is the way the administration feels. I think, in a multilateral agreement, that special, petty preferences on one little item—this is a small item in the overall program—should not be provided, because it would be clearly resented by other participants in the program.

Mr. KEATING. I thank the Senator.

Mr. COOPER. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield to the Senator from Kentucky.

Mr. COOPER. I understand the reasons which led the Senator from Maryland and Senators from other States which have large shipping interests to want to maintain the principle which has been followed in the past; and I would say in general it is a good principle. But I wish to raise the issue, if it has not already been raised, of what I think perhaps is a larger interest. The Senator knows that since the partition of India, there has been great tension between Pakistan and India. I think anyone who has been there knows the bitterness of the feeling between the two countries. One of their problems has been the use of the waters of the Indus River. It has been believed that if the differences between the two countries over this river could be composed, the resolution of those differences could lead to and establish a first step toward the easing of tensions, and perhaps toward a final settlement of their differences, over a period of years. So it is of great importance to peace and good relations in that area.

Someone may ask, "Well, of what importance is that to the United States? Both of these countries are friends of the United States." Yet the fact that these differences exist between them makes our own relations with those two countries difficult.

The United States has taken the lead in trying to find some way to resolve the differences over the Indus River. Other countries have entered into those negotiations. I think it would be a great mistake, looking to the larger interest of the Nation, looking to the interest of composing the differences between those two countries, and looking to a day when perhaps both friends will not be estranged from the United States because of their own differences, not to make this movement in the right direction.

It seems to me we should adhere to some principle which, in the broad gage, is of importance to the United States; and if we defeat such a broad and general and desirable purpose as this, we shall be doing something which is injurious to the broad interests of the United States.

Mr. FULBRIGHT. I appreciate the statement of the Senator. I think he is absolutely correct. I will close with one other thought.

The administration is required to report to Congress if it does exercise the waiver. If at that time it should appear that the administration did so arbitrarily, and there was no reason for it except it wished to injure American shiping, and so on, I am certain the Senator from Maryland, the Senator from Washington, and other Senators will raise all kinds of noise in this body. I am certain the administration will not do it without sufficient justification. Congress requires the administration to report any waiver to the Congress.

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. BUTLER. The Senator well knows the only thing we could do would be to make a lot of noise, because once this becomes law, the only way we could deal with the situation would be to override a veto of the President. We might talk, but we could do very little about it.

Mr. FULBRIGHT. The Senator shows very little confidence in the President. He is not going to waive this provision arbitrarily.

Mr. BUTLER. It is not a question of confidence in the President of the United States. This is a limitation which would be in effect over a period of 10 years. The State Department has categorically said it does not see any application of it in the foreseeable future.

If Congress were going to stay away and not be in session for 2 or 3 years, there might be some merit to the contention that this provision is needed and there is some reason to put the language in the bill; but the Congress is going to be here. This project will go along the same as ever. All that will happen will be that when American money is used to buy American material in America, half of it will be shipped abroad in American bottoms. We are not interfering with international relations. We are not upsetting anything. We are saying Congress should retain its power to legislate, and not give it to the executive on a 10-year blanket authority. That is what the language does. That is especially true in view of the fact that the Secretary of State has said he sees no application or need for it.

Mr. FULBRIGHT. I regret very much I do not agree with the Senator from Maryland. I do not agree with the significance of it.

Mr. BUTLER. Let me point out that there is being introduced in legislation of this type, for the first time, the principle that the minute any foreign nation puts money in a project, and commingles its funds with ours, they become international funds, and that all national law should be suspended. I do not agree with that philosophy. This is the entering wedge.

Mr. FULBRIGHT. The Senator from Arkansas did not originate it. It originated with the administration.

Mr. BUTLER. The Senator from Arkansas recognizes the validity of the point I have just made; does he not?

Mr. FULBRIGHT. I think the administration and the International Bank have been very wise in what they have done. This provision has no relation to Arkansas, and there is no interest in it from the standpoint of my State. It is only in the interest of the national welfare, and particularly in trying to get other countries to help us bear this burden. I know the Senator from Maryland would not be interested in appropriating money for the entire cost of this project. He would object to that much more than he does to this proposal.

Mr. BUTLER. I respectfully say there is no reason for it. This will in no way affect the contributions of other nations.

The inter-Indus project will go ahead, whether this language is deleted or remains in the bill. The Senator from Arkansas well knows that.

Mr. FULBRIGHT. I do not know that. I know just the opposite. In my opinion, it is just the opposite.

Mr. BUTLER. In addition, the Senator will not quarrel with the fact that we are putting up 80 percent of the money for this purpose; will he?

Mr. FULBRIGHT. The Senator knows loans made by the International Bank have never been on the 50–50 shipping basis. We cannot lend money and say, "We are going to lend you this money, and you are going to pay it back, and at the same time you have got to pay big subsidies to our shipping." We have never done that. The only way the 50–50 provision would apply would be if international operations and other countries were not involved. The part to which it would apply would be the grant part, which I mentioned, the $177 million provision. That is the part to which it could be applied.

Mr. BUTLER. How will the loans be repaid?

Mr. FULBRIGHT. In rupees.

Mr. BUTLER. In soft currency.

Mr. FULBRIGHT. In rupees.

Mr. BUTLER. If the Government ever does get the money back, it will be paid back in rupees.

Mr. FULBRIGHT. That has nothing to do with shipping. We will be repaid in rupees.

Mr. BUTLER. It has a lot to do with the question that, when American money is being paid out, and when America is being given away, we should be allowed to carry half of the material.

Mr. FULBRIGHT. If the Senator believes what he is saying, that this is a giveaway program, he ought to vote against the whole program. If the Senator does not think this program is in the interest of the country, he ought to vote against it. There is no justification in voting for a giveaway program. If that is what the Senator believes, he should vote against the program. I do not believe it is a giveaway program.

Mr. BUTLER. Does the Senator believe a $177 million grant is not a giveaway? If it is not a giveaway, what is it?

Mr. FULBRIGHT. It is an investment in the security of this country.

Mr. BUTLER. To build a dam in the Indus Basin?

Mr. FULBRIGHT. That is correct.

Mr. BUTLER. It may be, or it may not be.

Mr. FULBRIGHT. That is what the President asked.

Mr. BUTLER. It may work against the United States. Nobody knows.

Mr. FULBRIGHT. The President asked for this on that basis. The President has said time and time again that the program, including this part of the program as well as the rest of it, is in the interest of the security of the United States. I have never heard the present President or any other President say to the Senate that we are a charitable institution, an eleemosynary institution, and that all we are doing is looking for places to throw money away.

Mr. BUTLER. Mr. President, will the Senator yield for a further question?

Mr. FULBRIGHT. If the Senator believes what he says, he should never vote for the program.

Mr. BUTLER. I should like to ask the Senator one more question.

Mr. FULBRIGHT: I yield.

Mr. BUTLER. If the amendment fails, even though the State Department has said it can see no use whatever it could make of the language of the bill, it could, nevertheless, the day after the bill became law, put a waiver into effect and deprive American ships of their due proportion of the carrying business, could it not?

Mr. FULBRIGHT. If the Senator wants to assume that these men are liars and are deceitful, that they are against American shipping, they could do so, but I do not think that is the case. I think these men mean what they say.

Mr. BUTLER. Very well.

Mr. FULBRIGHT. These men have given us their solemn assurance, in their letter, that they have no such intention.

Mr. BUTLER. How about the incoming administration? Is there any reason why a new administration should live up to these assurances?

Mr. FULBRIGHT. Most certainly there is.

Mr. BUTLER. Have we any real assurance that a new administration will do so?

Mr. FULBRIGHT. That is the tradition in this country. I have no doubt, regardless of which party wins the election, the administration will live up to the solemn declaration by the Under Secretary of State. I do not see any justification for assuming that these men are trying to sabotage the American merchant marine. That is the reason I read the figures.

The Senator from Maryland surely ought to be satisfied with the enormous subsidy which has been paid out by the country to support the merchant marine.

Mr. BUTLER. If there is such an enormous subsidy which has been paid——

Mr. FULBRIGHT. The reason, of course, is that it costs twice as much to carry the cargo.

Mr. BUTLER. Then why are the President of the United States and the Department of Defense so gravely worried at the present time about the state of the American merchant marine, and how woefully deficient it is? How does the Senator add those things up? They do not add up.

Mr. FULBRIGHT. All I can say is that American shipping has probably been subsidized to such a great extent that the shippers have lost most of their initiative. That often happens to companies and to people when they are not left to exercise a little ingenuity on their own.

Mr. BUTLER. I say to the Senator from Arkansas that there is one American shipping company which has returned to the Treasury of the United States every dollar of subsidy it has ever received, and other companies are returning a high proportion of their subsidies. They are not so laggard as the Senator seems to think. Like all other Americans, the merchant marine is trying to do a good job at the lowest possible cost.

Mr. FULBRIGHT. I am not trying to attack shipping. I have simply supplied the figures which were given to me.

Mr. BUTLER. The Senator is not attacking shipping, but he is trying to take the cargoes away.

Mr. FULBRIGHT. I think the Senator from Maryland ought to be proud of the tremendous job which he and his colleagues have done in getting these subsidies. I wish I could do something like that for some of the poor little programs with which I am associated. The Senator ought to be proud of his job, and not belittle it at all.

Mr. KEATING. Mr. President, will the distinguished Senator from Arkansas yield to me?

Mr. FULBRIGHT. I am ready to yield the floor, but I am glad to yield to the Senator from New York.

Mr. KEATING. I should like to clarify one point. I think the Senator from Arkansas and the Senator from Maryland have proceeded on an assumption which may very well be true, but I wanted to have the point clarified, so that if we leave the language in the bill it will be understood. This is for the whole 10-year period?

Mr. FULBRIGHT. That is correct.

Mr. KEATING. If it were to be mismanaged by the President or by any successor, would it not be open to us to make a different provision, as we made the yearly appropriations thereafter?

Mr. FULBRIGHT. I would certainly think so.

Mr. KEATING. That is my impression.

Mr. FULBRIGHT. Any waiver has to be reported. If there is a waiver the language expressly requires that it will have to be reported to the Congress. At that time, I am sure, there would be a grave questioning of the matter, and of the justification for the action. The action would have to be justified.

Mr. KEATING. In other words, the Senator from Arkansas has indicated that the Senator from Maryland and others might yell about it. Not only could they yell about it, but I might well yell about it also. In addition, would it not be open to change by us, if there were what we felt was improper management of the provisions of the law? Would the matter not be open to us, to make a revision in the annual appropriations to the Bank, for the administration of the fund from year to year?

Mr. FULBRIGHT. I think that certainly could be done. I think the only deterrent would be the wisdom of it under the then existing circumstances.

Mr. KEATING. I agree with the Senator on that point. I thank the Senator for helping to clarify the matter.

I wish to very emphatically express agreement with the views advanced by the distinguished Senator from Kentucky. I lived in India for some 3 years, and I know how very serious is this area of tension between India and Pakistan. It is the hope and the prayer of many that this development project, in which our country is engaging, along with others, will be a source of removal of those tensions and will permit these two great countries to live in peace and in harmony. I certainly think it is a most important single factor in that regard. I would not want to cast any vote which in any way would interfere with the fine development of this basin.

Mr. FULBRIGHT. I thank the Senator very much.

Mr. BUTLER. Mr. President, will the Senator yield to me for a half minute?

Mr. FULBRIGHT. I yield.

Mr. BUTLER. I simply want to clarify the RECORD. As the Senator knows, I have been very close to this 50–50 program.

Mr. FULBRIGHT. I surely do know that.

Mr. BUTLER. I have worked on it, with the Senator from Washington.

Mr. FULBRIGHT. I realize that. I give the Senator full credit.

Mr. BUTLER. I have been close to the program. I have seen many assaults which have been made on it. I have seen the cunning of those assaults.

I do not make the statement on the floor of the Senate that this is the beginning of a way to undermine the 50-50 program. I do not make that statement, because I do not honestly believe it is true. However, this could very well be the broad way the whole 50–50 program could be set aside. All we would need to do is to transfer the mutual security money in any quantity we want to an international bank, and out would go the 50–50 program. We all know that.

This represents the establishment of a policy which could destroy the 50–50 program. I do not say it is being done deliberately, but it is something which could destroy the program. It is my duty to bring that to the attention of the Senate.

Mr. FULBRIGHT. Of course, I think the national interest would be well served if, in the entire program of development in the underdeveloped part of the world, we could obtain participa-

tion by these other countries on a basis such as that represented in this approach. Our whole Government would save an enormous amount of money if we could get such participation.

If the Senator from Maryland, in order to save the 50–50 program, wants the United States to undertake the whole program, he is entitled to want that done. That is the alternative to this kind of program. I do not think it would serve our purposes. It would be vastly more expensive for us.

Mr. President, I only wish to invite the attention of Senators to the fact that the committee, on page 52 of its report, paid special attention to this matter, when it said, near the bottom of the page:

> Notice shall also be given to the Committee on Foreign Relations of the Senate and the Speaker of the House of Representatives of any determination under the first sentence of section 451 (except with respect to unvouchered funds) and under the last clause of the second sentence of section 404, and copies of any certification as to loyalty under section 531 shall be filed with them.

In other words, we especially invite attention to the fact that the Committee on Foreign Relations of the Senate and the Speaker of the House of Representatives would be notified of any waiving. We did not overlook the matter. We tried to make it as plain as we could.

Mr. President, I yield the floor.

Mr. MAGNUSON. Mr. President, I shall be very brief. I should like to speak much longer.

In the first place, this question has nothing to do with the merits of the proposal to do something with the Indus River. The Senator from Maryland and I are for that project, and I have been for such proposals as long as the Senator from Arkansas has, as long as I have been in the Congress.

Second, the question has nothing to do with other countries participating in the World Bank.

Third, I do not know why other countries would fail to go into the program because we suggest hauling some of the cargo in American ships. The Senator from Arkansas says that if we want to destroy this kind of program all we have to do is to insist on the 50–50 policy, which has absolutely nothing to do with it. Why should any other country which wants to go into the program fail or refuse to go into it because we suggest hauling some of the cargo in American ships?

Fourth, I cannot find a bit of testimony by any witness to the effect that the proposed waiver is needed. There may be such testimony, but I do not find it.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. FULBRIGHT. No one ever conceived of the possibility of trying to insist on the 50–50 policy in this kind of program under the Internatonal Bank. It has never been done; and, of course, there is no testimony on the subject. The reason why I have the letter to which I have referred is the amendment made in the House, in an effort to impose the 50–50 arrangement. Of course there is no testimony on it. There is testimony on the Indus River Basin.

Mr. MAGNUSON. There is no testimony on this question at all.

Mr. FULBRIGHT. There is no testimony on the 50–50 policy because it never occurred to anyone that the 50–50 policy would be sought to be applied to this kind of project, because it is so unsuitable.

Mr. MAGNUSON. This is typical of the State Department. Every time it has an opportunity, in connection with some bill, to suggest a waiver of the 50–50 policy, it does so.

The Senator from Arkansas said that the Senator from Maryland and others may not have much faith in the State Department when the Department says it will make up for the difference. The truth of the matter is that the State Department has always been opposed to the 50–50 provision. It has been opposed in principle, and outspokenly opposed. It has tried on every occasion possible to weaken it.

Where this waiver proposal comes from, I do not know, but it was in the testimony. It has nothing to do with the subsidies on American ships. The only reason for the 50–50 provision, which we tried to put into other bills, is to give American ships some cargo, so that we shall not have to pay such high subsidies.

Mr. FULBRIGHT. This is a subsidy.

Mr. MAGNUSON. That is the only reason for it.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. FULBRIGHT. I do not see what the Senator means. This is a subsidy. This is a disguised subsidy. These goods could be shipped in other ships, at less than is charged in American ships. This is a subsidy, only it is disguised under the 50–50 provision.

Mr. MAGNUSON. I think the Senator does not quite understand. We have a law which provides that if ships are to fly the American flag we will pay the difference between foreign operating costs and what it costs to operate American-flag ships. That is the subsidy to which the Senator referred. That runs for 24 years. We pay that subsidy under the law. Also, under the Merchant Marine Act of 1936, if a company makes more than 10 percent profit, there is a recapture, and that money comes back. The more American ships operate, the more cargo they haul, and the less we have to pay in subsidies. We say that, so long as we are paying out our money to go overseas to help people, the least we should do is to give our American-subsidized ships a chance at the cargo, so that we will not pay out as much in subsidies to keep them operating. This is a subsidy, in that we are going to put the cargo on American ships.

I know where this proposal comes from. This is not to satisfy India or Pakistan. They do not care anything about it. This is to satisfy Great Britain. Great Britain has conducted a consistent compaign in the State Department and out of the State Department, ever since we adopted the 50–50 provision. The British have been against it. They have even held meetings on the subject. They held a meeting here this spring, in the hope that that provision would be eliminated. The State Department has recommended that we eliminate it in connection with the agricultural program.

The State Department has said publicly and privately for years that it is opposed to the provision. That is why the Senator from Maryland and I—at least, I speak for myself—have not much faith in what the State Department or Mr. Dillon says in the letter. He did not say so in the testimony. That is why we suggest that if the State Department wants to turn about, and believes in this sort of thing for the American merchant marine, the House amendment would not be harmful. It provides for compensating allowances which are made in the administration of other programs in the same area.

It is my understanding that if the House amendment were put in, the waiver would still be there. I may be mistaken about that; but it is merely a safeguard, because we know the attitude of the State Department with respect to the 50–50 provision.

Mr. GRUENING. Mr. President, may I address an inquiry to the Senator from Washington or the Senator from Arkansas?

Mr. MAGNUSON. I do not know whether I can answer the Senator's question.

Mr. GRUENING. I note in the record that the total cost of the Indus River project will be $1 billion, and that of that $1 billion the United States has obligated itself to pay $515 million, or a little more than half.

Is it not reasonable, therefore, that 50 percent of the shipping should go in U.S. bottoms, leaving 50 percent for the other nations. I find myself puzzled as to why that is not logical, and why, therefore, the amendment of the Senator from Maryland should not prevail, in order to have an equitable distribution of the freight carrying, in proportion to the amount of money the nations involved are spending on the Indus River development project.

Mr. MAGNUSON. The other nations which are putting something in are claiming a part of the shipping. For example, the United Kingdom says that 60 percent of its cargo should go into its ships.

Mr. FULBRIGHT. In what kind of program?

Mr. MAGNUSON. In any foreign program in which they participate.

Mr. FULBRIGHT. I do not know of any program comparable to this. Is the Senator asserting that under the Indus Basin project, with respect to the part the United Kingdom gives, $58 million, they are going to insist that 60 percent go in United Kingdom bottoms?

Mr. MAGNUSON. Yes.

Mr. FULBRIGHT. I do not believe it. Does the Senator have any proof of that?

Mr. MAGNUSON. Yes. That is what they have been carrying.

Mr. FULBRIGHT. I should like to see the proof which the Senator has.

Mr. MAGNUSON. I will put it in the RECORD.

The Senator from Arkansas mentions figures as to the cost. Some 70 percent has gone in American ships. Fifty percent was only the minimum. There is no reason why 100 percent should not go in American ships if they were available; but it costs more to operate American ships.

Mr. FULBRIGHT. Why does it cost more?

Mr. MAGNUSON. Mainly because of increased labor costs. We could send American goods to Pakistan and India in ships flying the Greek flag, with Italian officers and an Indian crew, ships owned by a British company, and get the goods there much cheaper. But I do not think that is the way we want to do business.

I do not care whether it is rupees or dollars that are involved. If we have rupees over there, we pay them some dollars to have the rupees. It is all outgo.

Mr. FULBRIGHT. We gave them wheat mostly.

Mr. MAGNUSON. It is all outgo. We paid for the wheat. It all comes out of the pockets of the taxpayers. What we are trying to do is to say that when the American taxpayer is paying the bill to keep the American merchant marine alive, perhaps we should encourage some of the shipments to go in the American merchant marine, so that we shall not have to pay such high subsidies.

That is the whole purpose. I do not know why the State Department always tries to knock out the 50–50 provision. As the Senator from Maryland knows, this is put in every bill, and how it got into this bill I do not know. Apparently they need not have mentioned it at all, because the Department of State says that they do not intend to use the waiver. They did not testify to the language. Of course they did write a letter to the chairman of the committee later, after the House had put some language in the bill. I do not think that anyone would say that if we left it as it is and did not include a waiver, that these countries would not participate.

Great Britain makes that kind of a threat all the time with respect to the 50–50 provision. The State Department has been against it. I do not say that the State Department is determined to submerge the American merchant marine. However, I do not know that they have been of any particular help to it at any time. I can remember one time when I had a very difficult time getting the State Department to suggest to its employees that if and when they travel on official business they travel in American ships, if space is available. I had a very difficult time with that proposition. They traveled on the *Queens* and on French ships and on Italian ships.

I want to tell the Senate that if any Englishman traveled to his post on an Italian ship, he would be recalled before he got there. They would radio him on the way.

It is not pleasant for the Senator from Maryland and me to stand here defending this 50–50 arrangement. We are trying to keep the American merchant marine flying the American flag. This is no bonanza for the American merchant marine. That is not it at all. He would probably be in much worse shape so far as the American merchant marine is concerned if we did not have the 50–50 cargo arrangement. This has kept it alive in some cases, particularly with respect to some of the nonsubsidized lines—the tramps and the freighters.

I do not know why it is that every time someone suggests something about the American merchant marine this kind of situation arises. Unless we keep this kind of arrangement, we will not do for the American merchant marine what should be done.

I do not know why this provision should be in the bill at all. I cannot for the life of me see why any countries who are participating in this project—even though it is demonstrated how much they are participating, half of it will come out of our pocket anyway—that they will not participate if we have a 50–50 arrangement in the bill. That has no bearing on it at all.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. MAGNUSON. I have prepared some remarks on this subject, and I ask unanimous consent to have them printed in full in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR MAGNUSON

INDUS BASIN DEVELOPMENT—SECTION 204(E)

The mutual security proposals of the Department of State currently before our Congress contain an item of great interest; namely, the Indus Waters project. This project is significant both from its humanitarian intent, involving the future welfare of 40 million people who live in the Indus Basin, and because it promises the possibility of an early settlement of a major dispute which since 1947 has embittered the relations between India and Pakistan. This project is also significant for a third reason. It is a proposal which departs from our normal bilateral approach to foreign assistance and contemplates a cooperative multilateral effort to be taken with five other friendly governments for the financing of this huge program.

Section 404 of the bill contains a provision that such funds as may be appropriated may be used in accordance with requirements, standards, or procedures established by the Bank, rather than with requirements, standards, or procedures concerning such matters set forth in this or other acts. Among the U.S. requirements which would be set aside are the provisions of the Cargo Preference Act. This would be accomplished by providing that funds appropriated for this Indus Basin project may be used without regard to the provisions of section 901(b) of the Merchant Marine Act of 1936, as amended, whenever the President determines that such provisions cannot be fully satisfied without seriously impeding or preventing accomplishment of such purposes.

I can assure Senators that no one is more interested than I in a project of this nature. At the same time, I can assure you that no one is more concerned than I that this action with respect to our protective maritime statutes might be taken on an arbitrary basis which would be detrimental to our workers and our industry.

Witnesses of the executive department have testified and the State Department has publicly announced that there is no immediate need for any waiver of this shipping statute and, in fact, there may never be such need. The concern of the State Department appears to center around the fact that U.S. funds would be commingled with some funds of other countries, and that these other participants and the International Bank might find our contribution unacceptable unless there was a clear-cut separation of our statutes from anything having to do with this project.

Let us not forget that the United States will be putting up some $515 million and five other participating countries are only putting up $130 million. In addition, the World Bank, which will be administering the project, is making a contribution of $103 million. I am given to understand it has been made clear that since the Indus Basin project is only part of our total mutual security program, and since the Cargo Preference Act does not require administration on an individual project basis, there is, in fact, absolutely no justification for seeking this waiver provision.

Substantial as these sums are, as we all know, this Indus project is but a small part of our mutual security programs. The 50–50 law can be fulfilled by applying it to the total foreign assistance program for the area. This fact is well known to the Department of State and they have admitted that if our foreign assistance programs continue anywhere near as at present there would not be any possibility of complications arising with respect to the Indus Basin project. In other words, both from an administrative point of view and from the point of view of any need for present action, there is absolutely no justification for any waiver authority at this time. This is, in fact, confirmed by the Senate committee's report on the bill on page 18, second sentence.

I cannot fail to observe that right from the beginning there has been very arbitrary action in connection with this legislative proposal. My colleagues will recall my comments on March 18 (CONGRESSIONAL RECORD, pp. 5978–5979), when I reminded them that this waiver proposal has been put forward without any consultation with the agency of our Government most directly concerned with the state of our merchant marine. Not only were no consultations held in advance but, now that the facts are out in the open, it is obvious that this whole proposal is unnecessary.

I am, therefore, extremely concerned that the State Department's request to set aside this item of our national law is a symptom of a broader attack on our maritime industry. Is the Department, in effect, preparing to sacrifice our maritime industry as a capricious stunt in the guise of international harmony—using this vague problem of cargo preference administration as a flimsy justification. I surely hope that this is not the case. But frankly I can attribute it to no other cause since no other action could greater please the designs of our European maritime competitors.

The existence of such a waiver authority in connection with mutual security legislation would establish a precedent which strikes at the heart of our maritime industry and its labor and all that this industry is doing to contribute to our commerce, our balance of international payments, and our defense readiness. But beyond that, and this should be the concern of every Member of this body, it is giving approval to the philosophy of allowing an administrative agency to set aside any national law on the flimsiest possible pretext. Certainly if this need for a waiver should arise 5, 6, or 8 years from now and an actual problem is demonstrated, that will be time enough to turn this authority over to the administrative agency. To withhold this provision now will do no harm to the Indus Basin project. Yet

to grant it now could mean great harm to our established policies. I therefore move to strike the last clause of the second sentence of section 404 of this bill, and the related reference to this clause in section 401(c).

Mr. MAGNUSON. I do not wish to be understood as being opposed to the project. That has nothing to do with what I am saying. It is a fine program. It is going to cost $500 million. That may be all right. It is pretty hard to get the money to build a dam in the State of Washington, however.

Mr. GRUENING. Or in Alaska.

Mr. MAGNUSON. That is correct. It is said we cannot afford that, but we can afford $500 million for this project. I am for both.

Mr. GRUENING. Mr. President, will the Senator yield, so I can address an inquiry to the chairman of the committee?

Mr. MAGNUSON. I yield.

Mr. GRUENING. I understand that the total cost of the project will be $1 billion, of which the United States is obligating itself to pay a little more than half, or $515 million.

Is there anything unreasonable in asking that the United States should have an equitable proportion of the shipping? That is exactly what it would get if the Butler amendment were to prevail, and what it may not get otherwise since the bill without the amendment scraps the 50–50 provision.

Mr. FULBRIGHT. All I can say is what I have already said about it. I tried to explain the figures in the bill. This is an agreement that has been negotiated by the International Bank. It is not an MSA undertaking.

Mr. GRUENING. The money comes from the United States, to the extent of $515 million.

Mr. FULBRIGHT. $177 million of it. I have said more than four times that it is $177 million. That is the grant in dollars. That is the U.S. part of the total foreign exchange grants of $307 million. The rest of it is in loans, which are from this country or from the bank or in foreign currencies. In these categories the traditional 50–50 concept would hardly apply.

Mr. GRUENING. Is the House report in error in reporting at page 37 that the total cost of the project is estimated to be slightly more than $1 billion, of which the United States would pay $515 million?

Mr. FULBRIGHT. Well, I cannot make it any plainer than I have already made it.

Mr. GRUENING. This is the report of the House committee. I imagine it is not incorrect. It breaks the U.S. contribution down into the various parts, but it totals $515 million.

Mr. FULBRIGHT. That includes the grant of $177 million. There are also loans to India and to Pakistan, including loans of rupees. In these loans the 50–50 provision does not apply. If we make a loan to a country it pays interest, or is supposed to pay the interest and pay back the loan. Sometimes they pay it in dollars; other times in local currency, depending on the program. This provision does not apply to loans of local currency that already are owned by this country in India. Those loans are generated under Public Law 480. There has never been any application of the 50–50 concept to such loans. Those are the figures that add up to $500 million. The part that would normally be affected by the 50–50 provision is $177 million.

Mr. LAUSCHE. Mr. President, will the Senator yield so that I may answer the question of the Senator from Alaska?

Mr. FULBRIGHT. I should be delighted to have the Senator answer it. I should be very happy if he would answer it.

Mr. LAUSCHE. At page 173 of the testimony before the Senate committee there is set forth by the State Department the figures concerning this project. It shows that the contribution of the U.S. Government was to be $515 million, exactly the figure given by the Senator from Alaska.

Mr. GRUENING. Yes.

Mr. LAUSCHE. That $515 million, however, is broken down as follows: $177 million in grants; $103 million in loans; and $235 million in local currency. That constitutes our participation in the program.

The other nations, which include Australia, Canada, West Germany, New Zealand, and the United Kingdom, are to make grants in the amount of $128 million. The World Bank is to lend $103 million to Pakistan and India. My recollection is that the testimony of the State Department was to the effect that the project would entail a cost of about a billion dollars, evaluating local currency as if it were actually American dollars.

Mr. JOHNSON of Texas. Mr. President, will the Senator from Washington yield to me?

Mr. MAGNUSON. I do not have the floor.

Mr. JOHNSON of Texas. Mr. President, who has the floor?

The PRESIDING OFFICER. The Senator from Washington has the floor.

Mr. JOHNSON of Texas. The Chair says the Senator from Washington has the floor.

Mr. MAGNUSON. Then I yield to the Senator from Texas.

ORDER OF BUSINESS—ORDER FOR RECESS TO 10 A.M. TOMORROW

Mr. JOHNSON of Texas. Mr. President, it appears that it will not be possible to conclude action on the bill this evening. It is desired to conclude action on the pending amendment. Therefore, I ask unanimous consent that when the Senate concludes its deliberations today, it adjourn until 10 o'clock tomorrow morning; and that following the morning hour tomorrow, there be not to exceed 1 hour of debate on each amendment, to be equally divided between the proponent of the amendment and the majority leader, if he is not opposed to the amendment; and that there be not to exceed 2 hours of debate on the bill, the time to be equally divided.

The exact wording of the agreement will follow the usual form which is at the desk.

Mr. MAGNUSON. Mr. President, will the majority leader yield?

Mr. JOHNSON of Texas. I yield.

Mr. MAGNUSON. The Senator from Maryland [Mr. BUTLER] is in the Chamber. Many Senators desire to leave soon. Some have already gone. I wonder if we might also have as a part of the agreement that the Senate will vote on this amendment tomorrow with, say, 10 minutes to a side, or 15 minutes to a side, at the most.

Mr. BUTLER. Mr. President, is there any possibility of disposing of the amendment now?

Mr. MAGNUSON. Mr. President, I yield to the Senator from Louisiana.

Mr. ELLENDER. Mr. President, I send to the desk nine amendments to the pending measure and ask that they be printed and lie on the table.

The PRESIDING OFFICER. The amendments will be received and printed, and will lie on the table.

Mr. JOHNSTON of South Carolina. Mr. President, I have an amendment at the desk. I ask that it also be printed and lie on the table.

The PRESIDING OFFICER. The amendment will be received and printed and will lie on the table.

Mr. MAGNUSON. Mr. President, I yield to the Senator from New York.

Mr. KEATING. Mr. President, I desire to ask another question for the purpose of clarifying the situation, and the doubt is raised by the remarks of the Senator from Washington. As I understand the statement of the Senator from Arkansas, only $177 million is involved, to which the Merchant Marine Act of 1936 would apply in any event, whether or not this provision is included in the bill.

Mr. FULBRIGHT. That is my understanding.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the unanimous-consent agreement previously entered be modified so as to include 15 minutes to each side on the Butler amendment, and 15 minutes to each side on the so-called Douglas amendment, the Douglas amendment to follow action on the Butler amendment. I hope that the Senate can conclude action on those amendments this afternoon.

Mr. KEATING. Mr. President, reserving the right to object, does the Senator from Illinois feel that 15 minutes is sufficient for the presentation of his amendment?

Mr. DOUGLAS. Yes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas?

Mr. JOHNSTON of South Carolina. Does that concern only two amendments?

Mr. JOHNSON of Texas. No; it concerns all amendments.

Mr. JOHNSTON of South Carolina. I expect to speak for an hour on my amendment.

Mr. JOHNSON of Texas. The Senator can take some of the time allotted for debate on the bill, and I assure him that, if necessary, I will call up another amendment to provide sufficient time for him.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The unanimous-consent agreement to limit debate on S. 3058, to amend further the Mutual Security Act of 1954, as amended, and for other purposes, reduced to writing, is as follows:

UNANIMOUS-CONSENT AGREEMENT

Ordered, That, effective on Friday, April 29, 1960, at the conclusion of routine morning business, during the further consideration of the bill (S. 3058), to amend further the Mutual Security Act of 1954, as amended, and for other purposes, debate on any amendment, motion, or appeal, except a motion to lay on the table, shall be limited to 1 hour, to be equally divided and controlled by the mover of any such amendment or motion and the majority leader: *Provided,* That in the event the majority leader is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or some Senator designated by him: *Provided further,* That no amendment that is not germane to the provisions of the said bill shall be received.

Provided further, If a yea-and-nay vote is ordered on any amendment, the vote will be postponed until Monday, May 2, 1960, at which time, before each rollcall vote, the proponent of any such amendment will be entitled to an additional 5 minutes with 5 minutes in opposition thereto, controlled under the same conditions set forth above. Likewise, debate on any other motions or amendments shall be limited to 10 minutes and equally divided as set forth above.

Ordered further, That on the question of the final passage of the said bill debate shall be limited to 2 hours, to be equally divided and controlled, respectively, by the majority and minority leaders: *Provided,* That the said leaders, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, motion, or appeal.

Mr. MAGNUSON. Mr. President, is it clear that we shall vote on the Butler amendment tomorrow?

Mr. JOHNSON of Texas. No; we shall vote this evening. Fifteen minutes has been allotted to each side. Then we shall vote on the Douglas amendment tonight, 15 minutes to a side having been allotted to that amendment.

Then, except for the transaction of routine business, it is planned to have the Senate convene at 10 o'clock tomorrow morning. That is a part of the agreement.

Mr. MAGNUSON. I thank the Senator.

LEGISLATIVE PROGRAM

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that, notwithstanding the unanimous-consent agreement just entered, I may be permitted to announce certain bills cleared this week by the policy committee.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. I ask for the attention of the minority leader.

The following bills have been cleared by the policy committee:

Order No. 1304, H.R. 9861, to continue for a temporary period the existing suspension of duty on certain istle or Tampico fiber.

Order No. 1305, H.R. 9862, to continue for 2 years the existing suspension of duties on certain lathes used for shoe last roughing or for shoe last finishing.

Order No. 1307, S. 1857, to promote the foreign trade of the United States in grapes and plums, to protect the reputation of American-grown grapes and plums in foreign markets, and for other purposes.

Order No. 1308, S. 2618, to authorize the exchange of certain war-built vessels for more modern and efficient war-built vessels owned by the United States.

Order No. 1309, H.R. 6482, relating to the credits against the unemployment tax in the case of merged corporations.

Order No. 1310, S. 3387, to authorize appropriation for the Atomic Energy Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and for other purposes.

Order No. 1311, S. 3106, to change the title of the Assistant Director of the Coast and Geodetic Survey.

Order No. 1312, S. 3189, to further amend the shipping laws to prohibit operation in the coastwise trade of a rebuilt vessel unless the entire rebuilding is effected within the United States, and for other purposes.

Order No. 1313, H.R. 9084, to repeal certain retirement promotion authority of the Coast and Geodetic Survey.

Order No. 1314, H.R. 4049, to amend the Federal Aviation Act of 1958 in order to authorize free or reduced rate transportation for certain additional persons.

Order No. 1315, House Concurrent Resolution 582, providing under section 3(e) of the Strategic and Critical Materials Stock Piling Act the express approval of the Congress for the disposal from the national stockpile of approximately 470,000 long tons of natural rubber.

Order No. 1317, S. 3019, to provide for certain pilotage requirements in the navigation of U.S. waters of the Great Lakes, and for other purposes.

Order No. 1318, S. 1781, to provide for cooperative unit programs of research, education, and demonstration between the Federal Government of the United States, colleges and universities, the several States and territories, and private organizations, and for other purposes.

Order No. 1319, S. 3058, to amend further the Mutual Security Act of 1954, as amended, and for other purposes. That bill is the pending business.

Order No. 1320, H.R. 10550, to extend the Export Control Act of 1949 for 2 additional years.

Order No. 1321, S. 2575, to provide a health benefits program for certain retired employees of the Government. That bill is scheduled for action, but with reservations which have not yet been cleared up. Further notice will be given before that bill is brought up. I have talked with the Senator from Delaware about it, and it is not yet completely clear what disposition will be made of the bill.

Order No. 1323, H.R. 8241, to amend certain provisions of the Civil Service Retirement Act relating to the reemployment of former Members of Congress. That bill also is scheduled provisionally.

Order No. 1324, Senate Joint Resolution 166, authorizing the Architect of the Capitol to permit certain temporary construction work on the Capitol Grounds in connection with the erection of a building on privately owned property adjacent thereto.

Order No. 1325, H.R. 10045, to amend the act entitled "An act to provide better facilities for the enforcement of the customs and immigration laws," to increase the amounts authorized to be expended.

Order No. 1326, H.R. 11415, to provide for the designation of a portion of the District of Columbia as the "Plaza of the Americas."

Order No. 1327, S. 3072, to authorize the Secretary of the Treasury to effect the payment of certain claims against the United States.

Order No. 1328, H.R. 8289, to accelerate the commencing date of civil service retirement annuities, and for other purposes.

The policy committee has also previously cleared Calendar No. 950, S. 2653, to amend the Communications Act of 1934, to establish jurisdiction in the Federal Communications Commission over community antenna systems. That bill was introduced by the distinguished Senator from Rhode Island [Mr. PASTORE]. The policy committee decided today that it would be in order to bring up that bill on May 11. I shall not participate in the consideration of that bill, but it will be called up by the able Senator from Montana [Mr. MANSFIELD] or the author of the bill, the Senator from Rhode Island [Mr. PASTORE]. However, Senators should be on notice that it has been cleared for consideration and is eligible to be called up at any time on or after May 11. That is Calendar No. 950, S. 2653.

Mr. President, I shall now yield to any Senator who has a question concerning the proposed legislation. If no Senator has any questions I yield the floor, so that the time limitation can begin to run on the amendment of the Senator from Maryland.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10234) making appropriations for the Department of Commerce and related agencies for the fiscal year ending June 30, 1961, and for other purposes; that the House receded from its disagreement to the amendments of the Senate numbered 12, 23, and 27 to the bill, and concurred therein, and that the House insisted upon its disagreement to the amendment of the Senate numbered 13 to the bill.

MUTUAL SECURITY ACT OF 1960

The Senate resumed the consideration of the bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes.

Mr. MAGNUSON. Mr. President, I hope the Senator from Arkansas can assure me that the House has provided

language to satisfy all of us in this matter. We need not have any controversy about it. If we accept language that is different but similar in purpose, it would be in conference anyway, and probably we could work out something which would place us in agreement.

The PRESIDING OFFICER. The Senate is operating under the unanimous-consent agreement, and the Senator from Washington has used his 15 minutes.

Mr. MAGNUSON. No; I have not used 15 minutes; I have just started.

The PRESIDING OFFICER. The Chair is in error. The Senator from Maryland has 15 minutes.

Mr. JOHNSON of Texas. Mr. President, who has the floor?

Mr. MAGNUSON. The Senator from Texas has the floor now.

Mr. JOHNSON of Texas. Mr. President, will the Chair recognize me?

The PRESIDING OFFICER. The Chair recognizes the Senator from Texas.

Mr. JOHNSON of Texas. The distinguished Senator from Idaho [Mr. CHURCH] desires to have an amendment he proposes to the bill voted upon this evening. He tells me that he expects to consume about an hour's time on the amendment. I ask unanimous consent that there may be 45 minutes allotted to each side on the amendment, and that the consideration of the Church amendment follow the consideration of the two amendments as to which unanimous-consent agreements have previously been entered.

Mr. BUTLER. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. BUTLER. As soon as the vote has been taken on the pending amendment, I have another amendment to offer. I shall not do anything beyond offering it, and the Senator from Arkansas may take 5 or 10 minutes, if he wishes to do so. But I should like to have a vote on that amendment, too. The Senator from Illinois [Mr. DOUGLAS] has agreed to let me proceed with that amendment before his amendment is called up, because my second amendment is to the same section of the bill, and for the sake of continuity it should be considered immediately after the amendment now being considered. I had originally intended to offer it immediately after the vote on the pending amendment.

Mr. JOHNSON of Texas. Mr. President, I am informed by the minority leader that objection will be made to my last request.

I am sorry if that is true, because I do not believe that the Senator from Idaho would have given consent to the request except for the plea of the leadership that such an agreement be entered into; and at that time I did not know that this would be the situation.

I am prepared to ask unanimous consent to have the whole arrangement vitiated, and to stay here late tonight or meet early in the morning, or to follow any other arrangement.

We hear much talk about wanting to have the Senate transact the necessary business, and much criticism in regard to Congress being behind in its schedule; and there are people who complain, on the airwaves, about the lack of progress in the Congress. But then, after I spend a great deal of time in attempting to work out a satisfactory program, we are told that certain Senators have out-of-town engagements, and wish to have votes postponed.

Mr. President, I serve notice now that during the remainder of the session we may have late sessions and Saturday sessions; and it will not be possible to postpone votes because a Senator wishes to attend a pie supper somewhere.

Certainly it is almost impossible to do the necessary work if various Senators wish to have votes postponed until they return to the Senate from out-of-town engagements. Some of them may be in Europe; some of them may be in the North or the South or the East or the West. But certainly we shall not make much progress if we continue to postpone votes merely because certain Senators request that the votes be postponed or delayed until they can return to town, after fulfilling out-of-town engagements.

We have before us much important proposed legislation, and there is much more to come. We must act on a housing bill, on a bill for medical care for the aged, on social security legislation, on the number of bills on the calendar which we cleared today, on pay bills for the Federal employees, on a minimum-wage bill, and on many other bills which will be brought up by motion this year, and will be acted on this year if I can get a majority of the Senate to remain here.

Of course, the leadership does not have the power to compel Senators to attend the sessions. Furthermore, even if Senators do attend the sessions, they can talk the program to death, if they wish to do so. But certainly Senators should not ask the Senate to agree to postpone its action and its votes simply because certain Senators expect to be absent, because of other engagements.

Personally, I have never made such a request. The other day, when we were told that there was a desire to have the Senate act on one of the appropriation bills, I was asked what my pleasure was in that connection, inasmuch as I was to be away. I said, "Bring it up, and vote on it, and pass it. I cannot ask other Senators to wait just because I must be out of town."

I have given the Senator from Idaho my assurance that I shall cooperate with him; and in these circumstances I shall agree to do whatever he suggests.

Mr. CHURCH. Mr. President, if the distinguished minority leader intends to object, then I shall have to wait until tomorrow to make my presentation, because my amendment is not a pro forma one, and I believe it deserves the attention of the Senate. In addition, I should like to have the vote on my amendment come immediately after the conclusion of the debate on it.

Therefore, the objection which I understand the Senator from Illinois intends to make would require that my amendment go over until tomorrow, so that the vote on it could come immediately following the debate on it.

Mr. JOHNSON of Texas. Would the Senator object to having us proceed to consider the other amendments this evening? Would that embarrass him in any way?

Mr. CHURCH. Certainly not. The only difficulty is that I have already advised the press that I would bring up the amendment today.

Mr. FULBRIGHT. Why can we not handle today both this amendment and the others? That will not take very long.

Mr. JOHNSON of Texas. It seems to me that, under the agreement, the Senator from Idaho could obtain recognition after the other amendments were disposed of. Then he would have an hour, instead of the 45 minutes he has requested. It seems to me such a procedure would reduce the total amount of time to be used.

Mr. DIRKSEN. Mr. President, will the Senator from Texas yield to me?

The PRESIDING OFFICER (Mr. LUSK in the chair). Does the Senator from Texas yield to the Senator from Illinois?

Mr. JOHNSON of Texas. I yield.

Mr. DIRKSEN. Mr. President, I try not to be offensive in connection with these matters; and I think the distinguished Senator from Idaho knows that I do not. But I point out that for a long, long time the minority leader has not been out of town. Certainly I have attended the sessions religiously, day after day, and at the same time I have taken care of my duties both in the Committee on Labor and Public Welfare and in the Judiciary Committee, and at the same time I have also taken care of my minority leadership duties.

I am prepared to be here at any time. However, the session today began at 10 a.m. We devoted 2 hours to the testimonials to the senior Senator from Montana, after we had had to take the time required to attend the meeting with the other body in honor of His Majesty, the King of Nepal.

There has been no notice that a late session would be held this evening. Members do incur commitments; that is inherent in this work. I try to satisfy our commitments if I possibly can. That is why I said that if the Senator from Idaho is to speak for 45 minutes, I would have to object, because if there is to be a yea-and-nay vote on the Butler amendment on the Douglas amendment——

Mr. JOHNSON of Texas. Mr. President, will the Senator from Illinois yield?

Mr. DIRKSEN. I yield.

Mr. JOHNSON of Texas. First of all, let me say that since we began to talk about the Butler amendment, the proponents have informed me that they are prepared to vote now on the amendment, if we stop talking. In that way, I believe we shall save enough time to permit the amendment of the Senator from Idaho to be brought up today.

In the next place, let me say that although I had to be out of town, I did not request that any votes be delayed during that period of time. Furthermore, the Senator from Illinois [Mr. DIRKSEN] was here all during that period. I commend him for it, and for not asking the Senate to adjourn at any time while he was out of town.

Mr. DIRKSEN. But I have not been out of town since February.

Mr. JOHNSON of Texas. Of course I realize that. The Senator from Illinois has most ably performed his duties. He and I did all we could to have the Senate proceed to vote on the various measures; and the Senator did not ask the Senate to postpone any vote until his return.

Mr. DIRKSEN. That is correct.

Mr. JOHNSON of Texas. I hope every Senator will be guided by that example.

The only reason why we have this problem now is that certain Senators desire to be excused for the remainder of the evening.

Therefore, I wish to state now that we are giving notice that during the next 2 months there will be Saturday sessions and there will be evening sessions, if they become necessary—and I believe they will become necessary.

If Senators will now yield back the remainder of the time available to them, I believe we can now handle these amendments.

Mr. BUTLER. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. BUTLER. I have made arrangements with the Senator from Washington and the Senator from Arkansas for the vote to be taken on the companion amendment; and then we shall yield back the remainder of the time available to us.

Mr. JOHNSON of Texas. Then I shall withdraw my request in regard to the Church amendment, with the understanding—and I so request—that 45 minutes be available to each side in connection with that amendment.

Mr. DIRKSEN. That will mean a total of one hour and a half.

Mr. CASE of South Dakota. Mr. President, reserving the right to object, let me ask whether there will be a vote tonight.

Mr. JOHNSON of Texas. First, Mr. President, let me ask the Senator from Arkansas how much time he will need in connection with the Church amendment.

Mr. FULBRIGHT. I shall not need very much time.

Mr. CASE of South Dakota. Mr. President, has there been an answer to my inquiry?

Mr. GORE. Mr. President, I call for the regular order.

The PRESIDING OFFICER. Is there objection to the request?

Mr. CASE of South Dakota. Mr. President, I object.

Mr. DIRKSEN. Mr. President, I ask the Senator to withhold his objection for a moment.

Mr. JOHNSON of Texas. Mr. President, I renew my request that 45 minutes be allowed to each side, in connection with the Church amendment. I believe that will meet with the pleasure of the Senator from Illinois. If we do not do that, there will be 30 minutes for each side, under the agreement which already has been entered into. So I believe we shall save time by proceeding in the way I suggest.

The PRESIDING OFFICER. Is there objection to the request?

Mr. BUTLER. Let me ask whether it will be agreeable for the Senate to vote—without debate—on the amendment which I shall send to the desk immediately after the vote which is about to be taken.

Mr. JOHNSON of Texas. Yes, to vote without further debate.

Mr. KEATING. Let me ask what will happen if a substitute for the Butler amendment is offered.

Mr. JOHNSON of Texas. I am not aware of any such proposal. Does the Senator have such a proposal to make?

Mr. KEATING. I think a substitute might evolve here which would be to take the House language.

Mr. BUTLER. That is what my second amendment will do.

Mr. KEATING. That is, assuming the defeat of the first amendment.

Mr. BUTLER. That is right.

Mr. KEATING. That is probably a fair assumption.

Mr. CASE of South Dakota. Mr. President, reserving the right to object, does the unanimous consent request permit 45 minutes on both sides on the Church amendment?

The PRESIDING OFFICER. That is correct.

Mr. GORE. Mr. President, I call for the regular order.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered.

The unanimous-consent agreement, as subsequently reduced to writing, is as follows:

Ordered, That, effective immediately, during the consideration of the bill (S. 3058), to amend further the Mutual Security Act of 1954, as amended, and for other purposes, debate on amendments by Senators BUTLER, of Maryland, and DOUGLAS, of Illinois, be limited to 15 minutes in favor thereof and 15 minutes in opposition thereto, and an amendment by Senator CHURCH, of Idaho, be limited to 45 minutes in support thereof, and 45 minutes in opposition thereto: *Provided further*, That Senator BUTLER be permitted to offer a second amendment to be voted on without debate.

The PRESIDING OFFICER. The question is on agreeing to the Butler amendment.

Mr. BUTLER. Mr. President, I yield back all my time.

Mr. JOHNSON of Texas. I yield back all my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Maryland [Mr. BUTLER] to the mutual security bill. On this question the yeas and nays have been ordered, and the Clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from Alaska [Mr. BARTLETT], the Senator from Nevada [Mr. BIBLE], the Senator from Virginia [Mr. BYRD], the Senator from West Virginia [Mr. BYRD], the Senator from Nevada [Mr. CANNON], the Senator from Colorado [Mr. CARROLL], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Rhode Island [Mr. GREEN], the Senator from North Carolina [Mr. JORDAN], the Senator from Oklahoma [Mr. KERR], the Senator from Montana [Mr. MURRAY], and the Senator from Virginia [Mr. ROBERTSON], are absent on official business.

I further announce that the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

On this vote, the Senator from Colorado [Mr. CARROLL] is paired with the Senator from North Carolina [Mr. JORDAN]. If present and voting, the Senator from Colorado would vote "nay," and the Senator from North Carolina would vote "yea."

On this vote, the Senator from Missouri [Mr. SYMINGTON] is paired with the Senator from Nebraska [Mr. HRUSKA]. If present and voting, the Senator from Missouri would vote "nay," and the Senator from Nebraska would vote "yea."

On this vote, the Senator from Massachusetts [Mr. KENNEDY] is paired with the Senator from Alabama [Mr. SPARKMAN]. If present and voting, the Senator from Massachusetts would vote "nay," and the Senator from Alabama would vote "yea."

On this vote, the Senator from Montana [Mr. MURRAY] is paired with the Senator from Nevada [Mr. BIBLE]. If present and voting, the Senator from Montana would vote "nay," and the Senator from Nevada would vote "yea."

I further announce that, if present and voting, the Senator from Alaska [Mr. BARTLETT], the Senator from West Virginia [Mr. BYRD], the Senator from Nevada [Mr. CANNON], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Oklahoma [Mr. KERR], and the Senator from New Mexico [Mr. ANDERSON] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BEALL], and the Senator from New Hampshire [Mr. BRIDGES] are necessarily absent.

The Senator from New York [Mr. JAVITS] is absent by leave of the Senate, to attend, as Chairman of the Economic Committee, a meeting of the NATO Parliamentarians Conference at Strasbourg, France.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are absent on official business as members of the Board of Visitors of the U.S. Military Academy.

On this vote, the Senator from Nebraska [Mr. HRUSKA] is paired with the Senator from Missouri [Mr. SYMINGTON]. If present and voting, the Senator from Nebraska would vote "yea," and the Senator from Missouri would vote "nay."

The result was announced—yeas 33, nays 44, as follows:

[No. 170]

Cannon	Jordan	

So Mr. BUTLER's amendment to the committee amendment was rejected.

Mr. BUTLER. Mr. President, I offer the amendment which I send to the desk and ask to have stated for the information of the Senate.

The PRESIDING OFFICER. The amendment will be stated for the information of the Senate.

The LEGISLATIVE CLERK. At the end of section 404 it is proposed to add the following:

Provided, That compensating allowances are made in the administration of other programs to the same area to which the requirements of said section 901(b) are applicable.

Mr. BUTLER. Mr. President, I ask for the yeas and nays on this amendment.

The yeas and nays were ordered.

Mr. BUTLER. Mr. President, this amendment is the House language, and it would provide compensating tonnage for cargoes denied under any waiver.

Mr. FULBRIGHT. Mr. President, I only wish to say, in response, that this is the House language and if this is agreed to the language would not be involved in conference. We would have to accept the language, with no opportunity to change it. It is much worse than the language we have voted down. I hope the Senate will not agree to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Maryland [Mr. BUTLER]. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from Alaska [Mr. BARTLETT], the Senator from Nevada [Mr. BIBLE], the Senator from Virginia [Mr. BYRD], the Senator from West Virginia [Mr. BYRD], the Senator from Nevada [Mr. CANNON], the Senator from Colorado [Mr. CARROLL], the Senator New Mexico [Mr. CHAVEZ], the Senator from Rhode Island [Mr. GREEN], the Senator from North Carolina [Mr. JORDAN], the Senator from Oklahoma [Mr. KERR], the Senator from Montana [Mr. MURRAY], and the Senator from Virginia [Mr. ROBERTSON] are absent on official business.

I further announce that the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

On this vote, the Senator from Colorado [Mr. CARROLL], is paired with the Senator from North Carolina [Mr. JORDAN]. If present and voting, the Senator from Colorado would vote "nay" and the Senator from North Carolina would vote "yea."

On this vote, the Senator from Missouri [Mr. SYMINGTON] is paired with the Senator from Nebraska [Mr. HRUSKA]. If present and voting, the Senator from Missouri would vote "nay" and the Senator from Nebraska would vote "yea."

On this vote, the Senator from Massachusetts [Mr. KENNEDY] is paired with the Senator from Alabama [Mr. SPARKMAN]. If present and voting, the Senator from Massachusets would vote "nay" and the Senator from Alabama would vote "yea."

On this vote, the Senator from Montana [Mr. MURRAY] is paired with the Senator from Nevada [Mr. BIBLE].

If present and voting, the Senator from Montana would vote "nay" and the Senator from Nevada would vote "yea."

I further announce that, if present and voting, the Senator from Alaska [Mr. BARTLETT], the Senator from West Virginia [Mr. BYRD], the Senator from Nevada [Mr. CANNON], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Oklahoma [Mr. KERR], the Senator from New Mexico [Mr. ANDERSON], and the Senator from Louisiana [Mr. ELLENDER] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BEALL] and the Senator from New Hampshire [Mr. BRIDGES] are necessarily absent.

The Senator from New York [Mr. JAVITS] is absent by a leave of the Senate, to attend, as Chairman of the Economic Committee, a meeting of the NATO Parliamentarians Conference at Strasbourg, France.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are absent on official business as members of the Board of Visitors of the U.S. Military Academy.

On this vote the Senator from Nebraska [Mr. HRUSKA] is paired with the Senator from Missouri [Mr. SYMINGTON]. If present and voting, the Senator from Nebraska would vote "yea," and the Senator from Missouri would vote "nay."

The result was announced—yeas 32, nays 44, as follows:

[No. 171]

So Mr. BUTLER's amendment to the committee amendment was rejected.

Mr. DOUGLAS. Mr. President, on behalf of myself and 28 colleagues I call up my amendment identified as 4–27–60—C. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. JOHNSON of Texas. Mr. President, I move that the Senate reconsider the vote by which the last two amendments were agreed to.

Mr. FULBRIGHT. Mr. President, I move to table that motion.

The motion to table was agreed to.

The PRESIDING OFFICER. The clerk will state the amendment offered by the Senator from Illinois.

The LEGISLATIVE CLERK. On page 11, between lines 8 and 9, insert the following:

STATEMENT OF POLICY

SEC. 2. Section 2 of the Mutual Security Act of 1954, as amended, which is a statement of policy, is further amended by adding at the end thereof the following:

"(f) It is the sense of the Congress that inasmuch as—

"(1) the United States favors freedom of navigation in international waterways and economic cooperation between nations; and

"(2) the purposes of this Act are negated and the peace of the world is endangered when nations which receive assistance under this Act wage economic warfare against other nations assisted under this Act, including such procedures as boycotts, blockades, and the restriction of the use of international waterways;

assistance under this Act and the Agricultural Trade Development and Assistance Act of 1954, as amended, shall be administered to give effect to these principles, and, in all negotiations between the United States and any foreign state arising as a result of funds appropriated under this Act or arising under the Agricultural Trade Development and Assistance Act of 1954, as amended, these principles shall be applied, as the President may determine, and he shall report on measures taken by the administration to insure their application."

Mr. JOHNSON of Texas. Mr. President, as I understand, 15 minutes of debate is allowed to each side on the amendment.

The PRESIDING OFFICER (Mr. FREAR in the chair). The Senator is correct.

Mr. JOHNSON of Texas. The time of the proponents is to be controlled by the Senator from Illinois, and the

time of the opponents is to be controlled by the minority leader.

The PRESIDING OFFICER. The Senator is correct.

Mr. JOHNSON of Texas. At the end of a period not to exceed 30 minutes we will have a yea-and-nay vote on the Douglas amendment. Then we will have the Church amendment before us, and then we will vote on that amendment in approximately 50 minutes after we conclude voting on the Douglas amendment. I want all Senators to be on notice.

Mr. DOUGLAS. Mr. President, the amendment, when it was submitted, had 19 sponsors. Since then, the following additional Senators have asked to cosponsor it: Messrs. MURRAY, SYMINGTON, BUSH, MCNAMARA, CARROLL, ENGLE, HARTKE, KEFAUVER, JAVITS, and WILEY.

Mr. YARBOROUGH. Mr. President, will the Senator yield?

Mr. DOUGLAS. I yield.

Mr. YARBOROUGH. I desire to be added as a cosponsor.

Mr. DOUGLAS. Also the Senator from Texas [Mr. YARBOROUGH].

This amendment restores to the bill language which is included in the bill as passed by the House, but which was omitted in the draft which the Senate committee has reported to the Senate. What it does is to say, first, that it is the sense of Congress that we favor freedom of navigation in international waterways, and that the purposes of the Mutual Security Act are negated and the peace of the world is endangered when nations which receive assistance under this act wage economic warfare against other nations assisted under this act, including such procedures as boycotts, blockades, and restrictions of the use of international waterways.

The amendment then goes on to provide that our Government's assistance shall be administered to give effect to these principles and the principles shall be applied in our negotiations, as the President may determine.

This policy statement clearly covers the action of the United Arab Republic under President Nasser in not only prohibiting Israeli ships from using the Suez Canal, but also in prohibiting ships which carry cargoes either from or to the State of Israel from using the Suez Canal.

This action by President Nasser is in clear violation of the Suez Canal Convention of 1888, which laid down the original rules under which the Suez Canal was to be governed. It is contrary to the 1951 decision of the United Nations Security Council. It is also in clear violation of the pledge which President Nasser made in 1956, when he nationalized the Suez Canal.

These clear pledges have been violated by Nasser and by the Arab Republic. Thus far the United States has done absolutely nothing effective to check that action.

The World Bank has made a loan of $56 million to broaden and deepen the Suez Canal. But it did not attach any conditions whatsoever to that loan, and has refused to hold it up pending the United Arab Republic's compliance with U.N. decisions and its own pledges.

The pending bill provides economic assistance to Nasser. The amendment simply provides that in administering this aid, the President shall try to secure compliance with the principles of freedom of navigation and economic cooperation to which we all subscribe.

This is a matter of basic principle. It is not, however, binding upon the President. The President is given the power not to apply the principle if he so desires. It expresses the sentiment and the sense of Congress that we should not give assistance to a country if it is in violation of these pledges, unless the President determines it is in the national interest to do so.

It is a very mild resolution indeed. I do not see how the Senate can properly refuse to adopt it. I am surprised, indeed, that the committee is not willing to accept it.

I know there are some who say that all it will do is to get Nasser's back up and stiffen his resistance. This is the story we have been hearing for years, and the situation has been getting worse, despite the fact that we have been doing nothing but placating Nasser and actually increasing our aid to him.

I know that it is sometimes said Israel is prospering more than the other nearby countries; therefore it does not need any assistance of this type. It is true that Israel is prospering more than the Arab countries, but it is the result of tremendous effort on its part. If there were no boycott, its development would be speeded up and our aid programs could be reduced.

It is extraordinary that we should penalize Israel by permitting this boycott to remain in effect without effective efforts to end it. There comes a time, when international principles are continuously challenged and flouted, that the supporters of those principles must stand up against the violators.

Mr. President, in further elaboration of the purpose of the amendment, I ask unanimous consent to have printed in the RECORD at this point a statement I have prepared on it.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR DOUGLAS

THE AMENDMENT

We are asking the Senate to approve an amendment to the statement of policy of the Mutual Security Act which was recommended by the House Committee on Foreign Affairs and which has already been approved by the House of Representatives. It appears as section 2 in the House bill—H.R. 11510. This amendment is unfortunately not before us in the Senate bill. The Senate Committee on Foreign Relations reported out the mutual security bill before the House had completed action on its draft.

The amendment puts the Congress of the United States on record in favor of freedom of navigation in international waterways and economic cooperation between nations. It declares that the purposes of the Mutual Security Act are negated and the peace of the world is endangered when nations which receive assistance under this act wage economic warfare against other nations assisted under this act, including such procedures as boycotts, blockades and restriction of the use of international waterways.

The House amendment calls upon the administration to give effect to these principles in the administration of both the Mutual Security Act and the Agricultural Trade Development and Assistance Act of 1954. But it should be made clear that the authority of the President for the administration of American foreign policy is respected. He is asked to carry out these principles as he may determine. This amendment is not an unqualified ban on assistance to nations which flout these principles. On the other hand, this statement of policy, as an expression of the opinion of Congress and the views of the American people, should reinforce the administration in its efforts to bring an end to these practices and to promote freedom of navigation, economic cooperation and peace in the Middle East.

I believe that this amendment does accurately reflect the views of the Congress of the United States and the administration's policy. Our Department of State has frequently put itself on record in favor of the principles here espoused. And it is consistent with the principles and purposes of the United Nations Charter. The question that arises, therefore, is whether it serves any purpose to reiterate these views in the Mutual Security Act. I feel strongly that it does.

THE SUEZ SITUATION

The House Committee on Foreign Affairs made clear in its report to Congress that this amendment relates to the continuing restrictions on the movement of commerce through the Suez Canal. The report said: "The Committee on Foreign Affairs has followed closely developments relating to the use of the Suez Canal and believes that the United States has not done as effective a job as it should have in urging the removal of the restrictions on the free movement of commerce through the canal." The committee proposed its amendment "with this and other situations in various parts of the world in mind."

I know there are two points of view on this issue. There is no difference of opinion at all on the proposition that the Suez Canal should be open to the shipping of all nations. The question is whether it serves the attainment of that goal by taking this action here in the name of the American people. Some believe that it is better to say or do nothing because, they believe, little by little the situation in the Middle East will improve and there will be a gradual evolution toward cooperation and peace. But, in the light of developments in the last year, I am afraid that it is unrealistic to suggest that peace in this troubled area will come by itself. The facts testify to the contrary.

The situation in the Suez Canal has deteriorated in the last 12 months and both the United Nations and the United States have been unable to arrest that unfortunate and dangerous trend. Beginning with the Egyptian war against the State of Israel in 1948, and down to 1959, the Egyptian Government refused to permit the passage of Israel flagships. This action has been declared illegal by the United Nations Security Council and has evoked protest from our own Government. Our Government has always maintained that the Suez Canal should be open to all nations without discrimination. But the situation changed for the worse last year. The Egyptian Government instituted a new policy. It began to bar the ships of all nations, regardless of the flag they carried, as long as those ships were carrying cargoes to and from Israel. This represented a worsening of the blockade and an intensification of the Arab effort to strangle Israel's economy.

Nevertheless, the Western World has gone forward with a program of generous economic assistance to the United Arab Republic, and this was climaxed last December by the World Bank, which loaned the United

Arab Republic $56 million to widen and deepen the Suez Canal—a commendable project in itself—at a time when two ships, a Danish ship and a Greek ship, carrying Israel cargoes were illegally detained at Port Said. Whether or not it was wise for the World Bank, a specialized agency of the United Nations, to go forward with the loan to the United Arab Republic at that time is debatable. I myself and many others counseled strongly against it. But much has been said on both sides.

However, the loan has been granted. The question is—what do we do now? Despite that loan and the large-scale economic assistance to the United Arab Republic by the United States, the United Arab Republic persists in this blockade and has repeatedly declared that it will not abandon it.

The Department of State has repeatedly reaffirmed its interest in freedom of navigation through the Suez Canal, but it has insisted that this is a matter to be left to Secretary General Dag Hammarskjold of the United Nations. Now, Mr. Hammarskjold does not live in a world by himself. The United Nations is not an instrument separate and apart from the United States. We are the greatest power in the United Nations. If the United Nations is making a determined effort to win compliance with its principles and its decisions, then surely it is up to us to do everything we can to support it. What we say and do here in Congress on this issue will have a positive effect on world public opinion.

Within recent weeks, our Government has spoken out strongly on a number of situations throughout the world, in Asia and in Africa. We have been impelled to make these statements because we believe they are right. World public opinion is aroused on these issues. Our policies on issues like the one now before us must be clearly announced if we are to maintain the respect and friendship of the peoples of the world and if we are to offer world leadership.

THE LEGAL BACKGROUND TO THE SUEZ DISPUTE

I do not know whether it is necessary to recite the legal background of this situation. All authority favors the opening of the Suez Canal to the shipping of all nations and rejects the argument that the canal may be closed even in time of war. Thus, the Constantinople Convention of 1888 lays down the rules for the administration of the Suez canal, and article I provides that "the canal shall always be free and open in time of war as in time of peace to every vessel of commerce or of war without distinction of flag, the canal shall never be subjected to the exercise of the right of blockade."

After the State of Israel was established, the Egyptians closed the canal to all Israel shipping and began to blacklist ships which called at Israel ports. They also seized cargoes considered to be contraband. The Egyptians attempted to justify this policy in the light of article 10 of the Constantinople Convention, which permits "measures necessary for defense and public order." The United Nations challenged the Egyptian position, but the Egyptians insisted that they regarded themselves legally at war with Israel. They claimed that the United Nations armistice agreement did not put an end to a state of war and did not prohibit Egypt from exercising certain rights of war.

THE U.N. DECISION OF 1951

Now, this is an incongruous and unacceptable situation. The Egyptians are members of the United Nations, and as such they are obligated to refrain from war and to settle disputes peaceably. When they went into Palestine in 1948, they insisted that they were not really going to war at all but that they were merely acting as some kind of fire brigade in order to extinguish a blaze in that country. The issue was debated in the United Nations Security Council, and on September 1, 1951, that body—the supreme body of the United Nations—refused to accept the Egyptian contention that it was permitted to carry on this blockade despite the Constantinople Convention and despite the United Nations armistice agreement. The Council called upon Egypt to: "Terminate the restrictions on the passage of international commercial shipping and goods through the Suez Canal wherever bound and to cease all interference with such shipping beyond that essential to the safety of shipping in the canal itself and to the observance of the international conventions in force."

A decision of the Security Council is binding. Members of the United Nations agree under article 25 of the United Nations Charter to carry out Security Council decisions. Nevertheless, unfortunately, this decision was ignored by the Egyptians.

Apparently encouraged by the incapacity of the United Nations to deter them, the Egyptians then went on to extend the blockade and they included the Gulf of Aqaba. They went further, on November 30, 1953, by defining food stuffs and all other commodities "which are likely to strengthen the war potential of the Zionists in Palestine as contraband," which they claimed they were entitled to seize.

In March 1954, Israel protested again to the United Nations Security Council, and our Government and seven other members of the Security Council voted for a resolution which "notes with grave concern that Egypt has not complied with the 1951 resolutions; calls upon Egypt in accordance with its obligations under the charter to comply." But, unfortunately, by this time the Soviet Union had begun its policy of supporting the Arabs on every possible occasion. The resolution was vetoed by the Soviet Union, and Egypt was thus rendered immune from international discipline.

THE MISSED OPPORTUNITY IN 1954

Meanwhile, in the summer of 1954, the British agreed to withdraw from their Suez base. Our Government was helpful to Egypt in those negotiations, and, in view of our sympathetic attitude towards Egyptian aspirations, leaders in this body thought it appropriate to appeal to the Department of State to ask the Egyptians to abandon the blockade of the canal. Senator Saltonstall, Senator Ives and Senator Lehman joined in a letter to the Secretary of State in which they pointed out that the negotiations might be regarded as "a historic opportunity to dispose of the blockade" and that, on the other hand, failure to act might be interpreted by Egypt as an invitation that we do not regard the blockade as a matter of sufficient concern. Reassurance came from the Department of State that our Government stood fully behind the September 1, 1951 resolution and regarded it as valid, despite the 1954 Soviet veto, and, furthermore, the United States would continue to urge compliance with it. That reassurance came from Assistant Secretary of State THRUSTON B. MORTON, who is now one of our distinguished colleagues in the Senate. However, a few weeks later, the Egyptians seized another ship—an Israel vessel bound from Eritrea to Haifa—the *Bat Galim*—and when the matter came before the U.N. Security Council that body could do no more than discuss the matter because a Soviet veto forbade decisive action. The President of the General Assembly made a statement that most of the members of the Security Council regarded the 1951 resolution as having "continuing validity and effect."

THE 1956 SUEZ CRISIS: THE SIX PRINCIPLES

I do not intend to rehearse all of the difficulties in 1956, when President Nasser nationalized the Suez Canal and the rest of the world made an effort to insist that the canal would be open to the shipping of all nations. Unfortunately, the Western camp was divided. Nevertheless, the UAR did inform the world that it accepted six principles which would govern the operation of the Suez Canal. One of these principles declared, "there should be free and open transit through the canal without discrimination, overt or covert; this covers both political and technical aspects." Furthermore, the third principle declared that "the operation of the canal should be insulated from the politics of any country."

In the development which followed the Suez and Sinai conflict, there is no doubt that the United States assisted the United Arab Republic, and at that time we might have taken a strong position calling upon Egypt to change its policies with respect to Israel shipping.

Many Members of this body made our position clear at that time. While we believed that Israel should withdraw from Sinai and from the Suez, we insisted that there should be guarantees against the restoration of the boycotts and blockades which had existed prior to the Suez conflict.

THE PRESIDENT'S ASSURANCE

And we were reassured by the President of the United States when he said, on February 20, 1957, "We should not assume that, if Israel withdraws [from Sinai] Egypt will prevent Israeli shipping from using the Suez Canal or the Gulf of Aqaba. If, unhappily, Egypt does hereafter violate the armistice agreement or other international obligations, then this should be dealt with firmly by the society of nations."

In 1957 and 1958, it appeared that some progress had been made. The Israel Government made no effort to send its own ships through the Suez Canal, but more than 40 non-Israel ships, carrying cargoes to and from Israel, were permitted to pass through the canal without any disturbance. Many of these were carrying Israel products to countries of Asia and Africa. And the administration respected its undertaking to secure the opening of the Gulf of Aqaba and the Straits of Tiran. A United Nations Emergency Force was stationed there; our Government took a strong position to the effect that this is an international waterway, and the blockade of Israel shipping through Aqaba came to an end.

THE CHANGE FOR THE WORSE IN 1959

But, in early 1959, there was a change in the Egyptian position. One can only speculate as to the reasons. Some suggest that President Nasser has been compelled to take this position because he is in a conflict for leadership of the Arab world with Premier Kassem of Iraq, and the accepted manner of demonstrating Arab patriotism is to get tough with Israel. Another theory which may explain what has happened is that the United Arab Republic and other Arab countries have become concerned over the fact that Israel has been expanding its relations with the new countries of Asia and Africa, leaping over the Arab blockade boundary.

Whatever the reason, the United Arab Republic stopped the SS *Capitan Manolis* on February 26, 1959, while it was carrying a cargo to Ceylon and Malaya from Israel. That ship was a Liberian freighter.

In March, the Egyptians stopped a German ship—the SS *Lealott*, which was carrying a cargo of cement, and that cargo also was confiscated.

And on May 21, the Egyptians stopped the *Inge Toft*. This was a Danish ship which remained in detention at Port Said for 8½ months.

THE REACTION OF WORLD OPINION

This resumption and intensification of the Arab boycott and blockade brought sharp reactions from world public opinion.

The New York Herald Tribune, on June 1, 1959, said:

"At the moment Cairo is attempting to obtain World Bank funds for widening and

deepening the canal. The time might seem singularly unpropitious for the UAR to stir up trouble, were it not that Nasser is the kind of dictator who might well equate suspension of the blockade with a sizable loan."

On June 7, 1959, the Washington Post and Times Herald declared:

"The UAR action can scarcely stand the scrutiny of either international law or sound international policy. Understandably, some governments may be reluctant to irritate the UAR at a time when relations between Cairo and the non-Communist capitals have happily improved. But the world community cannot with good conscience avoid facing the fundamental problem. Equivocation in similar instances prior to 1956 helped create armed conflict. Forthrightness now may avoid new troubles."

And the New Bedford Standard-Times, on June 5, 1959, said:

"Governments of seafaring nations would do well to marshal support of Israeli counteraction in this matter, for it involves high-handed interference with international trade, expropriation without payment and the operation of an important waterway on the basis of political prejudice."

Later, on June 25, the New York Herald Tribune declared:

"Mr. Hammarskjold must make it plain to the UAR that its actions are illegal and that the object of his visits is less to obtain the release of a single cargo than to make certain that the canal remains open to the ships of all nations at all times."

And, on June 19, the New York Times referred to Nasser's policy as "Nasser's piracy," and it said:

"President Nasser seems to believe that in view of the Western preoccupation with the Soviet challenge and his own verbal quarrel with the Soviets, he can now count on greater Western toleration and help. He should be disillusioned on that point until he learns to honor his international obligations."

No less a journal than the Economist of London, in its issue of June 13, discussing the Egyptian blockade and the proposed World Bank loan for improving the Suez Canal, asserted:

"The pressure on Cairo would be much greater if the World Bank insisted before granting the loan that Egypt should honestly and in full carry out its obligations."

These are but a few of the hundreds and hundreds of opinions that have been expressed by American newspapers on this vital issue.

MEMBERS OF THE SENATE TELEGRAPH THE PRESIDENT

Meanwhile, on June 24, 1959, 25 Members of this body joined in a telegram to President Eisenhower, calling his attention to the detention of these cargoes and urging the administration to take a firm stand on this issue. The 25 who joined in this telegram included Senators ALLOTT, BARTLETT, BEALL, CAPEHART, CARROLL, CASE of New Jersey, DOUGLAS, ENGLE, GRUENING, HART, HENNINGS, JAVITS, KEATING, MCGEE, MORSE, MOSS, MURRAY, NEUBERGER, PROXMIRE, SALTONSTALL, SCOTT, SYMINGTON, WILEY, WILLIAMS of New Jersey, and YOUNG of Ohio.

THE WORLD BANK LOAN

There was a debate last fall as to whether the World Bank should go forward with the loan to the UAR while the *Inge Toft* was detained at Port Said—an exhibit of the Egyptian blockade practice. In the meantime, Secretary General Dag Hammarskjold sought to persuade the UAR to revise its practices, and it has been widely reported that he was able to secure a commitment from the UAR to the effect that Nasser would permit ships to pass through the canal if neither the cargo nor the ship belonged to Israel at the time it approached the waterway. The Israelis acted on the basis of these negotiations. On December 18, 3 days before the World Bank granted the loan, the *Astypalea*, a Greek ship, was stopped by Nasser, despite the understanding Nasser had given Mr. Hammarskjold.

The loan was granted. I will not review all the arguments that were made at the time. It has been stated repeatedly that the World Bank is an economic institution and that the question of transit through the Suez Canal is a political one. And then, having made that statement, the proponents of the Bank's policy immediately go on to say that if the World Bank had not made the loan to the UAR for the improvement, the Soviet Union would have stepped into the breach.

ECONOMICS OR POLITICS

That, of course, is a political argument and a poor one, in view of the fact that Egypt is already one of the largest beneficiaries of he Soviet aid program. When our decisions to make loans and grants are determined by reference to what the Soviet Union may or may not be prepared to do, we are delegating the determination and execution of our foreign policy to another country. And we allow ourselves and our aid program to be victimized by blackmail.

I would like to add another comment on this question as to what is an economic and what is a political question, a subject which fascinates an economist-turned Senator. Immediately after President Nasser nationalized the Suez Canal in 1956, we withheld all economic assistance from the UAR. The Department of State froze Egyptian balances in this country. It was not until the UAR had completed negotiations to compensate the stockholders for their interest in the canal that we released Egyptian assets and resumed economic assistance to that country. Now, if the World Bank and if our Government could withhold aid from President Nasser until he satisfied the property rights of stockholders, one may ask why we could not withhold aid from the UAR until shipping rights were also respected. So far as I can see both the rights of stockholders and the rights of shippers are economic rights.

THE SEIZURE OF CARGOES

The *Inge Toft*, after 8½ months at Port Said, was compelled to give up the struggle, and it surrendered its cargo. A few weeks ago, the *Astypalea*—the Greek ship which was held up on December 18—followed suit. And Secretary General Dag Hammarskjold declared that the action of the UAR in seizing the cargo of the *Astypalea* "goes against" the principles of the United Nations. You may have seen the strong editorial comment that came from the New York Times, on April 10, and the New York Herald Tribune, on April 12, about the seizure of the *Astypalea*.

The New York Times declared:

"COLONEL NASSER'S CANAL

"United Nations Secretary General Hammarskjold's statement of last Friday on Colonel Nasser's Suez Canal policy was mild in its terms, but severe in its implications. The Secretary General did not speak lightly when he said that the detention and confiscation of Israeli cargoes carried in ships of other nationalities went against 'the principles upheld by the United Nations.' Since the beginning of 1959 the Cairo government has been seizing the cargoes of ships bound to or from Israeli ports whenever they attempted to pass through the Suez Canal. Four such ships and cargoes are mentioned in a current Israeli statement. The latest is a little Greek freighter called the *Astypalea*, loaded with cement and bound for the port of Djibouti. In each of these cases Colonel Nasser's government has confiscated—if this polite word is the correct one—the ship's cargo.

"Colonel Nasser has done this thing contrary to the original Canal Convention of 1888, contrary to his own agreement with the United Nations, and contrary to international law. The Israelis believe that he has also violated an agreement privately made with Secretary General Hammarskjold, although the Secretary General did not allude to such an agreement in his statement last Friday. The only defense Colonel Nasser can make is that there is at least a theoretical state of war between Israel and the United Arab Republic. It is a shabby defense indeed. Colonel Nasser should not expect loans or other assistance from the United States for the development of the canal while he continues to use that waterway as a political weapon."

The New York Herald Tribune declared:

"THE SUEZ BLOCKADE ISSUE PERSISTS

"If U.N. Secretary General Dag Hammarskjold were a man given to bluster and denunciation, his recent statement on Egypt's blockade of the Suez Canal against Israeli shipping would merit little attention. But precisely because Mr. Hammarskjold customarily avoids the slightest indication of annoyance or displeasure his assertion that the detention by the Egyptians of the Greek ship *Astypalea* "goes against the principle upheld by the United Nations" has all the force of a rebuke to Cairo.

"That the rebuke will go unheeded is a reasonable assumption, for President Nasser has so far ignored all efforts by Mr. Hammarskjold to obtain either an end to the United Arab Republic's blockade or at least a modification which would permit Israeli cargoes in foreign-owned ships to pass.

"Mr. Hammarskjold, discouraged though he has every right to be by Nasser's rebuffs, indicated in his statement that he intends to pursue his efforts 'to arrive at workable practices' in the Suez Canal. We're glad he hasn't given up. But we would like to see him get some positive support from those nations—especially our own—which have an interest in maintaining freedom of navigation in general and preserving the peace in the Middle East in particular. Even Prime Minister Nehru of India, who is currently entertaining President Nasser, could do worse than bring up the subject of Suez in his conversation with his distinguished guest."

SHOULD WE PUT CONDITIONS ON OUR AID? THE WORLD BANK DID IN THE PAST

I know that many people believe it is wrong to hold up assistance and to put conditions on our aid. I strongly favor economic assistance to underdeveloped countries. We must do what we can to raise living standards in these countries. But I find it difficult to accept the arguments of those who say that it is wrong to put any kind of conditions on our assistance. That makes for a world of anarchy. The World Bank, itself, informed the UAR in 1955 that it would not be possible for it to get a loan for the Aswan Dam until it reached an agreement with neighboring Sudan on the sharing of the Nile waters, And, in 1957, it is no secret that the World Bank played a leading role in persuading the UAR to settle with the Suez stockholders—a commendable action—but it was quite clear that the World Bank was not prepared to lend money to the UAR for any improvements so long as it had destroyed its credit by taking the property of the Suez stockholders and denying compensation for it.

It has also been said that the new nations of the world are sensitive and suspicious and easily offended. They do not want to take sides, and they will not accept our good offices and our assistance if they believe that we are trying to impose our will upon them and transform them into satellites. And we, as Americans, who are very jealous of our freedom and independence of action, can sympathize with the desires of these governments to be free and to be immune from pressures from without. But this does not, on the other hand, mean that we can afford

to ignore policies which are in conflict with the principles and decisions of the United Nations and which reflect irresponsibility and contempt for the international community.

We must not permit the recipients of our assistance to put unacceptable strings on the aid we give them. We must not permit them to say to us that they insist on their right to violate United Nations principles and decisions and that they insist on their right to remain in a state of war—surely an anomaly in 1960, when the world cries for disarmament and understanding and peace—and yet claim to deserve the benefits of our assistance programs.

GENEROSITY TO THE UAR HAS NOT PAID

It is argued that if we were generous with the UAR, if we gave it the World Bank loan, for example, it might moderate its position. But nothing has happened to justify this hope; on the contrary, the blockade against Israel has been intensified, and President Nasser has said categorically that he will not permit any kind of shipping connected with Israel to go through the canal.

THE RIGHTS OF THE ARAB REFUGEES

President Nasser insists that this is his way of helping the Palestine Arab refugees. It is a very curious way of helping them. I suggest that if the UAR were really concerned about doing something for the resettlement of the Arab refugees, it would move for peace and cooperation with Israel. It will not serve the interests of the Arab refugees to demand compensation from Israel and at the same time do everything possible to destroy Israel's economy. It will not encourage Israel to accept repatriation of any Arab refugees if Arab leaders continue to incite them to destroy Israel. The attempt to link the Suez Canal with the Arab refugees is a specious argument, invalid in law, and I believe, insincere in purpose.

THE ARAB BLOCKADE GETS TIGHTER

Bear in mind that the Arab States have been tightening their blockade around Israel. I call the attention of the Senate to an article in the Reporter of April 14, which is entitled "The Noose Around Israel," and which informs us, "The noose gets tighter and tighter and tighter." I call your attention to the fact that this article has stated that a vessel is placed on the blacklist if it:

Carries material to be used to strengthen the "Israeli war effort."

Calls at an Israeli port and at an Arab port during the same voyage. This does not apply to ships carrying passengers only, in which case the vessel has to call at the Arab port first and furnish the regional boycott office a complete statement of arrival and departure times at the ports.

Is chartered by Israeli companies or organizations (this was the case with the *Inge Toft*).

Carries immigrants to Israel.

Had originally been of Israeli nationality and was sold to another country (such a vessel has no hope of ever getting off the blacklist).

Carries Israeli industrial, agricultural, and commercial products.

Refuses to submit within 15 days the certificates and manifests requested in respect of previous voyages.

There is one other method of getting on the full blacklist, and that is by infringing the rules for the second time after removal from the list. There is no third chance.

OUR CURRENT AID TO THE ARABS

And all this despite the fact that we have been increasing our economic assistance to the Arab States. The amounts that are authorized for each of the countries in the Middle East are not disclosed in the mutual security program—they are not public property—but we understand that Jordan, Israel, the United Arab Republic, Sudan, and Yemen are destined to receive special assistance. Our country has generously assisted Israel. I hope that it will continue to assist Israel because that country is on the way to economic viability. But we have also in recent years increased vastly our economic assistance to the Arab countries.

AID TO JORDAN

In the fiscal year ending 1959, we gave Jordan some $52½ million in food and money, in addition to some military aid. And I am told that so far this year the special assistance program to Jordan totals $45 million.

AID TO THE UAR

Our assistance to the United Arab Republic consists largely of surplus foods, which are sold for Egyptian currency, as well as the gift of some surplus foods. The record shows that in fiscal 1959 the United Arab Republic received $11 million in food and money, and we sold the United Arab Republic some $48 million in surplus foods. In the current year, the UAR is receiving $4.2 million in special assistance; $1.5 million in technical cooperation; and gifts of food in the amount of $9 million. In addition to this, however, the UAR has been permitted to purchase $83 million in surplus foods for Egyptian currencies which are reloaned to help Egypt's and Syria's development. The special assistance money intended for the UAR for the current fiscal year will be used to equip Cairo's airport to accommodate jet planes. We are helping the UAR to expand its propaganda facilities. And we are given to understand that Egypt is receiving about $7 million in development loans. All this means that American assistance to the UAR in 1960 will be more than $100 million, and that does not include the World Bank loan for the Suez Canal.

In view of this most generous program, it must surely be clear to the Arab peoples that we wish them well, we want to help them raise their living standards, we want them to be free people, we want their friendship—even as we want the friendship of Israel. But could they not, as a contribution to peace, to the welfare of their own people and to humanity everywhere, could they not find it possible to accommodate themselves to Israel's existence and eliminate a threat of war which confronts us all?

THE RIGHTS OF AMERICANS ARE ALSO INVOLVED

I should like to point out that this situation affects the rights of Americans as well as the Arab-Israel conflict. The Arab boycotts are directed against many Americans in an attempt to strike at Israel through them.

THE INJURY TO AMERICAN TRADE AND SEAMEN

Blacklisting by the Arab States has injured American shipping and American seamen. The Arab States refuse to permit American ships which have traded with Israel to carry cargoes to Arab ports, and this even applies to cargoes carrying surplus foods purchased with funds advanced by the United States. Under the law, one-half of the shipments must be in American ships. This means that many American ships cannot secure these contracts unless they forgo trade with Israel. American seamen and shippers have been discriminated against. And so the Arab boycott and blockade against Israel have intruded into our own commerce. American businessmen who would like to trade with Israel are unable to do so for fear that they will lose their commerce with the Arab States.

We, as Members of Congress, should stand up for freedom of shipping and for the right of American ships to call at the ports of the world without suffering discrimination. I believe it is our duty to strengthen American policy and to strengthen the hands of the United Nations in this regard.

THE SURPLUS FOODS

You will note that the amendment refers to the funds disbursed under the Agricultural Trade Development and Assistance Act of 1954, as well as to the Mutual Security Act. I have, myself, written to the Department of State on these questions, and it has been suggested to me that our Government cannot bring an end to the practice of the Arab governments in forbidding the transport of foodstuffs and surplus commodities by ships that are blacklisted. This is a private transaction between the Government of Egypt and American shippers, and the Government of the United States has no jurisdiction over these contracts although American surplus foods are involved and American shippers are injured.

DO THE ISRAELIS FOLLOW THE SAME PRACTICE?

But I have also been told that the Israel Government carries on a similar practice. I would like to say at this point that there is a difference between the contract provisions in the Egyptian contracts and those provisions which appear in the contracts written by the Israel Government. The provisions which appear in the Egyptian contract state:

"Vessel is prohibited from calling at Israelian waters or ports. Transshipment is prohibited. To owner's knowledge vessel is not on any UAR blacklist and has not traded to Israeli ports under owner's management. Vessel is not blacklisted in the UAR."

This is quite different from the clause in the Israel contract which provides "Sailing in any Egyptian-Syrian-Jordanian-Saudi Arabian or territorial waters prior to discharge to Israel is prohibited."

In the one case, the Egyptians are boycotting all ships which have traded with Israel at any time. In the case of the Israel contract, the Israel Government is making certain that cargoes destined for Israel do not fall into the hands of the Arabs before they reach Israel lest they be confiscated. Thus the Israel provision is a defensive measure designed to protect cargoes from seizure. On the other hand, the Arab provision is a blacklist aimed at all ships which may have traded with Israel at any time.

The Israel precaution is not an empty gesture. In the article of the Reporter magazine of April 14, to which I have already referred, it is stated that, and I quote: "There is a story that recently an apparatus for artificial breathing had been shipped from New York to Israel. Before it left New York, however"—and I am quoting from the article—"a Lebanese official in the United States somehow convinced the shippers that the apparatus was to be channeled through Beirut. When it got to the Lebanese capital, it was, of course, confiscated." And the article points out that privately the Lebanese were not very proud of this action.

DON'T WASTE OUR AID FUNDS

I hope that our economic assistance program to the Arab countries and to other nations in the Middle East will be continued without interruption and will serve a useful purpose. But I suggest that this program is negated if money furnished in economic assistance and in arms to Arab countries is used to further a war against Israel and an economic siege of Israel's friends. I am also concerned about the amount of money that we spend and I submit that we waste our economic assistance, we waste our foreign aid, if one of the beneficiaries of our program is boycotted and blockaded and besieged by other countries which receive assistance from us. Israel would be much further along towards economic self-sufficiency and economic viability if it were not subjected to this economic harassment. Thus the American taxpayer is also a victim of these practices. I believe that we owe it to ourselves to make certain

that our aid is not wasted by the policies of countries that we seek to help and befriend.

Finally, Mr. President, I believe we must do what we can to uphold the integrity of the United Nations and the integrity of our American policy.

There have been some comments around the country about this amendment. I note that the Oakland Tribune of April 17, in an article by Raymond Lawrence on the blockade of the Suez Canal, writes about this amendment:

"This is not a categorical ban, since the amendment leaves it up to the President to decide whether we should subsidize the Suez blockade with millions in surplus foods and loans. Congress has thus laid down a principle about which the President should report regarding its application. It is one that should cause some serious thinking in Cairo about the need for intelligent and constructive efforts to settle the central problem in the Middle East."

And the Christian Science Monitor, in an editorial on April 23, 1960, pointed out:

"The House Committee on Foreign Affairs has proposed an amendment to the Mutual Security Act which would authorize the President to take into account the interests of economic cooperation and freedom of navigation in administering foreign aid. The United States can hardly afford to subsidize a restriction on foreign aid."

MORALITY IN FOREIGN POLICY

I am sure that these views reflect the best sentiment of the American people. I am sure that the mutual security program would be far more popular with the people of the United States if it were administered with a continuing and uncompromising regard for principles of morality and the interests of international peace. I do not share the views of cynics who believe that foreign policy is purely a matter of convenience, that we must be pragmatic and that we can afford to ignore interests dictated by moral considerations and principle. Our foreign policy will prosper throughout the world as our prestige rises. And our prestige will gain if the United States is forever identified with the cause of freedom and peace everywhere in the world. There can be no areas in the world marked off as "free zones for aggression," for boycott, for blockade and for war. We must work for peace everywhere.

Mr. DOUGLAS. I now yield 1 minute to the Senator from Alaska.

Mr. GRUENING. Mr. President, as a cosponsor of the amendment, I believe it is highly desirable that the United States stop appeasing dictators, especially when they are in definite violation of their own agreements and conventions. The United States is now contributing about $6½ million to the United Nations police force to keep the peace on the border between Israel and Egypt—a third of the total U.N. appropriation. All of this could be averted if we were not constantly stimulating and encouraging irresponsible dictators. It is desirable that this mild amendment, which does nothing more than declare a principle—but a vital principle for which the United States has long stood—be adopted. It does not tie the hands of the President, does not force him to adopt this policy. I hope the amendment will be adopted.

Mr. DIRKSEN. Mr. President, I yield 10 minutes to the Senator from Arkansas.

Mr. FULBRIGHT. Mr. President, this is a textbook case.

Mr. DIRKSEN. I yield 10 minutes to the Senator from Arkansas.

Mr. FULBRIGHT. Mr. President, this is a textbook case of how not to conduct international relations.

I hope no one in the Senate is so naive as to believe that the amendment will accomplish its ostensible purpose, which is to open the Suez Canal to Israeli shipping and to end the Arab economic boycott against Israel. What it will accomplish is to annoy the Arabs and fortify them in their conviction that in any issue arising from the Arab-Israeli controversy the United States, because of domestic political pressures, will be on the side of the Israelis. This Arab conviction, for which I regret to say history affords some justification, is the greatest single burden which American diplomacy has to carry in the Middle East.

If there were any real prospect that the amendment would be effective in opening the Suez Canal to Israeli shipping and ending the Arab boycott against Israel, then the objection that it would annoy the Arabs would not lie. But why annoy them if you are not going to accomplish anything by it—anything, that is, beyond the appeasement of certain uninformed minority groups in the United States?

The amendment suffers from other defects. It begins with a statement of principle that the United States favors freedom of navigation in international waterways, and with this there can certainly be no quarrel.

It continues with a statement that the United States favors economic cooperation between nations. This is a little like being in favor of motherhood; yet I wonder how many Senators would be willing to apply it to the economic relations of the United States with the Soviet Union and Communist China.

Then, the amendment says that the purposes of the Mutual Security Act are negated and the peace of the world is endangered "when nations which receive assistance under this act wage economic warfare against other nations assisted under this act." This is a strange way to put it. Why is it limited to nations receiving mutual security assistance? Would the purposes of the act be promoted, or would the peace of the world be any less endangered if nations which did not receive assistance waged economic warfare against those who did, or vice versa?

The amendment clearly contemplates that the Mutual Security Act and Public Law 480 should be used as a club to force the United Arab Republic to open the Suez Canal to Israeli shipping. Suppose that assistance to the U.A.R. is terminated and suppose that the Suez remains barred to Israeli shipping. Is that going to further the purposes of the Mutual Security Act or contribute to the peace of the world? On the contrary, it will further embitter the Arabs and it will further drive them into the economic tentacles of the Soviet Union.

Finally, we come to the end of the amendment, and we find an escape hatch broad enough to accommodate almost anything. "These principles," the amendment says, "shall be applied, as the President may determine, and he shall report on measures taken by the administration to insure their application."

This is a strange diminuendo. We begin with a fortissimo declaration of noble principle. Then we say we mean it only as between nations receiving mutual security assistance. And finally, we end pianissimo—not with a bang but a whimper—saying it applies only "as the President may determine."

This amendment is a sham and a travesty and it will lead to no good, but only trouble.

The same pressures that put this provision in this bill are trying to hang this albatross on the IDA in the House.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield to the Senator from Illinois on his time.

Mr. DOUGLAS. Since the Senator from Arkansas has explained that the President can disregard the sentiment of Congress in these matters, let me say that if the Senator wishes to propose an amendment to strike out the discretionary powers of the President, I shall be very glad to accept it.

Mr. FULBRIGHT. I said that that was only one of the objections to the amendment.

Mr. DOUGLAS. If the Senator from Arkansas will propose that amendment, I will be glad to accept it.

Mr. FULBRIGHT. That is only one of a series of defects.

Mr. DOUGLAS. Does the Senator wish to offer that as an amendment?

Mr. FULBRIGHT. I do not offer any amendment. I think the whole amendment is bad.

Mr. DOUGLAS. Very well.

Mr. FULBRIGHT. This is only the latest episode in this continuing quarrel.

Only recently, in New York, the unions took our foreign relations into their hands and have boycotted the unloading of an Egyptian ship called the *Cleopatra*. In response to that action, the New York Times on April 28 said:

Arab unions plan cutting of radio contact for U.S. shipping in Mideast.

In other words, we are starting a vicious course of action and reaction. When one does something wrong, then someone else gets into the act, much as the unions in New York are doing, and tries to solve a very difficult problem by attaching strings to the aid program. I cannot think of any more unwise way to try to conduct foreign relations. The administration, the United Nations, and Secretary General Hammarskjöld are all actively trying to find a solution to this very difficult problem in the Middle East. They are doing it in the only way I can think of which might lead to success; that is, by patient negotiation with the authorities in the United Arab Republic and the other Arab countries.

I think it would be a great mistake for us to inject this kind of amendment into the foreign aid program.

Mr. SALTONSTALL. Mr. President, will the Senator yield for a question?

Mr. FULBRIGHT. I yield.

Mr. SALTONSTALL. Do I correctly understand that this proposal is contained in the House bill?

Mr. FULBRIGHT. It is.

Mr. SALTONSTALL. So the matter will be in conference; and if there is to be any proper language, or a change of language, it can be settled in conference.

Mr. FULBRIGHT. That is correct. I do not wish to offer any hope, so far as I am concerned, that there will be any proper language on this matter. I simply point out the fact that the language is in the House bill and will be in conference. I am confident that I shall oppose it in conference as strongly as I can because I think this is a very poor way to try to carry on our international relations.

Mr. President, to make this point clear for the RECORD, I ask unanimous consent to have printed at this point in the RECORD an article regarding this controversy, under the headline "Appeals Court Holds Up Ruling on Pickets at Arab Ship Here," published in the New York Times of April 28, 1960. The article relates to a controversy over the Egyptian freighter *Cleopatra* in New York Harbor, and the reactions which have followed from that boycott.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

APPEALS COURT HOLDS UP RULING ON PICKETS AT ARAB SHIP HERE—THE "CLEOPATRA'S" OWNERS CALL UNION ACTION POLITICAL—LABOR COUNSEL RETORTS

(By Werner Bamberger)

A legal attempt to lift at once the 2-week-old picket line established by American maritime unions against the United Arab Republic ship *Cleopatra* failed yesterday.

A three-man appeals tribunal, headed by J. Edward Lumbard, chief judge of the U.S. Court of Appeals for the Second Circuit, took under advisement a plea by the Khedivial Mail Line, owners of the 8,193-gross-ton vessel, to enjoin picketing.

The court reserved decision on an appeal from a ruling made last Saturday by Judge Thomas F. Murphy, of Federal district court, denying a preliminary injunction. The other members of the appeals panel were Judge Henry J. Friendly and Judge Leonard P. Moore.

Judge Murphy ruled that, in light of a Supreme Court decision handed down last week, the picketing of the ships by the Seafarers International Union was protected by the provisions of the Norris-La Guardia Act of 1932. The act prohibits Federal courts from issuing injunctions in cases involving labor disputes.

BASIS OF ISSUE ARGUED

The picketing by the S.I.U., supported by the International Longshoremen's Association, is in protest against the United Arab Republic's blacklisting of United States ships that have called at Israeli ports.

Joseph K. Grainger, counsel for the shipowners, told the court that the picketing constituted a violation of Federal antitrust laws and was a restraint of trade.

He said that, contrary to S.I.U. assertions, the dispute was political in nature and no labor dispute was involved. He added that Judge Murphy had erred in not granting a temporary injunction.

Mr. Grainger argued the principal question involved was whether a union could stop the work of a vessel to publicize the policy of a foreign government.

ARAB UNIONS PLAN CUTTING OF RADIO CONTACT FOR U.S. SHIPPING IN MIDEAST

CAIRO, April 27.—All Arab ports on the Mediterranean and Red Seas will cut radio contact with American ships from midnight Friday unless the New York picketing of the freighter *Cleopatra* is stopped, the newspaper Al Goumhouri said today. There was no confirmation of the report.

The paper said operators of the Alexandria Harbor wireless station acted in support of the decision by Arab trade unions to boycott U.S. shipping. It said coastal wireless stations in Arab countries along the Mediterranean and Red Seas had declared their support.

The International Confederation of Arab Trade Unions sent President Eisenhower a message last night deploring what it called Zionist attempts to destroy friendly American-Arab relations.

ZIONIST LINK CHARGED

"The boycott by American longshoremen of a United Arab Republic vessel is a flagrant intrusion in political affairs and a new method of international Zionism to settle the Palestine problem at the expense of the rights of 1 million Arab refugees forced out of Palestine," the Arab unionists' message said.

Ali Sabry, one of President Gamal Abdel Nasser's top aides, said in Tokyo that the U.S. Government could stop the picketing of the *Cleopatra* if it wanted. "We consider the picketing a provocative action," said Mr. Sabry, who has been in Tokyo as a guest of the Japanese Government.

Labor leaders all over the Arab world have been trying to work up a total Arab boycott of American shipping in reprisal for the *Cleopatra* incident. The boycott could drive a new wedge between the United States and Arab countries.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. AIKEN. I agree with the Senator from Arkansas that the adoption of this amendment will almost certainly make a bad matter much worse. It appears to be directed at such situations as the restrictions on the passage of Israeli ships through the Suez Canal, and the boycotting of Arab ships in certain ports of the world.

However, if this instruction or admonition to the President were carried out literally, I believe it would probably preclude our rendering assistance to almost any country in the world.

Paragraph (2), on page 2, reads:

> The purposes of this act are negated and the peace of the world is endangered when nations which receive assistance under this act wage economic warfare against other nations assisted under this act, including such procedures as boycotts, blockades, and the restriction of the use of international waterways.

The blockading of waterways or boycotting is certainly not the only method by which economic warfare is conducted. I, for one, cannot determine where competition leaves off and economic warfare begins. What about the dumping of surplus agriculture commodities or surplus industrial output on the markets of the world? What about price cutting in the markets of the world? What about the erection of trade barriers? These are all forms of economic warfare.

I do not believe we assist any country in the world today which does not carry on some form of very stiff competition or economic warfare against other countries. If this proposal were carried out literally by the President to the extent that it might go, it would undoubtedly preclude our giving assistance to almost any country in the world, because we are all competitive.

Mr. FULBRIGHT. The Senator from Vermont is quite correct.

I should state, too, that the administration is very strongly opposed to the amendment.

Mr. HICKENLOOPER. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. HICKENLOOPER. I completely agree with the statement of the Senator from Arkansas. I think this is a very ill-advised amendment. It could do nothing but create, at least, temporary chaos, and perhaps might cause permanent chaos, which might take a long time to have straightened out.

We all hope that the Suez Canal can be opened to all nations. No one approves of the idea of blockading Israeli shipping.

I suggest to the Senator from Arkansas, along the line of the suggestion of the Senator from Vermont [Mr. AIKEN], that if what is sought to be done by the amendment were done, what should we do about the contentions of Peru, of Equador, and of other Latin American countries, which claim a jurisdiction of 200 miles over the sea? What should we do about Mexico, which claims fishing jurisdiction to a limit beyond anything we agreed to? Those nations are blockading not only the United States, but other nations in international waters. In my opinion, they are in direct violation of international agreements.

I think the amendment would create a tremendous amount of ill will, and would create situations in the Middle East which would set us back a long time in the vigorous attempts which we are making to settle the situations there. I really think we have been making progress. I believe the situation is easing. But the amendment, if adopted, would set our progress back years, especially in the Arab Republic.

As much as we may sympathize with the sentiment of the amendment, I think it would be a tragic mistake if it were included in the bill.

Mr. FULBRIGHT. I thank the Senator from Iowa for that contribution.

Adoption of this amendment would obviously be interpreted as an attempt, through the mutual aid program, at coercion on these people. So I hope the Senate will reject the amendment.

Mr. LAUSCHE. Mr. President, will the Senator from Arkansas yield to me?

Mr. FULBRIGHT. Yes; if I have further time available.

The PRESIDING OFFICER (Mr. FREAR in the chair). The Senator from Arkansas has one-half a minute remaining.

Mr. FULBRIGHT. Then I yield.

Mr. LAUSCHE. Mr. President, in my opinion, the easy course to follow in regard to this amendment is to vote for it. The hard course, but the correct one, is to vote against the amendment.

This amendment must be disposed of on the basis of what will be in the best interests of our country. I fear gravely

that if the amendment is agreed to, complications will follow, probably in a degree which will cause great worry to all of us.

I would want to be the first to vote to open the Suez Canal to the Israelis. I want the Israelis to use that canal. But in that connection, it is necessary that we take no action that will endanger the peace of the world which already hangs on precarious threads. So, Mr. President, the votes which Senators will cast on this amendment should be cast on the basis of considering the interests and welfare of our country first.

The PRESIDING OFFICER. The time available to the Senator from Arkansas has expired.

Mr. DOUGLAS. Mr. President, I yield 7 minutes to the Senator from New York [Mr. KEATING].

The PRESIDING OFFICER. The Senator from New York is recognized for 7 minutes.

Mr. KEATING. Mr. President, I should like to deal briefly with some of the points the Senator from Arkansas and other Senators have made.

In the first place, in voting on this amendment, let no Senator vote against it because of a belief that the matter can be handled in conference. This language is in the House version of the bill; but the Senate conferees who presumably will be appointed are not sympathetic to the amendment. So no Senator should consider voting against the amendment, having in mind the idea that the matter will be handled in conference.

In the second place, of course, the amendment will not automatically open the Suez Canal to commerce. However, we have heard many pious statements to the effect that the Suez Canal should be opened to free navigation by everyone. But we know the canal has not been opened to such navigation. We know that Colonel Nasser and the Egyptians have flouted international law. We know that not only have they denied Israeli ships the right to use the canal, but they have also prevented Israeli cargoes from being taken through the canal, and they have seized a number of those cargoes.

Are we ready to back up with some very moderate action the pious statements we have made?

Let us remember that this amendment is only a statement of the sentiment or the sense of the Congress. It is no more than that.

Objection has been made to the first part of the amendment; it is said that it does not go far enough, and that there are other areas in which economic warfare can be waged. If any Senator desires to present a sense-of-the-Congress amendment which condemns some other kind of economic warfare against other countries we are aiding, I shall be happy to support such an amendment.

Of course this amendment is limited. It has been rather carefully drafted. The Senator from Arkansas has made a great point to the effect that the amendment does not apply to all the nations of the world, but applies only to the nations to which we are giving assistance. Certainly any such argument against this amendment is entirely specious, because in connection with this mutual aid bill we can take action only with regard to countries to which we are giving aid under the mutual assistance programs.

By means of this amendment, if it is agreed to, we shall say to the countries to which we are giving aid under the mutual assistance programs that it is the sense of the Congress that there should be free navigation through any international waterways with which they may have anything to do; that we are condemning economic sanctions, such as boycotts and blockades, and any restriction on the use of those waterways; and that any funds appropriated under this act shall be used only in accordance with these principles, as the President may determine.

In other words, if the amendment is agreed to, it will still leave a considerable degree of discretion available to the President. We would still leave him the discretion in foreign policy which is required by the Constitution.

Mr. JOHNSON of Texas. Mr. President, will the Senator from New York yield to me at this time, with the understanding that the time I shall use now will not be charged to the time available to him?

Mr. KEATING. I am happy to do so.

Mr. JOHNSON of Texas. Mr. President, I am informed that more than a dozen amendments will be offered. They can be debated tomorrow, under the time agreement.

I wonder whether it will be possible now to obtain an additional agreement, to the effect that each amendment that is offered will be debated tomorrow, under the agreement, and with the further understanding that the proponents will have not to exceed 5 minutes on Monday, and the opponents will have not to exceed 5 minutes on Monday, and that all rollcall votes will be had on Monday. I so request.

The PRESIDING OFFICER. Is there objection?

Mr. JOHNSTON of South Carolina. Mr. President, I believe it is understood that I shall have 1 hour to discuss my amendment.

Mr. JOHNSON of Texas. Yes, following the Dirksen amendment.

The PRESIDING OFFICER. Is there objection to the request?

Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I should like to put all Senators on notice that in a short time we shall have a yea-and-nay vote on the question of agreeing to the Douglas amendment, and thereafter we shall proceed for 50 or 60 minutes to debate the Church amendment and thereafter we do not expect to have any more yea-and-nay votes this evening.

We hope and expect to have yea-and-nay votes on Monday. We expect to exhaust all time for debate on all amendments tomorrow; and we shall proceed under a 5-minute limitation on Monday, and we expect to take the vote on the question of final passage of the bill, on Monday.

The PRESIDING OFFICER. All Senators will take due notice of this announcement.

Mr. KEATING. Mr. President, how much time remains available to me?

The PRESIDING OFFICER. Two minutes.

Mr. KEATING. Mr. President, I wish to say that my distinguished senior colleague from New York [Mr. JAVITS] is today in Paris, on official business in connection with the NATO Parliamentarians Conference. He has telephoned, and has asked that his name be added as a consponsor of this amendment. He has been a longstanding leader in this field, is deeply interested in this amendment, and believes very strongly that it should be added to the bill.

The PRESIDING OFFICER. The Chair assumes that the Senator from Illinois would have no objection.

Mr. KEATING. His name has been joined.

Mr. President, in order that the full purport of the amendment may be understood, I ask unanimous consent to have printed at this point in the RECORD, in connection with my remarks, a statement setting forth the background of what has been happening to the Suez Canal and the need for the pending amendment.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR KEATING ON FREEDOM OF NAVIGATION AMENDMENT TO MUTUAL SECURITY BILL

I am proud to be a sponsor of this amendment, and I am delighted that so many of my colleagues have joined in endorsing this addition to the Mutual Security Act of 1960. I believe it is incumbent upon this body to follow the lead of the House of Representatives and include language in the bill reaffirming our dedication to the principle of the freedom of international waterways.

This amendment is both timely and pertinent, in the light of activities in recent months by Colonel Nasser and his agents in the Suez Canal. By his acts of obstruction and hindrance, the Egyptian chief executive has effectively flouted established international law and has severely strained relations with his neighbors in Israel. In fact, the whole Middle East tinderbox could well be set off if Egypt persists in her meddling tactics with regard to Israeli shipping in the Suez Canal.

It is to the everlasting credit of the United States that we have generally taken a strong stand in opposition to the machinations of Colonel Nasser. But it is important for the peoples' representatives to give concrete backing to the efforts of our Government by means of the language of this proposed amendment.

In addition, adoption of this amendment will help strengthen the hand of our representatives in the United Nations. This is important bcause in the view of many observers the intensification of the Suez Canal blockade during the past year reflects the failure of the U.N. to find suitable means to enforce its decisions with regard to free transit through the canal. If we are to be true not only to the principles of the United States and the United Nations, but the established principles of international law, we must press forward with action to condemn Egypt's blockade both within and without the U.N.

As a matter of fact, I have long contended that the United States should take the lead

in stern actions against the United Arab Republic. We should, for example, use our influence to urge a denial of UAR funds from the World Bank until Colonel Nasser sets his house in order. Unfortunately, a $56 million loan was granted last December, at a time when two ships—one Danish and the other Greek—were being detained by the UAR at Port Said.

For a full understanding of the need for a strong and aggressive American policy with regard to Colonel Nasser's piracy in the Suez Canal, it is essential to have a knowledge of the background of the present situation.

BACKGROUND ON THE SUEZ CANAL

The Suez Canal is a 110-mile waterway, built in Egypt linking the Red Sea with the Mediterranean, and has special status in international law. The doctrine that the Suez Canal should be open to all vessels at all times was developed even before the canal was constructed. This stipulation was made in the concession granted the Compagnie Universelle du Canal Maritime de Suez on January 5, 1856. The canal was in operation less than a year when its special status was tested by the Franco-Prussian War of 1870–71. Then, although French nationals were in control of the Suez Canal Company, the waterway remained open to both belligerents.

This special status was again tested in the Russo-Turkish War in 1877. Russia was in a position to blockade the canal, but she assured Great Britain, which had bought a 44-percent interest in the canal company from the Egyptian Khedive 2 years earlier and had since assumed responsibility for its protection, that she would "neither blockade, nor interrupt, nor in any way menace the navigation of the Suez Canal." Therefore the canal remained open to the belligerents.

Even during the Italian-Ethiopian hostilities in 1935–36, when the League of Nations branded Italy as the aggressor nation, Italy was permitted free access, although it was widely argued that closing the canal to her shipping would be the most effective sanction.

In 1882, Egypt was the scene of a revolt against the Khedive, and the rebels were about to destroy the canal. A British military expedition arriving on the scene saved the Egyptian ruler, and Egypt then became a British protectorate.

In view of the canal's importance to all powers, it was recognized that its status needed a more precise definition. In 1888, the "Convention Respecting the Free Navigation of the Maritime Suez Canal" was signed in Constantinople by the representatives of the following powers: Great Britain, France, Germany, Austria-Hungary, Italy, Russia, Spain, Turkey, and the Netherlands. The Constantinople Convention of 1888 remains to this day the basic instrument governing the use of the Suez Canal and is recognized as a major tenet of international law.

The Convention spelled out the international guarantees on the freedom of shipping through the Suez Canal to all nations in peace or war. It stipulated that "the Suez Maritime Canal shall always be free and open in time of war as in time of peace, to every vessel of commerce or war, without distinction of flag."

Article I states precisely: "The canal shall never be subjected to the exercises of the right of blockade."

In subsequent years, the nations of the world have scrupulously observed the guarantees laid down in the Convention.

In 1898, during the Spanish-American War, the United States was free to send its fleet through the canal.

In 1904–05, during the Russo-Japanese War, Great Britain was an ally of Japan, but Russia as well as Japan was able to send their shipping through the canal.

And in World War I, Great Britain permitted Germany to use the canal, and did not obstruct it.

In 1936, the treaty of alliance between Great Britain and Egypt again reaffirmed the status of the canal as an international, universal means of communication.

In March 1938, an Anglo-Italian agreement acknowledged that the Constantinople Convention "guarantees at all times for all powers free use of the Suez Canal."

Even in World War II the canal technically remained open to all, although actually the Axis vessels made no use of it.

This principle—the international guarantee for the freedom of shipping in the Suez Canal, first voiced in 1856, embodied in the convention, by which Egypt is still bound—still governs the international character of the waterway. The practices of the past, historically recognized and observed through decades of war and peace, by all nations, give the canal its legal and special status.

The United Arab Republic's recent actions in boycotting the canal, and in searching and confiscating ships and cargo which attempt to pass through it, are in sharp contrast to all historic precedents. Egypt cannot regard the blockade as a domestic question—as some of her spokesmen have declared—even though the canal happens to be entirely within Egyptian territory. Colonel Nasser's flouting of international law is a matter for international condemnation.

UNITED NATIONS DECISIONS

In 1947, the problem of Palestine was the key issue at the United Nations. Great Britain had turned over responsibilities for her Palestine mandate to the U.N. for settlement and the U.N. then dispatched a Special Commission To Investigate Tensions in the Middle East. On its return, the Commission urged partition of Palestine into independent states—Arab and Jewish. And during the debate on partition, Prime Minister Nokrashy Pasha, of Egypt, at a Security Council meeting on August 5, 1947, while asserting the absoluteness of Egyptian sovereignty over every inch of Egyptian soil, declared that the Suez Canal was an international waterway open to all nations in time of peace and in time of war.

The United Nations General Assembly approved partition on November 29, 1947. Israel declared her independence on May 14, 1948, but the Arab States refused to recognize the United Nations resolution and attacked Israel. At the same time, Egypt began to board and search ships entering the Suez Canal and to confiscate cargoes which it declared "contraband."

The Egyptian-Israeli Armistice Agreement, signed at Rhodes on February 24, 1949, provided that neither country would engage in warlike or hostile acts against the other. It was to remain in force until "a permanent peace between the parties is achieved." Still, Egypt continued to search ships passing through the canal and to seize Israel-bound cargoes.

Egypt insisted upon looking at the agreement as a mere suspension of hostilities leaving belligerent rights intact. The Egyptian U.N. delegate at the Security Council on July 26, 1951, maintained that all armistices are simply agreements between belligerent forces for a temporary cessation of hostilities; and that Egypt's right of visit and search, therefore, could not be questioned.

Israel, however, pointed out that this agreement specifically states that it is not a mere suspension of hostilities, but a permanent and irrevocable renunciation of hostile acts. And Dr. Ralph Bunche, acting United Nations mediator who negotiated the agreement, declared in July 1949:

"The entire heritage of restrictions which developed out of undeclared war should be done away with. There should be free movement for legitimate shipping and no vestiges of the wartime blockade should be allowed to remain, as they are inconsistent with both the letter and the spirit of the armistice agreements."

Egypt's policy of interfering with shipping through the canal affected many nations besides Israel. The great sea powers, the United States and Great Britain, as well as France and the Netherlands whose ships were also affected, were alarmed at any measures that would infringe on their freedom of shipping, lose them the right to transverse the canal, and make them ship around the Cape of Good Hope to the Indian Ocean.

Israel, deprived of her maritime freedom, complained to the Mixed Armistice Commission which had been created by the armistice agreement. On August 29, 1949, the Commission established that it had the right to demand that the Egyptian Government shall not interfere with "the passage of goods to Israel from the Suez Canal." Egypt challenged the ruling before a special committee which had also been set up under the armistice agreement, and that committee overruled the Commission's directive.

On July 11, 1951, Israel turned to the United Nations Security Council and asked it to resolve the issue. On September 1, 1951, the Security Council passed a resolution which called on Egypt "to terminate the restrictions on the passage of international commercial shipping and goods through the Suez Canal wherever bound."

The Security Council resolution enunciated in bold language that it:

"Finds that the maintenance of the practice (the present practice of interfering with the passage through the Suez Canal of goods destined for Israel, par. 4) is inconsistent with the objectives of a peaceful settlement between the parties and the establishment of a permanent peace in Palestine set forth in the armistice agreement;

"Finds further that such practice is an abuse of the exercise of the right of visit, search, and seizure;

"Further finds that such practice cannot in the prevailing circumstances be justified on the ground that it is necessary for self-defense;

"And further noting that the restrictions on the passage of goods through the Suez Canal to Israeli ports are denying to nations at no time connected with the conflict in Palestine, valuable supplies required for their economic reconstruction, and that these restrictions, together with sanctions applied by Egypt to certain ships which have visited Israeli ports, represent unjustified interference with the rights of nations to navigate the seas and to trade freely with one another, including the Arab States and Israel;

"Calls upon Egypt to terminate the restrictions on the passage of international shipping and goods through the Suez Canal, wherever bound, and to cease all interference with such shipping beyond that essential to the safety of shipping in the canal itself and to the observance of the international conventions in force."

The Egyptian authorities, however, persisted in their acts of confiscation, detention and molesting of ships proceeding to and from Israel even in respect to goods which were not included in their "contraband" list.

THE RECORD OF AGGRESSION

The record of economic warfare waged by Egypt against Israel and other maritime nations by blockading the Suez Canal can be noted as follows: October 31, 1952, the Norwegian ship *Rimfrost* en route from Eritrea to Israel, was detained at Port Said and its cargo of frozen meat was confiscated.

On September 2, 1953, a cargo of Israel-assembled motor cars consigned to Kenya was confiscated aboard the Greek freighter *Parnon*.

On December 14, 1953, a cargo of meat was confiscated at Port Said aboard the Italian vessel *Franca Maria* on her way to Haifa.

On December 22, 1953, a shipment of motorcycles and personal effects consigned to Israel was confiscated from the Norwegian freighter *Triton*, en route from Melbourne to Genoa.

On July 8, 1955, a similar consignment was taken off the Dutch ship *Fedala*.

On September 28, 1954, the Israel freighter *Bat Galim* en route from Eritrea to Haifa carrying hides and food, was stopped at the entrance to the Suez Canal. The ship was seized, the cargo confiscated and the crew imprisoned. The crew was not liberated until January 1, 1955, and the ship was not released.

On February 26, 1959, the S.S. *Captain Manolis*, a Liberian ship, carrying potash, fruit juices and cement for Ceylon and Malaya was stopped at Port Said and its cargo impounded.

On March 9, 1959, a German boat, the *Lealott*, was stopped and its cement cargo was taken.

On May 21, 1959, the Danish *Inge Toft* was detained and 8½ months later was released, with its cargo finally yielded up to the UAR authorities.

On December 19, 1959, the Greek-owned *Astypalea*, from Haifa to Eritrea, was halted at Port Said, and was finally released in March 1960, after its cargo was also impounded.

The American freighters, the *Kern Hills*, the *Westport*, and the *Valiant* were also stopped and held this past year and the crews were molested and abused.

NINETEEN HUNDRED AND FIFTY-FOUR STATUS

In 1953, Egypt enlarged its blockade to include the Gulf of Aqaba and on November 30, 1953, it issued a definition of "contraband" to include "foodstuffs and all other commodities which are likely to strengthen the war potential of the Zionists in Palestine."

Israel once more protested to the Security Council, and on March 29, 1954, eight Council members including the United States supported a resolution which noted "with grave concern that Egypt has not complied with the 1951 resolution; calls upon Egypt, in accordance with its obligations under the charter to comply."

Russia's veto power helped Egypt escape this indictment.

In the meanwhile, Egypt and Great Britain were negotiating on the British withdrawal from the Suez base. The United States was mediator in the settlement.

A number of Members of Congress saw in this an opportunity for the United States to intercede and obtain a pledge from Egypt to cease the blockade. On July 27, 1954, they wrote to the Department of State urging our Government to act on this issue. They said:

"The negotiations are an historic opportunity to dispose of the blockade. * * * Failure to act * * * may cause a deterioration * * * because it could be interpreted by * * * Egypt as an indication that we do not regard the blockade as a matter of sufficient concern."

In his reply, former Assistant Secretary of State THRUSTON B. MORTON, and now a distinguished Member of this body, stated that the agreement had already been reached but that it will "express the determination of both parties to uphold the 1888 Convention, guaranteeing the freedom of navigation of the Canal."

And he reiterated the U.S. position as standing "fully behind" the United Nations resolution of September 1, 1951, despite Russia's 1954 veto. He said the United States regards the resolution as valid and "will continue to urge compliance with it."

Israel tested the new understanding by sending the *Bat Galim* to the canal. The boat was confiscated and its crew placed under arrest until January 1, 1955. The United Nations countered this Egyptian action with a statement from the Security Council president that "most representatives regard the September 1, 1951, resolution as having continuing validity and effect."

SUEZ AND AFTERMATH

In 1956, the Suez crisis erupted. Nasser nationalized the canal and the West began a new struggle to insure international regulation.

In the United Nations debate which followed the Suez operation, Egypt agreed to abide by six principles propounded by the Western nations which provided:

"1. There should be free and open transit through the canal without discrimination, overt or covert—this covers both political and technical aspects;

"2. The sovereignty of Egypt should be respected;

"3. The operation of the canal should be insulated from the politics of any country;

"4. The manner of fixing tolls and charges should be decided by agreement between Egypt and the users;

"5. A fair proportion of the dues should be allotted to development;

"6. In cases of disputes, unresolved affairs between the Suez Canal Co. and the Egyptian Government should be settled by arbitration with suitable terms of reference and suitable provision for the payment of sums found to be due."

But the U.S.S.R. vetoed the resolution in October 1956 and, although Egypt accepted the principles, she resisted any supervision impinging on her sovereignty.

President Eisenhower, on February 20, 1957, in a television address urging Israel to withdraw from the Sinai Peninsula and Gaza, declared:

"We should not assume that, if Israel withdraws, Egypt will prevent Israeli shipping from using the Suez Canal or the Gulf of Aqaba. If, unhappily, Egypt does hereafter violate the armistice agreement or other international obligations, then this should be dealt with firmly by the society of nations."

For nearly 2 years following that, ships carrying cargo to and from Israel were allowed to pass through the Suez Canal, although Israel flagships were still refused transit.

UAR TIGHTENS BOYCOTT—THE "INGE TOFT"

But a year ago, this uneasy gentlemen's agreement seems to have ended. Colonel Nasser suddenly stopped ships carrying cargoes from Israel to the Far East. These were not Israeli flagships, but vessels of other countries carrying cargoes among which were Israeli goods. The boycott was tightened and the cargoes were impounded. The ships were allowed to proceed only once they had yielded the Israeli material.

On May 21, 1959, Nasser halted the Danish ship *Inge Toft*. The captain refused to turn over the cargo, so the freighter was tied up in Port Said Harbor. This detention stirred up justifiable resentment in Congress and throughout the country.

On June 24, 1959, I joined 24 other Senators in a telegram to the White House, indicating our concern over the U.A.R.'s seizure of cargoes shipped to and from Israel via the Suez Canal. The 25 Senators included Gordon Allott, E. L. Bartlett, J. Glenn Beall, Homer E. Capehart, John A. Carroll, Clifford P. Case, Paul H. Douglas, Clair Engle, Ernest Gruening, Philip A. Hart, Thomas C. Hennings, Jr., Jacob K. Javits, Gale W. McGee, Wayne Morse, Frank E. Moss, James E. Murray, Richard L. Neuberger, William Proxmire, Leverett Saltonstall, Hugh Scott, Stuart Symington, Alexander Wiley, Harrison A. Williams, Jr., and Stephen M. Young.

The administration reassured us that: "The U.S. Government's position with respect to the unrestricted use of the canal is clear and unequivocal." The letter from the Department of State answering our letter, signed by Assistant Secretary of State William Macomber, Jr., reaffirmed the U.S. support of United Nations resolutions. With regard to the *Inge Toft* case, he assured us that the administration was fully behind Secretary General Dag Hammarskjold's attempts at settling the issue and that "we will continue to take every appropriate measure which may contribute to a resolution of this problem."

Secretary General Dag Hammarskjold assumed the mission of going to Cairo to discuss the deadlock over Nasser's continuing Suez blockade. On July 1, he arrived in Cairo. However, on June 30, Nasser gave an interview to an Egyptian newspaper in which he stated that despite United Nations decisions, Egypt would still block the canal to Israel shipping. He charged that the *Inge Toft's* journey was an Israel conspiracy with three objectives:

1. To liquidate the remnants of the Palestine problem. His policy of barring their ships was "one of the remaining cards in the hands of the people of Palestine."

2. To push the U.A.R. toward political isolation and Nasser felt that if the issue of freedom of shipping in the canal came before the Security Council at that time it would hamper Egypt's political relations with international organizations, since Israel might win.

3. To infiltrate into Asia and Africa, sowing disagreement between the Arabs and the Asian and African countries. "Our seizure of these goods * * * bound for those countries * * * was bound to raise problems between us and these countries," he said.

Nasser insisted that the Constantinople Convention gave Egypt the right to take the necessary measures to guarantee the defense of the canal and that a state of war still existed between Israel and the U.A.R.

NASSER-HAMMARSKJOLD ARRANGEMENT

At the July 1959 meeting between Nasser and Hammarskjold a reported "arrangement" was made. Under it, the U.A.R. might permit the passage of Israel goods, if, providing at the time of transit through the canal, neither the ships nor the cargo were the property of Israel, and providing that no publicity accompanied the passage.

The United Nations General Assembly once more took up the problem in its 14th session this past September. Secretary of State Christian A. Herter declared that the U.S. position was unchanged in support of free passage through the canal. British Foreign Secretary Selwyn Lloyd also gave his country's position in upholding the international character of the canal. Twenty-eight nations spoke in favor of the freedom of shipping through the Suez waterway, and criticized the U.A.R.'s illegal blockade.

Finally, in December, Israel agreed to test the terms of the Nasser-Hammarskjold proposal, and the Greek *Astypalea* left Haifa for Eritrea carrying 400 tons of cement. Israel notified all the proper authorities through diplomatic channels and there was no public publicity. Nevertheless, on December 18, Port Said officials detained the ship, thus repudiating the Secretary General of the United Nations and his agreement with Colonel Nasser. Mr. Hammarskjold appealed to the U.A.R. Government, which refused to answer.

In January, he went to Cairo to renew his suit. He failed to win any concession from Colonel Nasser.

On February 9, 1960, at a press conference, Secretary of State Herter once more explained the U.S. position. He said:

"The Secretary General of the United Nations undertook to deal firmly with this matter between Israel and Egypt. His efforts are still continuing. As of now, they do not appear to have been too successful. But how

they will turn out, I cannot say at this time. He may still succeed in working out a modus vivendi which will take care of that problem. Until we know the degree of success or failure which he has achieved, I feel that working through that channel, to which we have given full support, is the best way of handling the matter."

Mr. Hammarskjold, returning from his fruitless trip to Cairo, told the press on February 4:

"The fact that certain attitudes of member governments are not adjusted to what, from my point of view, is the U.N. line, does not mean acquiescence either from the U.N. or from the Secretary General."

Meanwhile, Cairo radio broadcast: "Israeli ships shall never pass through the Suez Canal except over our dead bodies."

On April 7 the *Astypalea* was released, and Mr. Hammarskjold said he would renew his efforts to open the canal. Nevertheless, the Suez Canal today remains closed.

In spite of repeated U.N. decisions, consistent American declarations, unswerving congressional perseverance, the history of the canal itself and the clear command of international law, there is still no working solution to the quandary.

Egypt's interference with shipping in the canal runs counter to:

1. The Constantinople Convention;
2. The Egyptian-Israel General Armistice Agreement;
3. The Charter of the United Nations;
4. The decisions of the United Nations;
5. The expressed policy and opinion of major nations; and
6. The established principles of international law.

THE AMENDMENT

With this rather extensive background in mind, the present need for a reaffirmation of American backing for the principle of free transit through the Suez Canal comes into better focus. The amendment now before the Senate provides the vehicle for that vital statement of policy by the peoples' representatives.

Clearly, the present situation cries out for action to reduce tension in the Middle East to prevent a threat to peace from developing in that area. With this situation in mind, a special subcommittee of the House Foreign Affairs Committee, in a recent report, made a strong recommendation that the "United States vigorously support and encourage efforts to obtain free transit through the Suez Canal of persons and goods coming to and from Israel." The report correctly described the Arab-Israel dispute as "an ever-ready volcano" which "commands the free world's attention as a primary area for affirmative action."

Partially as a result of this report, the House Foreign Affairs Committee this year recommended this significant amendment to the Mutual Security Act of 1960. The amendment was adopted in committee by a vote of 19 to 3 and was included in the bill approved by the House.

In its report on the bill, the House committee pointed out that it had followed closely developments in the canal and questioned whether the United States had done as effective a job as possible in urging removal of restrictions on the free movement of commerce through the canal. The report then stated:

"With this and other situations in various parts of the world in mind, the committee proposes an amendment to the Mutual Security Act, expressing the sense of Congress that the United States favors freedom of navigation in international waterways and economic cooperation between nations."

As I have noted, the House endorsed the stand of its Foreign Affairs Committee and included this amendment in its version of the mutual security bill. Unfortunately, the Senate Foreign Relations Committee failed to follow suit.

It is my understanding that this amendment was discussed in the Foreign Relations Committee but was never brought to a vote. We feel it is vital that the sentiment of the Senate be obtained on this matter, particularly in view of the very strong backing it received in the other body.

It should be carefully noted that there are precedents for action of the type proposed by the pending amendment. As recently as last year, in the mutual security appropriations bill, Congress went on record as opposing discrimination by recipients of American aid against Americans on the grounds of race or religion. I testified before the Senate Appropriations Committee in support of that amendment.

The language of this amendment is largely self-explanatory. It states that "the purposes of this act are negated and the peace of the world is endangered when nations which receive assistance under this act wage economic warfare against other nations assisted under this act, including such procedures as boycotts, blockades, and the restriction of the use of international waterways."

The amendment further states that "it is the sense of the Congress that * * * assistance under this act and the Agricultural Trade Development and Assistance Act of 1954 * * * shall be administered to give effect to these principles. * * *" The amendment also states the sense of Congress that in negotiations under the mutual security program or under Public Law 480, "these principles shall be applied, as the President may determine, and he shall report on measures taken by the administration to insure their application."

It should be emphasized—so there will be no misunderstanding on this score—that this language applies not only to the Mutual Security Act but also to the Agricultural Trade Development and Assistance Act. This is because if the Arab nations which have been allocated large shipments of surplus American commodities continue to blacklist American shippers who trade with Israel, steps should be taken to reduce or eliminate such allocations.

I also wish to call attention to the rather careful manner in which "the sense of Congress" is expressed. There is no outright command to the President. There is no sweeping or categorical ban on assistance to offending nations.

The amendment fully recognizes that the President can and must have final discretion in matters relating to our foreign policy. Thus, if the President at any given time should determine that it is in the best interests of the United States to continue to send aid to the Arab nations in spite of acts of economic warfare and obstruction of international waterways, he would not have to cut off such aid. However, he would have to report to Congress on measures taken by the administration to insure the application of the principles set forth in this amendment.

I am firmly convinced that adoption of this amendment is essential if we want to stiffen America's policy on blockades and boycotts. It is essential if we are to proceed with efforts to call a halt to the highwayman activities of the UAR. It is a must if continuing lawlessness and economic warfare in the Near East is to be brought to an end.

Let us, then, by an overwhelming vote, express the will of the American people. I believe deeply our people back to the hilt America's traditional support for freedom of the seas. I believe they support strongly efforts to deny aid to those who thwart the established principles of international law by means of blockades and boycotts.

By adopting this amendment we can show Colonel Nasser we mean business when we ask him to stop using the Suez Canal as a political pawn. We can reaffirm our dedication to the integrity of the high seas. And we can restate in concrete terms our continued high regard for that noble and courageous bastion of democracy in the Middle East, Israel.

If we are to remain true to our traditions and our heritage, if we are to do our part in promoting peace and tranquillity in the Middle East, we must adopt this amendment.

Mr. KEATING. Mr. President, if the extensive background of the present situation is borne in mind, the present need for U.S. backing of the principle of free transit through the Suez Canal comes into complete focus. The pending amendment provides a vehicle for a vital statement of policy regarding the principle of freedom of the seas by the representatives of the American people. Clearly, Mr. President, the situation today in the Suez Canal and in the Near East and the tension that has been created cry out for action by us. But it must be careful, moderate, considered action. This amendment is framed in that way.

I want to emphasize that the House Committee on Foreign Affairs voted 19 to 3 in favor of adding this significant amendment to the Mutual Security Act of 1960. It is included in the measure passed by the other body.

Mr. President, this amendment is not without precedent. When we were faced last year with the situation involving rank discrimination by Saudi Arabia and officials of that country, we adopted, in the mutual security appropriation bill, an amendment in which we went on record as opposing discrimination by recipients of American aid against Americans on the grounds of race or religion.

The amendment before us is in keeping with the language employed last year. Thus we have a clear precedent for the pending amendment. We have yelled and shouted about the need for free transit through the Suez Canal for a long time, and it is high time we acted in this field.

Mr. DIRKSEN. Mr. President, I yield 2 minutes to the Senator from Kentucky [Mr. COOPER].

The PRESIDING OFFICER. The Senator from Kentucky is recognized for 2 minutes.

Mr. COOPER. Mr. President, when some sponsors talked to me about this amendment, I indicated my sympathy with its objectives; but, on reflection and study, I am convinced the amendment can have no effect toward opening the Suez Canal, and I shall vote against it. I want to give my reasons to friends in this body who have talked to me about the amendment.

First let me say, that I believe the embargo against Israeli shipping or any shipping, contravenes the Convention of 1888. I think it contravenes the spirit at least of the Suez Canal settlement. And, it is not in harmony with the attitude exhibited by the United States in 1956, at the time of the Suez Canal crisis. I believe the UAR would make a great contribution to world order by lifting its embargo. The United States has the means of acting directly and on a straight-forward manner upon

this issue, through direct negotiations, and through the United Nations. This is the proper course to follow.

It is my judgment that the adoption of this amendment could produce an effect opposite to that which is intended. The response to this indirect approach would be negative and we would lose our ability to negotiate directly or through the United Nations for full and free use of the Suez Canal. I hope the canal will be so opened. But I believe, with all my heart, the adoption of this amendment will not secure any action which would be helpful to Israel. It would only work against the objectives we hope for—the opening of the canal.

Mr. DIRKSEN. Mr. President, the Senator from Illinois [Mr. DOUGLAS] still has time left.

The PRESIDING OFFICER. The Senator from Illinois has 1 minute.

Mr. DIRKSEN. Mr. President, within the 3 minutes allowable to me, I should like to say that the State Department is opposed to this amendment. The administration is opposed to it. They make the following points:

It would be widely misunderstood by friendly nations abroad. Our Embassies unanimously share the concern of the administration, and they have personnel in the field who survey this matter and have a full understanding of it. They make the point it would be widely interpreted as demonstrating favoritism. They say it would render difficult our efforts to bring about a relaxation of tensions. They say it would be an effort to tie strings to our economic aid and potentially to threaten the use of aid as an instrument of political coercion.

Finally, they make the point that it would probably make the task of eliminating the boycott more difficult and play into the hands of the Soviet bloc, which seeks to exacerbate Middle East tensions, and to further its penetration into the area.

Mr. President, in view of the fact that our embassies in the field, our State Department, our President, and the committee oppose the amendment, it should be voted down.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Illinois, for himself and other Senators. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. LONG of Louisiana (when his name was called). On this vote I have a pair with the senior Senator from Minnesota [Mr. HUMPHREY]. If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I therefore withhold my vote.

Mr. SALTONSTALL (when his name was called). On this vote I have a pair with the senior Senator from New York [Mr. JAVITS]. If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I withhold my vote.

Mr. TALMADGE (when his name was called). On this vote I have a pair with the distinguished junior Senator from Massachusetts [Mr. KENNEDY]. If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I therefore withhold my vote.

The rollcall was concluded.

Mr. MANSFIELD. I announce that the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ], the Senator from Alaska [Mr. BARTLETT], the Senator from Nevada [Mr. BIBLE], the Senators from Virginia [Mr. BYRD and Mr. ROBERTSON], the Senator from West Virginia [Mr. BYRD], the Senator from Nevada [Mr. CANNON], the Senator from Colorado [Mr. CARROLL], the Senator from Louisiana [Mr. ELLENDER], the Senator from Rhode Island [Mr. GREEN], the Senator from North Carolina [Mr. JORDAN], the Senator from Oklahoma [Mr. KERR], and the Senator from Montana [Mr. MURRAY] are absent on official business.

I further announce that the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Wyoming [Mr. O'MAHONEY], and the Senator from Alabama [Mr. SPARKMAN] are necessarily absent.

I further announce that, if present and voting, the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ], the Senator from Nevada [Mr. BIBLE], the Senator from West Virginia [Mr. BYRD], the Senator from Nevada [Mr. CANNON], the Senator from Colorado [Mr. CARROLL], the Senator from Rhode Island [Mr. GREEN], the Senator from Oklahoma [Mr. KERR], the Senator from Montana [Mr. MURRAY], and the Senator from Wyoming [Mr. O'MAHONEY] would each vote "yea."

On this vote, the Senator from Alaska [Mr. BARTLETT] is paired with the Senator from North Carolina [Mr. JORDAN]. If present and voting, the Senator from Alaska would vote "yea" and the Senator from North Carolina would vote "nay."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BEALL], the Senator from New Hampshire [Mr. BRIDGES], and the Senator from Connecticut [Mr. BUSH] are necessarily absent.

The Senator from New York [Mr. JAVITS] is absent by leave of the Senate to attend as Chairman of the Economic Committee a meeting of the NATO Parliamentarians Conference at Strasbourg, France, and his pair has been previously announced.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are absent on official business as members of the Board of Visitors of the U.S. Military Academy.

The Senators from North Dakota [Mr. YOUNG and Mr. BRUNSDALE] are detained on official business.

If present and voting, the Senator from New York [Mr. JAVITS] would vote "yea."

On this vote the Senator from Nebraska [Mr. HRUSKA] is paired with the Senator from Connecticut [Mr. BUSH]. If present and voting, the Senator from Nebraska would vote "nay," and the Senator from Connecticut would vote "yea."

The Senator from Kansas [Mr. SCHOEPPEL] is detained on official business. If present and voting the Senator from Kansas would vote "yea."

The result was announced—yeas 45, nays 25, as follows:

So Mr. DOUGLAS' amendment to the committee amendment was agreed to.

Mr. DOUGLAS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. JOHNSON of Texas. Mr. President, I move to lay that motion on the table.

Mr. FULBRIGHT. Mr. President, may I say something on the question of reconsideration? Is there to be no debate at all?

Mr. JOHNSON of Texas. Mr. President, I withhold my motion.

Mr. FULBRIGHT. I only wish to say a word or two.

The Senate has now taken what I consider to be very irresponsible action. I do not wish to be responsible for what I am sure will flow from this kind of action. This amendment was not submitted to the committee. It was given no consideration. It now intervenes into one of the most delicate and explosive situations existing in the world. I only want to warn the Senate that the reaction from this is bound to be immediate and very serious. I think those who voted for the amendment must take the full responsibility for the consequences.

Mr. DOUGLAS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas [Mr. JOHNSON], to lay on the table the motion of the Senator from Illinois [Mr. DOUGLAS] to reconsider the vote by which the Douglas amendment was agreed to.

Mr. DOUGLAS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The motion to lay on the table is not debatable.

Mr. DIRKSEN. Mr. President, the motion to lay on the table was withheld.

Mr. JOHNSON of Texas. Mr. President, I will withhold the motion, if Senators desire to discuss it further; but if they do not care to do so, I move to lay on the table——

Mr. LAUSCHE. Mr. President——

Mr. JOHNSON of Texas. Mr. President, I withhold the motion, and I ask unanimous consent that the Senator from Ohio be given 1 minute.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. LAUSCHE. Mr. President, it is my opinion that the Senate has taken an action which will cause grief to most of us before a month has passed. We have dealt with a delicate situation.

In my opinion, the easy course to follow with regard to this amendment was to vote for it. The hard course, but the proper course, was to vote against it.

The amendment was not offered in committee. It deals with the most delicate problem confronting our Government. From my standpoint, I wanted with all my might to vote in favor of it, but could not do so.

Mr. DOUGLAS. Mr. President, will the Senator from Ohio yield?

Mr. CASE of South Dakota. Mr. President——

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senator from Illinois may have 1 minute.

The PRESIDING OFFICER. There is no time limit.

Mr. DOUGLAS. Mr. President, the Senator from Arkansas and the Senator from Ohio have made a great point about the fact that the amendment was not submitted to the committee. But they know perfectly well that it was in the House draft, supported by the House Foreign Affairs Committee by an overwhelming vote, and passed by the House. To say that it was not before the committee is somewhat strange.

Mr. JOHNSON of Texas. Mr. President, I move to lay on the table the motion——

Mr. CASE of South Dakota. Mr. President——

Mr. JOHNSON of Texas. Mr. President, I withhold the motion to lay on the table, and ask that the Senator from South Dakota be heard for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from South Dakota is recognized for 1 minute.

Mr. CASE of South Dakota. Mr. President, I think the Senator from Ohio has stated the situation fairly. This is a most delicate and difficult area for the Senate to enter, with as limited debate as there was here this afternoon. I happen to have been in both Israel and Jordan in December, at the time a certain ship was being held up, and I know something about the tension which exists there on this issue.

I think it is wholly unwise for the Senate to enter into this field unless we have a full dress hearing and some debate, with the best advice we can get from those who are conversant with the situation and those who will have to deal with it.

The PRESIDING OFFICER. The time of the Senator from South Dakota has expired.

Mr. CASE of South Dakota. Mr. President, I ask unanimous consent to be allowed to proceed for one additional minute.

The PRESIDING OFFICER. Is there objection?

Mr. JOHNSON of Texas. I have no objection. I believe that every Senator has had an opportunity to express himself on the amendment. Senators seem to be reiterating their views and lecturing other Senators who voted on the opposite side. I believe that any Senator has the right to vote against the motion to lay on the table if he so desires, and I am prepared to make that motion.

Mr. DIRKSEN. Mr. President——

Mr. JOHNSON of Texas. If the Senator from Illinois desires to be heard for 1 minute, I shall be glad to have him given that opportunity, and then I shall make the motion to table.

Mr. CASE of South Dakota. Mr. President, I ask for an additional minute.

Mr. JOHNSON of Texas. Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, the Senator from South Dakota is recognized for an additional minute.

Mr. CASE of South Dakota. Mr. President, I hope every Senator will vote against the motion to table, and will vote against disposing of the question in such a summary way.

It is true that Senators might have spoken earlier during the day, but there was a 15-minute limitation on the question. Some of us probably did not believe that the amendment would prevail. On sober second thought, I believe the Senate ought not to write this provision into the bill.

Mr. JOHNSON of Texas. Mr. President, I thank the Senator for his opinion.

Mr. President, I ask unanimous consent that the Senator from Illinois [Mr. DIRKSEN] be recognized for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIRKSEN. Mr. President, this afternoon we contrived an understanding to consider all amendments tomorrow without a vote, and then allow 5 minutes on a side on all amendments when we vote on Monday.

I believe that the prudent thing to do would be to reject the motion to lay on the table, and reconsider this amendment on Monday. That would give us an opportunity to sleep on it over the weekend. I think that would be a very desirable course. So when the motion is made to lay on the table the motion to reconsider, I respectfully suggest that the Senate reject the motion to lay on the table. That would leave the amendment in status quo until Monday, and we could vote on it when we vote on other amendments.

Mr. FULBRIGHT. Mr. President——

Mr. JOHNSON of Texas. Mr. President, I have agreed to yield briefly to the Senator from Arkansas. I ask unanimous consent that he be allowed 1 minute.

The PRESIDING OFFICER. Without objection, the Senator from Arkansas is recognized for 1 minute.

Mr. FULBRIGHT. Mr. President, I shall not argue the merits. I hope the Senate will follow the course suggested by the minority leader.

However, I wish to clarify the RECORD in this respect with regard to committee action. We reported the bill on April 22. The bill from the House was not received until April 25, and was never referred to the committee. We had already reported our own bill before the House bill arrived. The House bill is still on the calendar. I presume it is at the desk.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. FULBRIGHT. We had reported our bill before the bill was passed in the House.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. DOUGLAS. Did not the Senator know that the House Committee on Foreign Affairs had reported a bill?

Mr. FULBRIGHT. We were aware that it had been reported. We could not believe that the House or the Senate would take this proposal seriously. It is obviously designed for local political advantage in this country. I was amazed that the Senate took it seriously. I do not believe I would have consented to the limitation of time had I thought the proposal would be considered seriously. In my opinion, this is very irregular procedure.

Mr. KEATING. Mr. President, will the Senator yield to me for 1 minute?

Mr. AIKEN. Mr. President——

Mr. JOHNSON of Texas. I yield 1 minute to the Senator from Vermont.

Mr. AIKEN. Mr. President, at a time when the whole world is seeking the way to peace, and is making some progress, I fear that the action the Senate has just taken, if it stands, will create a very serious international crisis, much more severe than any we have had for several years.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent to yield to the Senator from New York [Mr. KEATING] for 1 minute.

The PRESIDING OFFICER. Without objection, the Senator from New York is recognized for 1 minute.

Mr. KEATING. Mr. President, there is apparently a concerted effort to undo what we have just done. I hope Senators who supported the amendment will not be a party to it, and will vote for the motion to lay on the table the motion to reconsider. There is no reason why we should put this question over until tomorrow, in order that members of the State Department, or others who are opposed to this amendment, may have time to turn on the heat.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. KEATING. We have considered this question seriously. The amendment is only a sense-of-Congress amendment. It has been approved in the other

body, and there are responsible Members in the other body, no matter what we may say from time to time. They knew what they were doing. The amendment has been considered by the House Committee on Foreign Affairs, and there is no reason on earth why we should reconsider the action we have taken.

Mr. JOHNSON of Texas. Mr. President, I believe that this procedure is a reflection on the judgment of Members of the Senate. I do not believe that a single Senator is going to be misled or will change his convictions as a result of what is happening. I do not believe Senators would change their position if the amendment were to go over until Monday. I see no reason for attempting to get a pressure operation going. Therefore I move to lay on the table the motion of the Senator from Illinois [Mr. DOUGLAS] to reconsider the vote by which the amendment was agreed to.

Mr. FULBRIGHT. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas [Mr. JOHNSON] to lay on the table the motion of the Senator from Illinois [Mr. DOUGLAS] to reconsider the vote by which the Douglas amendment was agreed to.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll, and Mr. AIKEN answered in the negative when his name was called.

Mr. DOUGLAS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MANSFIELD. Mr. President, the first Senator has answered the rollcall.

Mr. DOUGLAS. Mr. President, do I correctly understand that the question is on the motion to table the motion to reconsider?

The PRESIDING OFFICER. The Chair so stated.

The clerk will resume the calling of the roll.

The rollcall was resumed and concluded.

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from Alaska [Mr. BARTLETT], the Senator from Virginia [Mr. BYRD], the Senator from West Virginia [Mr. BYRD], the Senators from Nevada [Mr. BIBLE and Mr. CANNON], the Senator from Colorado [Mr. CARROLL], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Louisiana [Mr. ELLENDER], the Senator from Rhode Island [Mr. GREEN], the Senator from Arizona [Mr. HAYDEN], the Senator from North Carolina [Mr. JORDAN], the Senator from Oklahoma [Mr. KERR], the Senator from Montana [Mr. MURRAY], and the Senator from Virginia [Mr. ROBERTSON], are absent on official business.

I further announce that the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Missouri [Mr. SYMINGTON], and the Senator from Alabama [Mr. SPARKMAN], are necessarily absent.

On this vote, the Senator from Louisiana [Mr. ELLENDER] is paired with the Senator from Missouri [Mr. SYMINGTON]. If present and voting, the Senator from Louisiana would vote "nay" and the Senator from Missouri would vote "yea."

On this vote, the Senator from Minnesota [Mr. HUMPHREY] is paired with the Senator from North Carolina [Mr. JORDAN]. If present and voting, the Senator from Minnesota would vote "yea" and the Senator from North Carolina would vote "nay."

On this vote, the Senator from Massachusetts [Mr. KENNEDY], is paired with the Senator from Virginia [Mr. ROBERTSON]. If present and voting, the Senator from Massachusetts would vote "yea" and the Senator from Virginia would vote "nay."

I further announce that, if present and voting the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ], the Senator from Alaska [Mr. BARTLETT], the Senators from Nevada [Mr. BIBLE and Mr. CANNON], the Senator from West Virginia [Mr. BYRD], the Senator from Colorado [Mr. CARROLL], the Senator from Rhode Island [Mr. GREEN], the Senator from Oklahoma [Mr. KERR], the Senator from Montana [Mr. MURRAY], the Senator from Wyoming [Mr. O'MAHONEY], and the Senator from Alabama [Mr. SPARKMAN] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BEALL], the Senator from New Hampshire [Mr. BRIDGES], and the Senator from Connecticut [Mr. BUSH] are necessarily absent.

The Senator from New York [Mr. JAVITS] is absent by leave of the Senate to attend as Chairman of the Economic Committee a meeting of the NATO Parliamentarians Conference at Strasbourg, France.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are absent on official business as members of the Board of Visitors of the U.S. Military Academy.

The Senators from North Dakota [Mr. YOUNG and Mr. BRUNSDALE], the Senator from Kansas [Mr. SCHOEPPEL], the Senator from Kentucky [Mr. COOPER], and the Senator from Wisconsin [Mr. WILEY] are detained on official business.

If present and voting, the Senator from Kansas [Mr. SCHOEPPEL] and the Senator from New York [Mr. JAVITS] would each vote "yea."

On this vote the Senator from Connecticut [Mr. BUSH] is paired with the Senator from Nebraska [Mr. HRUSKA]. If present and voting, the Senator from Connecticut would vote "yea," and the Senator from Nebraska would vote "nay."

The result was announced—yeas 40, nays 29, as follows:

So the motion to table the motion to reconsider was agreed to.

The PRESIDING OFFICER. The committee amendment is open to further amendment.

Mr. CHURCH. Mr. President, I call up my amendment identified as "3-28-60—I."

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 1, after line 6, insert the following:

SEC. 101. Section 103(a) of the Mutual Security Act of 1954, as amended, which relates to authorizations for military assistance, is amended by striking out "1960" and inserting "1961"; by striking out "$1,400,000,000" and inserting "$1,800,000,000" and by striking out the last sentence.

The PRESIDING OFFICER. The time limitation on this amendment is 45 minutes on each side. How much time does the Senator from Idaho yield to himself?

Mr. CHURCH. I yield myself as much time as I may require.

The PRESIDING OFFICER. The Senator from Idaho is recognized for such time as he desires, up to 45 minutes.

Mr. CHURCH. Mr. President, this amendment authorizes a military assistance program of $1,800 million for the coming year. This is a 10 percent reduction in the amount requested by the administration, but the effect of the amendment, if adopted, would be merely that of holding the military assistance program to the current levels of spending. For some time, we have been spending approximately $1,800 million a year in military assistance. The administration seeks to expand the level of spending to approximately $2 billion a year.

I may say at the outset that I offer the amendment, not as one who is opposed to the foreign aid program, but as one who has supported it. The mutual security program is not popular in the State of Idaho. I may be the first elected representative from my State ever to vote for foreign aid. I have done so because I have a strong conviction that foreign aid, however distasteful it may be to the voters, is nonetheless nec-

essary in the interests of promoting peace and freedom in the world.

But even as I have supported the program, I have sought, as have many other Members of the Senate, including the members of the Committee on Foreign Relations, to improve and perfect the program. There are few Senators who are satisfied with it. The chairman of the Committee on Foreign Relations himself has referred to it as "warmed-over grits." I must say that the committee this year did very little to change or perfect or reform the program. It is the same stale package.

Military assistance is certainly a case in point. Last year it was fashionable to criticize the emphasis on military aid in the foreign aid program. Indeed, so great was the criticism, not only by Members of the Senate, but by other observers elsewhere in public life, as well, that when the spokesmen for the State Department came before the committee last year, they took pains to assure us that the trend from year to year in foreign aid was to reduce military assistance. They said they approved of the trend. They indicated that they felt the trend should continue, and would continue in their planning. I think we were reassured by those statements, so much so that last year the Senate adopted a carte blanche authorization for military assistance for the next 3 years. I opposed that move because it seemed to me, that whenever you make a given piece of furniture a permanent fixture in the house of government, there is no better way to do it than by voting a carte blanche authorization.

No sooner did we do this, than the administration came forward this year, at its first opportunity, and rather than proposing a reduced program of military assistance, it proposed to expand that program above the current levels of spending. Instead of coming to Congress with a package in which about 40 percent was dedicated to military assistance, they reversed the trend which they had applauded last year in their presentations before the committee, and presented to us a package in which military assistance is almost 50 percent of the total program. The amount of the administration's requests this year for military assistance is $400 million more than was requested last year. It is $600 million more than Congress authorized last year. It is $700 million more than was actually appropriated by Congress for military assistance last year. Moreover, the $2 billion the administration seeks is $650 million more than the average amount appropriated for military assistance by Congress during the preceding 6 years, from 1955 through 1960.

To put it still another way, if we take the amount that the administration asks, which is contained with the provisions of the bill before the Senate, and if we add to it the $2 billion the administration seeks for military assistance, and the $700 million the administration seeks for the Development Loan Fund, we reach a grand total of $4,175 million. This is an increase of almost $1 billion above the program approved by Congress last year.

If we look at the $1 billion proposed increase, we find that 75 percent of it relates to the proposal for an expanded military assistance program.

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. CHURCH. I am glad to yield.

Mr. LONG of Louisiana. Is it not true that a great proportion of the expanded military expenditure is proposed to be used in Europe, where those nations are already holding the better part of $10 billion of American funds, which could be used to pay for anything those countries would like to purchase for their defense?

Mr. CHURCH. It is true that more money is planned for Western Europe next year, and I shall discuss that point in the course of my remarks.

Mr. President, I have offered this amendment because I do not think so large an increase in military assistance is justified. I submit that the State Department has failed to make a case for it. When their representatives were questioned in the committee, they said they were seeking $2 billion because there was a depletion in the pipeline; because more money was being taken out of the military assistance pipeline each year than Congress had been putting in. Therefore, they felt it necessary for Congress to approve the full $2 billion this year, so that the depletion in the pipeline would not continue.

That proposition sounds logical enough; but if we examine the facts, we will find that there is still more than $2 billion—to be more exact, more than $2,500 million—in the pipeline. It is not necessary to put $2 billion into the pipeline this year in order to prevent further depletion.

The current level of spending is $1,800 million. All we have to do is to put into the pipeline each year as much as we take out. All that is necessary is to put in $1,800 million, if the military assistance program is to be maintained at its present level. To put in $2 billion would be to increase the program. When the representatives of the State Department were questioned closely on this point, they conceded that the purpose was, in fact, to increase further the general level of spending for military assistance abroad by approximately $200 million a year. I submit that there is no need to increase the military assistance program above present levels.

Do we realize that we are at present extending military assistance to 39 countries—to almost half the countries of the world?

In only one region—in Latin America—is this program slowly being diminished. This is because, with respect to Latin America, Congress took a stand. Last year Congress wrote into the mutual security program a limitation of military spending in South America. As a result of that limitation, the State Department now expresses its approval.

The Department now concedes that the program of military assistance in South America was probably a mistaken one; and the Department pledges that this program will be diminished from year to year. But I submit that if the Congress had not imposed the ceiling, we would now be asked by the administration to expend even greater amounts in Latin America, even as we are being asked to expend, each year, greater amounts in other regions of the world.

What about the other regions, Mr. President? Why, for example, do we need to spend nearly $100 million more for military assistance in Western Europe? That is the plan of the administration. In 1960, the expenditures for military assistance in Western Europe, under this program, amounted to $364 million. In the coming year, the administration proposes to spend, for the same purpose, in Western Europe, $459 million—or an increase of nearly 25 percent. Does any Senator believe that France or Belgium or the Netherlands or the United Kingdom is unable to contribute its full share to its own defense?

Mr. President, if any Senator believes it, assuredly the administration does not, because this year the administration has said these very countries should do more, that the level of prosperity in Europe is such that these countries should do more to assist us in a common effort to furnish greater amounts of capital to the underdeveloped countries of the world. So, on the one hand, the administration proclaims that these countries should do more, owing to their own economic prosperity, which we ourselves helped to stimulate, through the Marshall plan, and should assist us in providing more capital with which to help the underdeveloped countries of the world. But, on the other hand, the administration proposes that we give these same Western European countries approximately $100 million more of our own money than we gave them last year for their own military establishments.

So, Mr. President, we have here a case in which the left hand does not seem to know what the right hand is doing. It is but another flagrant example of moving at once in opposite directions.

Listen as I read what I must describe as the muddled argument by Mr. Foy Kohler, Assistant Secretary of State for European Affairs, who sought to justify the request for additional military assistance to Europe. He made this statement before the Foreign Relations Committee:

> The mutual security program for Europe in the fiscal year 1961 is almost entirely military. Military assistance proposed for European "country programs" totals $459 million. A good deal of this is made up of items involving cost-sharing projects designed to induce increased and more effective country contributions to the NATO defense effort and to provide an incentive for greater country efforts toward essential modernization of NATO-committed forces. * * * Our contributions are designed to maintain a level of defensive strength which is much greater than could be expected from Europe's effort's alone.

Mr. President, how could that be true? Any Senator who has visited Western Europe in the last year or two has seen with his own eyes the remarkable economic recovery that has occurred there.

Western Europe is bustling. Its industrial activity is greater than it has ever before enjoyed. Can it really be true that these countries cannot afford to contribute their full share to their own defense? Mr. President, the figures do not bear out such an assertion. From 1948 to 1958, the gross national product of these western European nations—the very nations which are receiving American military aid—increased by 148 percent; and that increase occurred during a period when the economy of the United States increased its gross national product by only 72 percent. So Europe is well able to pay its own share of the cost of its own defense, without receiving increased military aid from us.

But Assistant Secretary of State Kohler continued as follows his statement before the Senate Committee on Foreign Relations:

> Our European allies would be able to pay their own defense costs—provided we and they were willing to accept a substantially lower level of total defensive power.

Mr. President, do the facts bear out that statement? These European countries could easily maintain their own forces at the desired strength without receiving any assistance from the United States, let alone increased assistance, if they had to do it for themselves. We give them the easy way out, Mr. President, by continuing to supply them with large amounts of military aid. So long as we are willing to send a half a billion dollars, annually, to Western Europe, those countries will accept it; it is good, sensible politics for them to accept it. So long as we persist in sending nearly half a billion dollars, annually, to Western Europe, we can be sure that those countries will not be induced to spend larger amounts of their own funds in their own defense. Instead, they will tend to spend smaller amounts of their own money. And, again, the figures bear that out.

In the 11 years from 1949 through 1959, the gross national product of the European members of NATO has more than doubled; it has increased from $105 billion, in 1949, to $243 billion, in 1959. As these countries have grown richer, they have been spending relatively less for their own defense. The percentage of their gross national product which they spent for their own defense from 1949 through 1954 was, on the average, 6.1. But as they have grown richer, during the period from 1955 to 1959, they have spent only 5.7 of their gross national product for their own defense. So, Mr. President, as their wealth has increased, the effort they have been making has diminished. The 5.7 percent of their gross national product which they contributed to their military forces in the years from 1955 to 1959 compares to the 10 percent of its gross national product that the United States has devoted to its military forces during the same period. These figures are based upon the percentages of their gross national products which the respective countries have spent for that purpose.

So, Mr. President, these countries of Western Europe are not making the same effort that the United States is making. These countries are making a relatively smaller effort, as their productivity and the level of their prosperity increase. Yet, in the face of this situation, we in the Congress are being asked to increase the U.S. contribution by more than $100 million in the coming year.

I say, Mr. President, that the case does not bear out the assertions of the administration, and we ought not to approve increased military assistance in this area; but, rather, we should reverse our tactics and make clear to these countries that we expect them to contribute their full part. And the best way we can achieve that purpose is to declare to them, here and now, that we are going to progressively reduce our contribution and expect them to take up the slack.

That is the way we will make progress. It is demonstrated on the record of the last 10 years that we do not make progress in this direction by increasing the amount of the American dole. So I think it wrong, and unnecessary, and unjustified on the record, that we should increase our military assistance program in Western Europe by more than $100 million in the coming year.

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. CHURCH. I yield.

Mr. LONG of Louisiana. Was not the giving of a lot of the billions of dollars in military aid that we gave Western Europe based on the theory that those countries would be able to make a more substantial contribution as their prosperity increased?

Mr. CHURCH. That is correct; and they have not. We are being met with the same old shopworn argument without the data and backing for it. I have presented the data in the hope they will disprove the assertions that are made to justify the increased amount of military aid to Europe.

Mr. LONG of Louisiana. In the early days of the Marshall plan and military aid, if a question was raised as to why we should give the countries all the money advanced to them and why it could not be loaned, the answer was made that these people cannot pay us back and will never be able to. Now we find our country in the position of trying to protect its gold holdings, because the countries abroad have almost enough credits against us to empty the vaults at Fort Knox, the way matters stand.

Mr. CHURCH. Mr. President, so much for Europe. What about the other regions in the world? What about Africa? What about this restive continent that is only now beginning to awaken from its ancient slumbers? It is just now beginning to awaken, but we are already there. We are already standing by the couch administering our military nostrums. We are already dispensing weapons in Africa. To be sure, the program is not large in Africa yet, but the administration proposes to increase it 50 percent next year over what it was this year.

I cannot conceive of a continent that needs an arms race less than does Africa; but I venture to predict, on the floor of the Senate tonight, that unless the Congress imposes a ceiling in Africa, as we did impose a ceiling in Latin America, we shall see this program grow from year to year even as we have seen it grow elsewhere in the world.

What about Asia and the Near East? In 1960 we programed $255 million for military assistance in south Asia and the Near East. What does the administration request this year? $458 million—an increase of $203 million in this part of the world, which nearly doubles the size of the program there.

I suggest, Mr. President, that nowhere in the world is military aid more dubious, nowhere is the case for military aid more vulnerable to grave and searching question, than in south Asia and the Near East.

We have been pouring lavish amounts of money into countries like Pakistan and Iran. We have been maintaining Armed Forces in those countries that are many times larger than necessary to maintain internal order; and yet these very forces would be of little consequence, by our own admission, against Russian attack. Indeed, it is not even seriously contended, Mr. President, that these military machines restrain Russian aggression.

It is conceded, quite openly, that it is our deterrent power which deters Russian aggression in this area; and, if not our deterrent power, then it is the realization of the Russians themselves that military adventure here would profit them very little, for it would undermine their position and the position of communism everywhere else in the world.

So we sustain in countries like Iran and in Paskistan useless and excessive military forces, in spite of the fact that they are neither useful as a deterrent against Russian aggression, nor are they needed to maintain internal order.

This is a mischievous policy. It is mischievous because these military machines have a capability only of fighting one another. It is mischievous in Pakistan, because there we have stimulated an arms race between Pakistan and India; and those who have visited Pakistan have come back and told the Senate, and have told me personally, that in Pakistan it is generally felt that the armed forces there are meant to defend Pakistan against India. Those who have visited India have likewise said that the Indian Government has complained that it must appropriate larger amounts of money than it can afford to the maintenance of big military forces in India, because they fear the threat of Pakistan.

So I suggest to you, Mr. President, that in this large region of the world it is difficult to justify what we are already spending, let alone the request of the administration to double the size of the program in this region.

Lest it be said that I am merely making a personal indictment that is unfounded or unshared by other observers, I would refer the Senate to the Comptroller General's report to the Congress, "Review of the Military Assistance Program to Pakistan." I am sorry that I cannot detail it on the floor, because it is classified. Like so many documents which relate to the actual substance of the foreign aid program, it is classified and thus beyond the reach of this debate.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. CHURCH. I yield.

Mr. CLARK. In the judgment of the Senator, who is a very able member of the Foreign Relations Committee, should this report and many others be classified?

Mr. CHURCH. I think not. I think the practice of classification has not only exceeded its proper bounds, but has resulted in putting blinders on the Congress and the American people. We cannot assess, we cannot refine, we cannot perfect this program unless we know the facts; and we cannot engage here in an intelligent and mature debate on the program without full use of the facts. Yet classified information prevents us from debating the program as it should be debated and from exposing it to all the American people for what it is.

But let me read from an unclassified document, from the Conlon report on Asia, prepared as a special study for the Senate Foreign Relations Committee.

In this study with reference to the situation in Pakistan the Conlon report contains the following observations:

It may be questioned, however, whether it is sound policy for the United States to encourage Pakistan to maintain its military establishment at present high levels, levels that may involve outlays of as much as two-thirds of Pakistan's own budget annually, in addition to foreign contributions. Pakistan, if not her associates in arms, has assumed in the past that the building of her military strength was inherently a counterpoise in strength for bargaining with India and against possible encroachments on Pakistan by India. The fear of such encroachments upon Pakistan is not to be underestimated, nor should India's fears of Pakistani aggressive action be overlooked. For Pakistan, India holds the favored position militarily and geographically on every major issue in dispute between the two parties. Without a substantial military arm, Pakistan argues, India will not be moved by arguments of logic or of history on cases such as those of Kashmir. Thus it appears to have been a considered policy in Pakistan to construct an armed force that would back up in terms of power what Pakistan felt was her right in international affairs, especially as regards India.

At this time, however, with signs of betterment of Indo-Pakistani relations appearing and with a sizable armed force now developed in Pakistan, it would be advantageous to cut down on the budgetary priority given to the military establishment, as financed from internal and from external sources, and to devote more concentrated attention to the basic economic problems of the country. When a favorable time arises, an attempt should be made to effect mutual defense and partial disarmament agreements between India and Pakistan to release energies for more constructive activities in both countries.

Mr. President, we have contributed to an arms race which profits neither side, and which certainly ought not to be an objective of proper American foreign policy.

The same questions can be raised about Iran that I have attempted to detail with reference to Pakistan. These questions certainly provoke the most serious doubts about the propriety of continuing our military assistance program in this area at the present levels, let alone increasing that program by over $200 million in the coming year.

I cannot pass from a discussion of the foreign-aid program in this part of the world without observing that the extent of our error is not measured by the amount of money we have poured into the military establishments of countries like Pakistan and Iran. We have fostered the development of forces so large in these countries that they are beyond the capacity of the impoverished economies of these lands to sustain them, and so to support the investment of American moneys in the armies, we have to add additional millions of dollars of American money to support the overburdened economies.

This completes the circle. It makes a perfect zero.

So, Mr. President, I urge this amendment upon the Senate, knowing it is a moderate amendment. It will effect no cut in the military-aid program. If agreed to, it will establish the authorized program for military aid abroad at the current level of expenditure, which is $400 million above what Congress authorized last year, $500 million above what Congress appropriated last year, and $450 million above the average amount which we have appropriated for military assistance during the past 6 years. If the amendment is agreed to, it will leave the authorized program with abundant funds for military assistance. Let there be no doubt on this score.

Indeed, Mr. President, the level of $1.8 billion would permit large increases in expenditures in areas where the money is really needed. I cannot urge this amendment upon the Senate without making it clear that I believe there are places in the world where we need to give military assistance. Those are the places where the nature of the Communist threat takes on a military character. In places like Korea, Taiwan, and Vietnam we need the military assistance program. These countries do face a military threat, and they cannot maintain adequate defense forces with their own meager resources.

For those who may not agree with me with respect to Western Europe, let me point out we could increase the program $100 million, as the administration requests, even in Western Europe, and still have plenty of funds to do so, within the limits of the present level of the expenditures.

The effect of my amendment will be to impose some degree of restraint upon this expanding military aid program all around the world. Unless the Congress stands up and asserts itself, this program, which is as subject to "Parkinson's law" as any other program, is going to get bigger and bigger with every passing year. Only in South America, where the Congress has imposed a ceiling, is the program no larger this year than last. The administration now agrees it is advisable in our interests to progressively reduce the size of the program in South America.

I say to you Senators, let us agree to this amendment. Let us say clearly that we believe the total military assistance program in the world ought not to be expanded above the ample level of current expenditures. That, Mr. President, will be a beginning. If we will do only that, then we can be sure the administrators of the program will begin to attempt more prudently to concentrate the funds at their disposal in the areas where the military assistance program is really needed, and will begin to cut down in those areas where the program is highly questionable, or where it can be demonstrated it has been hurtful to the interests of the United States in fostering peace and freedom in the world.

This is the way to start. This is a moderate amendment. It will leave more than ample funds available for military assistance. It does not go so far as it should, for I have hoped to win sufficient votes to pass the amendment, by asking only that we hold the line at present levels, by asking only that the Congress say, "Thus far, but no farther."

I think the facts which have been presented by the administration fail to justify the attempt to increase this program above present levels, and I urge upon the Senate favorable consideration of the amendment I have offered.

Mr. GRUENING. Mr. President, will the Senator yield?

Mr. CHURCH. I yield.

Mr. GRUENING. I should like to commend the distinguished Senator from Idaho for his very comprehensive, very convincing, and very enlightening presentation of one aspect of the program which needs, at least, as he points out, to be held in status quo.

The Senator has well said that the amendment is very moderate. It will be interesting to see whether the forces which wish to make this program larger and larger, without adequate control and accounting, are willing to say, "Thus far and no farther."

I hope very much the Senate will adopt this amendment.

Mr. CHURCH. I thank the Senator from Alaska very much.

Mr. President, I yield the floor.

Mr. JOHNSON of Texas. Mr. President, I yield 5 minutes to the Senator from Arkansas [Mr. FULBRIGHT].

The PRESIDING OFFICER. Without objection, the Senator from Arkansas is recognized for 5 minutes.

Mr. FULBRIGHT. Mr. President, this amendment was considered at length and thoroughly by the committee, and rejected. The argument for a cut in the military assistance is better applied when the appropriation bill comes before the Senate.

What the amendment amounts to is simply a reversal of the action which was taken by the Congress last year in authorizing, for a 2-year period, appropriations for military assistance. The issue, then, really is whether we are to undo that action and go back to a system of annual appropriations or not.

There will be full opportunity for the Senator from Idaho to offer his amendment to cut the appropriation by $200 million or $500 million, or any amount he wishes, and that proposal will be considered by the Senate and the House.

Personally, I have no particular concern about that particular aspect of the question. I merely think it is rather ridiculous to authorize a 2-year appropriation last year, and to come in this year and undo what we did in connection with the authorization. If we accept this amendment, we shall be adding $1,800 million to the present authorization in the bill. I do not think this is the orderly way to achieve the Senator's purpose.

Mr. CHURCH. Mr. President, will the Senator yeild?

Mr. FULBRIGHT. I yield.

Mr. CHURCH. I ask my good friend, the chairman of the Foreign Relations Committee, if it is not true that we have already taken action in this bill to impose a limitation upon the extent of the military assistance program in Latin America. Is not this in conflict with the carte blanche authorization which we approved last year, every bit as much as is the amendment I now propose?

Mr. FULBRIGHT. I do not quite understand the Senator's point.

Mr. CHURCH. If I may restate it, the purpose of this amendment is to place a limitation upon the authorized military assistance program for the coming year, at the level of $1,800 million.

Mr. FULBRIGHT. That is correct. However, that is not all it would do.

Mr. CHURCH. If I may add, the effect of my amendment would be to impose a limitation on the authorized military assistance program of $1,800 million for the coming year.

Mr. FULBRIGHT. And to nullify the action taken last year authorizing a 2-year program.

Mr. CHURCH. It is necessary, in order to impose a ceiling on the authorization this year, to nullify the action taken last year. But I say that this is no more inconsistent than the action the committee itself has taken in imposing a $55 million limitation on the military assistance program in Latin America.

Mr. FULBRIGHT. Last year we gave special attention to Latin America. There was no question about the concern of the committee with regard to military assistance in Latin America.

This year we made a token cut of $2 million, from $57 million to $55 million, to express the sentiment of the committee that, with regard to Latin America, there should be a decrease in the military assistance, but not in economic aid, or in other branches of assistance.

We also excepted approximately $10 million for training. The provision we put in last year was not effective, as the Senator knows, because it did not cover the sales for cash or for credit. It was not operative, and we were trying to correct that situation by putting in a limitation of $55 million.

I do not maintain that the Senate does not have authority to do what is proposed, or that it cannot undo what it did last year. I see no particular point in doing so. I am not particularly concerned about this question. I do not think it is a major matter. I think this amendment is not nearly as important as the other amendments. I merely think it is rather an inept way to proceed to achieve the Senator's own purposes.

The Senator will have full opportunity, as I have already said, when the appropriation bill comes before the Senate. I do not know what the Appropriations Committee will recommend. The administration has requested $200 million. I would almost bet that the Appropriations Committee will not allow the full amount which the administration requests. It never does. I would almost bet a small sum that when the appropriations bill comes from the Appropriations Committee it will be under the $1,800 million, so I am not very much concerned about that feature. If the Senator wishes to insist upon his amendment, and the Senate wishes to do so, it can undo what was done last year in authorizing a 2-year appropriation.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. FULBRIGHT. Mr. President, I am not going to fight, bleed, and die over this issue. I do not believe that the amendment is appropriate. It is a rather irrelevant way to get at the problem. At the proper time, when the appropriation bill comes before the Senate, the Senator can move to reduce the amount $200 million or $500 million.

Mr. DODD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Connecticut wish time?

Mr. DODD. Will the Senator from Texas yield me 3 minutes?

Mr. JOHNSON of Texas. I yield 3 minutes to the Senator from Connecticut.

Mr. DODD. Mr. President, the amendment we are discussing vitally affects the amendment we adopted last year, which I had the privilege of offering to the Senate, and which the Senate adopted, as I recall, by a vote of 56 to 38.

I think the chairman of the Foreign Relations Committee hit the nail on the head when he pointed out what the amendment of the Senator from Idaho, whom I admire very much, would do. What is proposed is to put military assistance back into the foreign aid program, and this amendment would increase the amount of money under this foreign aid bill by $1,800 million.

It may be that everything the Senator from Idaho has said about the military program is correct, but my point is that this is not the hour or the place to argue the question. Under the bill passed last year, the military assistance program will come before the Appropriations Committee as a part of the defense budget. There it will receive full consideration. That is where it should be. That is what we decided last year, when we determined that military assistance should be placed under the defense budget.

I do not doubt that my friend has his facts right. He may find me on his side when this question comes before the Appropriations Committee. But let us not put the military program back in the foreign aid bill. Let us not subject ourselves again to the charge that our foreign economic aid program is just an arm of our military policy. I thought that took much of the moral strength out of our foreign aid program in the past, and that is why I offered the amendment to separate the programs last year.

I hope the Senate will stand by what it did then.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Idaho to the committee amendment.

Mr. CHURCH. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered, and the legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ], the Senator from Alaska [Mr. BARTLETT], the Senators from Nevada [Mr. BIBLE and Mr. CANNON], the Senators from Virginia [Mr. BYRD and Mr. ROBERTSON], the Senator from West Virginia [Mr. BYRD], the Senator from Colorado [Mr. CARROLL], the Senator from Louisiana [Mr. ELLENDER], the Senators from North Carolina [Mr. ERVIN and Mr. JORDAN], the Senator from Rhode Island [Mr. GREEN], the Senator from Oklahoma [Mr. KERR], the Senator from Minnesota [Mr. MCCARTHY], the Senator from Arkansas [Mr. MCCLELLAN], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Utah [Mr. MOSS], the Senator from Montana [Mr. MURRAY], the Senator from Maine [Mr. MUSKIE], the Senator from Florida [Mr. SMATHERS], the Senator from Texas [Mr. YARBOROUGH], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

I further announce that the Senator from Minnesota [Mr. HUMPHREY], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Oregon [Mr. MORSE], the Senator from Wyoming [Mr. O'MAHONEY], and the Senator from Alabama [Mr. SPARKMAN] are necessarily absent.

I further announce that, if present and voting, the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ], the Senator from Alaska [Mr. BARTLETT], the Senators from Nevada [Mr. BIBLE and Mr. CANNON], the Senator from Virginia [Mr. BYRD], the Senator from West Virginia [Mr. BYRD], the Senator from Montana [Mr. MURRAY], the Senator from Alabama [Mr. SPARKMAN], the Senator from Arkansas [Mr. MCCLELLAN], and the Senator from Tennessee [Mr. KEFAUVER] would each vote "yea."

On this vote, the Senator from Colorado [Mr. CARROLL] is paired with the Senator from Oregon [Mr. MORSE]. If present and voting, the Senator from Colorado would vote "nay," and the Senator from Oregon would vote "yea."

On this vote, the Senator from Rhode Island [Mr. GREEN] is paired with the Senator from Wyoming [Mr. O'MAHONEY]. If present and voting, the Senator from Rhode Island would vote "nay," and the Senator from Wyoming would vote "yea."

On this vote, the Senator from Louisiana [Mr. ELLENDER] is paired with the Senator from Texas [Mr. YARBOROUGH]. If present and voting, the Senator from

Louisiana would vote "yea," and the Senator from Texas would vote "nay."

On this vote, the Senator from North Carolina [Mr. ERVIN] is paired with the Senator from Minnesota [Mr. MCCARTHY]. If present and voting, the Senator from North Carolina would vote "yea," and the Senator from Minnesota would vote "nay."

On this vote, the Senator from Virginia [Mr. ROBERTSON] is paired with the Senator from Minnesota [Mr. HUMPHREY]. If present and voting, the Senator from Virginia would vote "yea," and the Senator from Minnesota would vote "nay."

On this vote, the Senator from North Carolina [Mr. JORDAN] is paired with the Senator from Florida [Mr. SMATHERS]. If present and voting, the Senator from North Carolina would vote "yea" and the Senator from Florida would vote "nay."

On this vote, the Senator from Utah [Mr. Moss] is paired with the Senator from Ohio [Mr. YOUNG]. If present and voting, the Senator from Utah would vote "yea," and the Senator from Ohio would vote "nay."

On this vote, the Senator from Massachusetts [Mr. KENNEDY] is paired with the Senator from Oklahoma [Mr. KERR]. If present and voting, the Senator from Massachusetts would vote "nay," and the Senator from Oklahoma would vote "yea."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BEALL], the Senator from New Hampshire [Mr. BRIDGES], and the Senator from Connecticut [Mr. BUSH] are necessarily absent.

The Senator from New York [Mr. JAVITS] is absent by leave of the Senate to attend as Chairman of the Economic Committee a meeting of the NATO Parliamentarians Conference at Strasbourg, France.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are absent on official business as Members of the Board of Visitors of the U.S. Military Academy.

The Senators from North Dakota [Mr. YOUNG and Mr. BRUNSDALE], the Senator from Hawaii [Mr. FONG], the Senator from Kansas [Mr. SCHOEPPEL], the Senator from Wisconsin [Mr. WILEY], the Senator from Illinois [Mr. DIRKSEN], and the Senator from Vermont [Mr. PROUTY] are detained on official business.

On this vote the Senator from Nebraska [Mr. HRUSKA] is paired with the Senator from Hawaii [Mr. FONG]. If present and voting, the Senator from Nebraska would vote "yea," and the Senator from Hawaii would vote "nay."

On this vote the Senator from Kansas [Mr. SCHOEPPEL] is paired with the Senator from Illinois [Mr. DIRKSEN]. If present and voting, the Senator from Kansas would vote "yea," and the Senator from Illinois would vote "nay."

The result was announced—yeas 27, nays 32, as follows:

[No. 174]

YEAS—27

Church	Dworshak	Hart
Clark	Eastland	Hill
Cooper	Frear	Holland
Curtis	Gore	Jackson
Douglas	Gruening	Johnston, S.C.
Long, Hawaii	Monroney	Stennis
Long, La.	Proxmire	Talmadge
Magnuson	Randolph	Thurmond
Mansfield	Russell	Williams, Del.

NAYS—32

Aiken	Goldwater	McNamara
Allott	Hartke	Martin
Bennett	Hayden	Morton
Butler	Hennings	Mundt
Capehart	Hickenlooper	Pastore
Carlson	Johnson, Tex.	Saltonstall
Case, N.J.	Keating	Scott
Case, S. Dak.	Kuchel	Smith
Dodd	Lausche	Symington
Engle	Lusk	Williams, N.J.
Fulbright	McGee	

NOT VOTING—41

Anderson	Ellender	Moss
Bartlett	Ervin	Murray
Beall	Fong	Muskie
Bible	Green	O'Mahoney
Bridges	Hruska	Prouty
Brunsdale	Humphrey	Robertson
Bush	Javits	Schoeppel
Byrd, Va.	Jordan	Smathers
Byrd, W. Va.	Kefauver	Sparkman
Cannon	Kennedy	Wiley
Carroll	Kerr	Yarborough
Chavez	McCarthy	Young, N. Dak.
Cotton	McClellan	Young, Ohio
Dirksen	Morse	

So Mr. CHURCH's amendment was rejected.

Mr. FULBRIGHT. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. JOHNSON of Texas. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF BUSINESS

Mr. JOHNSON of Texas. Mr. President, if I may have the attention of the Senate, it is not expected that there will be any more yea-and-nay votes this evening. The Senate will remain in session so long as Senators may desire to transact routine business; but there will not be any yea-and-nay votes, if the leadership can avoid them.

If it is agreeable, it is proposed to have the Senate convene at 12 o'clock noon tomorrow. Under the unanimous-consent agreement, there will be 1 hour of debate on any amendment, motion, or appeal, and 2 hours debate on the bill.

However, if a yea-and-nay vote is ordered on any amendment, motion, or appeal, it will be postponed until Monday, and at that time the proponents of any amendment, motion, or appeal will have 5 minutes, and the opponents will have 5 minutes. There will be no yea-and-nay votes tomorrow.

If the Senate is unable to finish its discussion of the bill tomorrow, and if Senators desire to call up any amendments, they may do so on Saturday. It is not expected that there will be a yea-and-nay vote on any amendment, motion, or appeal, or any other matter, on Friday. However, on Monday, debate on such amendments, motions, and appeals will be limited to 5 minutes.

Mr. SALTONSTALL. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. SALTONSTALL. The plan as narrated by the distinguished majority leader is entirely satisfactory to me, with one suggestion: That there should be no voice votes on motions to reconsider and motions to lay on the table, because if such voice votes were taken on Friday, when not many Senators were present, the situation would be——

Mr. JOHNSON of Texas. I am not taking the position that all Senators will not be present. All I say is that any Senator who wishes to be present can be present, but that if a yea-and-nay vote is requested, that vote will go over until Monday, and 5 minutes will then be allotted to each side.

Mr. SALTONSTALL. Assume a matter were acted upon tomorrow by a voice vote, not a yea-and-nay vote, and then a motion were made to reconsider, followed by a motion to lay on the table.

Mr. JOHNSON of Texas. That would be perfectly in order.

Mr. SALTONSTALL. Those matters would not be open to discussion on Monday.

Mr. JOHNSON of Texas. They would not be. The only debate which would take place on Monday would be in the event a yea-and-nay vote were asked for. That is what has been agreed to.

Mr. SALTONSTALL. If a yea-and-nay vote were ordered——

Mr. JOHNSON of Texas. Then the matter would go over until Monday. If the matter were noncontroversial, there would be no reason why it should not be acted upon tomorrow. But if a yea-and-nay vote is requested, then 100 Senators will be guided by the desires of 20 percent of the presumptive quorum, under the rule.

ORDER FOR ADJOURNMENT UNTIL NOON TOMORROW

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that when the Senate concludes its deliberations today, it adjourn until 12 o'clock noon tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

MUTUAL SECURITY ACT OF 1960

The Senate resumed the consideration of the bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes.

Mr. LAUSCHE. Mr. President, I submit an amendment which, if adopted, would strike from the bill section 207, on page 13. Section 207 deals with housing projects in Latin American countries.

I submit a second amendment, which strikes from the bill the language beginning on page 19, line 21, through line 12, on page 20. This particular language authorizes the expenditure of money to save and preserve ancient Nubian monuments in the Nile River Valley.

I submit a third amendment, which I shall suggest for consideration in the event the second amendment is not adopted. This third amendment adds, on page 20, before the period in line 12: "and no such currencies shall be so used until the President is satisfied that expenditures representing the remainder of such cost have been or will be made by other interested nations or organizations thereof."

The PRESIDING OFFICER. The amendments will be received and printed, and will lie on the table.

HEALTH FOR PEACE

Mr. WILLIAMS of New Jersey. Mr. President, 12 days ago, 14 members of the Committee on Labor and Public Welfare and the Committee on Foreign Relations joined with me in urging President Eisenhower to consider proposing at the forthcoming summit conference in Paris on May 16 an all-out joint effort for research and eradication of the major diseases and illnesses afflicting the world—a massive "health for peace" campaign by East and West under the auspices of the World Health Organization and other appropriate agencies.

I desire to say a few words about the background of this proposal, and also to pay tribute to the distinguished senior Senator from Alabama [Mr. HILL], whose devoted leadership in the field of international health has generated and inspired this idea.

Last year I was privileged, as a member of the Health Subcommittee of the Labor and Public Welfare Committee, to attend the hearings on Senate Joint Resolution 41, Senator HILL's International Health and Medical Research Act. Listening to the testimony of the most distinguished public and professional authorities in the field of health, I became profoundly impressed by the sheer enormity of the health problems that still plague the world. But I was equally struck by the tremendous opportunity that lay within our grasp to make, through health, a major contribution to a better life for mankind, and thus to the peace of our world.

Out of those hearings and study last year has grown my conviction that Senator HILL's proposal is a potent instrument for use in the cause of peace, and as the forthcoming summit conference drew nearer it seemed to me that here was an idea deserving consideration at the highest levels of the major governments as they gather in Paris next month.

Here was an opportunity to focus world attention on a great and global problem.

I desire to say also that the possibility that this proposal might be discussed at the coming summit meeting should stir much greater interest in the House for early action on Senate Joint Resolution 41, and I hope the strong, effective provisions of the resolution as originally conceived will be approved by that body.

In giving his endorsement and support to the proposal, the Senator from Alabama [Mr. HILL] wrote me that "It would be not only fitting but also obligatory" for the President to propose this international health effort of research and eradication of the major dreaded diseases in the world. This statement, from the acknowledged leader in the battle for health in the interest of peace, has reaffirmed my own conviction on the merits of proposing a joint war against sickness and disease at the summit conference.

I have also been extremely gratified and heartened by the degree of support this proposal has so far received.

The New York Times wrote editorially on April 18 that the problem of ill health is basic and worldwide and that the United States should "challenge the Soviet Union to march with the rest of the world against the ancient and common enemies of the whole human race."

I notice that President de Gaulle, during his visit here, has been urging a program of common East-West effort to aid the underdeveloped countries of the world, particularly in the field of health. In a talk before the National Press Club, President de Gaulle suggested the undertaking of a joint campaign against tuberculosis in Asia, and said:

> There must be areas in which it is possible for the powers that are well provided for, to agree today to pool a few resources in order to begin this development. I must confess that if they do this, it would certainly mean a great improvement in the atmosphere of the world and consequently in East-West relations.

Although I have not yet received from the White House any comment on the merits of the proposal, I was interested to note that in an article in the April 26 issue of the Washington Post, Murrey Marder reported that apparently President Eisenhower and President de Gaulle have agreed to seek some kind of joint effort in the field of health. Mr. Marder wrote that—

> The United States would agree, in very limited form, to try for East-West agreement on cooperative projects to aid backward areas. This probably would be in limited areas of health and medicine, as distinguished from large-scale projects France had wanted.

Mr. President, I have also been pleased by the words of support I have received from some of the most eminent citizens and professionals in the field of medicine. None have expressed any objection to the idea. Those who have written to express their support include Mrs. Albert D. Lasker, who for years has led the fight for better health; Dr. Howard Rusk, chairman, Department of Physical Medicine and Rehabilitation, New York University, and associate editor of the New York Times; Mrs. Franklin D. Roosevelt; Leo Cherne, executive director at the Research Institute of America; Dr. Dobert L. Levy, professor emeritus of clinical medicine at Columbia University, and president of the New York Academy of Medicine; former Senator Herbert H. Lehman; and Basil O'Connor, president of the national foundation.

Among the many eloquent comments that were made, the one of Dr. Thomas Francis, Jr., of the University of Michigan, perhaps states the case most aptly. He writes:

> Our views of health, and its values, must, like our educational system, reflect our culture and our way of life. They must be projected as the image of our ideals. Freedom and democracy may seem like hollow triumphs if the hopes of life are submerged in a welter of disease. Security and longer life can be miserable acquisitions, if they mean only the continuation of unhealthy states. Preventive medicine can be our most progressive demonstration to all the world of our belief in human life and happiness. Peace, health, and security are of the same fabric. We should weave more of it.

Mr. President, to give a little more perspective to this subject, I may add that my suggestion to President Eisenhower follows in the path of related proposals that others have made.

On June 8, 1958, at Michigan State University, Adlai Stevenson first proposed a worldwide undertaking, similar to the then functioning International Geophysical Year, and said:

> Why don't we now propose an international medical research and health year as another way for the world to cooperate for survival instead of destruction? Certainly collaboration and exchanging research and resources in the field of medicine and health would be merciful to the human race—which is something we all have in common—and could further reduce tensions and mistrust.

Incidentally, I have just received a letter from Mr. Stevenson, who said:

> I approve emphatically of your suggestion that President Eisenhower propose a cooperative program of international medical research at the forthcoming summit conference. My recent trip to South America and what I saw there of the urgent need to improve the health and living standards of millions of people has reenforced my strong view that the time is ripe to launch a massive international effort against sickness and disease.

The late Senator Richard Neuberger, who devoted so much of his life to the cause of health, also proposed, in 1958, an International Medical Year to—

> mobilize all the world's skills, knowledge, and facilities for an all-out onslaught against heart disease, against the grim series of malignant diseases known as cancer, against malaria, against the blinding glaucoma which plagues the orient, and against all the other sinister maladies that kill and torment members of the human race.

And the distinguished Senator from Minnesota [Mr. HUMPHREY], during his trip to the Soviet Union late in 1958, suggested a greatly expanded joint East-West medical research program, and announced that Premier Khrushchev had given his enthusiastic approval to the idea.

Mr. President, all of us know that at the forthcoming summit meeting there will be a great deal of talk on the critical problems that now divide the world and threaten its survival. There is the arms race, the hydrogen bomb, the intercontinental missile, the surprise attack, nuclear testing, divided Germany, and the powder keg of Berlin which started the chain of events leading to the agreement to hold a summit meeting.

With so many momentous issues that desperately need settling, it may perhaps seem somewhat incongruous to bring up the subject of health. It is, I suppose, what one would call a prosaic problem. Sickness and disease have always been with us. And there is a tendency to take them for granted so far as a national or international response is concerned. But it has always struck me as somewhat curious that we spend so much time and energy on problems that

may possibly arise in the future and so little on problems that are ever present. We have spent a great deal of time, money, and effort—and rightly so—on trying to find ways to lessen the chances of a future war, particularly a nuclear war. In fact, we spend about $40 billion a year on armaments, in the hope that a strong military defense will prevent world war III. The same, however, cannot be said of our efforts against the quiet war of disease, which reaps its toll day by day, century after century.

To translate into military terms the effects of this "war," we find that every year a cancer "bomb" kills 2 million people in the world. A malaria "bomb" annually wipes another 1.5 million people off the face of the earth, and causes an estimated 150 million casualties. A trachoma "bomb" blinds some 10 million people each year and leaves 400 million, or one-seventh of the world's population, with disabling eye lesions. The filariasis "bomb," a parasitic worm infection, attacks the lymph glands and causes a tremendous swelling of the limbs of some 250 million people, causing partial or complete incapacitation.

There are a number of other such bombs of varying lethalness, and of varying importance in different regions of the world. In our own country, heart diseases are the No. 1 killer—in 1957, causing 55 percent of all deaths. In most of Europe, heart ailments are the most frequent cause of death. In the underdeveloped areas of Asia and Africa there are tuberculosis, yellow fever, leprosy, yaws, hookworm, smallpox, and river blindness. These take their toll of another several million a year, and maim, cripple, and incapacitate many millions more before their time.

The total of the figures for just 1 year amounts to what everyone would condemn as a ghastly and horrifying war if the deaths and casualties were the result of a hydrogen-bomb explosion. But only on rare occasions does the news break through the surface of the stream of everyday events.

It seems to me, however, that there is very little difference between a military war and a microbic war, except that in the latter case our buildings are left standing. The toll, in terms of human misery and suffering, is virtually the same; and I would not be surprised if the statistics showed that in the field of health we are undergoing the equivalent of a major thermonuclear war every 5 or 10 years.

If this is so, then there is certainly every reason to make world health a matter of concern at the summit, in an effort to get underway a common, concerted program of research and disease eradication in the field of health.

For example, a joint assault against the common enemy of cancer might turn up the most dramatic health discovery of our century, namely, a means to prevent or cure that dreaded disease.

As the late Dr. Cornelius P. Rhoads, who was president of Sloan-Kettering Institute, told the Health Subcommittee:

> Because of the increasing average age of the population, the annual death rate from cancer and the annual incidence rate are steadily rising, despite the vigorous efforts which have been made. We are not at the moment winning this battle.

And the eminent specialist in this field, Dr. Sidney Farber, said his experience has shown—

> That in no country in the world is there support for medical research commensurate with the enormity of the problems of disease and the potential of the scientists and doctors to find solutions to these problems.

We know that continuing, intensive research is essential in the case of cancer.

But in other cases, and particularly for the diseases rampant in the underdeveloped areas of the world, we already have the knowledge, the medicines, and the means of treatment which, if only applied, could eradicate or arrest the incidence of malaria, trachoma, tuberculosis, smallpox, yaws, filariasis, river blindness, and the many other diseases which afflict the people of Asia and Africa, South America, and the islands of the Pacific and the Caribbean.

The problem of tuberculosis, for example, presents a good illustration of what still needs to be done. Although we have been very successful in wiping out this disease in the United States, elsewhere in our own hemisphere—in Chile—as recently as 1954, 70 out of every 100,000 deaths resulted from tuberculosis. And it has been estimated that in India alone, about 1 billion man-days of work are lost, each year, because of tuberculosis.

The general problem was well stated as follows by the distinguished layman, Leo Cherne, who knows the challenge, through his work with the International Rescue Committee and its Medico program:

> Almost half of the people of the world in underdeveloped areas, which means well over a billion human beings, rarely, if ever, in their lives have a physician to treat their ills. These people, with diseases largely eliminated in the Western World, have neither the security nor the hope engendered by simple medical care because of a lack of indigenous physicians, nurses and hospitals. They live in discomfort and agony until they die, many of them from most minor illnesses or of any one of a hundred complications which flow from common ailments. In addition, millions of these people suffer from diseases which can only be ameliorated at present, but whose cure may lie in further research and the international exchange of medical information and personnel.

To illustrate the importance of such seemingly insignificant, undramatic efforts as the teaching of simple principles of sanitation and infection, I should like to tell again the poignant story related not long ago by our colleague in the House of Representatives, Dr. WALTER JUDD, of one of his experiences as a medical missionary in China, some years ago. In talking with the mother of a dying infant, brought to him too late to save, Dr. JUDD learned that the woman had lost seven previous babies from the same cause—infection resulting from use of a traditional application of mud to the navel of newborn infants. These were only a few of the lives lost for lack of rudimentary facts on infection and a few pennies' worth of antiseptic gauze.

It is dismaying to think that thousands of children are destined to die in their first few years of life, for reasons such as this one. In southwest Asia, for example, children under 5 years of age constitute 60 percent of all deaths in the area each year; and we are told that the mortality of infants is frequently regarded as an index of the sanitation standards of many countries.

There is, then, an obvious and pressing humanitarian need for greatly expanded efforts to promote better health. But there is also an equally great economic need.

The economic consequences of ill-health are enormous, and they have a direct relation to the ability of a country to meet the growing economic and social aspirations of the people. Not only do the sick and disabled contribute little or nothing to the economic development of their country, but they are also a positive burden upon the limited resources of their country.

To take an extreme example, here in the United States the economic burden of cancer amounts to about $12 billion each year. Admittedly, the costs of treating this disease are abnormally high; but always, to some extent, illness creates a drain on the total resources of a country and its people.

To the extent that countries around the world provide governmental or governmentally financed help in providing health services, they must inevitably divert precious funds away from schools, roads, harbors, dams, irrigation projects, industrial plants, farm tools, and fertilizers.

The costs to individuals are also very great, in terms of the time and money that a family, let us say, must spend to care for a member of the family who has been seriously stricken.

In a word, much of this waste could be reduced, and the resultant savings could be put to better use by people whose great expectations could be largely met in the very important area of health.

I do not think it would be too much to expect that this fulfillment could easily lead millions of people to make much more intensive efforts to better their lot in other ways. I think a psychological value, as well, is involved here.

Mr. President, thus far I have spoken of the most direct gains which it seems to me would accrue from the conscientious, ongoing implementation of this proposal. But I think it would also be of substantial benefit to the conduct of our foreign policy.

For one thing, this subject, in principle, and, to some extent, in practice, already has the agreement of the Soviet Union. Last November, when Russia signed the Cultural Exchange Act with the United States, Russia acknowledged the principle of cooperation in health, and agreed to certain specified medical exchange programs. And Senator HUMPHREY reported, during his trip to Russia, that Premier Khrushchev is apparently willing to engage in much greater cooperation. Then why not find

out at the summit just how far the Russians really are willing to go? Why not raise this subject at a level commensurate with its importance?

I do not mean to imply by this that the proposal for a large-scale health-for-peace campaign should be our major effort at the summit. Certainly there are many issues that should take precedence. But at least this is an area in which we can take a positive initiative.

I think this is important for several reasons.

In the first place, with a well-defined, clear-cut proposal of our own, it could never be said that we returned from the summit emptyhanded because we went there emptyhanded.

In the second place, there is the danger of postsummit disillusionment, similar to the atmosphere that developed after the Geneva Conference in 1955, which may develop again if we are unsuccessful in gaining any significant resolution of the major outstanding issues.

As Secretary of State Herter said recently to members of the Foreign Relations Committee:

> I am very frank to admit that I am not too optimistic that the summit conference will produce very great results.

Thus, an agreement to undertake major cooperation in the field of health would reduce at least some of the disappointment, and would dispel some of the pessimism and defeatism which otherwise might set in.

At the very least, assuming that the Soviet Union rejects the proposal, we shall have had another opportunity to demonstrate the degree of the Soviet Union's sincerity, which—though it may be clear enough to us—is not clear in many areas of the world. And we shall have put ourselves in a position to nullify the impact of any propaganda gestures which the Soviet Union might "spring" at the summit, in an attempt to impress the underdeveloped countries of the world.

Another important benefit of a large-scale health program is that it would greatly help meet the frequent and growing criticism of our foreign-aid program—that it is too much government-to-government, and not enough people-to-people.

The very distinguished Member of the House of Representatives from Connecticut, and our former Ambassador to India, CHESTER BOWLES, tells the story of a letter he received from a friend shortly before the coup d'etat in Iraq, in 1958. The friend, who had heard all about the great strides Iraq was making with its large-scale economic development projects, went out to the villages, to find out what the average people thought about this progress; and he met one farmer who said: "Well, the only difference I see is that they used to come on horseback and in carriages to collect their interest and their rent. Now they come in Cadillacs."

In short, Mr. President, if ever there was an activity which we could be sure would be of genuine benefit to all the people, and not to just a few in or close to the ruling circles, it is in the field of health.

As Dr. Rusk said, in supporting Senate Joint Resolution 41:

> I know of no other way that we can let the world know how we feel about sharing these things and about the dignity of the individual in our democratic way of life, than this.

So it seems to me, Mr. President, that from a great many standpoints, this proposal is worth taking up at the summit. The need is great; and the benefits, both direct and indirect, would be equally great. But so far, very little is actually being done.

In terms of our total foreign-aid program since the end of the war, which I believe has cost in excess of $80 billion, only the smallest fraction has been used for purposes of health. Of course a very large part of that $80 billion has been used for military aid; but when we look at the budget of the ICA since 1955, we find that only 3.2 percent of its funds have been used for health and sanitation. And the World Health Organization, which, under the circumstances, has been doing an excellent job, has had even less money with which to operate than has the ICA.

From a total regular budget, excluding a voluntary special assistance and malaria eradication fund, of less than $5 million, in 1948, the budget for 1959 has risen to only $15 million; and much of this increase can be chalked off to inflation throughout the world.

As a report by the Senate Government Operations Subcommittee has said:

> So vast are the potential calls upon WHO's limited resources, especially in an organization so highly regionalized, that only by careful, systematic planning can splintering of effort and resources be avoided and highest priority targets be met.

Mr. President, this is the kind of agency that should be given much more money than it has so far received, and should be utilized to the fullest possible extent in any joint health effort by the East and the West. At the same time, however, much more than can possibly be accomplished by any single agency must be done.

I believe our many splendid private national and international health organizations ought to be mobilized for this effort. I believe we ought to have an organization like the one proposed by the Senator from Alabama [Mr. HILL] which could serve as a research clearinghouse in the United States, and could coordinate the activities of the many other scattered agencies in Government with activities in health.

If we do all this, and if the Soviet Union and the other nations of the world join in, I believe we can take one of the greatest single steps possible toward the creation of a more stable, peaceful world and toward the fulfillment of the ideal expressed in the Charter of the United Nations—to "promote social progress and better standards of life in larger freedom" for all mankind.

Mr. President, I yield the floor.

"MANAGING THE PENTAGON"—WORK AND METHODS OF SECRETARY OF DEFENSE THOMAS S. GATES, JR.

Mr. MANSFIELD. Mr. President, in the April 27 issue of the Wall Street Journal there appears an article entitled "Managing the Pentagon." The article was written by Louis Kraar, and is devoted primarily to an analysis of the work and methods of the present Secretary of Defense, Thomas S. Gates, Jr.

The article points out that, although it is late in the history of this administration, the most costly and most complex Department of the Government is now beginning to function more effectively. Mr. Kraar attributes the improvements to the knowledge, hard work, and innovations of Secretary Gates. He notes particularly that the civilian Secretary sits in with the Joint Chiefs of Staff and personally helps work out interservice problems, rather than permit them to fester in unreconciled differences.

The article by Mr. Kraar provides a very helpful insight into the operations of the Pentagon, and contains some very useful advice on how to deal with these defense problems.

Secretary Gates is to be commended for the personal interest he has taken in administering the Department of Defense, and for his personal attendance at the meetings of the Joint Chiefs of Staff.

Mr. President, I ask unanimous consent that the article to which I have referred be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Apr. 27, 1960]

MANAGING THE PENTAGON

(By Louis Kraar)

WASHINGTON.—When President Eisenhower first came to the White House, he picked as Defense Secretary—the biggest money-spending job in Government—a man who seemed ideally suited: Charles E. Wilson, then president of the biggest manufacturing company, General Motors Corp.

But when Secretary Wilson left office nearly 4 years later, he was at odds with Congress, the scientific experts, and most of his own uniformed brass.

Next Mr. Eisenhower chose another great business executive to run the Pentagon, a man with a reputation for getting along with people: Neil H. McElroy, president of Procter & Gamble. But when Secretary McElroy left office after about 2 years, his standing in this regard was little better than Mr. Wilson's; his associates felt he never fully got on top of the job.

By this time, late in his administration, the President could get no industrial titan to come to Washington. Last December he turned to another Republican businessman, but one comparatively little known: Thomas S. Gates, Jr., a Philadelphia investment banker. Initially, it appeared Mr. Gates was to be little more than a caretaker to see

the Defense Department through the closing months of the Eisenhower administration.

But the results of his few months as Defense Chief have confounded this expectation. Mr. Gates has won praise from Congressmen, gained respect from his subordinates, and even calmed much of the feuding among military services. While Secretary Gates certainly is a vast distance away from unsnarling all the Pentagon's problems, the consensus is that he has made some solid improvements.

Mr. Gates' detailed grasp of arms questions has gone far in blunting attacks on the President's defense program by Democrats in Congress who sought to make arms policy a top election-year issue. When a hostile Senator shot questions at him about schemes for keeping bombers on a full-time air alert, Mr. Gates quickly came back with three sets of figures to show the effects of such a maneuver. During other heated congressional hearings on defense, Secretary Gates has stoutly warded off Democratic criticisms with quick, careful explanations of the administration's program.

After the defense boss detailed the President's defense plans to one committee, a Democratic Congressman declared: "It is a very fortunate thing for us that we in America have you in the position that you occupy."

SETTLING MILITARY DIFFERENCES

By working more closely with the military chiefs, and making them work with each other, Mr. Gates has smoothed over much of the worst interservice bickering. The Secretary has devised a new technique for settling disagreement among the Joint Chiefs of Staff, composed of the top man in each service plus a chairman named by the President. In recent years this military group has confused civilian officials with split decisions—differing advice—on such crucial questions as how many and what kind of weapons to have in the atomic stockpile, and how much emphasis to put on small, brushfire wars.

To settle such disputes, Mr. Gates now personally sits with the chiefs when they're thrashing out issues likely to produce divided advice. This way, he hears arguments firsthand, rather than just wading through lengthy "position papers" as did past civilian Secretaries. "We have succeeded in clearing up quite a few papers," Mr. Gates reports.

Another innovation introduced by the Defense Secretary is submitting the entire Pentagon budget to the Joint Chiefs who, amazingly, never studied the entire program before.

Rather than delay decisions on the continual shifts possible in selecting the best combination of evolving weapons, Mr. Gates has encouraged the services to propose changes. Even while the administration was publicly defending its existing program against political critics earlier this year, the Defense Secretary was quietly looking at ways to expand the long-range missile effort and hurry development of devices to detect enemy missile attacks. When military experts showed these accelerations were possible, Mr. Gates approved cutbacks in the less necessary antiaircraft defense weapons to pay for the missile speedup. Thus, he swiftly changed military plans without upsetting the President's budget.

Why is Thomas Gates a more effective Pentagon leader? Without discounting his native ability, perhaps the chief answer is something else: his governmental experience. Mr. Gates has worked for 6½ years in the Defense Department. Before taking the top defense post, he served first as a rather humble Navy Under Secretary, next as Secretary of the Navy, and then as Deputy Defense Secretary. And one might also count earlier service as a naval intelligence officer during World War II and later as a Reserve captain.

KNOWING THE MAZES

"He came to the top job better prepared than practically anyone before him," observes a close associate of the Secretary. "He really knows his way through the mazes of this building." And, knowing the problems, he works to solve them.

While his predecessor, Mr. McElroy, often knocked off for frequent vacations, Mr. Gates frequently goes to the other extreme. One recent morning he arose at 5 a.m. to make certain he was properly prepared for a session with the hostile Senate Preparedness Subcommittee, headed by Majority Leader JOHNSON.

The dark, somewhat retiring Pentagon boss gets into his office about 8:30 each morning and stays until 7 p.m. or later. At lunch, he almost always has someone from the Defense Department as a guest so they can talk over problems. Mr. Gates depends little on staff work, though most top civilian defense officials do; he prefers to dig into the details of arms questions himself.

The tall (6 feet 2 inches) Mr. Gates, while hardly a publicity seeker, is aware he has a public relations role; he rejects a smaller proportion of Washington speaking invitations than did his predecessor. "He's a hard man to keep from doing things that tax his time and strength," remarks an aide.

One high official whose duties take him deep into Pentagon affairs remains convinced that the Defense Department is still wasting billions of dollars annually. Yet even this harsh critic is a fan of Secretary Gates, declaring: "He is the experienced, knowledgeable sort of man who could eventually set the place in order; we need this kind of executive at the start of an administration, not just at the tail end."

The story at the Pentagon is not unique. Experience in Government pays off in other places, too. George M. Humphrey, a top business executive, came in as the President's first Secretary of the Treasury with no previous background in government and was hailed as "strong man" of the Cabinet. Yet he proved to be inflexible, created hostility within the administration and in Congress, and failed to accomplish most of his aims. In contrast, present Treasury Secretary Anderson, who came to his post with political and Government experience as well as business background, has been highly successful.

And Percival F. Brundage, a brilliant accountant by trade, proved to be a weak Budget Bureau Director for Mr. Eisenhower. In sharp distinction, current Director Stans, with a similar background except that in addition he had learned his way around government by working in the Post Office Department, is a strong man in the Budget post.

The next administration can, if it wishes, draw the moral from these tales. It would seem to be: Businessmen have much to offer in Government, but peak posts should be given to those who have been seasoned in lesser Federal duties, gaining skill in the ways of Washington.

ADJOURNMENT

Mr. CHURCH. Mr. President, if there is no further business to come before the Senate, I now move, in accordance with the previous order, that the Senate adjourn.

The motion was agreed to; and (at 8 o'clock and 8 minutes p.m.) the Senate adjourned, under the order previously entered, until tomorrow, Friday, April 29, 1960, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

THURSDAY, APRIL 28, 1960

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

John 8: 12: *He that followeth me shall not walk in darkness, but shall have the light of life.*

O Thou infinite and gracious God, grant that during this day we may apply and act upon the words of our blessed Lord, the wisest of all teachers; the ablest and most willing of all helpers, who alone can emancipate us from sin and weakness, from fear and despair.

Inspire us, amid the vicissitudes of our mortal life, to put our trust in Thee and to walk by the faith which will make us courageous for all our duties and responsibilities.

We beseech Thee to sustain us in our loyalty to that which is noblest; enrich our hearts with love and good will toward all mankind; and teach us how we may serve Thy divine will in bringing redemption and peace to humanity.

In Christ's name we pray. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed a bill and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 743. An act to amend the Federal Coal Mine Safety Act in order to remove the exemption with respect to certain mines employing no more than 14 individuals; and

S. Con. Res. 92. Concurrent resolution creating a Joint Committee on Arrangements for the inauguration of the President-elect and the Vice-President-elect on January 20, 1961.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 8042) entitled "An act to authorize the Secretary of Commerce to resell four Cl-SAY–1 type vessels to the Government of the Republic of China for use in Chinese trade in Far East and Near East waters exclusively," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. MAGNUSON, Mr. BARTLETT, and Mr. SCHOEPPEL to be the conferees on the part of the Senate.

JOINT COMMITTEE TO MAKE NECESSARY ARRANGEMENTS FOR INAUGURATION OF PRESIDENT-ELECT AND VICE-PRESIDENT-ELECT OF THE UNITED STATES ON THE 20TH OF JANUARY 1961

Mr. McCORMACK. Mr. Speaker, I offer a concurrent resolution—Senate Concurrent Resolution 92—and ask unanimous consent for its immediate consideration.

The Clerk read the Senate concurrent resolution, as follows:

Resolved by the Senate (the House of Representatives concurring), That a joint committee consisting of three Senators and three Representatives, to be appointed by the President of the Senate and the Speaker of the House of Representatives, respectively, is authorized to make the necessary arrangements for the inauguration of the President-elect and Vice President-elect of the United States on the 20th day of January 1961.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER. The question is on the Senate concurrent resolution.

The Senate concurrent resolution was concurred in, and a motion to reconsider was laid on the table.

RECESS

The SPEAKER. The House will stand in recess subject to the call of the Chair.

Accordingly (at 12 o'clock and 4 minutes p.m.), the House stood in recess, subject to the call of the Chair.

JOINT MEETING OF THE TWO HOUSES OF CONGRESS TO HEAR AN ADDRESS BY HIS MAJESTY, MAHENDRA BIR BIKRAM SHAH DEVA, THE KING OF NEPAL

The SPEAKER of the House of Representatives presided.

At 12 o'clock and 22 minutes p.m., the Doorkeeper announced the Vice President of the United States and Members of the U.S. Senate, who entered the Hall of the House of Representatives, the Vice President taking the chair at the right of the Speaker, and the Members of the Senate the seats reserved for them.

The SPEAKER. On the part of the House the Chair appoints as members of the committee to escort His Majesty, the King of Nepal, into the Chamber the gentleman from Massachusetts, Mr. McCORMACK; the gentleman from Indiana, Mr. HALLECK; the gentleman from Pennsylvania, Mr. MORGAN; and the gentlewoman from Ohio, Mrs. BOLTON.

The VICE PRESIDENT. On the part of the Senate the Chair appoints as members of the committee to escort the Senator from Montana, Mr. MANSFIELD; the Senator from Montana, Mr. MURRAY; the Senator from Illinois, Mr. DIRKSEN; and the Senator from Wisconsin, Mr. WILEY.

The Doorkeeper announced the following guests who entered the Hall of the House of Representatives and took the seats reserved for them:

The Ambassadors, Ministers, and Chargés d'Affaires of foreign governments.

The members of the President's Cabinet.

At 12 o'clock and 30 minutes p.m. the Doorkeeper announced His Majesty the King of Nepal.

His Majesty the King of Nepal, escorted by the committee of Senators and Representatives, entered the Hall of the House of Representatives and stood at the Clerk's desk. [Applause, the Members rising.]

The SPEAKER. Members of the Congress, we receive in this Chamber many distinguished and welcome guests. Today we receive here the head of a government whose people are a gracious and friendly people, and we want him to know that in this Chamber where we, the representatives of all the American people, are assembled today, he is very, very welcome.

I take great pleasure and a degree of pride in presenting to you the King of Nepal. [Applause, the Members rising.]

ADDRESS OF HIS MAJESTY, THE KING OF NEPAL

(The King of Nepal addressed the joint meeting in Nepalese. His speech was translated by an interpreter. The English translation of his speech follows:)

The KING OF NEPAL. Mr. President, Mr. Speaker, and Members of the Congress, we are very much touched by the warmth and spontaneity of emotions and feeling with which we have been received here. With a deep sense of honor and privilege we avail ourselves of the opportunity to address this august assembly. We regard this invitation to us as a token of your friendship and good will toward the people of Nepal who in their turn have nothing but the greatest respect and admiration for the great people and the leaders of the United States of America. [Applause.] It is my pleasant duty to convey to you and through you to all the citizens of this great Republic the sincere greetings and salutations of the Government and the people of Nepal.

Different nations have acquired influence and leadership in the world in different periods of history. But no other nation at its height of power and prosperity, glory and greatness had in the past thought in the same benevolent terms about poverty and hardships of the less fortunate people in other countries of the world as you have been doing in your own time. Your pioneering spirit in this field and dedication to the great and noble task of helping to alleviate the conditions of poverty and suffering wherever they may exist, have served to focus universal attention on this question of serving humanity as a matter of international responsibility.

We had till 12 years ago very little to do with each other even in the way of trade and diplomatic relations. Till then, few Americans had visited Nepal and the Nepalese who had visited America could actually be counted on the fingertips. With the advent of democracy in Nepal things began to change, and since the U.S. Operations Mission was set up in the country in January 1952, our contacts have increased rapidly and hundreds of Nepalese have come to this country for training and studies in various fields. Quite a few American technicians and experts have been to Nepal to help the Nepalese people with their problems of transport, economy, and agriculture, and problems of health and education. We are glad to be able to tell you that the Nepalese have found the American experts friendly and helpful and always willing and eager to help the Nepalese out on their various problems.

Apart from the recent contacts we have referred to above, our common faith in democratic ideals and procedures provides, in our opinion, the lasting basis for greater understanding and cooperation between our two peoples and countries. You are all familiar with the strains and difficulties under which all newly established democracies have to work. The concurrent resolution passed by the U.S. Congress last year on the successful holding of the first ever elections in Nepal has served as a source of great inspiration and encouragement to the newly elected members of our parliament in carrying out their duties and responsibilities. Provision for fully representative institutions of government and legislature, respect for fundamental rights and due process of law, respect for freedom and dignity of the individual are some of the basic principles that underlie our constitution. As is apparent to you, the constitution of Nepal is based on the concepts of law, liberty, and rights prevalent for a long time in your own country. Though our two countries are separated from each other by vast expanses of land and water, though our diplomatic relations even do not date very far back, there exists between us a lasting moral and spiritual bond that in effect transcends all these material and mundane considerations, a real identity of outlook and views on vital problems of man and society that is derived from common faith in common political principles, ideals and beliefs. [Applause.]

As a nation, we have always prized freedom more than anything else in our history, and the freedom of small countries is something which is very dear and close to our hearts.

We believe in an independent foreign policy of judging every international issue on its merits without consideration of anybody's fear or favor and in a policy of nonentanglement. Our record in the United Nations will also bear testimony to the above fact. This may sound a little idealistic and a little too impractical but as a small nation, we feel that this is the only way in which we can best contribute to the discussions and deliberations in the United Nations and to the interests of world peace and friendly relations among nations.

Our policy of nonalinement does not arise from our desire to sit on the fence or to evade responsibility in any way. It is merely a manifestation of our reluctance and unwillingness to compromise our freedom of judgment and action beforehand by committing ourselves irrevocably to support one side or the other even before the emergence of such an eventuality. We do not see anything immoral, or selfish, or passive about it. We do not believe in shirking action, once we feel satisfied and convinced about the right course.

Unfortunately, the world we live in is passing through a state of uneasy peace and tension between nations. The sooner this state of fear and uncertainty is ended, the better prospects will emerge

for mankind as a whole. This is something which is realized by all, but still it appears as though it will be some time before this realization can be translated into practice to the actual benefit of all concerned. However, men of peace and good will in every country must work and work ceaselessly and untiringly for peace and for the removal of the threat of war, because war under the present circumstances will mean nothing short of total destruction of human life and civilization.

Rightly have the great leaders of the world described disarmament, both conventional and nuclear, as the greatest and most pressing problem of our time. All the peoples of the world are eagerly awaiting the successful outcome of the Geneva negotiations on disarmament and a nuclear testing ban. Will it be too much to hope that the negotiations in Geneva will result at least in some limited agreement in this field which could be formally registered at the forthcoming summit meeting and announced to trembling humanity as a prelude to better times and broader agreements among nations in the near future? We hope and believe that the forthcoming summit conference and the ones that are proposed thereafter will have the effect of easing tension in the world and registering real progress toward peace, disarmament and settlement of the outstanding political disputes between nations. [Applause.]

We have not the slightest doubt about the peaceful intentions of the American people. [Applause.] Now it is for her to prove her initiative and skill in convincing other great and small countries of the need for the gradual evolution of a new international order based on freedom, justice and peace for all and fully responsive to the needs and challenge of the time. The way in which the great powers can meet the greatest challenge of our time and perhaps of history is by turning the present-day situation, fraught with the risks of nuclear war, into one of the pooling of the resources of the nations of the world for the eradication of poverty and needs from everywhere. We cannot help feeling that if even a small fraction of $100 billion that is being presently spent on defense and war expenditure in the world is devoted to the development of the underdeveloped countries, the world would for everybody be an infinitely better and happier place to live in. [Applause.]

We have faced the devasting effects and grim consequences of the two world wars which took place during the life time of many in our own generation. The finest flower of youth and manhood in every country was decimated in the two world wars and we can very well imagine the sense of horror haunting the minds of the people heavily loaded with the bitter memory of the loss of their sons, brothers, and husbands. We hardly need emphasize that no nation in the world, big or small, will remain unaffected in the event of another global war. It is the sincere desire for peace and freedom in the hearts of the 9 million of our countrymen that has prompted us to conclude this address with the following exhortation in the immortal words of your great leader and a great son of America, Abraham Lincoln, which, to our mind literally applies to the present day global context as well if we only replace the word "nation" by the phrase "international community":

> It is rather for us, the living, to stand here dedicated to the great task remaining before us—that from these honored dead we take increased devotion to that cause for which they here gave the last full measure of devotion—that we here highly resolve these dead shall not have died in vain, that this Nation shall have a new birth of freedom, and that government of the people, by the people, for the people, shall not perish from the earth.

[Applause.]

Thank you once again for giving us a patient hearing.

[Applause, the Members rising.]

At 12 o'clock and 56 minutes p.m. His Majesty, the King of Nepal, accompanied by the committee of escort retired from the Chamber.

The Doorkeeper escorted the invited guests from the Chamber in the following order:

The members of the President's Cabinet.

The Ambassadors, Ministers, and Chargés d'Affaires of foreign governments.

JOINT MEETING DISSOLVED

The SPEAKER. The purposes of the joint meeting having been completed, the Chair declares the joint meeting of the two Houses now dissolved.

Thereupon (at 12 o'clock and 59 minutes p.m.) the joint meeting of the two Houses was dissolved.

The Members of the Senate retired to their Chamber.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 1 o'clock and 45 minutes p.m.

DEFENSE DEPARTMENT APPROPRIATION BILL, 1961

Mr. MAHON. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tomorrow night to file a report on the Defense Department appropriation bill which makes appropriations for the Department of Defense for the fiscal year ending June 30, 1961.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. FORD reserved all points of order on the bill.

TREASURY-POST OFFICE DEPARTMENTS APPROPRIATION BILL, 1961

Mr. GARY. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill, H.R. 10569, making appropriations for the Treasury and Post Office Departments, and the Tax Court of the United States for the fiscal year ending June 30, 1961, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Virginia? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. GARY, PASSMAN, CANNON, CANFIELD, and TABER.

AMENDING WATERSHED PROTECTION AND FLOOD PREVENTION ACT

Mr. ABERNETHY. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 4781) to amend the Watershed Protection and Flood Prevention Act to provide that its loan provisions shall be applicable to certain other projects, and for other purposes, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

> Page 1, line 10, and page 2, line 1, strike out "for any of the purposes provided for by this Act" and insert "(as defined in section 2 of this Act)."
>
> Page 2, after line 20, insert:
>
> "SEC. 3. Section 10 of the Watershed Protection and Flood Prevention Act (68 Stat. 666), as amended, is amended by adding at the end thereof the following: 'No appropriation hereafter available for assisting local organizations in preparing and carrying out plans for works of improvement under the provisions of section 3 or clause (a) of section 8 of this act shall be available for any works of improvement pursuant to this act or otherwise in connection with the eleven watershed improvement programs authorized by section 13 of the Act of December 22, 1944 (58 Stat. 887), as amended and supplemented, or for making loans or advancements to State and local agencies as authorized by clause (b) of section 8.'"

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mr. GRIFFIN. Mr. Speaker, reserving the right to object, may I ask the gentleman if this has been cleared by this side of the aisle?

Mr. ABERNETHY. It has been cleared with the Republican leadership, including the senior minority member of the committee.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

PROCEEDINGS DURING RECESS ORDERED TO BE PRINTED

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the proceedings had during the recess of the House be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

AUTHORIZING APPROPRIATIONS FOR THE ATOMIC ENERGY COMMISSION

Mr. THORNBERRY, from the Committee on Rules, reported the following privileged resolution (H. Res. 513, Rept. No. 1559), which was referred to the House Calendar and ordered to be printed:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11713) to authorize appropriations for the Atomic Energy Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and for other purposes. After general debate, which shall be confined to the bill, and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Joint Committee on Atomic Energy, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

AUTHORIZING THE SECRETARY OF THE INTERIOR TO CONSTRUCT THE SAN LUIS UNIT OF THE CENTRAL VALLEY PROJECT, CALIFORNIA

Mr. THORNBERRY, from the Committee on Rules, reported the following privileged resolution (H. Res. 514, Rept. No. 1560), which was referred to the House Calendar and ordered to be printed:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7155) to authorize the Secretary of the Interior to construct the San Luis unit of the Central Valley project, California, to enter into an agreement with the State of California with respect to the construction and operation of such unit, and for other purposes. After general debate, which shall be confined to the bill, and shall continue not to exceed three hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

RETIREMENT OF SENATOR JAMES E. MURRAY

Mr. METCALF. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Montana?

There was no objection.

Mr. METCALF. Mr. Speaker, the announcement of Senator MURRAY's retirement at the end of his present term will bring to a close a chapter in the history of Montana that Senator MURRAY has dominated for more than a quarter of a century. It will also bring a surge of affectionate recollection for kindness and service in hundreds of hearts in Montana.

Senator MURRAY has been identified as the leader of the Democratic Party in Montana for most of those years. His policies, his philosophy, his leadership have been inseparable from the Democratic Party. Yet it is not in this political area that Senator MURRAY has made his greatest contribution to his State and the Nation. He never avoided a controversial issue and has always firmly declared himself on the side which he thought was right.

His humanitarianism pulled him into the vanguard of a struggle for the recognition of the decency and dignity of all citizens. His fights in behalf of the poor, the sick, the oppressed have changed the attitudes of the entire Nation. Legislation on welfare, health, minimum wage, full employment bears the imprint of his philosophy.

Senator MURRAY came to the Senate relatively late in life after a distinguished career at the bar of Montana and a long record of meritorious public service. He was always concerned with the industrial development of his adopted State and of its resources. His concern for conservation and development of Montana's resources led him to a greater concern for conservation and use of the Nation's resources which, in his capacity as Chairman of the Committee on Interior and Insular Affairs, he has translated into our national policies.

Senator MURRAY leaves the Senate at the end of his term after five straight elections. But the imprint of his personality and his philosophy on the whole United States will permanently endure.

Nearing his 84th birthday, Senator MURRAY is more progressive and more enlightened than many younger men. I join his hundreds of friends in and out of Congress in paying tribute to his many achievements and in honoring a great American citizen.

FRANCE SHOULD SHARE OUR ATOMIC SECRETS

Mr. CELLER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CELLER. Mr. Speaker, General de Gaulle has been acclaimed as an inspired leader and statesman—the savior of France. He epitomizes a new France, strong, determined, liberty loving. His tumultous reception is proof that the United States regards France as a stanch and true friend. The flowers, the cheers, the enthusiastic crowds are symptomatic of the warmth with which we regard De Gaulle and France. John Quincy Adams said to the Marquis de Lafayette years ago:

> We shall look upon you always as belonging to us, during the whole of our life, and belonging to our children after us.

We, the children mentioned, are happy to have France and De Gaulle and we welcome them on our side. We march together shoulder to shoulder to a better world.

De Gaulle has marched as a man of rare courage. See how he stood up to Khrushchev and in no uncertain language told him that Berlin was not expendable and Germany was not negotiable. He galvanized Western thought and stiffened the United States attitude vis-a-vis Russia.

See his determination amidst well-nigh insurmountable obstacles—a determination as firm as a rock.

See his faith; he has a faith in the language of Browning, to move mountains; faith in himself, his flag, and his country.

He showed an exultation that was as fierce as a streak of lightning and infected the whole country with enthusiasm.

In that courage, faith, exultation, determination, he shall lead France from strength to strength.

Then why not treat France as a full fledged ally? Why deny her admission to the nuclear club and put her to the inordinate expense and trouble of exploding atom bombs in the Sahara? If the President cannot do the needful in this regard under the present law, then amend the McMahon Act to permit him to do so. The danger of leaks concerning our atomic secrets is nonsense. There were no leaks from England. There would be none from France. As a matter of fact Russia knows as much, if not more, about atomic energy than we do. There is always the bugaboo or fear of "what after De Gaulle?" That question is often asked. The answer is that the nation that produced a De Gaulle can produce a successor. That question was asked concerning Churchill. England has not suffered with either Eden or Macmillan. The same question was asked concerning Stalin. The Russians seem quite satisfied with Khrushchev. The same question was asked in the old days concerning Washington, Jefferson, and Lincoln. Our country prospered even after they were gone. The same question is now asked concerning Nehru in India and Adenauer in Germany. We need not worry about France. She is the only principal European country which has never waged war against us ever since our existence. It is high time that we ceased treating France as a stepchild anent atomic energy. Admit her to the nuclear club.

DEFENSE APPROPRIATION REPORT

Mr. MAHON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

DEFENSE APPROPRIATION BILL

Mr. MAHON. Mr. Speaker, I take this time to announce that the hearings on the defense appropriation bill have been printed and are available, and that the committee report and the bill should be available tomorrow noon.

Printed volumes of the hearings have been made available for distribution as the hearings progressed. Volume 1 became available January 19 and volume 7 was released today.

The Committee on Appropriations is scheduled to report the bill at noon on Friday, April 29, and the bill and report should be available at that time. The gentleman from Massachusetts [Mr. McCORMACK] will no doubt announce when the bill will be considered by the House.

CALL OF THE HOUSE

Mr. BYRNES of Wisconsin. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. SPENCE. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 58]

Alexander	Grant	Moulder
Ayres	Hargis	Pelly
Barden	Harmon	Pilcher
Bolton	Holifield	Powell
Bonner	Jackson	Rabaut
Bowles	Jones, Ala.	Riehlman
Boykin	Keogh	Roberts
Brooks, La.	Kilburn	Rogers, Tex.
Buckley	Kilday	Rooney
Burdick	Kowalski	Scott
Burleson	Lafore	Short
Chelf	McDowell	Siler
Coffin	McIntire	Sullivan
Cooley	McMillan	Taylor
Dent	Magnuson	Teague, Tex.
Devine	Martin	Thompson, La.
Dooley	Mason	Thompson, Tex.
Dowdy	Miller, N.Y.	Walter
Durham	Mitchell	Wampler
Frazier	Moeller	Willis
Gavin	Montoya	Young
Goodell	Morris, N. Mex.	

The SPEAKER. On this rollcall 363 Members have answered to their names; a quorum is present.

By unanimous consent, further proceedings under the call were dispensed with.

EMERGENCY HOMEOWNER ACT

Mr. SPENCE. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 10213) to amend the National Housing Act to halt the serious slump in residential construction, to increase both on-site and off-site job opportunities, to help achieve an expanding full employment economy, and to broaden homeownership opportunities for the American people.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 10213, with Mr. FORAND in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on yesterday, the Clerk had read through section 1, ending on line 4, page 1 of the bill. If there are no amendments to this section, the Clerk will read.

Mr. RAINS. Mr. Chairman, I ask unanimous consent that the bill be considered as read, and be open for amendment at any section therein.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The bill is as follows:

SEC. 2. (a) The Congress hereby finds that the present policy of the Federal Housing Administration, insofar as it limits mortgage insurance under its regular residential housing program to cases involving loans made by corporate mortgagees and other commercial lenders, is preventing the effective operation of the program, particularly in the smaller towns and communities of the Nation. It is therefore declared to be the intention of the Congress and the purpose of this section to make mortgage insurance under the Federal Housing Administration's regular residential housing program more readily available in smaller towns and communities by specifically providing that individuals as well as commercial lenders may be approved as mortgagees for purposes of such program.

(b) Section 203(b) of the National Housing Act is amended by adding at the end thereof the following new paragraph:

"Nothing in paragraph (1) or any other provision of this section shall be construed as prohibiting or preventing the approval of an individual as mortgagee for purposes of insurance under this section."

SEC. 3. The first sentence of section 203(c) of the National Housing Act is amended by striking out all that precedes the first colon and inserting in lieu thereof the following: "The Commissioner is authorized to fix a premium charge for the insurance of mortgages under this title but in the case of any mortgage such charge shall be not less than an amount equivalent to one-fourth of 1 per centum per annum nor more than an amount equivalent to 1 per centum per annum of the amount of the principal obligation of the mortgage outstanding at any time, without taking into account delinquent payments or prepayments".

SEC. 4. (a) Section 301(a) of the National Housing Act is amended by inserting before the semicolon at the end thereof the following: ", and by aiding in the stabilization of the mortgage market".

(b) Section 304(a) of such Act is amended by striking out the last three sentences and inserting in lieu thereof the following: "The Association shall, from time to time, establish and publish prices to be paid by it for mortgages purchased by it in its secondary market operations under this section. The volume of the Association's purchases and sales and the establishment of purchase prices, sales prices, and charges or fees in its secondary market operations under this section shall be so conducted as to promote the interests of the national economy by aiding in the stabilization of the mortgage market to the maximum extent consistent with sound operation, and within the reasonable capacity of the Association to sell its obligations to private investors. The Association shall buy at such prices and on such terms as will reasonably prevent excessive use of the Association's facilities and permit the Association to operate within its income derived from such secondary market operations and to be fully self-supporting. Notwithstanding any other provision of this section, advance commitments to purchase mortgages in secondary market operations under this section shall be issued only at prices which are sufficient to facilitate home financing, but which are sufficiently below the price then offered by the Association for immediate purchase to prevent excessive sales to the Association pursuant to such commitments."

SEC. 5. Section 302(b) of the National Housing Act is amended by striking out "and" immediately before "(3)" and by inserting before the period at the end thereof the following: "; (4) during the one-year period beginning on the date of the enactment of the Emergency Home Ownership Act, the Association (except as provided in clauses (1), (2), and (3), and subject to the authority of the Association to set a limitation on the age of mortgages which it will purchase) shall purchase any mortgage (or participation therein) described in this subsection which is offered to it unless the loan is in default or in imminent danger of default or title to the property is defective."

SEC. 6. Section 302(b) of the National Housing Act is further amended by inserting before the period at the end thereof (and immediately after the clause added by section 5 of this Act) the following: "; and (5) during the one-year period beginning on the date of the enactment of the Emergency Home Ownership Act the Association shall not sell or otherwise dispose of any mortgage (or participation therein) held by it, except to the Housing and Home Finance Agency or one of its constituent agencies or to the Veterans' Administration, or as may be provided by contract or other obligation between the seller of the mortgage and the Association.

SEC. 7. The first sentence of section 303(b) of the National Housing Act is amended by inserting before the period at the end thereof the following: ": *Provided*, That with respect to mortgages which are purchased (or with respect to which commitments to purchase are made) by the Association during the one-year period beginning on the date of the enactment of the Emergency Home Ownership Act, such contributions shall be equal to 1 per centum of such unpaid principal amounts".

SEC. 8. The second sentence of section 305(b) of the National Housing Act is amended by inserting before the period at the end thereof the following: "; except that with respect to any mortgage which is purchased (or with respect to which a commitment to purchase is made) during the one-year period beginning on the date of the enactment of the Emergency Home Ownership Act, the price to be paid by the Association shall be not less than the unpaid principal amount thereof at the time of purchase, with adjustments for interest and any comparable items".

SEC. 9. The third sentence of section 305(b) of the National Housing Act is amended by inserting before the period at the end thereof the following: "; except that with respect to any mortgage which is purchased (or with respect to which a commitment to purchase is made) during the one-year period beginning on the date of the enactment of the Emergency Home Ownership Act, the charges or fees so imposed by the Association for its commitment and purchase shall not exceed 1 per centum of the unpaid principal amount of the mortgage, and (unless the commitment was issued before the beginning of such one-year period) not more than one-fourth of such charges or fees shall be collected at the time of the issuance of the commitment with respect to the mortgage, with the balance of such charges or fees (whether the commitment was issued before or during such period) being collected at the time of purchase".

SEC. 10. Section 305(g) of the National Housing Act is amended by inserting immediately after "$13,500" the following: "(or $13,500 per dwelling unit in the case of a mortgage insured under section 213)".

SEC. 11. Section 305(g) of the National Housing Act is further amended—

(1) by striking out "*Provided*, That" and inserting in lieu thereof the following: "*Providing*, That the Association may by regulation increase such amount by not more than $1,000 in the case of mortgages covering property located in geographical areas where it finds that cost levels so require: *Provided further*, That";

(2) by inserting after "shall exceed $1,000,000,000 outstanding at any one time" the following: ", which limit shall be increased by $1,000,000,000 on the date of the enactment of the Emergency Home Ownership Act"; and

(3) by adding at the end thereof the following new sentence: "The Association shall by regulation (1) allocate the assistance provided under this subsection in order to channel such assistance, to the maximum extent practicable, into geographic areas where the problems of excessive mortgage discounts and the shortage of mortgage credit are most severe, and (2) prevent any builder or mortgagee from obtaining a disproportionately large share of such assistance."

SEC. 12. Section 305 of the National Housing Act is further amended by adding at the end thereof the following new subsection:

"(h) Notwithstanding any other provision of this Act, the Association is authorized to make commitments to purchase, and to purchase, service, or sell, any mortgage (or participation therein) which is insured under section 203(i); but (1) the Association shall not enter into any commitment or make any purchase under this subsection unless the property involved was approved for mortgage insurance prior to the beginning of construction, and (2) the total amount of purchases and commitments authorized by this subsection shall not exceed $50,000,000 outstanding at any one time. The Association shall not enter into any commitment or make any purchase involving a mortgage (or participation) insured under section 203(i), under this subsection or any other provision of this section, if any service charge (other than the normal origination fee charged to the mortgagor) was imposed or collected in connection with the making of the loan."

SEC. 13. (a) Section 305 of the National Housing Act is further amended by adding at the end thereof, after subsection (h) (as added by section 12 of this Act), the following new subsection:

"(i) Notwithstanding any other provision of this Act, the Association is authorized to make commitments to purchase, and to purchase, service, or sell, any mortgage (or participation therein) which is insured under section 810; but the total amount of purchases and commitments authorized by this subsection shall not exceed $25,000,000 outstanding at any one time."

(b) Section 305(f) of such Act is amended by striking out "title VIII of this Act" and inserting in lieu thereof "section 803 or 809 of this Act".

SEC. 14. With respect to any mortgage insured by the Federal Housing Administration or any loan guaranteed or insured by the Veterans' Administration, where the commitment of the Federal Housing Administration or the certificate of reasonable value of the Veterans' Administration was issued more than sixty days after the date of the enactment of this Act, the originating mortgagee shall report to the Federal Housing Administration or the Veterans' Administration, as the case may be, the amount of any fees, charges, or discounts (except for the normal origination fee charged to the mortgagor) paid by the builder, seller, broker, sponsor, or any other person in connection with or for the purpose of arranging the mortgage or loan.

SEC. 15. Section 404(b) of the Housing Amendments of 1955 is amended by inserting before the period at the end thereof a comma and the following: "or which the Secretary determines to be a permanent part of the military establishment".

With the following committee amendments:

Page 5, strike out "the Association" in line 1 and all that follows down through the end of line 7, and insert the following: ", the Association may sell or otherwise dispose of any mortgage or participation therein only on a cash basis and only at a price which is not less than the acquisition price of such mortgage or participation (or the average of the acquisition prices when the transaction involves more than one mortgage), except that this clause shall not apply to assignments of mortgages or participations by the Association to the Federal Housing Administration'."

Page 7, line 6, after "require" insert the following: ", and by such additional sum in the case of mortgages covering property located in Alaska, Guam, or Hawaii as may be necessary (because of the higher costs there prevailing) to permit the purchase under this subsection of mortgages covering housing in Alaska, Guam, or Hawaii which is comparable in construction and design to other housing covered by mortgages which may be purchased under this subsection".

Page 9, after line 24, add the following:

"SEC. 16. Section 809 of the National Housing Act is amended by adding at the end thereof the following new subsection:

"'(g) A mortgage secured by property which is intended to provide housing for a person employed or assigned to duty at a research or development installation of the National Aeronautics and Space Administration and which is located at or near such installation, where such installation was a research or development installation of one of the military departments of the United States (on or after June 13, 1956) before its transfer to the jurisdiction of such Administration, may (if the mortgage otherwise meets the requirements of this section) be insured by the Commissioner under the provisions of this section. For purposes of this subsection (1) the terms "Armed Forces", "one of the military departments of the United States", "military department", "Secretary or his designee", and "Secretary" when used in subsections (a) and (b) of this section, and the term "Secretary of the Army, Navy, or Air Force" when used in section 805, shall be deemed to refer to the National Aeronautics and Space Administration or the Administrator thereof, as may be appropriate, (2) the terms "civilian employee", "civilians", and "civilian personnel" as used in this section shall be deemed to refer to employees of such Administration or a contractor thereof or to military personnel assigned to duty at an installation of such Administration, and (3) the terms "military installation" when used in section 805 shall be deemed to refer to an installation of such Administration.'"

The committee amendments were agreed to.

Mr. BENTLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BENTLEY: Page 7, line 24, strike out "and."

Page 8, insert "; and" after the quotation marks in line 8 and insert after line 8 the following:

"(4) by adding at the end thereof (after the sentence added by paragraph (3) of this section) the following new sentence: 'Notwithstanding any other provision of this section, the Association shall not purchase or make a commitment to purchase under this subsection any mortgage covering housing with respect to which there is (or is permitted to be) any discrimination against purchase, rental, or occupancy on account of race, religion, color, ancestry, or national origin.'"

The CHAIRMAN. The gentleman from Michigan is recognized in support of his amendment.

Mr. BENTLEY. Mr. Chairman, this is the long-expected and awaited anti-discrimination amendment as it applies to section 11 of the pending legislation with respect to the additional billion dollars for FNMA's program and operation.

To anticipate any questions or impressions that may be in the mind of any Member I would like to say categorically here and now that if this amendment or similar amendments are adopted to the bill I will support the bill and I will vote for it.

Furthermore, I would like to say that I have been concerned for some time about this question of discrimination in the field of federally financed housing. Last year I introduced legislation which would have abolished discrimination with respect to the voluntary home mortgage credit program. This year on February 3 I introduced H.R. 10163 which would have provided that the Federal Government shall not extend any financial or other assistance for housing with respect to which there is or may be discrimination on account of race, creed, or color, and for other purposes.

My bill would have applied to the entire field of federally financed housing. I limited this particular amendment to section 11 because I was not sure that an amendment broader in scope would be germane at this particular time. But I do feel that where Federal officials or agencies are making loans or grants, or providing mortgage insurance for purchase or construction there should not be any such authorization where any racial or religious discrimination exists.

Mr. Chairman, I would suggest to the members of the committee that some time, if they have not already done so, they turn to the national conference and the reports of the State advisory committees to the U.S. Commission on Civil Rights, 1959, and read the particular section with reference to their State insofar as housing is concerned. I would just like to read a paragraph or two from the section dealing with my own State of Michigan:

From examples given by the reports from Michigan cities, it is evident that in general the programs of the Public Housing Administration, the Federal Housing Administration, and the Urban Renewal Administration, while importantly relieving the national housing shortage, are contributing to the spread and intensification of housing segregation, as is seen from the following:

The mortgage insurance program of FHA is utilized by almost all private builders who practice racial and religious discrimination in housing development and mass-produced projects, and by members of the housing industry in financing relocation housing for families displaced by Government activities.

Then the State of Michigan Advisory Committee goes on to make the following recommendations:

That is the extension of all Federal housing aids be only on condition of a guarantee that the accommodations be available to all

qualified persons under the same terms and conditions without regard to race or color—

A situation which certainly does not exist in my State at this particular time.

In offering this antidiscrimination amendment, Mr. Chairman, I am not pointing my finger at any particular geographical area of our country. In Michigan, of course, we do not have any problems of discrimination with respect to the question of voting on which we recently passed legislation in this House. I would say, however, that discrimination with respect to employment and particularly in the field of housing can be found in almost any part of the United States.

In the case of privately financed housing, I do not believe that this is the appropriate time to deal with that matter. Most States have legislation or could enact legislation to take care of that situation.

I say with the utmost sincerity of which I am capable that as long as it is the policy of the administration and the Congress to act to remove discrimination based on racial or religious lines and as long as Federal money is going into any part of the housing program, I think all discrimination of any kind in federally financed housing programs should be outlawed, and I believe the Congress should take the necessary action.

Mr. RAINS. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Michigan, and I am not going to use the full time allotted me because everyone knows what this amendment means. It is simply the same attempt that was made last year on the housing bill to scuttle it completely. This is in line with the amendment that the gentleman from Ohio discussed in debate on the rule yesterday.

I have only this further to say, that this type of amendment if adopted, as everyone who is interested in housing will know, kills the bill. It is a parliamentary maneuver in order to get the bill into a position so it can be defeated.

Mr. Chairman, I ask for a vote on the amendment.

Mr. CURTIS of Missouri. Mr. Chairman, I move to strike the requisite number of words.

Mr. BENTLEY. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Missouri. I yield to the gentleman from Michigan.

Mr. BENTLEY. Mr. Chairman, I hope very much that the gentleman from Alabama is not questioning my personal motives in offering this amendment. I have offered this amendment in all sincerity. I am not presuming to speak of the motives of any other Member of the body, but I assure the gentleman from Alabama that my motive in offering this amendment comes from a sincere desire to improve the bill.

Mr. HALLECK. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Missouri. I yield to the gentleman from Indiana.

Mr. HALLECK. The gentleman from Alabama referred to certain actions here in the last session on the housing bill. If my recollection serves me correctly, and I think it does, the gentleman from New York [Mr. POWELL] offered a similar amendment to the Herlong substitute. At that time it was indicated that if the substitue did no prevail the same amendment would be offered to the committee bill.

The substitute did not prevail. In spite of the fact we were supporting it, the amendment offered by the gentleman from New York [Mr. POWELL] received very substantial support on the Democratic side, but when the time came for consideration of the committee amendment, no such amendment was offered to the bill.

Mr. HOFFMAN of Michigan. Mr. Chairman, I ask unanimous consent that the gentleman from Missouri [Mr. CURTIS] may proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. RAINS. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Missouri. I yield to the gentleman from Alabama.

Mr. RAINS. I merely want to correct the distinguished minority leader's recollection.

His memory is incorrect about what happened on the housing bill last year. The amendment was offered by the gentleman from California [Mr. BALDWIN] and was not offered by the gentleman from New York and was defeated overwhelmingly by the votes on this side, including the gentleman from New York [Mr. POWELL] himself, so he is totally in error about it.

Mr. HALLECK. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Missouri. Yes; I yield to the gentleman from Indiana.

Mr. HALLECK. The gentleman from Alabama is correct in respect to the offering of the amendment by the gentleman from California [Mr. BALDWIN]. That had slipped my mind, and I accept that correction. But the amendment came from this side and not from that side on the committee bill.

Mr. CURTIS of Missouri. Mr. Chairman, I want to make this point: I appreciate there are some motives on possibly both sides of the aisle that have nothing to do with the issue. The issue, if you please, as the gentleman from Michigan has posed it, is "Do we have a problem of racial discrimination in our Federal Housing Administration? Does it exist in my State of Missouri? Yes; indeed it does. I have talked to Negro leaders, and they tell me that one of the great problems today is the problem of racial discrimination in housing. I am convinced that that is an important issue.

Now, whether or not the issue is presented to this Congress in relation to a bill so that it might be defeated, if that issue itself is important that is the test, the other has no bearing. Whether we vote up or down this particular amendment must be decided on the basis of whether or not we believe that it is an important problem at the Federal level; that there is a problem of racial discrimination in the way Federal funds are being used in the housing field. I am convinced that that is the case. In fact, I am surprised that this committee came out with this bill without a provision of this nature already in the bill so that it would not have to be offered on the floor of the House.

I want to say this: I voted for every Powell amendment, or one like it, that has been proposed in relation to these Federal expenditure bills, in relation to school construction or whatever, and I will continue to do so, although I do recognize that there is a fair charge made that the motives of some who support that are to defeat the bill. The question does come back not to whether or not this will defeat a housing bill. The question comes back: Do we have racial discrimination in this area, and do we mean what we said we meant when we debated for those long weeks the civil rights bill? Do we really believe that at the Federal level we should do everything we can to eliminate this discrimination?

Mr. Chairman, I engaged in correspondence with the head of the NAACP and the gentleman from New York [Mr. POWELL], on this very subject, raising a question about their approach to this amendment when their supporters actually went through the line with my good friends from the Southern States in voting down these amendments on the ground, as they say, that it was put in in order to defeat the bill. I said maybe that was the motive of many people, but should that take one's mind off of the real problem? Is not the problem and must not the problem be this question of civil rights in relation to racial discrimination, and if that is so, let us meet it and let us meet it just as we met the civil rights bill. Do you people on that side of the aisle—and I am now addressing myself to what I hope will be the northern Democrat-Republican coalition, as it always has been on civil rights—do you people really believe enough in civil rights that you are willing to join the Republicans and put it in measures of this nature? I have heard on the floor of the House this old thing that is brought in each time that there is a southern Democrat-Republican coalition in which, I have said, we do get together and hope it will continue on fiscal matters.

The essential coalition, as I stated back in January, is the northern Democratic-southern Democratic coalition. You call yourselves a political party. You are the ones who elect the Speaker, who elect your majority leader; you elect the gentleman from Virginia, Judge SMITH, in effect, the head of the Committee on Rules. In effect you elect the gentleman from New York [Mr. CELLER], the chairman of your Committee on the Judiciary. Are you going now to measure up to national responsibility on this issue?

I know that some of you want this housing bill, but this is an important thing. You are answering two questions in your vote. No. 1, do you think there is a real problem in this housing situation as far as racial discrimination is

concerned? If your answer is "Yes," that there is a problem, then indeed I see no other course but that you vote for this amendment so that we will correct the situation this time.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Missouri. I yield to the gentleman from Florida.

Mr. FASCELL. In order that I might be properly apprized in responding to the allegation or inquiry made by the distinguished gentleman from Missouri, I would like to know whether or not he is basing his argument on the theory that the present administration, in the operations of its executive agency, is now improperly discriminating in housing in this country, although there is no such authority contained in the law?

Mr. CURTIS of Missouri. I think there is discrimination, yes. I think this administration can be properly criticized on that. But this is a matter, I might say, for the Congress to decide. Are we going to approve what discrimination there is? We know this is a serious problem. There are people in the administration who are fighting to eliminate this discrimination, just as there are people in this administration who take the other point of view. It is now before the Congress as to whether or not we want to back up those in the administration who are trying to eliminate racial discrimination or whether we want to take this attitude of all things to all people here.

Mr. FASCELL. Mr. Chairman, will the gentleman yield for one further question?

Mr. CURTIS of Missouri. I yield.

Mr. FASCELL. Will the gentleman admit that the problem can be resolved right now, immediately, by a directive from the head of the agency?

Mr. CURTIS of Missouri. I do not believe that it can be.

Mr. FASCELL. Administratively?

Mr. CURTIS of Missouri. I do not believe it can be entirely, particularly as this does relate to the Congress. I believe a great deal more can be done and I hope it will continue to be done. But the issue is before us now and what we do on this will have a great bearing on what the administration does.

Mr. McDONOUGH. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Missouri. I yield.

Mr. McDONOUGH. With reference to this question that has been raised on determining whether there is racial discrimination at the administrative level, there is no intentional racial discrimination, but the discrimination, where it exists, originates with the subdivider, the man who builds the houses, the salespeople who offer them. There is discrimination even in the matter of showing the houses to people of various races, religions, and creeds. The Administration would have to have a tremendous police force to be sure that each builder, each salesman, was not denying to certain racial groups this opportunity. So the Administration is not at fault in this matter.

The CHAIRMAN. The time of the gentleman from Missouri [Mr. CURTIS] has expired.

Mr. McDONOUGH. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I am a little bit surprised at the attitude taken by my colleague on the Democratic side the gentleman from Alabama [Mr. RAINS] concerning this amendment. We spent a lot of time debating this bill yesterday. The burden of the argument was entirely directed to the point of aiding the low wage group to obtain housing. Here is an amendment that would assure many people in the low wage group the benefits of this bill, because under this amendment there would be no discrimination because of race, religion, ancestry, or national origin, and it is being opposed. I do not know how many of the Members who are here today were here yesterday when we discussed the heart of this bill. The pertinent part of it is that $1 billion will be made available to FNMA to purchase at par any mortgage from $13,500 to $14,500 in high-cost areas. That gives the builder, the homebuilder the full advantage of cashing in at par, but there is nothing in the bill, and there is no assurance in this legislation that the home buyer is going to profit by the discount that the homebuilder picks up by selling his mortgage at par to FNMA. How can it then become a small wage earner, low-income group bill? Furthermore, if denial is made of this amendment—and the charge is made that it is not offered in good faith, with which charge I cannot agree—if this amendment is denied we are saying in effect that we do not want the small wage earners in these categories to benefit from this legislation.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan [Mr. BENTLEY].

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. BENTLEY. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers Mr. BENTLEY and Mr. RAINS.

The Committee divided; and the tellers reported that there were—ayes 83, noes 126.

So the amendment was rejected.

Mr. RAINS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RAINS: On page 10, strike out section 15 beginning on line 7 and ending on line 11 and redesignate any succeeding sections accordingly.

Mr. RAINS. Mr. Chairman, this is an amendment which strikes out the section known as the Wherry acquisition section. It is the section that said the military would be required to purchase all Wherry housing at ali permanent military bases. The distinguished gentleman from Georgia, chairman of the Committee on Armed Services, has now a subcommittee headed by the gentleman from Texas [Mr. KILDAY] which is engaged in working out the details of these Wherry transfers. For that reason, I ask that this amendment be adopted to exclude the Wherry acquisition section from the bill.

Mr. McDONOUGH. Mr. Chairman, we have no objection to the amendment.

Mr. FASCELL. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I support the amendment and I rise in support of the bill. It would seem to me that the logical way to determine whether one would support this bill would be to arrive at the facts.

First, on the question of need, the majority of the committee makes a strong case in support of this legislation; yet in debate on this floor, as usual, we have heard the majority position attacked on several grounds: That the facts are untrue, that the motives of the proponents are political, and finally that the legislation is fiscally irresponsible.

I heard the distinguished gentleman from Alabama, the chairman of the subcommittee who is the author of this legislation, present basic facts to this committee. More importantly, Mr. Chairman, he requested that any person who could successfully challenge those basic facts, should immediately do so. To this point in the record of the debate on this bill, there is not a successful challenge to the basic facts. It is easy to rationalize one's own political position and draw entirely different conclusions from the facts, but it seems to me that in all fairness, such a position should be so stated.

In Dade County, Fla., one of the fastest growing areas in the country, construction is one of our principal economic factors, just as construction throughout the country must now be considered basic to the economy of the United States. It certainly must be included along with other major industries, such as the automobile industry, steel, agriculture, and the production of consumer goods.

For some time now, many people in our area have been very much concerned about the programed effort of the present administration to restrict credit, raise interest rates, and slow down home construction. Perhaps one or all of these actions must necessarily be applied at a particular time under certain economic conditions. At the same time, however, it must likewise be admitted that there is and can be a time when such restrictions need to be eased.

The facts are that in my area, for some time, the restrictions applied have been too stringent. Financing is difficult to obtain, interest rates have climbed sharply, discounting has increased, unfavorable secondary financing arrangements are resorted to, money is scarce and building generally has slowed down.

I am confident that while I generalize on these subjects, that a technical survey of my area would more than substantiate these facts.

The committee has outlined some of them for the State of Florida in its report. I would like to quote two, and I am sure I could get many more communications, which point out the seriousness of the situation we have in south Florida.

The following telegram was received by me on January 26:

MIAMI, FLA., *January 26, 1960.*
HON. DANTE B. FASCELL,
House of Representatives Building,
Washington, D.C.:

This company active in south Florida home finance field more than 5 years. Figures from our records show massive decrease in construction and home sales industry.

October 1959 decrease of 34 percent compared with October 1958.

November decrease of 72 percent compared with November 1958.

December 1959 decrease of 53 percent compared with December 1958.

We face extended bleak future with current construction loans total 34 percent less than 1 year ago and cost of construction money up more than 100 percent. This widespread slackening of business in homebuilding industry is a reflection of public concern as to high interest rates, large discounts, and Federal Reserve activity. We urge support of immediate housing measures to give relief and public confidence to VA and FHA programs as well as stability to the money market.

HOME MORTGAGE CO. OF FLORIDA,
By W. M. MOORE, *Vice President.*

The following letter was received by me on February 4:

It is naturally disturbing to see our great industry experiencing such extreme financial pressure, due to the high mortgage discounts demanded by the lending institutions.

At this time I am most anxious to see us actively support this proposed legislation in every manner possible. It should be clearly understood and publicly pointed out that this special assistance program is a contingent liability and will not be in any way a cost to the taxpayers. These funds are repaid, and become completely self-sustaining.

The existing situation, and obvious truth, is that the VA and FHA home purchasers are paying the unrealistic mortgage discounts in the price of the house they purchase.

Permit me to thank you in advance for any additional consideration you may feel this matter justifies.

MORTON ADLER,
Home Builder.

The facts pointed out by these two communications are readily visible to anyone who is in any way acquainted with construction in our area in the last few years.

A great to-do is made by some of our distinguished colleagues here today about the fact that this bill represents a raid on the Treasury of the United States through a back-door approach. As a matter of fact, the legislation is quite clear. It would authorize and by our action here we so do, the expenditure of funds for the purpose expressed in the legislation. I see nothing secretive about this. Congress is acting as a responsible body, to determine whether it will or will not grant this authorization. I have no difficulty in deciding on the facts. I am willing as a Congressman to grant this particular authorization at this time to an executive department, for the purpose of the legislation.

It is likewise contended with great anguish today that even if there is a need, and disregarding what the opponents allege is an improper method of authorization, the billion-dollar authorization which is part of this legislation, should not be passed at this time because; first, the national debt of the United States is higher than it has ever been; second, it will unbalance the budget; third, it will result in deficit spending; fourth, it is fiscally irresponsible.

Mr. Chairman, I am perfectly willing to overlook the nature of these cries and also overlook the fact that this happens to be the principal type of issue which is being manufactured for public consumption in a presidential election year. The objections enumerated fall flatter than a pancake without self-rising flour, because I am perfectly willing to vote the billion dollars for this important purpose and vote to cut a billion dollars from other places in the President's budget that I know can be cut and will be cut by this Congress. Furthermore, if we do not do this and it becomes necessary, I am perfectly willing to support the tax measure which will provide the financing for this important program.

I would simply ask those who oppose this bill why they do not feel that way? Everyone knows, Mr. Chairman, the necessary financing adjustments within the budget can be made to cover this authorization, if necessary. The point is, do you really want to do it? I say, based on the facts presented by the majority of the committee which are incontroverted and which I feel are more than substantially supported by the actual conditions in my own area, I find no hesitancy in supporting this legislation. I commend the distinguished gentleman from Alabama and his committee for bringing this bill to the floor at this time.

In conclusion, Mr. Chairman, it should not be overlooked that while this legislation authorizing the executive agency to expend up to a billion dollars by calling on the Treasury of the United States for that purpose, the executive agency is buying on the market mortgages from home owners of the United States, and that those mortgages are being repaid promptly and properly. I have heard no facts from any of the opponents to this legislation which would indicate that there is any reasonable doubt in anyone's mind that economic conditions will continue to be such that this good repayment record will continue. As a matter of fact, the opponents allege that economic conditions are good, and that there is peace and prosperity. The fact is that there is little likelihood, and we all know it, that the Government will lose any money because of this contingent liability.

Mr. YOUNGER. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, if I may have the attention of the gentleman from Alabama, I would like to take this time to ask a couple of questions. Yesterday, as one of the reasons for this bill, the gentleman said:

The bill is intended to help reduce the exorbitant and unconscionable discounts prevalent throughout the Nation on home loan mortgages.

Mr. RAINS. That is correct.

Mr. YOUNGER. Will the gentleman point to any section of the bill that governs in any way the discounts charged by the mortgagors?

Mr. RAINS. The par purchase section and the special assistance funds controls it.

Mr. YOUNGER. Just a moment.

Mr. RAINS. Does the gentleman want me to answer his question?

Mr. YOUNGER. I know, but you say that the purchase of mortgages at par controls the discounts of the mortgagors.

Mr. RAINS. You did not let me finish.

Mr. YOUNGER. All right.

Mr. RAINS. The other control is this. One of the reasons that high discounts are now chargeable is the lack of competition, and the whole bill and that section of the bill having to do with the billion dollar Fannie Mae authorization will help to alleviate the shortage and the high cost of money at the present time. It did it in 1958. It did it before and it will do it again.

Mr. YOUNGER. But there is nothing in the bill that in any way controls the discount that the mortgagor charges.

Mr. RAINS. I heard the gentleman say yesterday that he had been in this business for a long time. I have, too, as a matter of fact. But I am not one of those who think you can write into a bill a statement that says discounts cannot be above a certain figure. We recognize that there has to be some flexibility. I am not totally uninformed on that, I will assure the gentleman. But I know the answer to it is not in writing in definite language with a specific prohibition. Instead, you must make available at least a modicum of a reasonable supply of mortgage credit in order to keep discounts within reasonable proportions.

Mr. YOUNGER. But this does not cover discounts at all. The gentleman well knows that if your experience is what you say it is, and in that respect we have common experience, that will not control the discount any more than it controlled it in the Veterans' Administration loans.

Mr. RAINS. It has done it in the past. That is the only answer I can make.

Mr. YOUNGER. It has not controlled it in the past.

Now, one other question. In this bill you give the Administrator the right to reduce the premium from one-half to one-quarter percent. That control has always been by the Congress.

Mr. RAINS. It has always been discretionary to a certain point.

Mr. YOUNGER. No. The premium for the insurance is not discretionary.

Mr. RAINS. It is now discretionary from one-half to 1 percent. Do you not trust the Administrator?

Mr. YOUNGER. I am asking you. You are putting the power in the Administrator to take over the power that the Congress has controlled; yet you will not take the Administrator's word

for one recommendation in regard to this bill in the operation. The Administrator just last night said he was opposed to this bill and every section of the bill.

Mr. RAINS. I would assume that he is, but I would be willing for him to judge whether or not, when there is a big surplus in his agency, it ought to be lowered. That is his responsibility and we expect him to live up to it.

Mr. YOUNGER. He will not know if there is enough to cover the guarantee. The FHA has never been tested since it was started in 1934. You have had a constant increase in the price of real estate and homes. Nobody knows what it will take. You will give to the Administrator the right to make a present to somebody, which rates have always been controlled by Congress, yet in this bill you will not take one recommendation from him.

Mr. RAINS. Yes; I will take the Administrator's word when he says he thinks he can lower it. I do not take his advice as to policy.

Mr. YOUNGER. When it happens to differ with your opinion you will not take it.

Mr. RAINS. That is correct.

Mr. YOUNGER. But is the Administrator's word to be taken in regard to operation?

Mr. RAINS. Yes; as to administrative details.

Mr. McDONOUGH. Mr. Chairman, will the gentleman yield?

Mr. YOUNGER. I yield.

Mr. McDONOUGH. This bill does nothing for the home buyer. It gives a clear profit to the home builder. Is that not the point you are trying to make?

Mr. YOUNGER. No. It gives an unnecessary bonus to the lender. It gives him the right to go out and lend at any discount he wants to and turn the mortgage over to the buyer.

The CHAIRMAN. The time of the gentleman from California [Mr. YOUNGER] has expired.

Mr. WIDNALL. Mr. Chairman, I move to strike out the last three words.

Mr. Chairman, I would like to end this debate and get back to the alleged purpose of this legislation. We had a very tragic picture painted by the sponsor yesterday of gloom and doom with respect to the United States, of a recession that he claimed was in the offing.

Let me read from last night's Washington Evening Star an article by Sylvia Porter:

JOBLESSNESS HAS PLUNGED THIS MONTH

The number of jobless in our Nation again has dropped below the 4 million mark—wiping out the startlingly steep upswing which occurred in unemployment during March's dreadful weather.

The percentage of our labor force seeking jobs but unable to find them has fallen to less than 5 percent—reducing the seasonally adjusted unemployment rate to around the 4.8 percent of February.

Employment on farms, on construction projects, in plants and stores has climbed by hundreds of thousands in the past few weeks—pushing employment back into the seasonal uptrend usual at this time of any good business year.

These figures will not be released for another two weeks. The United States Labor Department's report on employment-unemployment in April is not scheduled until the second week of May.

But the census on which the May report will be based was taken in the week of April 10 through 16. Enough material is in the hands of Government experts to permit an informed forecast about April's developments.

This morning's New York Times, on the financial page, has the heading "Orders Climb for Machine Tools," and makes the statement:

A rise in orders for machine tools last month raised the level for the first quarter of this year to the highest point since the 1957 period. Machine tool orders are an important indicator of industrial planning.

And the same page contains the following headlines: "Earnings of General Motors Climb to Record"; "Sales Also at a Peak"—incidentally, an alltime peak for the first quarter—"Cigarette Maker Sets Profit Peak"; "Gimbel's Earnings Soar 23.1 Percent as Sales Surge to Record Level"; "Babcock and Wilcox Records Peak Net"; "U.S. Exports Zoomed in March."

I would like to close by reading from a New York Times editorial I inserted in the RECORD yesterday. There are many who class themselves as northern liberals who read the New York Times as though it were the Bible. Let me read from an editorial from the New York Times of February 13, 1960:

So far as the state of the economy is concerned, it is such as to indicate that the proposal to blow up mortgage demand artificially would not only be potentially inflationary on the demand side (for residential building has an exceptionally high multiplier effect on municipal and private spending) but it would lop off at a stroke nearly one-fourth the hoped-for surplus in the 1961 Federal budget. As to the lack of funds available for residential mortgages, this is true only if one believes that the Nation has a responsibility to maintain the supply of such funds at all times at a figure equal to or exceeding the recent previous high.

This is a very strong editorial against the bill you are trying to enact at this time.

I urge all of you to defeat this legislation.

Mr. MADDEN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, considerable discussion during this debate was devoted to the difficulty of veterans participating in the housing legislation. The following letter from A. Kobe, of Gary, Ind., explains in detail the veteran's problem under the present housing legislation:

GARY, IND., *April 23, 1960.*

HON. RAY MADDEN,
U.S. Congressman,
New House Office Building,
Washington, D.C.

DEAR MR. MADDEN: It certainly was a privilege to have the pleasure of meeting you in your office last Friday morning. I realize that you are a very busy man and I am very grateful to you for the time you have given me concerning the problem we discussed.

I did have a conference with Mr. Dervan, assistant to Mr. P. N. Brownstein, Director of Loan Guarantee Service, Veterans' Administration. At that time, I did air my particular problem to them and they did assure me that they would review my case and try to come up with a decision of some sort the week of April 25. You have, no doubt, heard from him as he did assure me that he was going to call you and discuss the problem with you. To me, it did appear that there was very little encouragement, and I am very doubtful whether anything can be done to help the situation that I am faced with at the present time.

I wish to call your attention to a particular problem which a veteran is faced with when he applies for Veterans' Administration assistance for a loan. A builder is confronted with a commission to be paid to the lender of the money, that must be absorbed in the profits of the sale of a home. This is utterly fantastic and almost an impossibility for a builder to absorb. Commissions for loans today amount to 10 to 20 points. In our particular instance, it amounts to an average of almost $1,700 per house. In some areas it amounts to almost twice that amount. A large project home builder, who builds upwards from 300 homes a year, could possibly pay this type of commission to a lending institution; but my experience with this type of situation has been one where the commission is included in the cost of a home and passed on to the veteran who buys the home, but as I stated to you in your office, we are a small builder. We are faced with a higher cost for land which is perfectly justifiable. The land is very desirable, it has all the protection and conveniences of the city and the site is very ideally located and cannot be surpassed for any reason. Therefore, land of this type has a higher valuation it its owners. Coupled with this fact plus commissions to be paid to a lending institution for mortgage money, it has placed our demands for an appraisal from the Veterans' Administration about $700 to $800 beyond what they feel is a satisfactory appraisal for this type of home. We have given them comparables for similar homes within the same area that we are working in, and proved to them that the land values are at least $10 a front foot more than we are getting, plus a better appraisal on the structure. Within the confines of the loan, I am sure the Veterans' Administration can approve our demands without any reasons of doubt. We can and we will, absorb a portion of the commission needed to secure mortgage money. As we mentioned to you, our profit was very slim. We cannot absorb any more than what we feel would give us a very ethical profit. To arrive at a profit that is fair, we must have exactly what we have asked for from the Administration. I expect to have an answer from Mr. Dervan within a week. If he finds it impossible to given us a favorable answer, it will necessitate another trip to his office to discuss the matter further.

It is my understanding that Congress is now investigating the future of the veterans' program regarding the homebuilding program. I want to go on record as a veteran, asking that you very diligently pursue the problems that we veterans are faced with concerning the homebuilding program. I feel, and I think that everyone in the Veterans' Administration will agree, that there must be some legislation to correct the lack of interest of lending institutions to be attracted to loaning money on the veterans' program. When moneys are available for veterans' loans, the commissions that are paid to lenders make it prohibitive for builders to absorb. Therefore, the problem has created a very chaotic condition which the veteran will be held responsible for because they are buying the same home for $2,000 to $3,000 more with conventional mortgage money. Builders are almost snubbing the veterans' loan completely, because of a lack of interest of a lending institution to provide the necessary money, without a commission. I am at a loss to know why there is such a tremendous amount of money

available in some areas, and not ours, on a conventional mortgage basis. It is my understanding that in some localities, loans are available for 19 percent commission, along with the purchaser being faced with two and three junior mortgages on a home. If you will recall, and I believe you will, this is a situation that existed prior to the financial disaster in 1929. Veterans are desperate and they are in need of housing. I think the veterans' program was well instigated and properly protected by law at the time it was formed. I do not feel that adequate changes have come about to continue to make the veterans' program adaptable to the present conditions. Our problems can be quite simply solved by permitting the law to be changed and raising the interest rate on a veteran's loan to satisfy the lending institution. To have the veteran bypass the protection of the Veterans' Administration and buy homes on a conventional basis, he is not only faced with a higher cost home which is way beyond the fair appraisal of the Veterans' Administration, but he is also faced with the problem of very inferior construction because we do not have the support of the proper inspections that are needed to conform with the architectural demands and specifications of the Veterans' Administration.

Again I ask that you encourage your colleagues to renew the veterans' program to World War II and any following military engagements. With simple modifications and changes in the law as it now exists, I am sure that we can satisfy every one concerned and it will also produce a very sound and lasting program and it will also be a buffer to any inflationary moves that are definitely heading in that way now. It is my intention to rally as many other builders with me in trying to encourage our Congressmen to have this program continue on as it has so successfully in the past years. It has produced very fine results in the past and there is no reason why it cannot continue to do so.

Again I wish to thank you for your time you have given me in counseling the moves to be made in helping me in my problem. I am certain with your cooperation, we are going to be able to correct the problem as it now exists.

Any time that you are in Lake County, feel free to call me at your convenience. I would be most delighted to visit with you and perhaps we could arrange a meeting with our friend, Mr. Mandich.

I shall be looking forward to hearing from you.

Very truly yours,

A. KOBE.

Mr. BYRNES of Wisconsin. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, we should not be discussing whether or not an additional Government subsidy is going to be injected into the mortgage market to stimulate the purchase of homes—an additional $1 billion. Rather, we should be looking sharply at another situation which can siphon off many millions of the available dollars from the mortgage market. I certainly do not feel that H.R. 10213 would work for the long-run interest of homebuilding calling as it does for additional Government subsidies.

What we must do is channel the flow of true savings into the mortgage market. If we do not, we only add to the troubles that have been all too prevalent in the past for housing—inflationary pressures, increase in construction costs, and the pricing of more and more Americans, principally those in the lower income brackets, out of the housing market.

Now, Mr. Chairman, savings alone do not automatically stimulate home buying. The money market is a complex mechanism—and it must function efficiently and smoothly if the required amount of savings is to flow into mortgages. We are today in the 11th month of a dammed-up flow caused by the unwillingness of a majority in this Congress to take a simple, direct, and businesslike step. I refer to the Congress' refusal to remove the outmoded 4¼ percent interest rate ceiling on Government bonds.

To my mind this is the most serious block in the channeling of a sustained and increasing flow of money into the mortgage market which could have vastly benefited American housing during the past year. Instead, it has caused distortions in the credit market and a confused pattern of blame being erroneously cast on those who would in the language of the critics insist on higher and higher interest rates.

These critics are wishful thinkers, too, because they have said that the recent decline in interest rates solved the problem of removing the outmoded ceiling and that the Treasury could from now on sell long-term bonds within the limit of the current ceiling. Have they not read the message clearly—the firm rejection by investors of the single 4¼-percent, 25-year bond offered by the Treasury on April 4.

The Treasury was courageous and logical in offering up to $1½ billion worth of this bond in order to test the situation as it is today. It had no other way to judge the true demand for long-term bonds in the credit market—and the market's answer was loud and clear. These new bonds were just not attractive to investors. The strength of our economy today has resulted in much better investment opportunities from which to choose. As you know, there were only $370 million of the bonds purchased after the announcement.

Now comes the question in relation to this bill H.R. 10213. How has the existence on maintaining the 4¼-percent ceiling hurt the mortgage market? This is what has happened: The Treasury has been forced to confine its financing to less than 5-year securities. This has distorted the credit mechanism and has certainly pushed short-term rates to excessively high peaks. You will recall the "magic 5s" of last October. This was an instance where the Treasury had to go to a 5-percent note in order to get its money to pay the Government's bills. Naturally, individuals with funds in savings banks, savings and loan associations, and savings departments of commercial banks were highly attracted by this rate because, remember, it was in sharp contrast to the 3 to 4½ percent prevalent in those institutions. What happened was not hard to predict. They withdrew hundreds of millions of dollars from these savings institutions and thereby siphoned off an important amount from a source, ordinarily a principal one, available to the mortgage market.

These funds and others during this period of high short-term interest rates are funds that ordinarily would have gone into the mortgage market and hence into the promotion of needed homebuilding. In addition, many of the financial institutions feared more issues of this type to come in the future and they in turn became reluctant to engage in future commitments to buy mortgages.

Experienced people in the market have said that the recent decline in housing starts can to a large extent be traced to the impact on the mortgage market of the restrictions imposed by the interest-rate ceiling last autumn.

Mr. Chairman, the National Association of Homebuilders, through its president on March 11 of this year, wrote a letter to his membership strongly urging support of another bill, H.R. 10590. This, as you know, does not remove the ceiling but would furnish valuable flexibility to the Treasury and permit it to avoid excessive drafts on the short-term market. The leaders of the homebuilders themselves realize that this is not an exercise in economic or financial theories, but that the existence of the roadblock of the outmoded ceiling can do nothing but continue to hurt homebuilding. This view is also shared by the National Association of Real Estate Boards and the National Retail Lumber Dealers Association.

Mr. Chairman, we have got to realize that our free economy has to really be free of old-fashioned, outmoded and unfair restrictions on the dynamic ability of the American economy to respond healthily and in normal fashion to the flow of its free markets. We have a growing economy and we live in prosperous times but, believe me, we are doing the wrong thing when we attempt by arbitrary measures to make anything, including money, cheaper than the economy permits or which is necessary to its continued progress. If we don't heed such advice, we get into conditions like this where the Treasury, in attempting to live with an outmoded restriction, has to go into an area of the money market which pulls large amounts of needed funds out of the mortgage market. If we want to do something for homebuilding, let us get at the source and face up to the facts. Homebuilding cannot live up to the promise which every American feels personally as long as we have an artificial restriction of such magnitude on the management of the national debt which results in a distortion of the credit market where the needs and the demands for credit are strong and growing. Let us remove this 4¼ percent interest rate ceiling right away.

Mr. HENDERSON. Mr. Chairman, in my opinion, we are seeing here today a demonstration of panic-button legislation. This is an old legislative device. Cry loudly, articulately, and often that disaster is about to befall the Nation and vote sensitive Members of this House respond by stampeding in all directions to destroy the national structure with hoses and axes to put out a fire that does not exist. In the case of this legislation, the cynical lack of concern by the big spenders here is exposed.

This is termed an emergency bill to deal with a so-called emergency situation in the Nation's housing industry and to deal with supposed emergency conditions affecting our people whose housing plight is said to have reached emergency proportions. We are taking a wild semantic toboggan ride. It is high time that we behave like responsible legislators and look at the situation we are facing without the hysteria of doom. We will not answer this or any other issue with pitchmen's spiels and ill-considered cure-alls in this election year. We must look at what the so-called emergency is, what the so-called palliative costs, and how many people would obtain genuine benefit from it.

Upon careful evaluation, it appears that the application of the term emergency to this bill is entirely unappropriate. We apparently will see a slight decline in new housing starts this year after the boom conditions that prevailed in 1959. Even with the decline the prospects are for a banner year of new starts and an actual increase in the dollar volume of new housing of more than 10 percent over any year before 1959.

We have here a bill which urges a billion-dollar raid of the Treasury for the purchase of mortgages at subsidy prices. This is planned in the back door tradition which is becoming the classical plan of those who want to spew out our tax dollars without the courage of presenting the people the price tag.

The Federal Government is complicated and costly enough without adding any more of this kind of phony slight-of-hand financing. If we are ever to see a tax reduction in this country, we are going to have to save our costly emergency legislation for genuine emergency situations. This is not an emergency and let us have the courage to say so.

The bill before the house does not help the struggling family with inadequate housing. This bill is directed to subsidizing housing merchants for whom no tears need be shed. They can fend for themselves.

The emergency that needs attention today is in the purchasing power of our dollar. By the time Congress passes all the pet spending programs that are on the legislative assembly lines, the families with inadequate housing will find their meager dollars will buy less food, clothing, and housing than before, while the builders and brokers who find favors in this bill will be living high on the hog.

Mr. FORRESTER. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I take this time to ask a question of the gentleman from Alabama [Mr. RAINS]. I am addressing myself now to the amendment to strike out section 15 of the bill which provides for the buying of Wherry housing. The gentleman knows, of course, that I have been interested in this particular amendment for some time. If my memory serves me correctly, a similar provision was in the housing bill of last year and the same objection was raised then that is raised now, that the Armed Services Committee was going to prepare some legislation to take care of it. Is that correct?

Mr. VINSON. Mr. Chairman, will the gentleman yield?

Mr. FORRESTER. Just 1 minute, I would like a reply from the gentleman from Alabama first.

Mr. RAINS. The Wherry housing has been in the bill, I will say to the gentleman from Georgia, for some time. The original formula was written 6, 7, or 8 years ago. The gentleman will recall that last year the section requiring the purchase of Wherry housing on a permanent basis was included, and the distinguished gentleman from Georgia set up a committee headed by the gentleman from Texas [Mr. KILDAY] who said they would speed action on the purchase of Wherry housing. It is my information that they did that; they held hearings and that there are only a few projects still left. I got this in conversation with the gentleman from Georgia and the gentleman from Texas. On the basis that they were to get the matter cleaned up I asked that it be excluded at this time.

Mr. FORRESTER. Now 12 months have intervened. I would like to ask the gentleman, can he give me any information or any encouragement to believe that this legislation is going to come up soon or at this session or is it in the foreseeable future that it will come up?

Mr. RAINS. My opinion is that the committee and the gentleman from Georgia, the chairman of the Committee on Armed Forces, can speak better than I on that. It is my information that they expect to attain the goal the gentleman seeks without any further explanation because there is on the books Wherry housing legislation. I would rather the gentleman address the gentleman from Georgia.

Mr. VINSON. Mr. Chairman, will the gentleman yield?

Mr. FORRESTER. I yield to the gentleman from Georgia.

Mr. VINSON. I will furnish the gentleman the information that approximately 63,000 units have already been acquired by the Department of Defense and unless there is some military need on the part of the Department of Defense between now and June 5—I think that is the date—they will acquire about 16,000. During this year we will require 3,000 more. We are proceeding in an orderly manner. All of us have the same objective but we do not want any mandatory requirement that each and every unit must be acquired unless there is some military necessity or need for the units.

Mr. FORRESTER. Then, as I understand it, the gentleman was in error that he intended to offer legislation.

Mr. VINSON. If it becomes necessary to offer legislation, it will be offered, but we think we can accomplish the objective without legislation.

Mr. FORRESTER. What the gentleman intends to do is buy what you want and let the others alone.

Mr. VINSON. We now have military use for it, and I am not going to advocate buying a unit that we have no military justification for. May I say that if the House goes along with us I am confident we will take care of the units in a very short period of time.

Mr. FORRESTER. Let me ask the gentleman just when will he get this legislation on these particular items?

Mr. VINSON. I cannot say it will be on the fifth of this month, or the fifth of next month, but we are approaching it in an orderly manner.

Mr. FORRESTER. Will the gentleman say during this session? When the gentleman simply says "orderly manner" I am a little bit afraid of that.

Mr. VINSON. I cannot hear the gentleman.

Mr. FORRESTER. I am a little afraid of that "orderly manner." Will you do it during this term?

Mr. VINSON. I cannot make any promise like that. We will proceed as we should proceed, and we will not permit the Government to buy those for which there is no justification.

Mr. FORRESTER. Am I to understand there will be no legislation, then?

Mr. VINSON. If there is justification, all right; if there is no justification, we will not.

Mr. HOLIFIELD. Mr. Chairman, will the gentleman yield?

Mr. FORRESTER. I yield to the gentleman from California.

Mr. HOLIFIELD. May I observe that the distinguished Chairman of the Committee on Armed Services is proceeding with deliberate speed.

Mr. FORRESTER. I do not think there is much doubt about the deliberation.

Mr. WESTLAND. Mr. Chairman, I move to strike out the last word. I do this for the purpose of asking the gentleman from Alabama a question. We have had a little argument over on this side on the proposition of whether or not an original lender under the terms of this bill can discount a mortgage, say 5 to 10 points, and then sell it to FNMA at par? I have said they cannot.

Mr. RAINS. The gentleman is correct; they cannot. I am glad he asked that question because I would like to have the legislative history in the RECORD make it clear that they cannot.

Mr. WESTLAND. I would appreciate it if the gentleman would do that, because if a lender could do that I would vote against the bill even though I intend to vote for it.

Mr. RAINS. I assure the gentleman I would, too, but it is not the intention of the legislation that that would prevail. I am glad that the gentleman asked that question. These loans would be at par and FNMA would never permit the lender to charge a discount on loans it purchases at par. We certainly would never permit it.

Mr. YOUNGER. Mr. Chairman, will the gentleman yield?

Mr. WESTLAND. I yield to the gentleman from California.

Mr. YOUNGER. Will the gentleman please point to any part of the bill that prohibits that?

Mr. RAINS. The gentleman should put his finger on the part that permits it. We did not need to spell out the obvious.

Mr. YOUNGER. The gentleman said he wrote the bill and knows about it. I did not write the bill.

Mr. RAINS. I did not say I wrote the bill. Our committee wrote the bill.

Mr. YOUNGER. Yes, you did, yesterday.

Mr. RAINS. I will simply say this: The answer to the question asked by the gentleman from Washington is "No; they cannot do it."

Mr. YOUNGER. Why did you not put in the bill that the mortgagor could not sell a loan to FNMA at a price different from what he took it at? Why did you not express it in the bill? What you say here does not mean anything.

Mr. RAINS. I have answered the question.

Mr. YOUNGER. The gentleman cannot point to one word in there that results in a prohibition against this practice.

Mr. RAINS. I can only repeat that FNMA would not permit it, nor would the Congress.

Mr. YOUNGER. Then it says "shall purchase any mortgage described in this subsection which is offered to it unless the loan is in default or in imminent danger of default or title to the property is defective." There is nothing at all said about discounts.

Mr. RAINS. The section you are quoting does not deal with discounts at all.

Mr. WESTLAND. Is the gentleman from Alabama saying there never has been an occasion where a lender has made an original loan at a discount and then turned around and peddled it to FNMA at par?

Mr. RAINS. I do not know what any individual has done, but the agency itself has never accepted these types of discounts that are talked about here. I do not doubt that some individual somewhere perhaps has done it.

Mr. WESTLAND. We know a GI mortgage today is taking a discount of about 10 points. Now, it is my understanding that under this bill any GI mortgage that FNMA will buy must have been made at par before they will buy it; is that correct?

Mr. RAINS. That is correct.

Mr. VINSON. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, there is one section of the bill that causes me concern and which I feel I must object to and that is section 15. This section would amend existing law so as to require the Department of Defense to acquire all Wherry projects located at or near an installation "which the Secretary determines to be a permanent part of the Military Establishment." The effect of this language is, of course, to require the acquisition of virtually all Wherry projects.

Now, I do not feel that this is the proper way to go about acquiring these Wherry projects. This language imposes an absolute requirement on the military departments to buy these projects whether they need them or not. I am as interested as the Banking and Currency Committee is in the acquisition of all Wherry housing projects for which the military departments have an actual requirement. I do not want the military departments, however, to acquire any Wherry housing for which they have no earthly need.

Indicative of my strong interest in the matter of acquiring Wherry projects is the fact that some time ago, on March 14, 1960, I reappointed a special subcommittee to look into this very matter. There have been some intimations that the progress of the acquisition of Wherry projects has not been as rapid as it might be. The chairman of this Wherry Acquisition Subcommittee is the distinguished gentleman from Texas [Mr. KILDAY]. It is his intention to initiate hearings on this subject in the very near future in order to bring up to date the information which his subcommittee obtained last year during similar hearings. Mr. KILDAY's hearings of last year were highly productive and speeded up the acquisition of Wherry projects to a very considerable extent.

I might say that the bare statistics themselves indicate that the Wherry acquisition program is definitely progressing, although we might like it to go a little faster.

Now, listen to this:

As of April 1, 1960, the military departments had acquired 62,237 units of Wherry housing. An additional 1,031 units are in the process of acquisition at the present time and it is expected that prior to June 30, this year, an additional 3,253 units will be acquired. Further, prior to June 30, 1961, still another 3,202 units will be acquired for a grand total of 69,723 units.

This figure together with 4,319 units which are now in default or acquired by the Federal Housing Administration represents over 88 percent of the original Wherry total of 83,742 units.

Now, the proper way to take care of this matter of Wherry housing acquisition is to permit the subcommittee to get all of the facts and then follow the matter up to see that all of the projects for which there are a military use be acquired, and be acquired promptly.

Mr. ARENDS. Mr. Chairman, will the gentleman yield?

Mr. VINSON. I yield to the gentleman from Illinois.

Mr. ARENDS. Just so that my friend the gentleman from Georgia [Mr. FORRESTER] might know about orderly procedure in the Committee on Armed Services, of which I am a member, and because we work so diligently, so long, and so hard, you should come over some day, and I assure you we do have orderly procedure.

Mr. FORRESTER. Mr. Chairman, will the gentleman yield?

Mr. VINSON. I yield.

Mr. FORRESTER. I just want to say to the gentleman I do not think that a visit is necessary, having seen this demonstration on the floor.

Mr. McDONOUGH. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I do not know that I am going to make any impression on anybody by the statement I am going to make. Evidently your minds are all made up. But, I want to say this, that this is the most irresponsible piece of legislation that the Committee on Banking and Currency ever reported here for action. It is totally unnecessary, and the admitted author of the bill, the chairman of the Subcommittee on Housing, has admitted that there is nothing in the law that gives any protection to the Government as far as previously discounted mortgages are concerned or any protection to the home buyer that he is going to reap the profits that the homebuilder will obtain when he sells his mortgage to FNMA for par. Now, this is the bill you are going to vote upon, gentlemen. We had a lot of talk about this thing, and we have gone off into all sorts of avenues as to the economic status of the country. We have talked about automobile production, tool production, money in the bank, and what not.

This bill will build only 70,000 houses. The total number of mortgages sold to FNMA at $13,500 or $14,500, if the total number were used up, would mean 70,000 houses out of an estimated 1,200,000, for this year. That is not going to make very much impression on the 64 million people who are employed in this country who the author of the bill attempts to imply are going to benefit by this bill. As a matter of fact, I just wanted to impress upon you that you are voting for a very irresponsible piece of legislation that I, as a member of the Committee on Banking and Currency, am embarrassed to have to bring in here for action.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama.

The amendment was agreed to.

PROGRAM FOR THE WEEK OF MAY 3

Mr. HALLECK. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I have taken this time to inquire of the majority leader concerning the program for the balance of the week and for next week, if he can announce it at this time.

Mr. McCORMACK. After the disposition of this bill there will be no further legislative program for the remainder of the week. Later on, when we are in the House, I shall ask unanimous consent that the House go over until Monday.

On Monday we shall take up the Consent Calendar. There will be two suspensions. First, H.R. 10548, the Helium Act of 1960; and second, H.R. 10596, payments to soldiers' homes veterans.

If there is time on Monday, there are three bills on which rules have been reported:

H.R. 6851, Bent's Old Fort Historic Site, Colo.:

H.R. 8226, Castillo De San Marcos National Monument lands, Florida; and

S. 1358. Headquarters site, Mount Rainier National Park.

On Tuesday there will be the Private Calendar and the Department of Defense appropriation bill.

There are several primaries on Tuesday—Alabama, Indiana, Ohio, Florida, and also the District of Columbia. Later on, when we are in the House, I shall ask the permission of the House that any rollcalls on Monday and Tuesday go over until Wednesday.

Wednesday is Calendar Wednesday. I understand it is going to be exercised and if so, S. 722, the depressed areas bill, will

be called up on that day, under the rules relating to Calendar Wednesday.

Mr. HALLECK. Will the gentleman permit me to make an observation at that point? If Calendar Wednesday is not dispensed with, that will mean that we would have to lay aside the Defense Department appropriation bill?

Mr. McCORMACK. That is correct.

Mr. HALLECK. Can the gentleman tell us whether or not he expects to ask permission to dispense with Calendar Wednesday next week?

Mr. McCORMACK. No; I do not intend to make that request because I have been informed that the desire exists to exercise next Calendar Wednesday.

Mr. HALLECK. I would like to make this observation for myself. The Defense Department appropriation bill is one of the most important bills we will have at this session of the Congress. To my mind, after it is taken up, it ought to be concluded. Of course, if objection is made, I can understand what the situation may be, except that possibly there might be a vote or two as to just what we ought to do about that feature of it.

Mr. McCORMACK. I might say that if any Member on either side told me he did not want Calendar Wednesday dispensed with, I would not put him in the position of having to object to a unanimous-consent request that it be dispensed with; in other words, I feel that then I should not make the request.

Mr. HALLECK. I appreciate that.

Mr. McCORMACK. I have been informed that there is a desire for Calendar Wednesday to be exercised next week and, if so, I desire to give the House as much notice in advance as I can, which I am doing on this occasion, by notifying the House that the bill to be taken up if reached will be the depressed areas bill.

Mr. PRICE. Mr. Chairman, will the gentleman yield?

Mr. HALLECK. I yield to the gentleman from Illinois.

Mr. PRICE. I would like to make the observation that there are many of us who consider the depressed areas bill to be of great importance, and even if we lose a day in the consideration of the Defense Department appropriation bill, that would not be very meaningful at the present time because that is an appropriation bill for the fiscal year 1961, which does not become effective before July 1 of this year.

Mr. McCORMACK. In announcing the program I did not want to get into a colloquy with my friend from Indiana on that question, but the gentleman from Illinois has very well given the other side.

If any action parliamentarily is taken on Wednesday that stops the depressed areas bill from coming up, of course other than a motion to adjourn, then we continue with the Defense Department appropriation bill. If all of Wednesday is taken up in connection with the bill that might be called up on that day, to-wit, the depressed areas bill, if it is reached in the call of the committees, then on Thursday we continue with the Defense Department appropriation bill.

Following the disposition of that bill, if there is time available next week, we will take up H.R. 11713, the authorization bill in relation to the Atomic Energy Commission.

I make the usual reservations that conference reports may be called up at any time and that any change or additions to the program will be announced later on as quickly as possible.

Mr. HALLECK. Is there a conference report slated for action this afternoon?

Mr. McCORMACK. Yes; there is a conference report coming up on the Commerce Department appropriation bill.

Mr. HALLECK. I had understood that was coming up.

Mr. McCORMACK. Yes. I am glad the gentleman asked that question.

The CHAIRMAN. If there are no further amendments, under the rule the Committee rises.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. FORAND, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 10213) to amend the National Housing Act to halt the serious slump in residential construction, to increase both on-site and off-site job opportunities, to help achieve an expanding full employment economy, and to broaden homeownership opportunities for the American people, pursuant to House Resolution 498, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. McDONOUGH. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. McDONOUGH. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. McDONOUGH moves to recommit the bill H.R. 10213 to the Committee on Banking and Currency with instructions to report the same back to the House forthwith with the following amendments:

Page 7, line 24, strike out "and".

Page 8, insert "; and" after the quotation marks in line 8 and insert after line 8 the following:

"(4) by adding at the end thereof (after the sentence added by paragraph (3) of this section) the following new sentence: 'Notwithstanding any other provision of this section, the Association shall not purchase or make a commitment to purchase under this subsection any mortgage covering housing with respect to which there is (or is permitted to be) any discrimination against purchase, rental, or occupancy on account of race, religion, color, ancestry, or national origin.'"

The SPEAKER. The question is on the motion to recommit.

Mr. McDONOUGH. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 139, nays 235, not voting 56, as follows:

[Roll No. 59]

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Keogh for, with Mr. Lafore against.
Mr. Walter for, with Mr. Devine against.
Mr. Hébert for, with Mr. McIntire against.
Mr. Buckley for, with Mr. Pelly against.
Mr. Rabaut for, with Mr. Taylor against.
Mr. Pilcher for, with Mr. Jackson against.
Mr. Wampler for, with Mr. Dooley against.
Mr. Rooney for, with Mr. Scott against.
Mr. Frazier for, with Mr. Alexander against.
Mr. Jones of Alabama for, with Mr. McMillan against.
Mr. Moulder for, with Mr. Coffin against.
Mr. Bonner for, with Mr. Miller of New York against.
Mr. Roberts for, with Mr. Hoffman of Michigan against.
Mrs. Sullivan for, with Mr. Siler against.
Mr. Multer for, with Mr. Kilburn against.
Mr. Thompson of Texas for, with Mr. Gavin against.
Mr. Thompson of Louisiana for, with Mr. Mason against.

Until further notice:

Mr. Montoya with Mr. Martin.
Mr. Morris of New Mexico with Mr. Riehlman.

Mr. MULTER. Mr. Speaker, I have a live pair with the gentleman from New York [Mr. KILBURN]. If present, he would have voted "nay." I voted "yea." I desire to withdraw my vote and answer "present."

Mr. CHAMBERLAIN changed his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. WOLF. Mr. Speaker, I could not let this moment pass without comment. The Republicans tried to tack an amendment on the housing bill on civil rights. After their strong support for this amendment which they have demonstrated, I hope they will now also with equal sincerity sign the discharge petition for home rule for the District of Columbia. We need just 30 more of those sincere Republican signatures to bring the bill to the floor. Today would be an excellent day to sign.

GENERAL LEAVE TO EXTEND

Mr. SPENCE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

AMERICAN SEAMEN PICKETING OF UAR SHIP "CLEOPATRA"

Mr. FARBSTEIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. FARBSTEIN. Mr. Speaker, as a result of the failure of the administration and the State Department to protect the livelihood of American seamen, it has become necessary for them to do something to protect themselves; to call worldwide attention to the fact that because of the policy of boycott by the Arab countries against American ships that touch Israeli ports, these American ships and seamen suffer economic loss and privation. They have made evident that two can play at the same game by picketing the *Cleopatra*, a UAR ship in the port of New York.

The State Department contends that the boycotts and blockades are a matter for the U.N.—this despite the fact that Mr. Hammarskjold has admitted that he can do nothing with Nasser.

The presumption by the State Department that the picketing is regarded abroad as a political demonstration related to the United Arab restrictions against Israel is unfortunate. That complex foreign policy questions are involved is similarly unfortunate. The fact remains that the courts in this country have three times denied injunctions against the pickets, one as late as Tuesday of this week, is evidence that it is considered a legitimate labor dispute. That questions of foreign policy are involved is incidental to the main question stated by Paul Hall, president of the International Seafarer's Union, that many U.S. seamen had lost jobs because of the Arab boycott.

Rather than deplore this picketing or feeling embarrassed, I suggest that strong representation should be made to the Arab countries to refrain from boycotting American ships that touch Israeli ports.

DEPARTMENT OF COMMERCE AND RELATED AGENCIES APPROPRIATION BILL, 1961

Mr. PRESTON. Mr. Speaker, I call up the conference report on the bill (H.R. 10234) making appropriations for the Department of Commerce and related agencies for the fiscal year ending June 30, 1961, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House may be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 1558)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10234) making appropriations for the Department of Commerce and related agencies for the fiscal year ending June 30, 1961, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 21, 25, 30, and 31.

That the House recede from its disagreement to the amendments of the Senate numbered 3, 4, 16, 19, 28, and 32, and agree to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$17,400,000"; and the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$4,069,000"; and the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$2,761,600"; and the Senate agree to the same.

Amendment numbered 8: That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$14,500,000"; and the Senate agree to the same.

Amendment numbered 9: That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$8,045,000"; and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,253,000"; and the Senate agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$5,202,000"; and the Senate agree to the same.

Amendment numbered 14: That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$22,567,500"; and the Senate agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert $29,591,500"; and the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$2,688,691,500"; and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,579,383,264.47"; and the Senate agree to the same.

Amendment numbered 20: That the House recede from its disagreement to the amendment of the Senate numbered 20, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$18,800,000"; and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$46,042,900"; and the Senate agree to the same.

Amendment numbered 24: That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$6,262,500"; and the Senate agree to the same.

Amendment numbered 26: That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$5,250,000"; and the Senate agree to the same.

Amendment numbered 29: That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$16,363,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 12, 13, 23, and 27.

PRINCE H. PRESTON,

Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10234) making appropriations for the Department of Commerce and related agencies for the fiscal year ending June 30, 1961, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments, namely:

TITLE I—DEPARTMENT OF COMMERCE

General administration

Salaries and Expenses

Amendment No. 1: Deletes language proposed by the Senate for official entertainment expenses.

Amendment No. 2: Appropriates $2,660,875 as proposed by the House instead of $2,822,400 as proposed by the Senate.

Office of Field Services

Amendment No. 3: Appropriates $2,584,000 as proposed by the Senate instead of $2,415,025 as proposed by the House.

Bureau of the Census

Amendment No. 4: Appropriates $8,898,500 as proposed by the Senate instead of $8,947,500 as proposed by the House.

Coast and Geodetic Survey

Amendment No. 5: Appropriates $17,400,000 instead of $18,000,000 as proposed by the Senate and $15,900,000 as proposed by the House.

Business and Defense Services Administration

Amendment No. 6: Appropriates $4,069,000 instead of $4,366,000 as proposed by the Senate and $3,772,000 as proposed by the House.

Bureau of Foreign Commerce

Amendment No. 7: Appropriates $2,761,600 instead of $3,139,100 as proposed by the Senate and $2,384,100 as proposed by the House.

Maritime activities

Salaries and Expenses

Amendments Nos. 8, 9, 10, and 11: Appropriate $14,500,000 instead of $14,920,800 as proposed by the Senate and $14,125,335 as proposed by the House, within limitations as follows: Administrative expenses, $8,045,000 instead of $8,086,000 as proposed by the Senate and $8,009,700 as proposed by the House; maintenance of shipyard facilities and operation of warehouses, $1,253,000 instead of $1,320,800 as proposed by the Senate and $1,190,835 as proposed by the House; and Reserve fleet expenses, $5,202,000 instead of $5,514,000 as proposed by the Senate and $4,924,800 as proposed by the House.

Maritime training

Amendment No. 12: Reported in disagreement.

General provisions—Maritime activities

Amendment No. 13: Reported in disagreement.

Patent Office

Amendment No. 14: Appropriates $22,567,500 instead of $22,600,000 as proposed by the Senate and $22,535,000 as proposed by the House.

Bureau of Public Roads

Limitation on General Administrative Expenses

Amendment No. 15: Provides limitation of $29,591,500 instead of $29,900,000 as proposed by the Senate and $29,283,000 as proposed by the House.

Repayable Advances to the Highway Trust Fund

Amendment No. 16: Appropriates $160,000,000 as proposed by the Senate instead of $200,000,000 as proposed by the House.

Federal-aid Highways (Trust Fund)

Amendments Nos. 17, 18, and 19: Appropriate $2,688,691,500 instead of $2,689,000,000 as proposed by the Senate and $2,687,383,000 as proposed by the House, of which the part of the amount authorized to be appropriated for the fiscal year 1960 shall be $1,579,383,264.47 instead of $1,579,691,764.47 as proposed by the Senate and $1,579,074,764.47 as proposed by the House; and provides $10,000,000 for reimbursement of sums expended for emergency repair of highways and bridges as proposed by the Senate instead of $9,000,000 as proposed by the House.

National Bureau of Standards

Research and Technical Services

Amendment No. 20: Appropriates $18,800,000 instead of $19,600,000 as proposed by the Senate and $18,000,000 as proposed by the House.

Research and Technical Services (Special Foreign Currency Program)

Amendment No. 21: Deletes language proposed by the Senate to appropriate $1,030,000 for the purchase of foreign currencies. The committee of conference has deferred appropriations for this purpose so that the objectives of the program may be given further study.

Weather Bureau

Salaries and Expenses

Amendment No. 22: Appropriates $46,042,900 instead of $48,100,000 as proposed by the Senate and $43,985,900 as proposed by the House.

Research and Development

Amendment No. 23: Reported in disagreement.

Amendment No. 24: Appropriates $6,262,500 instead of $7,500,000 as proposed by the Senate and $5,025,000 as proposed by the House. The committee of conference is agreed that flying safety should be given priority over beginning new research programs; and has allowed the $300,000 proposed by the Senate for additional flight time and instrumentation of aircraft.

Amendment No. 25: Deletes language proposed by the Senate making funds available until expended.

Establishment of Meteorological Facilities

Amendment No. 26: Appropriates $5,250,000 instead of $7,000,000 as proposed by the Senate and $3,500,000 as proposed by the House.

TITLE III—INDEPENDENT AGENCIES

Saint Lawrence Seaway Development Corporation

Amendment No. 27: Reported in disagreement.

Small Business Administration

Salaries and Expenses

Amendments Nos. 28 and 29: Appropriate $5,597,000 as proposed by the Senate instead of $5,201,000 as proposed by the House; and provide for the transfer of $16,363,000 instead of $17,563,000 as proposed by the Senate and $15,763,000 as proposed by the House from the revolving fund.

Revolving Fund

Amendment No. 30: Appropriates $50,000,000 as proposed by the House instead of $47,920,000 as proposed by the Senate for additional capital.

Grants for Research and Management Counseling

Amendment No. 31: Deletes appropriation of $2,080,000 proposed by the Senate.

Tariff Commission

Amendment No. 32: Appropriates $2,455,000 as proposed by the Senate instead of $2,295,000 as proposed by the House.

PRINCE H. PRESTON,
ALBERT THOMAS,
CLARENCE CANNON,
FRANK T. BOW,
JOHN TABER,
Managers on the Part of the House.

Mr. PRESTON. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

The SPEAKER. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 12: Page 10, line 8, insert ": *Provided*, That not to exceed $100,000 of the unobligated balance of the appropriation 'Ship construction (liquidation of contract authorization) maritime activities,' may be transferred to this appropriation for the purpose of providing furnishings and equipment for the Memorial Chapel at King's Point, New York (62 Stat. 172)."

Mr. PRESTON. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

The motion was agreed to.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. PRESTON. I yield.

Mr. GROSS. How does the bill compare in its present form with the bill the House sent to the other body?

Mr. PRESTON. I will be glad to make a statement on that point. The budget estimates on this bill were $799,615,000. The House reduced that to $760,522,235, a cut of $39,092,765.

The Senate bill further reduced the amounts from $760,522,235 to $738,388,300 through the device of cutting the repayable advance to the highway trust fund; and that was made possible due to the fact that two points of order were made on the floor against forest highways and public lands highways because the language the Budget sent us undertook to put those two categories under the trust fund. Points of order were made that knocked them out; consequently the Senate was then in a position to reduce the repayable advance to the trust fund appropriation by $40 million. So that is the method they used to reduce our total. However, I may say we further reduced the bill in conference from $738,388,300 in the Senate bill to $729,624,375, a reduction of $8,763,925 on the part of the House conferees.

Mr. GROSS. That is on the basis of the budget estimate?

Mr. PRESTON. No. The budget estimate was $799,615,000. We are down to $729,624,375, or a reduction in the bill of $69,990,625 from the way it originally came to the House.

Mr. GROSS. How does that compare with spending for the same purpose for the current fiscal year?

Mr. PRESTON. The appropriation last year was $1,081,097,900. It is now down to $729,624,375, a reduction of $351,473,525.

Mr. GROSS. I thank the gentleman.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 13. On page 12, line 11, insert "No common carrier by water subject to the Shipping Act of 1916, as amended; the Merchant Marine Act of 1936, as amended; or any other Act; shall directly or indirectly issue any ticket or pass for the free or reduced-rate transportation to any official or employee of the United States Government (military or civilian) or to any member of their immediate families, traveling as a passenger on any ship sailing under the American flag in foreign commerce or in commerce between the United States and its Territories and possessions; except that this restriction shall not apply to persons injured in accidents at sea and physicians and nurses attending such persons, and persons rescued at sea, and except that this restriction shall not apply to persons referred to in section 405(b) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1145(B)), relating to steamship companies carrying mails of the United States: *Provided,* That nothing in this section shall prevent the United States Government from entering into contractual arrangements with said companies for reduced transportation rates involving the traveling expenses of those Government employees (military or civilian) when such transportation costs are paid for by the United States Government. Any person or corporation who knowingly violates this section shall upon conviction thereof be fined not less than $500 nor more than $10,000 at the discretion of the Courts for each such violation."

Mr. PRESTON. Mr. Speaker, I move that the House insist on its disagreement to the amendment of the Senate numbered 13.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 23: On page 18, line 13, insert "Including the transfer from the Department of Defense, without payment therefor, of one aircraft."

Mr. PRESTON. Mr. Speaker, I move that the House recede from its disagreement to the amendment of the Senate numbered 23, and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 27: Page 22, line 17, insert ": *Provided,* That the next audit of such Corporation by the Comptroller General shall be for the period July 1, 1959, through December 31, 1960, and thereafter such audits shall be for each calendar year:".

Mr. PRESTON. Mr. Speaker, I move that the House recede from its disagreement to the amendment of the Senate numbered 27, and concur therein.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the several motions was laid on the table.

HARRY ALPERT ON THE GOVERNMENT'S GROWING RECOGNITION OF SOCIAL SCIENCE

Mr. PORTER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. PORTER. Mr. Speaker, most of our effort, both private and public, goes to advance our knowledge in the nonhuman sciences and not where we most need it, namely, the various social sciences.

My friend, Dr. Harry Alpert, dean of graduate school and professor of sociology at the University of Oregon, writes encouragingly about "the Government's growing recognition of social science" in the January 1960 issue of the Annals of the American Academy of Political and Social Science.

We're making some progress, but congressional confusion—

says Dr. Alpert—

regarding social science has by no means been completely eliminated. Negative attitudes still persist and need to be reckoned with.

Under a previous consent I am including the text of his article:

THE GOVERNMENT'S GROWING RECOGNITION OF SOCIAL SCIENCE

(By Harry Alpert)

Abstract: Important new developments have strengthened the standing of the social sciences in the Federal Government. Historical analysis emphasizes the recency of the Government's recognition of the national contributions of social science research. Significant progress has been made despite critical fluctuations. Five factors contributing to the more favored governmental position of social science research are (1) changing congressional attitudes; (2) acceptance of the social sciences at the White House level; (3) inclusion of the social sciences as part of broad definitions of scientific disciplines; (4) the general post-sputnik interest in American education; and (5) the concern with redressing imbalances in American higher education. Research support for the social sciences is growing but a critical shortage remains in funds for fellowships and assistantships. The social sciences approach the next decade in a climate of acceptance and encouragement.

"They never had it so good." This vernacular phrase may startle grammarians, but it describes accurately the present position of the social sciences with respect to support and interest by the Federal Government. As the result of important new developments which have served to consolidate the standing of the social sciences in the Federal Government, there is every likelihood that the 10 years from 1950 to 1960 will be viewed as the "March" decade of the social sciences. March, according to folk weather lore, comes in like a lion and goes out like a lamb. Similarly, the 1950's may be said to have come in with a roaring antipathy to the social sciences and to be departing with attitudes of positive interest and quiet acceptance.

That it has taken so long for the Federal Government to develop a modus vivendi with the social sciences is quite ironical, for its involvement in social research was written into the U.S. Constitution. By providing for a decennial census and making this count of the population the basis for representation in Congress, our Founding Fathers made a social science activity the ultimate basis of political power.[1]

In fact, the gathering, analysis, and dissemination of social and economic statistics has continued to be one of the three major ways in which the Federal Government relates itself to the social sciences. The other two are: exploitation and utilization of the findings and results of social research; and direct support of social sciences through the intramural conduct of social science research in the Federal Government's own research laboratories and units or through contracts and grants for extramural social science studies at colleges and universities, other nonprofit organizations, and business and commercial establishments.

PRE-WORLD WAR II STATUS

Up to World War II, the role of the Federal Government in the social sciences consisted largely of the first two of these functions, namely, producing mass statistical series and exploiting social science findings produced outside of the Government. During the 19th century, the social sciences played a modest but effective role in the development of Government powers and programs. Don K. Price has called attention to the contribution of economic and statistical series in the growing development of the regulation of business, as well as to the impact of John R. Commons' institutional economics on labor legislation and of Charles Francis Adams' studies on the regulation of railroads.[2]

Even as late as 1940, the Government's direct activities in the social sciences were still predominantly confined to the collection and analysis of statistical information.[3] However, the roots of later developments in the Government's social science programs were discernible in the 1920's. The appointment by President Hoover of a research committee on recent social trends provided significant White House endorsement of a major social science enterprise. Further impetus for governmental support of the social sciences came in the thirties from the practical programs of the New Deal. An outstanding example was the Department of Agriculture's Division of Program Surveys which assumed the leadership in introducing the sample interview survey as a basic social science tool and as an instrument of governmental policy.

IMPACT OF WORLD WAR II

But the defense mobilization period and World War II itself were undoubtedly the major catalytic events leading to the expansion of the Federal Government's programs of social science research. The events of the war on both the military and civilian fronts and the problems of postwar adjustment as they affected the nation and the individual provided the social sciences with dramatic opportunities to demonstrate their practical value and essential role in modern society. A brief review of illustrative uses of social science during World War II lists eight examples of problem areas in which important social science research accomplishments were achieved: soldier orientation and morale; analysis of command problems, particularly among Negro troops; more efficient use of psychiatry; venereal disease control; analysis of the American soldier's problems of adjustment, combat performance, and response to mass communications; evaluation of Japanese morale; estimation of war production requirements; and regulation of prices and rationing.[4] To this list may be added the

media analysis activities of the Office of War Information and the Foreign Broadcast Intelligence Service; the propaganda studies of the Library of Congress, Department of Justice, and various intelligence agencies; the surveys of war bond purchases and other evaluations of the effectiveness of drives; the testing of the public comprehension of governmental information materials; and research on national character and other problems related to a better understanding of the behavioral characteristics of foreign peoples.

The immediate postwar period of demobilization witnessed the dismantling and disappearance of many of these wartime programs. Dissatisfaction with the limited accomplishments of some of these social science activities was expressed, largely as the result of the disillusionment which set in when excessive promises of achievement were unfulfilled. Social scientists became their own worst enemies by promising too much, too fast and accepting funds in excess of what could be effectively expended. Moreover, the social sciences have suffered from their minority group status among the scientific disciplines. Like minority groups on the labor market, they are subject to the rule of "last hired, first fired." Thus, many social science programs were speedily demobilized because of their relatively low priority and because of a failure to appreciate their long-range implications and future contributions.

Nevertheless, significant efforts were made to continue programs which had demonstrated their effectiveness during the war. The Office of Naval Research, created shortly after World War II, supported research on manpower problems, personnel and training, group morale, organizational structure, and related social psychological areas. The Army continued, in abbreviated form, its studies of opinions and attitudes of American soldiers. The new Department of the Air Force, proud of the accomplishments of the aviation psychology program, organized units to undertake and support research in problems of selection and training, manpower, leadership, human relations and morale, and psychological warfare. When the Research and Development Board was established in the Department of Defense it included a Committee on Human Resources.

However, the skepticism and disenchantment which many of these programs engendered did not provide a favorable environment for their persistent growth and development. There set in, consequently, a period of recurring ups and downs, of "acute, and sometimes critical fluctuations," as Leonard S. Cottrell, Jr., has described it.[5] A "starts and fits" pattern became evident: An activity got started and then was curtailed or discontinued when some Congressman or general threw a fit. The Division of Research of the Housing and Home Finance Agency, the excellent survey research unit of the Veterans' Administration, the Air Force's Human Resources Research Institute at Maxwell Field and its Personnel and Training Center at Lackland Air Force Base were but a few of the research units which experienced difficulty.

Despite the on again, off again character of some of these programs, the long-term trend was toward increasing appreciation of the social sciences as valuable national assets. As the postwar pattern of extramural support developed, the social sciences, too, received encouragement, although not at the same rate and magnitude as the physical and life sciences.

THE "MARCH" DECADE

The "March" decade, 1950–60, will perhaps be viewed historically as the turning point in Federal Government recognition of the social sciences. The full measure of the change from the "lion" to the "lamb" phase of this decade may be observed in comparing the National Science Foundation Act of 1950 with the National Defense Education Act of 1958. In the former legislation, the social sciences are included only on a permissive basis and are referred to only as other sciences. In the 1958 act, the section dealing with graduate fellowships mentions no limitations whatsoever with respect to disciplines. Moreover, a separate title provides for research and experimentation in more effective utilization of television, radio, motion pictures, and related media for educational purposes. This act also recognizes the importance of improving statistical series in the field of education.

Note must be taken, also, of other evidences of changing attitudes toward the social sciences, such as the establishment, in December 1958, of an Office of Social Sciences within the National Science Foundation; the appointment, in the spring of 1959, of a sociologist, President Logan Wilson of the University of Texas,[6] as a member of the National Science Board; and the expansion of the social science research activities of the Department of Health, Education, and Welfare.

In the vernacular of the boxing ring, it may be said that the social sciences were, for several years definitely "rocky and punch drunk," but were still on their feet when the fight was over. They have survived Cox committee and Reese committee investigations. They have endured pariah status and innumerable reorganizations. They have weathered appropriation storms which threatened to cut off funds for studies of child-rearing practices, mother-love among lambs, population dynamics, message diffusion, and other projects which became the pet peeves of individual legislators.

MAJOR DYNAMIC FACTORS

In attempting to assess the major factors that account for the more favorable position in which the social sciences find themselves at the end of this decade, I am able to identify five important considerations: (1) Changing congressional attitudes; (2) acceptance of the social sciences at the White House level; (3) inclusion of the social sciences as part of broad umbrella definitions of scientific disciplines; (4) the general post-sputnik interest in American education; and (5) the concern with redressing the imbalances in education which stemmed from the earlier, almost exclusive, emphasis on natural science and mathematics. Brief comments on each of these five factors follow:

CHANGING CONGRESSIONAL ATTITUDES

In his report on the crucial Senate debate in 1946 which preceded the vote to exclude from the then pending bill to establish a National Science Foundation the specific provision which created a Division of Social Sciences, George A. Lundberg concluded that the Senate thought of the social sciences as at best "a propagandist, reformist, evangelical sort of cult."[7] The unfortunate phonetic confusion of social science with socialism reinforced such viewpoints. Just a few years later, however, more positive attitudes were being expressed. In 1953, the Cox committee, in its final report, noted the special importance of the social sciences in the contemporary world. It stated:

"It is entirely possible that in a time when man's mastery over the physical sciences threatens him with possible extermination the eventual reward from the pursuit of the social sciences may prove even more important than the accomplishments in the physical sciences.[8]

Other important turning points in congressional expressions toward the social sciences were the vigorous statements by Senator ESTES KEFAUVER'S Subcommittee on Juvenile Delinquency in 1955, 1956, and 1957; the 1955 recommendations of Representative RICHARD BOLLING'S Subcommittee on Economic Statistics of the Joint Committee on the Economic Report; Senator HUBERT HUMPHREY'S report to the Senate in 1957 of his experiences in the Middle East; and speeches by Senator WAYNE MORSE, Representative CHARLES O. PORTER, and others.[9] This year neither House of Congress raised any objections to the National Science Foundation's request for $2 million for support of basic research in the social sciences in fiscal year 1960, even though this represented a considerable increase over the $850,000 appropriated for this purpose for fiscal year 1959. (The actual budgetary allowance for social science research in the National Science Foundation for fiscal year 1960 is $1,600,000.)

This is an encouraging picture, indeed. But congressional confusion regarding social science has by no means been completely eliminated. Negative attitudes still persist and need to be reckoned with.[10]

WHITE HOUSE INTEREST

The White House, too, has shown increasing interest in the support of the social sciences. In his state of the Union message delivered on January 9, 1959, President Eisenhower expressed his desire to undertake a systematic study of American values, goals, and social trends, comparable to the earlier Hoover Committee study.

The objective, President Eisenhower said, would be "the establishment of national goals that would not only spur us on to our finest efforts but would meet the stern test of practicality." He hoped that this new study would be concerned, among other things, "with the acceleration of our economy's growth and the living standards of our people, their health and education, their better assurance of life and liberty and their greater opportunities." He noted that the report of Hoover's Recent Social Trends Committee "has stood the test of time and has had a beneficial influence on national development." Here, indeed, is a significant compliment to social science.

And in its report on "Strengthening American Science," issued December 27, 1958, the President's Science Advisory Committee included social psychology among the scientific disciplines for which a strong case could be made for intensifying the Nation's scientific effort. The Committee stated, "And advances in social psychology might help to reduce tension and conflict at every level of human intercourse—in our communities, in business and industry, in

(Washington: Government Printing Office, 1959), p. 527. For a discussion of persisting negative attitudes, see Harry Alpert, op. cit.

Government, and even among nations."[11] Furthermore, as previously noted, President Eisenhower has appointed a social scientist to the National Science Board. This policy-determining body for government science on January 23, 1959, adopted the following statement:

The National Science Board recognized the importance, as well as the complexity and difficulty, of research in the social sciences. It is clear that the intellectual, economic, and social strength of our Nation requires a vigorous approach to social problems, with scientific techniques of study making their maximum contribution.[12]

PROTECTIVE UMBRELLAS

The social sciences have prospered best in the Federal Government where they have been included under broad umbrella classifications of the scientific discipline such as agricultural sciences, military sciences, medical sciences, and health sciences. Under such umbrellas and in close company with scientific areas which enjoy the prestige and status of biological or physical sciences, the social sciences have enjoyed a protection and nourishment which they normally do not have when they are identified as such and stand exposed, naked and alone.

Agricultural research has been heavily supported by the Federal Government from its very inception. Quite early the concept of agricultural sciences was broadened to include not only biological research but agricultural economics and rural sociology as well. In fact, for many years the Department of Agriculture's Bureau of Agricultural Economics was internationally famous for its leadership in significant areas of social and economic research. Although from time to time specific social science projects of the Department of Agriculture have suffered congressional attack, there has been little question of the legitimacy of the inclusion of social research in the scientific program of the Department. In fact, one appropriation committee, with remarkable indifference to the distinction between biological and social science research, once included, in a list of fields for which research funds were not to be expended, the orchids of Guatemala, the flora of Dominica, child-rearing practices, research methodology, and population dynamics.

The medical sciences and health sciences rubrics have also provided generous hospitality to the social sciences. Social science research projects are given careful and sympathetic consideration by at least five study sections of the National Institutes of Health: Behavioral sciences, hospital facilities research, mental health, nursing research, and public health research. Social scientists serve as members of these study sections as well as on several other committees of the National Institutes of Health. The National Institute of Mental Health's Laboratory of Socio-Environmental Studies is outstanding in the quality of its research program.

Research undertaken by the Military Establishment in relation to the defense needs of the Nation develops strong immunities to congressional or other attacks if military authorities certify its importance to the mission of the Department of Defense. Despite the ups and downs previously referred to, the Army, Navy, and Air Force have arrived at a realization of the importance of basic research in the social sciences. The Office of Naval Research includes a Psychological Science Division. The Air Force has established a behavioral sciences program in its Office of Scientific Research. And here is the testimony of an Army general presented recently before an appropriations committee:

"We can never afford to neglect basic research and the Army wants to do more of it whenever we find applicable projects to further this increase of scientific knowledge. Such research is not confined to the physical sciences. Investigation of the social sciences to help us to utilize more effectively our manpower and insure man-machine compatibility with complex engines of war being developed is vital. Should we neglect these important considerations we only aggravate the trend in which the physical sciences are outstripping the social sciences and may, in time, reach a point where the machine may destroy its maker."[13]

These are the words of Lt. Gen. Arthur G. Trudeau, Chief of Research and Development, Department of the Army.

Another important umbrella for the social sciences is Operations Research. The various operations research units supported by the Federal Government have invariably included a social science component.

IMPACT OF SPUTNIKS

The social sciences have not been indifferent to the whir of the Russian sputniks and have directly felt the impact of these successes in space technology. It was recognized that Soviet Russia's accomplishment was not only the result of advances in science and engineering but also the consequence of a social system that was capable of making and carrying out significant decisions. Interest developed in studies of the social, economic, and political implications of the space age. It became imperative that we keep ahead of the Russians in the social science fields. For this reason, Vice President RICHARD M. NIXON encouraged the formation of a committee on national support for behavioral science which reported on social science needs to the President's Scientific Advisory Committee. Substantially increased appropriations were made available to the National Science Foundation, and in the National Defense Education Act of 1958, Congress officially declared as national policy the doctrine that the defense of this Nation depends upon the mastery of modern techniques developed from complex scientific principles, and, as well, upon "the discovery and development of new principles, new techniques, and new knowledge."[14]

REDRESSING IMBALANCES

For a time, it looked as if only the natural sciences and mathematics would be the beneficiaries of the increased responsibilities of the Federal Government toward research and education. Programs were quickly organized to improve the quality of science teaching, to train more scientists and engineers, and to intensify the pace of research in the physical, mathematical, and biological sciences. It became evident, however, that the neglect of other areas of scholarship and learning would spell national disaster. The Government's difficulties in international relations led to intensified interest in language study. Soon voices were heard calling attention to the need to redress the imbalances in American education which a predominant concern with the natural sciences and engineering was creating.[15] Cognizance of this requirement is found in the newly released report of the President's Science Advisory Committee on "Education for the Age of Science." This report stresses the fact that, "Today in America we need a very wide variety of human talents."[16] It goes on to urge that "a proper balance be maintained in our educational offerings."[17] To achieve such a balance we must encourage intellectual leadership in the humanities and social sciences as well as in the natural sciences and mathematics.

HEALTHY PROGNOSIS

The social sciences thus face the 1960's in an atmosphere of encouragement and with the active support of influential well-wishers. Research funds are becoming more plentiful. The Federal Government alone will soon be spending in the neighborhood of $60 million a year in support of the social sciences. This estimate does not include the $100 million or so that the decennial census of 1960 will cost.

MORE FELLOWSHIPS NEEDED

A major problem, however, remains. The most urgent need of the social sciences is expansion of the pool of available trained, specialized manpower. Recent studies have indicated that the length of time required to obtain the Ph. D. degree is stongly influenced by the availability of financial support to graduate students in the form of assistantships and fellowships. It is here that the social sciences, and humanities, too, are most seriously disadvantaged vis-a-vis the natural sciences. The major bottleneck in the advancement of the social sciences is not research funds, but fellowship and scholarship opportunities for basic and advanced training. If the social sciences are to fulfill the general public's expectations of them, they must double, at least, the number of trained practitioners. To make the training process more productive and more effective, however, additional fellowships and other types of financial support for training are an imperious and critical necessity. Title IV of the National Defense Education Act has been extremely helpful in this regard. Almost a fourth (23 percent) of the first 1,000 graduate fellowships were awarded in the social sciences. The various training programs of the National Institutes of Health also provide valuable opportunities for social science education. But more needs to be done. The National Science Foundation, for example, has the basic legislation to include the social sciences within its education in the science program. It also has reasonably adequate funds for training and education. It has broadened its conception of the social sciences in its research support program. Only administrative nearsightedness prevents it from giving the social sciences, broadly conceived, their deserved place within the various program activities of its Division of Scientific Personnel and Education.

COMPLACENCY TO BE AVOIDED

We can be proud of the achievements of the social sciences in government, but we cannot afford to be complacent. Certain past mistakes must be avoided: premature promises, excessive expectations, hasty growth, disastrous indifference to the political process, unwarranted impatience with the administrative processes of justification and review, and lack of concern with the public image of the social sciences. By careful planning and effective operations a solid basis can be established for future growth.

Advance in the social sciences will depend most immediately on what in fact social scientists do: how well they teach at the undergraduate level, how well they communicate with the general public, how effec-

tively they respond to calls from industry and government for help in resolving practical problems, and how much they devote to fundamental research. It depends also on their willingness to cultivate patience and humility.[18] Charles Dollard has well defined the problem: "The long-term contract of the social scientist with society is not to perform miracles but to bring to the study of man and his problems the same objectivity and the same passion for truth which have in the past given us some understanding and control of the physical world." [19]

POSTAL FIELD SERVICE EMPLOYEES

Mr. GRIFFIN. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. BARRY] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. BARRY. Mr. Speaker, this legislation is designed to correct an inequity resulting from the policy of paying postal service employees uniform national rates of basic salary. Clerks and carriers of metropolitan and urban post offices are recruited and paid at the same basic salary rates as are paid to clerks and carriers of small community post offices, irrespective of the fact that the city area may have a labor shortage, a higher cost of living, or excessively higher rates of pay in comparison to the postal service salary rates.

It is the purpose of this legislation to provide a proper differential between the salaries of employees in the larger city post offices having a critical labor shortage and the salaries of employees in post offices where there is no labor shortage. This proposal will apply to approximately 200,000 employees in at least 50 of our larger metropolitan and urban areas.

The inequitable operation of the present pay system and the unrealistic entrance rate for employees in labor shortage areas cause a continual recruitment problem in the cities which I represent, such as Yonkers, N.Y. Turnover rates are increasing with incident after incident of trained and highly capable employees leaving the local post offices to accept higher paying positions in private industry. Postal service employees in these areas are finding it more and more difficult, with their incomes lagging so far behind the increased cost of living, to make ends meet and to purchase the commodities they must have to maintain themselves and their families in a reasonable standard of living. This situation is bound to have a damaging effect on the employees' morale and consequently, on the effectiveness of their performance as personnel of the post office.

The cost of recruiting and training new employees and bringing them up through the necessary period of service, to the standard of production of those they replace is a tremendous item of expense. The cost of recruiting and training is aside from the undoubted delays and impediments to progress in carrying out the essential handling of the mails which result from high employee turnover. Improved morale and effectiveness of employee performance will result from adequate pay scales and be of major benefit to the post office.

I am firm in my belief that the increased efficiency by the employees who will be attracted to the postal service by more realistic entrance rates, and the reduction in the cost of recruiting and training which is bound to accompany a reduction in the rates of turnover because of an adjustment in existing rates in these labor shortage areas, will absorb a significant portion of the estimated annual cost of $125 million.

The Civil Service Commission has been empowered to authorize employment at higher than minimum rates in shortage categories and by area and location in order to aid recruitment, but the Postmaster General does not have any flexibility to adjust to local conditions or to changing conditions. I believe the benefits under this bill will go a long way toward eliminating these problems by establishing a realistic entrance rate for postal service employees at post offices in the large cities and by granting the Postmaster General the flexibility to meet changing conditions and labor shortages.

There are two main features of this bill. First, the bill will provide a needed increase, ranging from 10 to 14 percent, for postal employees at post offices located in cities with a population of over 250,000. It will establish realistic entrance rates ranging between $80.52 and $88.40 per week for clerks and carriers in such post offices, which certainly are the minimum rates we should be paying our clerks and carriers in these high cost-of-living cities. The new rates would terminate automatically if the area ceased to meet requirements set forth in the bill.

Second, the bill would grant the Postmaster General the flexibility to authorize adjustments in the rates of employees in other areas whenever he finds such adjustments to be warranted by reason of the cost of living or conditions of employment.

IMPROVED SOCIAL SECURITY LAWS

Mr. PHILBIN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. PHILBIN. Mr. Speaker, few people will deny that one of the primary obligations of the Congress and the Nation is to provide adequate benefits for our aged and disabled under our Social Security system.

At present, while the system has brought marked improvements in this field, it does not include many worthy older people who are urgently in need of assistance.

To my mind, it must be the province of the Congress to consider a much broader program that will fully, adequately, and, without discrimination, provide suitable coverage for our older fellow citizens and their families.

Rising prices, inflation, and improvements in standards of living are all serving to minimize the effectiveness of the present program. In most cases, current benefits are not only inadequate, but shockingly inadequate.

With the national product bounding toward an annual figure of $500 billion, certainly this Nation, which has done so much for the security and betterment of people all over the world, should be able to channel a more substantial portion of our huge annual income to urgent national needs in the field of social security, health, and the general well-being of the American people, the old and the young.

I do not mean to suggest that we should adopt a paternalistic or socialistic pattern in coping with these great problems. I think that we should move with all possible speed to perfect and amplify the system and instrumentalities which we have provided for social security, health, and general welfare.

There is nothing in these proposals for social security betterment which, in my opinion, this Government cannot and should not undertake without interfering in any way with freedom of the individual and without injuring our free enterprise institutions.

Social security, health, and welfare improvements are not only a great moral and humane end, but if handled intelligently and wisely, will actually provide greater efficiency and economy in the administration of social assistance programs at every level of Government—local, State, and Federal.

In this great Nation, we have already established the principle, both on a moral and legal basis that we must and will provide for the handicapped, the helpless, the afflicted and distressed peoples of the land. On the whole, the benefits we have established are available to provide for the ordinary needs of people who are unable to provide for themselves.

But there is a strong obligation further to broaden the basis, expand the coverage, and increase the scope and depth of this program to make it really effective at a time when prices are steadily advancing and many are hard pressed to cope with the high costs of living.

An adequate program will be expensive and costly; there is no doubt of that fact. It will have to be paid for by taxing the American people as a whole. If it is established on a sound basis the impact of this tax increase would not be prohibitive, and it most emphatically would not impose burdens on our economic system and our people which they would be unable to bear, in fact all the available evidence we have on hand at the moment indicates that this country could not only bear these costs, but could much better afford to pay them than to dole out more billions,

[18] See The Saturday Review, vol. 41, No. 5 (Feb. 1, 1958), p. 38 and the Saturday Review, vol. 42, No. 14 (Apr. 4, 1959), p. 64.

[19] "Strategy for Advancing the Social Sciences," in Social Science Research Center of the Graduate School, University of Minnesota, the Social Sciences at Mid-Century (Minneapolis: University of Minnesota Press, 1952), pp. 19–20.

wastefully, extravagantly, and uneconomically, for certain foreign aid programs.

The question of medical and hospital care and treatment is taking on new significance in the light of rapidly increasing costs in this field. A prominent hospital administrator speaking at Boston the other day stated that before long hospital care would cost from $65 to $70 per day. Obviously, most of our people could not afford, nor could they absorb, such costs.

I have known of several instances of friends and constituents taken with chronic illnesses requiring extended hospitalization whose entire life savings put away for a rainy day were eaten up by these costs leaving them and their dependents penniless in their advanced years.

We have the greatest system of medicine in the world. Our doctors are the best and most dedicated in the world. They work under our free system, like practically every one else in our economy, and that is the way it should be.

Nothing should be done, in my opinion, regardless of what this Congress may do to extend or firm up our health and hospital benefits, to socialize American medicine, any more than to socialize other parts of our economy.

There is no excuse or justification whatever for singling out doctors for socialization or regimentation or discriminatory treatment under any laws to be enacted by Congress. It is both desirable and essential that Americans should have the right to select their doctors and their hospitals and the conditions under which they shall be cared for.

It is very questionable that the present social security benefits, and present voluntary plans as currently organized and implemented, can adequately discharge the necessary obligation of providing proper medical and hospital care and treatment for most of the American people in the long run.

This problem is also beyond the means and the capabilities of local and State agencies. For that reason, Congress must consider some action to make sure that the American people shall be able to receive adequate medical and hospital care on a reasonable basis without bankrupting themselves and their families.

This is not only a problem, but a challenge, for the Congress.

It is obvious that the question requires further and most careful study in order that any plan adopted will be adequate, effective, fair and administratively feasible.

There can be no substantial delay in tackling this problem. Immediate attention should be given to all pending proposals, including not only those relating to improvement of social security laws, but also those which pertain to the strengthening of voluntary plans, or developing additional voluntary measures capable of doing the job that has to be done.

The public health is basic to the strength and welfare of the Nation and in this enlightened age with medical, research, and industrial science providing such effective techniques and remedies for many major diseases, chronic diseases and serious medical conditions that afflict mankind, it is of special importance that the Congress should not further delay careful consideration of this vital question.

The plight of our aged people, notwithstanding our great material product, is not improved, but is in many respects retrogressing. For one reason or another, older people, who used to be taken care of in the homes, are now being transferred to rest homes, or into housing projects for the elderly, where they are set apart from the rest of society as a class separate and distinct from their families, their former associates and friends and the normal currents and channels of social life. Some of them are, so to speak—and this is tragic and pathetic—almost in the role of untouchables pushed aside into a corner, lonely and friendless, to spend the rest of their days alone in relative isolation and solitude.

If, as a Nation, we are not able to grapple with problems of this kind and settle them in a fair, humane way and in a way that is compatible with our much vaunted moral, humane, and free enterprise standards then we are certainly not living up to the principles of the Divine Ruler, nor are we being worthy of the great traditions of free government and human brotherhood which are supposed to be a part of our proud American heritage.

The distinguished gentleman from Rhode Island, my esteemed and beloved friend, Congressman JOHN FOGARTY, aided by his splendid committee, and supported by the Congress, has unselfishly given of his time, energy, ability, and great talents to the solution of many of these problems. Few men in the history of the American Congress have worked with more devotion, with more wholehearted spirit, with more zeal, humaneness, and affectiveness to broaden our programs for better health, and better conditions for our people than this great American statesman, JOHN FOGARTY.

During the years he has been in Congress, Congressman FOGARTY has made such noteworthy contributions in the field of health, education, labor, and welfare as to evoke the admiration and gratitude of all his colleagues and the Nation. His leadership in rounding out and advancing these programs has not only been outstanding, but is certainly one of the great achievements recorded in the Congress during its long, illustrious history.

Understandably, this distinguished, humane son of Rhode Island has received the hearty cooperation of his colleagues here in the House and in the other body, and it is a source of gratification to those of us who serve with him in this greatest of all democratic, legislative bodies that he has decided to continue to serve in the House.

If he so chose, he could undoubtedly be elected to the other body. It was his judgment, however—and I believe it was a wise one—that as senior Member of the House he can be much more effective in serving both his constituents and the Nation than as a junior Member of the other body.

I am sure that Congressman FOGARTY will continue his deep interest and intensive efforts in these important, vital fields of health and social welfare, and I, for one, and many others who feel as I do, are most anxious to associate ourselves with the fine work that Congressman FOGARTY is doing, and the high objectives that he has in mind.

It is only by pursuing these great programs for individual and collective social benefits of the people that we can strengthen and improve our great Nation and make it the vitally strong and vigorously healthy force that it should be, not only in assisting, promoting, and perfecting democracy and free institutions here in our own country, but in broadcasting the principles and lessons of brotherhood and humanity, freedom and justice to the world.

I hope and urge that the appropriate committees of the Congress may continue their studies of these great humane questions, and before the end of the session, bring appropriate legislation before the House which will mark distinct advancement and progress in these fields which are of such profound concern for the Nation and the American people.

To summarize my text: It is now clear that the aged, our proud and beloved veterans of industry, agriculture, and our many trades and professions, have problems that go beyond inadequacies of income. Large numbers of our aged, though mentally and physically alert and well, are compelled to live in enforced idleness constituting a great potential of productivity and creative talent that is being shamefully wasted.

Many others suffer and wither away almost like prisoners in their little cells of loneliness shunted into isolated corners of a society they, at great personal sacrifice, loyally, faithfully, and constructively served during their more vigorous days and which now turns its back on them.

These conditions affecting our aged citizens have become most challenging. The Congress cannot do much to compel their families and communities to take a more humane and loving attitude toward the aged, since that is a spiritual, personal duty that lies primarily in the realm of conscience.

But the Congress has its own obligation to vote them adequate security benefits, to help provide for their health needs and to do something about creating for them the opportunity to follow some useful work to supplement their meager incomes.

Comprehensive, earnest surveys to ameliorate these more glaring deficiencies in our treatment of our aged have been too long delayed. We should with all possible dispatch move not only to study these conditions and questions affecting our aged but we must take expeditious action in order to instill some more decent measure of humaneness, brotherhood, and justice in the treatment this great Government and its people accords to our older citizens in the sunset of their years.

GEORGE F. SHEA

Mr. FEIGHAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. FEIGHAN. Mr. Speaker, the Nation's Capital has lost a very distinguished, able, and devoted public servant in the death of George F. Shea. Mr. Shea, as Chairman of the Armory Board, worked untiringly and unceasingly in the interests of the welfare of the people of the District and to make it worthy to be an outstanding capital of the world.

As Chairman of the Armory Board, Mr. Shea unselfishly devoted his time, his efforts, and his superlative talents to bring about the construction of the District stadium, which he envisioned not only as a showplace, but as a much needed place for sports, civic, and international affairs to be conducted.

It was my good fortune to meet Mr. Shea when I first came to Congress. Mr. Shea was a brilliant lawyer, an exceptionally well-read man, who had a keen understanding of human nature, a most pleasing and magnetic personality, with warmth which readily ingratiated him to all who had the good fortune to know him. Mr. Shea was very serious minded, yet had a sense of humor and an abundance of knowledge that made it delightful to be in his company.

George led a happy and exemplary life, and was devoted to his family.

His keen, analytical mind simplified may problems that confronted him, and his associates, whether he was dealing with an adversary or a friend. Mr. Shea was recognized as an outstanding lawyer. He had a rare quality of leadership which he exhibited in all fields of his endeavors. He was a man of boundless energy, and was unsparing of his time and efforts in any worthy cause.

From early youth, George Shea distinguished himself with honors in his academic work. He was an honor graduate of Westminster Preparatory School. He graduated with honors from Holy Cross College and Yale University Law School, where he was an editor of the Yale Law Journal.

I can think of no more fitting name for the new stadium than the Shea Stadium, in recognition of his successful efforts to make the stadium a reality, and as a richly deserved tribute to one of the District's most outstanding citizens.

Mr. Speaker, I ask unanimous consent that the gentleman from Rhode Island [Mr. FOGARTY] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. FOGARTY. Mr. Speaker, in the passing of George Shea I have lost a dear, loyal, and warm friend. I had very great admiration for Mr. Shea as a distinguished public-spirited gentleman and an able lawyer. Mr. Shea's life was rich with accomplishments beyond his years. George never missed an opportunity to extend a helping hand to a friend and to encourage those who were troubled. I extend my sympathy to his family.

I earnestly hope that appropriate steps will be taken to name the new stadium the "Shea Stadium" in honor and in memory of George Shea, as suggested by my colleague the gentleman from Ohio [Mr. FEIGHAN].

CHARLES N. COLLATOS, COMMISSIONER OF VETERANS' SERVICES, COMMONWEALTH OF MASSACHUSETTS, AND FORMER MASSACHUSETTS LABOR RELATIONS COMMISSIONER

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I want the House to know some of the accomplishments of my able and distinguished constituent, the Commissioner of Veterans' Services of the Commonwealth of Massachusetts. He has a lovely, gracious wife and two sweet children who share honors with him. He is a fine, loyal friend. Starting with the American Legion citation presented to him at a banquet on February 20, 1960.

THE AMERICAN LEGION—CERTIFICATE OF APPRECIATION

"In recognition of outstanding, unselfish, and loyal and continued cooperation rendered to the American Legion, Department of Massachusetts, by his years of service to the officers and the members of this organization and to the veterans of the Commonwealth of Massachusetts, this certificate is presented to Charles N. Collatos, past department commander and past national executive committeeman, who has exemplified himself as being a trusting servant of the veterans and their dependents and to his fidelity and devotion to the cardinal principles of the American Legion, this testimony expresses the gratitude of the members of this department."

In witness whereof the undersigned have affixed their signatures this 20th day of February in the year of our Lord 1960 and the 41st of the American Legion.

GEORGE K. WALKER,
Department Commander.
PETER E. PAPPAS,
Department Adjutant.

I shall enumerate certain other outstanding achievements:

Commissioner of veterans' services, Commonwealth of Massachusetts.

Formerly Massachusetts labor relations commissioner, was also national executive committeeman of the American Legion.

First World War II member from Massachusetts.

Past State commander of the American Legion, State of Massachusetts.

Forty years old; married Florence Koniares, formerly of Belmont; two children, Nicholas and Dianne.

Entered service as a private, September 1941; discharged as chief warrant officer, airborne troops, 1945.

Oversea duty: Gliderman — Italy, France, England, Germany, Denmark—First Airborne Task Force, Allied Airborne Army.

Joined George K. Menichios American Legion Post, No. 324, in 1945, 257 Commonwealth Avenue, Boston, Mass.; served as first World War II post commander.

Elected as commander, Suffolk County Council, after previous election as senior vice commander, junior vice commander, and executive committeeman.

Elected at 1952 State convention in Gloucester as department vice commander; reelected in 1953 State convention at Lowell as department vice commander.

Elected department commander at State convention in June 1954 at Pittsfield.

Served as State Americanism committee chairman for 2 years.

Member national legislative liaison committee of the American Legion.

Author of "Dangers and Threats of Communist Subversion."

Formerly secretary to Gov. Paul A. Dever, 1948 to 1952.

Massachusetts chairman for Crusade for Freedom Drive; Massachusetts community chairman of Freedom, Inc.

Former publisher of Athens, Greek-American newspaper.

Graduated June 1941 from Northeastern University with A.B. degree.

Active in civic, fraternal, and religious associations.

Member: Disabled American Veterans, Veterans of Foreign Wars, Massachusetts Veterans Services Agents Association, National Association of State Directors of Veterans' Affairs, and other civic, fraternal, and religious organizations.

It is most fitting that Commander Collatus and his family should live in the great historic town of Lexington, Mass.

ADJOURNMENT OVER

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

ROLLCALLS ON MONDAY, TUESDAY, AND WEDNESDAY OF NEXT WEEK

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that any rollcalls on Monday, Tuesday, or Wednesday of next week, as distinguished from quorum calls or rollcalls on rules may go over until Thursday of next week.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. GROSS. Mr. Speaker, reserving the right to object, was that request for Wednesday or just Monday and Tuesday?

Mr. McCORMACK. Monday, Tuesday, and Wednesday.

Mr. GROSS. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

ROLLCALLS ON MONDAY AND TUESDAY OF NEXT WEEK

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to withdraw the unanimous-consent request heretofore made that any rollcalls on Monday, Tuesday, and Wednesday of next week go over until Thursday.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that any rollcalls that might take place on Monday or Tuesday of next week, other than on rules or quorum calls, further consideration of such legislation may be postponed until Wednesday.

The SPEAKER. The gentleman from Massachusetts means Thursday. The Chair suggests that the gentleman from Massachusetts make his request that rollcalls on Monday and Tuesday go over until Thursday instead of Wednesday.

The HALLECK. I cannot agree to that, Mr. Speaker. What is the gentleman's request, may I inquire?

The SPEAKER. The pending request is that any rollcalls except on rules and quorum calls on Monday and Tuesday go over until Thursday.

Mr. HALLECK. Mr. Speaker, reserving the right to object, I am afraid that I could not agree to that. I think if rollcalls are not to be had on Monday or Tuesday—and I appreciate the reason for that request, and I certainly shall not object to that, because I am one of those who is interested in the primaries on Tuesday, but I think those votes should come on Wednesday, if there are any votes requested on Monday or Tuesday, and I suggest that the majority leader modify his request.

The SPEAKER. Now, there will be objection to that from the Chair, because the gentleman knows that that will be a good opportunity to ruin Calendar Wednesday.

Mr. HALLECK. Mr. Speaker, further reserving the right to object, there are some of us, of course, who are not impressed with the desirability or the necessity of calling anything up on Calendar Wednesday.

I do not know how many rollcall votes there would be on Monday and Tuesday. So far as I can see there will not be any.

Mr. McCORMACK. That is my hope and my expectation. I did not want to include any rollcall votes that might take place on Wednesday, if Calendar Wednesday is exercised. That was the reason I did not want to get myself into a complicated position where Calendar Wednesday might be exercised by some Member or Members, and then after we got along a little way, from a practical angle, they might find themselves in a trap as a result of a unanimous-consent request by the majority leader. That is the reason I withdrew my original request and submitted a second one.

I would prefer that any rollcalls on Monday and Tuesday go over until Thursday, if the gentleman from Indiana is agreeable to that.

Mr. HALLECK. Mr. Speaker, further reserving the right to object, in view of the Speaker's observation, that he would object to those votes coming on Wednesday instead of Thursday—that is, he would feel constrained himself to object if they came on Wednesday—certainly I do not want to get into the position of embarrassing people who will be away Monday and Tuesday. So, Mr. Speaker, I withdraw my reservation of objection.

Mr. McCORMACK. Mr. Speaker, I make the unanimous-consent request that as to any rollcalls that might be asked for on Monday and Tuesday, other than those on a rule or a point of no quorum, that further consideration of that legislation be postponed until the following Thursday.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. GROSS. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

VICTORY OVER THE GAMBLING SYNDICATE IN NEW YORK

The SPEAKER. Under previous order of the House, the gentleman from New York [Mr. POWELL] is recognized for 60 minutes.

Mr. POWELL. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include a series of articles from the New York Post.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. POWELL. Mr. Speaker, I take this opportunity of submitting a brief report on the tremendous success of my drive against the syndicate and the mafia that have controlled gambling in New York City for the past years. I use as my background first a series of articles that appeared in the New York Post last week in which in the opening article they said this with respect to the drive that I initiated here in Congress in January:

> Nobody, not even Thomas E. Dewey, has hit the business as hard as it is hit now.

Also:

> At least 60 percent of the bars, stationery stores, groceries, luncheonettes, newsstands, poolrooms, and other protected locations have gone out of the numbers business altogether—at least for now.
>
> The remaining 40 percent of the numbers spots are doing less than half their former business.
>
> The * * * $2,500 per month for each protected spot * * * has been suspended.

This is the way the series of articles began in the New York Post:

[From the New York Post, Apr. 18, 1960]

(Article I)

SECOND LOOK AT A RACKET: NUMBERS GAMES HARD HIT

(By Ted Poston with Al Hendricks and Irving Lieberman)

The lush citywide numbers racket, grossing an estimated $250 million a year here just 3 months ago, has plummeted to new low depths, a resurvey of the racket by the Post disclosed today.

Six weeks after the Post exposed the pad—the multimillion-dollar shakedown racket through which crooked vice squad policemen furnished open protection for policy spots and locations—a fresh look revealed these facts:

At least 60 percent of the bars, stationery stores, groceries, luncheonettes, newsstands, poolrooms, and other protected locations have gone out of the numbers business altogether—at least for now.

The remaining 40 percent of the numbers spots are doing less than half their former business.

The pad itself—under which crooked cops systematically collected an average of $2,500 per month for each protected spot (even if only an agreed-upon tenement hallway)—has been suspended, temporarily at least, by the racketeering police officials who directed it.

THINGS ARE TOUGH ALL OVER

And open warfare has broken out between the longtime numbers barons and those cops who for years were chiefly responsible for the protection and perpetuation of the policy racket.

"Nobody, not even Thomas E. Dewey (ex-racket buster) has hit the business as hard as it is hit now," said one prime source who had helped the Post in its original investigation, touched off by Representative CLAYTON POWELL's charge that police were cooperating with white racketeers—mainly Italian—to drive Negro bankers out of the Harlem business.

"Dewey was out to get Tammany Leader Jimmy Hines, and he got him," the Post source said, "but nothing like this has happened in the 40 years I've known this business. It's tough all the way down."

The Post series, which has been credited with helping the legislature to strengthen existing laws against policy and bookmaking, was only one of several factors in the current crippling of the racket.

Almost simultaneously with the Post publication of the first of 10 articles on the pad last February 29, Presiding Justice John M. Murtagh, assuming his new post in special sessions, began to crack down on the policy operators brought before him.

In the same courtroom where 3 days before 14 policy offenders had walked out free after paying fines from $25 to $300 in each case, Murtagh jailed the first six men brought before him—three for 90 days each, one for 6 months and another for 30 days and the sixth for 15 days.

Murtagh also highlighted the operations of certain policy lawyers and the open connection between bondsmen and the organized racket, spurring District Attorney Hogan's continuing investigation into these tieups.

AND THAT'S AN ORDER

The top-level order to shut down the pad came with dramatic and unexpected suddenness on March 1, when the second article of the Post series listed the exact sums extorted daily and monthly by crooked cops to let the game operate "legally."

These ranged from the $2 daily to the cop on the beat on up to the $300 a month paid to members of each of the top four vice squads in the police department, not to mention the $625 a month demanded by certain vice squad plainsclothesmen in one police division.

One veteran operator, who very recently retired after spending most of his adult life in the policy business, told how he received his orders.

"It was the second day of the Post series," he recalled, "and I hadn't even got a chance to read it before I got the call. The man said simply: 'Everybody's got to close down

until further notice. We don't want nothing from anybody until this blows over, but we don't want to get jammed either. So shut down.' "

Others told of personal visits by "bag men" and plainclothesmen with the same message. One said:

"The cop who brought me my orders had been scoffing at the whole thing just the day before. He'd bragged that he knew who the Post was going to name in its series, and he said he'd give each one 24 hours' notice before his name appeared so he could make himself scarce. Each man so warned was supposed to kick in an extra taste (additional bribe) for the information."

But two unexpected actions by Police Commissioner Stephen Kennedy, to whom the Post had submitted its series before publication, created panic in the police ranks of the organized racket.

Orders went out to the commanding officers of every vice squad in the city to read each installment of the Post series and to make written reports to police headquarters on any statement in the paper bearing on areas covered by their commands.

A veteran law enforcement official who followed the development said:

"So they panicked. They ordered their men to read the articles too and to increase arrests. They started grabbing everybody indiscriminately, sometimes without a pretense of obtaining legal evidence.

"They started grabbing the repeaters, the hangerson, the 'go for' boys—the guys who go out for aspirin tablets or coffee for the collectors or the controllers. There was nothing of quality in the arrests, but they made up for that in quantity."

Kennedy's second action was even more unexpected. The Commissioner asked the Post to publish daily a special telephone number at police headquarters where informants would be guaranteed anonymity on any tips of corruption on the part of any member of the police force, regardless of rank, and any definite information on policy spots, banks, or drops.

RINGING THE BELL

The special telephone number—Canal 6-7500—was first published on March 1, and hundreds of calls poured into police headquarters and were investigated by a special detail established by Kennedy.

Deputy Police Commissioner Walter Arm revealed that during the first month the special line received 352 calls on matters bearing on the policy racket and police corruption in other areas.

These calls resulted in 176 arrests—99 for policy, 61 for disorderly conduct, 9 for bookmaking, 4 for vagrancy, and 3 for violation of the liquor laws.

Arm said the calls involving accusations of police corruption were referred to Kennedy's undercover squad for investigation. The phone is still in operation, manned by carefully selected superior officers.

One important source in the racket credited this action by Kennedy with driving a real breach between the cops on the pad and the operators they have been shaking down for years.

"Nobody wants to be stoolie," this source said, "but nobody wants to be kicked around without reason either. So when they set up that phone that was the day things blew up.

"For the first time, we had a weapon we could use if the guys got too greedy. If they pushed us around too much in seeking an extra taste, we could always remind them that Mr. KENNEDY might be interested in the whole thing. I don't think any of us ever dreamed that we could one day stand up for our rights by threatening to use a solitary dime."

The Post resurvey indicated that the major outlets in the citywide racket—most of them controlled by the East Harlem mob—actually did suspend operations for several days, and many are still out.

But although the pad was temporarily suspended as an organized agency of graft, some corruption is believed to continue on a more chaotic scale. And the numbers racket, itself, of course, continues, but on a greatly reduced scale at the moment.

THE COOL VIEW

Chaos resulted, one source said, when several of the bolder vice squad plainclothesmen immediately sought to set up individual pads and make their own collections.

"They came around in teams of two and demanded $15 a man each week," this source said, "but most of the men ain't kicking in."

The source reported the reaction of an unidentified numbers banker.

"When they came to me [the banker], I told them we were cooling it like the orders said. And when they kept on hinting that we had better kick in or something would happen, I told them frankly:

" 'If you catch me right, I'll take my medicine. But if you frame me or any of my people, or tell me I got to give you somebody to make your quota, then I'll go straight to Murtagh or Hogan and I'll spill my guts.' I told them I ain't going to take no 6 months in jail for nobody."

I would like to point out also that nearly everything that I fought for here during January and February has been achieved.

The State legislature passed a new gambling law, signed by Governor Rockefeller, which now makes mandatory a prison sentence for repeaters after the second conviction.

The grand jury of Manhattan, under District Attorney Frank Hogan, is now sitting in session.

The State Crime Commission under Mr. Goodman Sacharand of Rochester, N.Y., is now staging an investigation.

The police commissioner has reorganized Manhattan into two districts rather than the many it had before.

The entire confidential squad of the police commissioner of New York City has been busted and a new one was sworn in yesterday.

However, I wish to state that beginning the last of May I will start again on Wednesdays putting into the RECORD any items that I find or are given to me by citizens which indicate there is any going back to the good old days of New York City Police Department payola or any whitewashing or covering up by any agency of government—county, city, State, or Federal.

Mr. Speaker, the articles to which I referred earlier are as follows:

HOW THE COURT CRACKDOWN HIT THE POLICY RACKET

(By Ted Poston with Al Hendricks and Irving Lieberman)

A simple weapon which has been available to the courts here for decades is inflicting more damage on the $250-million-a-year numbers racket than all the antipolicy crusades of the last half century.

The weapon? Stiff sentences instead of fines. Presiding Justice Murtagh of special sessions started slamming the jail doors on convicted policy defendants in Gamblers Part last February 29—simultaneous with the Post's exposé of the pad, the multimillion-dollar protection racket operated by crooked vice squad cops to let the numbers barons go unmolested.

Prosecutors and grand juries for years had been demanding jail sentences for gamblers instead of the traditional slap-on-the-wrist fines.

Back on November 12, 1958, District Attorney Hogan protested publicly when General Sessions Judge Marks suspended sentences on 13 of the biggest Italian policy barons after all had pleaded guilty to a numbers game conspiracy indictment. Hogan has always viewed jail terms as one of the most potent weapons in combating policy.

"There are thousands of such arrests (policy) each year," he complained recently, "but they all almost invariably result in a suspended sentence or a fine."

And the Brooklyn rackets grand jury, backing District Attorney Silver's own views reported last year:

"The bookmakers and policy bankers consider these court proceedings which result so often in fines as merely part of the cost of doing business—as a sort of 'license' fee.

"Bookmakers and policy operators are soft livers. Nothing, but nothing like a jail sentence could teach them that violating our laws is serious. As the police often put it: 'these bums don't like jail.' "

Court records compiled by Post reporters both in its original exposé of the links between crooked plainclothesmen and policy racketeers, and in its current followup on the situation, give substance to the jury's charges.

Of the 2,885 persons arraigned in the magistrates' courts for policy law violations in January and February, this year (while Murtagh was then chief magistrate, ironically), only 3 were given jail sentences. And none of these three—two in Manhattan and one in Queens—received as much as 30 days.

Of the 2,885, 239 pleaded guilty in magistrates court and were fined or given suspended sentences. The vast majority, represented by bondsmen and lawyers whose fees were paid by the syndicate behind policy, merely waived their cases to gamblers part of special sessions. There most of them were discharged on their own recognizance or fined $25 to $300 each on their routine pleas of guilty. The syndicate promptly paid the fines and most of these offenders never lost a day's work in the racket.

MURTAGH "LOWERS THE BOOM"

Then, on February 29, to use the words of one of his later victims, "that cat Murtagh came on like Gang Busters."

Without warning, the new presiding justice jailed up to 6 months the first six policy offenders brought before him in gambling part.

When Isaac Inglahm, 71, a lowly runner, admitted under questioning from the bench that he knew neither the name of the bondsman who bailed him out nor the lawyer who showed up to represent him, Murtagh indignantly called for an investigation by District Attorney Hogan of the alliance between the policy syndicates and the bondsmen and lawyers. Murtagh threatened to drive such lawyers from special sessions and referred the names of two lawyers to Hogan's office.

Some critics of police corruption and policy protection were unimpressed as Murtagh continued his crusade on March 3 by sending 13 men to jail for 15 days to 6 months each and 12 more to jail the next day for a flat 6 months.

"These men are all small fry," these "cuties" charged, "there isn't a numbers banker in the lot."

But the policy operators themselves had no such illusions.

"That's like saying the enemy shot your army to pieces but didn't lay a hand on the general," one commented the other day.

"A banker without runners and controllers is as helpless as a general without troops."

The more realistic reaction in the racket had been expressed by one defendant that first day when he saw six men go to jail before him.

"Man, get me an adjournment," he had whispered desperately to his lawyer, "that guy up there on that bench is crazy."

So, as Murtagh jailed 43 offenders in his first 5 days while revoking the bonds and issuing arrest warrants for 14 others who fearfully failed to appear, the syndicate shifted its operations back to the magistrates' courts and insisted that its men be tried there.

But they underestimated the situation, for while the bonding companies suddenly started demanding $250 cash surety for each policy arrest (instead of the usual $50 to be split between the syndicate's bondsman and lawyer), Murtagh was busy on another front.

He called a conference with his lower court successor, Chief Magistrate Abraham M. Block, and Administrative Magistrate Larry M. Vetrano and mapped the next line of attack.

The result became evident last March 28 when Larry Melville, 54, a socially prominent Harlem operator who had never spent a day in jail despite six previous policy convictions, came up in magistrates' court on a routine charge.

"NO HIDING PLACE"

Magistrate James E. LoPiccolo immediately slapped Melville with the stiffest sentence passed out so far—6 months in jail and 30 days more unless he paid a $500 fine immediately.

One Harlem operator recalled that moment the other day in these words:

"When they lowered the boom on Larry like that, we knew at last there was no hiding place. We were boxed in on both ends."

And the walls were closing in from two other sides at the same time.

Hogan stepped up his investigation of alliances between lawyers, bondsmen, and policy racketeers by flooding the town with subpenas. Veteran policy lawyers, faced with possible bar association investigation, started shunning such cases, leaving many defendants without counsel.

The list of defendants skyrocketed further as Police Commissioner Kennedy, aroused by the Post exposé of police corruption and policy protection, applied unprecedented heat to all the vice squad commands.

Policy arrests increased from 3,928 for the first 3 months of 1959 to a total of 4,280 for January, February, and March of this year. Only Staten Island failed to show an increase for the 3-month period.

While the overall increase in policy arrests was only 352 cases, a longtime operator interpreted the figures in this way for the Post:

"The difference is that these arrests this year—especially in March—were for real. Last year, you could figure that half of the numbers arrests were just 'accommodation cases'—you know, winos and junkies whom you paid $50 each to take a bust and help the cops keep their quota.

"But who the hell is going to agree to take 6 months in jail for a lousy $50? Not even a junkie. Maybe a junkie least of all. So the cops, to cover themselves, are grabbing the regular guys who are the backbone of the business. Even guys they've been collecting from for years.

"And if a bank can't take care of a regular guy's family for the 60 days or 6 months he's in jail, what is to keep that guy from spilling his guts to Murtagh or even Hogan?"

Another long-time operator discussed the matter from a different angle.

"No matter what the Post or anyone else says," he observed, "the vast majority of people in the numbers business are not racketeers. Many are quite respectable, church members, people who are often looked up to in their immediate communities.

"From habit and background, many of these people have handled a few numbers as a means of supplementing their regular job incomes. Even if they got arrested in the past—and that didn't happen often—they could be arraigned in court, fined, released, and nobody knew anything about it.

"But how many of them do you think will continue when they knew they may go to jail now and be disgraced before their families and their neighbors? This thing is going to cost the game several thousands of such part-time workers, not to mention many guys who never did anything else."

Our harassed policy operator asked the inevitable question:

"What got into this Murtagh? He didn't act up when he was chief magistrate. Now he's giving us hell all over the lot."

A fellow operative answered the question with a shrug.

"I don't know what got into him," he remarked despairingly, "but he sure as hell got into us."

BARE NEW RACKET IN RECORDS—HARLEM 'POLICY' HARDEST HIT—OTHER BANKS STILL STRONG

(By Ted Poston with Al Hendricks and Irving Lieberman)

The three-way squeeze which has reduced the policy racket to its lowest ebb here, following the Post's revelations of links between police and the numbers barons, has hit the Harlem game harder than elsewhere in the city.

While Queens and Staten Island policy banks apparently have continued to flourish on about the same scale, despite the Post's exposé of the multimillion-dollar vice squad protection system, the new drive by Police Commissioner Kennedy, Presiding Special Sessions Justice Murtagh and District Attorney Hogan is driving much of Harlem's game underground and biting into the play in Brooklyn and the Bronx.

In Brooklyn, arrests are up over 10 percent because special attention is being paid to the "spots" and "locations" which paid an average of $2,500 a month to grafting vice squad cops for the privilege of operating openly before the Post exposed The Pad, the list of protected policy places.

Angel F. Calder, the city's largest Puerto Rican policy banker, has given up his extensive Brooklyn operation as a result of his long running fight with District Attorney Silver, compounded by the heat the Post series generated.

SMALL CHANGE

Calder, who is still awaiting trial with his minions on charges growing out of Silver's spectacular 1958 raid on his $5 million Brooklyn bank, is now conducting a much more limited operation, reputedly from a store on Second Avenue in Manhattan.

Most of his former controllers and collectors in Brooklyn have been absorbed by the East Harlem mob's Kings County operation, directed by Mike Miranda.

But the East Harlem syndicate which controls most of the policy business in all boroughs has also accepted the temporary shutdown of the pad in Brooklyn—on the frightened orders of the crooked vice squad cops who run the protection system.

In the Bronx the syndicate's operation, still run in absentia by Sammy Schlitz (Schlitten), has also been hit, but not so hard, by a 10-percent rise in arrests following a suspension of the pad.

But although his basic Bronx-wide operation remains in fairly good shape, waiting only word of the reestablishment of the pad to swing back in action, persons associated with Schlitz told Post reporters that the dapper little ex-bootlegger and juke box czar is smarting over the shutdown of five of the seven lucrative spots for which he paid heavy police protection in Harlem.

First to go, in the wake of the Post exposé, was the modest headquarters which three Schlitz henchmen, known as Mel, Artie, and Sollie, maintained in a tenement hallway on 145th Street. All three disappeared March 1—the day the pad was ordered suspended—and haven't been seen there since.

Three other Schlitz locations closed down the next day. His last two remaining spots are run by two men known as Dave and Sutton on West 144th Street in what is known as the last wide open block in Harlem. Both Schlitz minions patrol the block more closely than the cop on the beat, but pickings were still slim there last week.

But Schlitz, although undisputed policy czar of the Bronx, is only a minor operator in the lush Harlem game which the East Harlem syndicate has been consolidating over a number of years.

And his losses, while substantial, are small compared to the major Italian banks which still control most of the business in the predominantly Negro community.

Here's what the Post resurvey indicated happened to other major Harlem operators:

Anthony (Punchy) Salerno, director of the Syndicate's citywide policy operations and most powerful figure in the Harlem policy game, had 37 "wide open spots" for which he paid grafting cops an estimated $100,000 a month before the crackdown. The Post found only about 12 of the 37 spots in operation last week. This does not mean that Salerno is out of the business, however. As one of his former associates pointed out:

"Many of the guys who acted as controllers in the candy stores, tailor shops, groceries, bars and other spots run by Tony are still in the business. They just don't operate out of stores any more. They got together many of the runners the Negro bankers had when the shutdown came, and they collect their business and turn it in.

"And in many ways, this isn't a bad deal for Punchy. He still saves the $45,000 a month which he had to get together for the three vice squads about the division level, while he is by no means starving from the 'controlling' business which is keeping his game going."

Other Post sources reported that another major Italian operation in Harlem—the Vigliante brothers, Louis, Tony, and Charlie—went one step further.

ORDERS IS ORDERS

"When the order came down on March 1 that the pad was closed and no payments expected," one said, "the Vigliantes really went underground, although they continued to work the same 'controlling' business as Tony.

"But when the cops, as most of them did after 2 or 3 days, came around and wanted to establish individual pads, Louis Vigliante would have no part of it.

" 'You ordered us to quit and we've quit,' he is said to have told these cops, 'we ain't giving nobody nothing.' The cops knew he was lying, but what could they do about it? Those East Harlem boys carry too much weight."

Also hard hit by the suspension of the pad was Louis (Louie The Gimp) Avitabile, the Lenox Avenue supermarket owner whom Representative ADAM CLAYTON POWELL had called the top man in the syndicate's Harlem operations.

Avitabile, despite the pressure put on him by POWELL, still had 14 spots for which he paid monthly protection when the Post ex-

posé was printed. Last week these 14 spots were down to 4.

His main spot then was in a basement around the corner from his supermarket (a raided premises since last July 2), operated by Solly Appuzzo, the Gimp's partner. Last week that basement was only an obscure policy drop, and neither Solly nor Louie have been seen in the neighborhood recently.

Another Italian operation—the Lenox Avenue bank operated by Felice and James Falca—came up with a new idea when the heat went on. The Falcas, who called themselves Phil and Jim Black, offered to sell shares in their bank to hard-pressed Negro policy bankers if the price would be met. Negotiations are still continuing, although neither brother has been seen recently in his usual Harlem hangout.

ON THE RUN

But if the syndicate's large white banks have been hard hit by the crackdown, the few remaining Negro bankers have suffered even more—although few of the Negro operators had been able to afford full pad payments even before the system was exposed.

Here is what happened to most of them:

Henry Lawrence, long regarded as one of only two Negroes who had enough influence with the crooked vice squad cops to OK another Negro for the pad, fled to his native Kingston, Jamaica, soon after he was ordered to cease operations from his upper Eighth Avenue tailor shop. Lawrence suffered a heart attack in Jamaica and is now hospitalized there.

Lawrence's Puerto Rican partner, Spanish Raymond Marquez, who operated several of their bank's 10 protected spots on the lower part of Eighth Avenue, also disappeared—but not before police raided the bar and grill he owns near 112th Street and stationed a patrolman there.

Ironically no such action had been taken on August 17, 1958, when police seized Marquez' brother, John, 27, and 12 companions in the same bar and stripped them of 4 revolvers and 2 dismantled rifles.

BANK ROBBERY

The arsenal had been assembled just a few hours earlier, after Spanish Raymond had shot to death David Peters, 28, a young Negro hoodlum who had been muscling in on the Lawrence-Marquez numbers business in the area. Marquez claimed self-defense and was not indicted for the killing.

With police protection no longer assured, several of the Negro bankers fell prey to youthful holdup men who had learned by bitter experience—and a few gangland-type killings—not to mess with the syndicate's Harlem operations.

The big three bank of Carlyle Williams, Walter Smith, and Crip Martin in the 127th Street and Lenox Avenue area was held up twice, with the bandits taking $1,800 in cash on their second trip. Simultaneously, the same young gang tried to break into Smith's apartment in Washington Heights but was thwarted in the attempt.

Fritz Devinish, who with Boo Marshall, Sid Thompson, Pat Hogan, and Crappy Hale, operated as the Big Five in the 140's block off Lennox Avenue, was called in by Immigration officials for questioning, and the whole bank closed down completely for a month. It has since reopened limited operations.

A young Negro who amassed a fortune by serving a scant 8 or 9 years as a vice squad plainclothesman was called in for questioning in Hogan's current investigation—but not before he had been summoned to conferences with his former vice squad colleagues after his operations had been mentioned in the Post series.

And the end is not in sight.

"Even when things open up again, and they will," one of the Negro operators said, "I don't think we'll ever get back to where we were. If ADAM CLAYTON POWELL was a little premature in saying that the whites were taking over all of the Harlem business 3 months ago, he won't be premature when the pad is reestablished in the near future."

[From the New York Post, Apr. 21, 1960]

(Article IV)

GUARD RECORD RACKET WITNESSES; POLICY MEN HOPE FOR COMEBACK

(By Ted Poston with Al Hendricks and Irving Lieberman)

The numbers game has been hard hit by the current crackdowns but many people in the racket persist in the belief that it will come back strong again, and with police collaboration. Post reporters kept running into this view as they resurveyed the policy situation.

Thousands of numbers runners—low men on the totem pole—are scuffling desperately each day to hold the shambles together in the hope that the antipolicy drive will run its course and be forgotten.

A member of the Post team which exposed the pad—the multimillion-dollar vice squad protection racket—6 weeks ago, retraced his steps last week to see how the operation was faring under the combined heat of the police and the courts. Here is his report:

"Toured Harlem today with the same numbers operator as before. The plan now as then was to introduce me as his nephew and engage various numbers writers in conversation.

STREET SCENE

"If the plan didn't work out better, blame the cops. The streets are flooded with them. Not just the patrolmen. You can't go a block without seeing police radio cars, cruising or just parked in front of bars or stores.

"In every other block, my guide, who knows them on sight, pointed out the unmarked cars of plainclothesmen. The cops know him, of course, so we had to pass by the first three places where we were supposed to stop; plainclothesmen or radio cops were parked there.

"We finally hit a bar on Amsterdam Avenue and started talking to a numbers writer he knew. This guy has a real problem. For him, the couple of blocks between his home and this bar is a kind of no man's land.

[From the New York Post, Apr. 22, 1960]

(Article V)

"POLICY": A HOUSE DIVIDED

(By Ted Poston, with Al Hendricks and Irving Lieberman)

Just 6 weeks ago Javon B. Hunter, 25, formerly of 242 West 148th Street, was a numbers runner who turned his daily book over to William (Shorty) Greer, 36, a controller for Felice and James Falca's Lenox Avenue policy bank.

Today, J. B., as his hundreds of numbers customers knew him, is dead, and Greer is in The Tombs charged with the slaying.

Both, in a way, are victims of the chaos which has descended on the policy racket since the Post exposed the pad—the multimillion-dollar protection racket operated by crooked vice cops—and Presiding Justice Murtagh started throwing jail terms at the small-fry sinews of the numbers industry.

Their story is only one of a score of similar incidents—more violent than most—encountered by Post reporters in their follow-up investigation of the numbers racket.

Here's what happened:

When Police Commissioner Kennedy cracked down on the vice squad corruption ring on the heels of the Post's exposures, the Falco brothers (who called themselves Phil and Jim Black) tried to sell shares in their lucrative policy bank. But when the crooked cops themselves ordered them and other bankers to suspend operations while the heat was on, the Falcos took off.

Greer, like scores of controllers all over the city, was left high and dry, so he took part-time work as a bartender in a Seventh Avenue gin mill and continued to accept the "books" turned in to him daily by his veteran numbers collectors.

Not until an unlucky hit came up on March 28 did J. B. find that Shorty hadn't been turning his bets over to a bank and thus couldn't pay off. J. B. went to the bar and beat up not only Shorty but the white owner of the place as well. Shorty finally routed him with a baseball bat.

The two met again early in the next morning, March 29, in the Beverly Hills Bar and Grill, 303 West 145th Street. The fight was resumed, and minutes later J. B. slumped to the floor, dying of stab wounds. Shorty was seized on homicide charges.

Greer was indicted for second-degree murder last Thursday, and is being held in $20,000 bail for pleading next week. He had been convicted of policy violations seven times and was fined $350 for running a policy drop on October 6, 1956.

This is only one incident in the fresh internecine warfare among minor policy operators. But there is a more bitter if less bloody conflict going on between the policy bankers themselves and the still-grafting cops who insist on "getting a taste" (bribe money) despite the orders of some of their superiors to "cool it for a while."

One veteran source described it this way.

"These guys who have been on the take so long just refuse to reduce their new standard of living, heat or no heat. One of them said his plainclothesman salary wasn't enough to meet the fixed charges of his monthly expenses.

"He said he had no intention of losing his Cadillac or putting his second old lady out of her Sugar Hill apartment while waiting for the Pad to be revived. So he told everybody that he expected to get his as usual every week or he'd bust (arrest) everybody in sight."

Some of the newly impoverished plainclothesmen went even further. In one case, a plainclothesman trailed a known pickup man for a hard-pressed Manhattan bank and seized him along with 50 envelopes containing that day's "works" (the betting action). Such "high-jackings" were not unusual even when collaboration between the cops and the banks was wide open, before the Post series. The usual practice was to call up the bank and demand a "$50 taste" for releasing the "works" before the close of the day's business.

"But the free-booting b—— in this case," a reliable source told the Post, "had the nerve to call the bank manager and demand $1,500 just for the 'works.' "

STALEMATE

"The manager told him he was crazy, but they kept on bargaining over the phone until the manager said he might come up with $500 if both his pick-up man and the 'works' were released immediately.

"But this free-booter said: 'Oh, no; your man has got to take a bust. After all, I've got to meet my quota.' The manager told him to go to hell, but the cop reminded him:

" 'If you'll up the ante, I might try to do something. But if you let your man get busted and if Murtagh decides to give him 6 months, he may decide to blow the whistle on you.'

"The manager really blew his stack then and reminded the cop that he could blow a whistle, too—just by calling that Canal 6–7500 special number which Commissioner Kennedy had set up for tips on crooked cops.

"This set up a sort of stalemate before they finally worked out something. I don't know how much was paid, but the 'works' were returned in time for that day's tabulations."

A somewhat similar incident was reported in the Bronx, where the drive against policy and corruption hasn't hit as hard as it has in Manhattan and Brooklyn.

[Antipolicy activity is even less evident in Queens, where numbers arrests rose only from 271 for the first 3 months of 1959 to just 279 for the same period this year. It is practically nonexistent in Staten Island, where only 11 policy arrests were made all last January, February, and March—a drop of 3 from the 14 arrests made during the same period in 1959.]

The Bronx incident had a fresh angle, as explained by a Post source there.

"When the Pad closed down in early March, everything went on a catch-as-catch-can basis," the source said. "Then everybody tried to get in the act. And this included many cops who had never been on the Pad."

He then cited the case of a numbers operator who was picked up 2 weeks ago by three detectives from the narcotics squad.

"Now this man had never had nothing to do with narcotics and these cops knew it. As a matter of fact, they weren't even in their assigned areas when they put the arm on him.

"But what could he do? They knew he was in the numbers and they knew he had money on him. And he was afraid that if he didn't get away he might find something put in his pocket before he got to the station house.

"So he finally got up $400 and they let him go."

A more common complaint in most boroughs is that, in their anxiety to build up their arrest records, some shady vice squad policemen are, in the words of a respected law-enforcement official, "making indiscriminate arrests without * * * obtaining legal evidence."

A FRIENDLY WAVE

Fausto Diaz, a $56-a-week busboy at the Prince George Hotel, 14 East 28th Street, came to the Post from his home at 370 Bushwick Avenue, Brooklyn, to charge that he had been framed in one such case last March 9—the day before the 10-part Post series on police corruption and policy protection ended.

Diaz said he was walking down the street to the subway to report for his regular 4 p.m. shift at the hotel when he saw a friend, Raphael Pagan, of 60 Moore Street, Brooklyn, sitting in a car on the other side of the street.

"I waved at him as I usually did and kept on walking," he said, "when suddenly a detective grabbed me and another grabbed Raphael across the street. He searched me right there on the street, and then they took both of us up to Raphael's apartment, where they searched us both again. They didn't find anything on either one of us, but they booked us both for policy."

Inspector William Kimmins of the Brooklyn East Patrol Bureau denied Diaz' charges. He said that Detectives Henry O'Brien and George Levine said they had made the arrests in Pagan's apartment and that Diaz had one policy slip in his pocket and had flushed another down the toilet. Kimmins also pointed out that Pagan had three previous policy convictions. Diaz had never been arrested before.

Diaz, finally released on $1,000 bail bond which cost him $50 plus $35 for a lawyer, rejected the police contention and produced what he felt was clinching evidence of his innocence.

He exhibited three dog-eared installment charge books to show that he owed almost $1,000 in bills for household fixtures and furniture.

"If I was in the rackets, and was making money from numbers," he asked, "then how would I be owing this kind of money?

"And I'll probably owe more now and fall behind in my payments, for I've already lost three day's pay just for waving to a friend on my way to work."

Diaz had been scheduled for trial in magistrates' court last March 31, but—unlike many policy veterans recently—he waived his hearing for a trial later in special sessions, preferring to take his chances with Murtagh.

Some old hands in the game who heard of his story saw in this some evidence of his innocence or inexperience in the game.

"Any cat these days who will take a chance of coming up before Murtagh," one observed, "must be pure in heart—or just aching to serve 6 months in the workhouse.

"I got to figure the man is innocent."

COMMISSION ON EQUAL JOB OPPORTUNITY UNDER GOVERNMENT CONTRACTS

The SPEAKER. Under previous order of the House, the gentlewoman from New Jersey [Mrs. DWYER] is recognized for 10 minutes.

Mrs. DWYER. Mr. Speaker, I have today introduced a bill to establish a Commission to be known as the Commission on Equal Job Opportunity Under Government Contracts. It is identical to the bill introduced earlier in the 86th Congress by our colleague the gentleman from Pennsylvania [Mr. KEARNS] on behalf of the administration.

Our colleagues will recall that, during the recent debate on the Civil Rights Act of 1960, the Chair sustained a point of order raised against an amendment to that legislation which was designed to create the proposed Commission. The House voted to uphold the ruling of the Chair that the amendment was not germane to the bill under consideration.

Now that the civil rights bill has been disposed of, Mr. Speaker, there can be no procedural objection standing in the way of early consideration of this proposal. I have introduced the bill to emphasize the urgency I feel about taking effective action in this important area of civil rights. Like many of our colleagues, I was disappointed that the civil rights bill, as enacted, was so limited in scope, that it failed to provide any measure of protection for civil rights other than voting rights—rights, for instance, in the fields of education, housing and employment. The present bill would deal with the last field by providing a statutory basis for the important work of the existing President's Committee on Government Contracts.

While it has become, perhaps, somewhat shopworn to say that "the world watches America," it is a statement which is nonetheless true and of great significance. In the never-ceasing struggle between the closed societies, which would subvert the dignity of man to the wishes of the state, and the open societies, which hold that each individual possesses certain fundamental rights regardless of the wishes of the state, the people of Africa, South America, Asia, and even Europe are watching the two great representatives of these conflicting ideologies: political and economic freedom represented by the United States, and political and economic statism and imperialism represented by the Soviet Union.

For the uncommitted and impoverished peoples, who quite literally do not know where their next meal is coming from and who live under conditions of permanent economic privation, the choice between the United States and the U.S.S.R. is not quite so simple or so black-and-white as it appears to us. They wonder if state control will also rapidly lift them to the levels enjoyed by their wealthier neighbors in the world. Some are even tempted to postpone concern for political freedom until economic gains have been made.

We understand, however, from the vantage point of experience, that full stomachs can never be enough. Men need more than full dinner pails as they live their lives on earth. We recognize that we are engaged not only in a competition of weapons and economies, but also in one for the spirits and minds of men.

As we pursue this competition, as we struggle to preserve and strengthen freedom throughout the world, we must remember that four-fifths of the world's population is composed of people whose skins are darker than ours. For these people, the question of racial discrimination is of primary importance—equal, certainly, to their quest for more of the world's goods. It is inevitable, therefore, that the leaders of the new nations of Africa, for example, should look at America to see how we practice the freedom we preach—especially as it involves our relations with those fellow citizens whose ancestors were also their ancestors.

With their eyes upon us, what can we say?

Can we tell them that when a Negro worker becomes unemployed he is usually out of work much longer than his white counterpart?

Can we tell them—people who place so high a value on a university education—that in the lower level laboring and service jobs in our country there are, proportionately, five times as many Negro men with college training as there are white men with similar educations?

What shall we say to those who inquire? Shall we tell them that tax revenues, to which all our people contribute, can be used to enrich some of our people who would in turn discriminate against others among our people?

We have an opportunity in this session of Congress to give an answer that will be heard around the world. This bill would provide for a 15-man Equal Job Opportunity Commission and authorize the Commission to "implement the policy of the U.S. Government to eliminate discrimination because of race, creed, color or national origin in the employment of persons in the performance of contracts or subcontracts to provide the Government with goods or services."

The means to be used would be education; the aim, voluntary compliance rather than arbitrary coercion. The

problem is to educate to their responsibilities those of our fellow citizens who are engaged in employing people to work on contracts to provide goods or services to the Government.

The results—we can be confident—will be a better utilization of America's human resources in a time of great need and, more important, a wider recognition throughout the world that here in America the efforts and abilities of all our people are recognized on their own merits, that here in America freedom is more than a word.

All around us, Mr. Speaker, we are witnessing the inevitable fruits of generations of discrimination—in the newly emerging nations of the world and in those still dominated by colonialism, as well as in our own South—results which have been predicted for many years. Everywhere, men are striving to secure the freedom they have never known: personal, political and economic freedom—freedoms which to an unusual extent they conceive of in the same terms as did our forefathers.

In some cases, violence is the tragic means to which they have resorted. In other instances—notably in our own South—the struggle for full freedom is being conducted with patience, restraint and dignity.

Throughout our history as a Nation, we have equated our destiny with our devotion to freedom. We are challenged now as never before to make of our devotion to freedom a living and meaningful force for good.

I hope this House will continue to implement its historic commitment to freedom by taking affirmative action during this session on legislation which will help to assure for all people their right to fair play and equal consideration in seeking employment under Government contracts.

DAY-CARE PROGRAMS FOR CHILDREN OF WORKING MOTHERS

The SPEAKER. Under previous order of the House, the gentleman from New York [Mr. HALPERN] is recognized for 10 minutes.

Mr. HALPERN. Mr. Speaker, among the many social changes which occurred in America during the 1950's was a great increase in the number of working mothers. Today there are more mothers working than in any previous time in our history. Their number, in fact has doubled since 1950.

More than 2,875,000 mothers are now working full time who have over 5,073,000 children under 12 years of age. Nearly 400,000 of these children under 12 have to care for themselves since there are no other arrangements for them. This is a national situation which the Children's Bureau of the Department of Health, Education, and Welfare has termed "alarming."

The Bureau pulled no punches in a recent release in stating that—

> Any community should be alarmed that young children under 12 have to fend for themselves while their mothers work.

The dimensions of the situation and its serious implications for family life and the healthy development of the children are potent arguments for the consideration of programs to provide adequate care for these youngsters. I am a cosponsor of the bill introduced by Senator JAVITS to create a system of Federal grants to the States on a matching basis for the establishment of day-care centers for these "latch key" children. It is not a new concept. The Lanham Act passed in the early 1940's set up such a program but it was allowed to lapse after the close of World War II. The need for the program today is even greater than during those war years when it was so successful.

The unfortunate fact is that once the Federal Government discontinued its participation in this effective day-care program, the States and localities which shared the expenses of the centers on a matching basis also discontinued their own responsibility in the field. Despite continued appeals, the States and localities have failed to keep up the day-care programs, because, they charge, Federal financial aid has ceased. Another reason given is the lack of knowledge and the lack of availability of professionally trained personnel to staff the centers. It is obvious, therefore, that Federal leadership is needed.

Under the bill, Federal grants for this purpose, not to exceed $12,500,000, would be provided on a matching basis to States which have initiated day-care center plans which have been approved by the Secretary of Health, Education, and Welfare. Such plans would provide for careful screening and only those children for whom no better plan could be made would be eligible. There would be a very careful check of the income of the family and the fee to the parents would be determined on the basis of the ability to pay.

The other half of the Federal funds would be administered to "impacted" areas in which specific Federal activities like defense work or military bases have created a special need for such facilities.

This is a cheap investment, yet one that will pay unquestionable dividends. Many communities are anxious to initiate programs but need the support and encouragement of the Federal Government. They are beginning to realize the value of skilled day care, not only to the child but to the family. For the child it provides a happy growing experience in safe surroundings during hours when parents must be absent. For families, day care often makes life together possible, both physically and emotionally. Day-care keeps families together and strengthens family life.

Modern day-care costs money. In New York City, for example, it totals about $1,000 per child per year. Large as this may seem, it is cheap when compared with the cost of family breakup and juvenile delinquency.

I urge that the Congress take every action to enact this needed legislation during this session.

COMMITTEE ON EDUCATION AND LABOR

Mr. THOMPSON of New Jersey. Mr. Speaker, I ask unanimous consent that the members of the Committee on Education and Labor may have until midnight tonight to file additional views to accompany Report No. 1556 on the bill H.R. 9070 and to become a part thereof.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

AMENDING THE NATIONAL LABOR RELATIONS ACT AS TO PICKETING TO PROTEST SUBSTANDARD CONDITIONS

The SPEAKER. Under previous order of the House, the gentleman from New Jersey [Mr. THOMPSON] is recognized for 60 minutes.

Mr. THOMPSON of New Jersey. Mr. Speaker, some days ago the Committee on Education and Labor voted by an impressive 21 to 5 to report a very simple but very important measure to the floor. This measure will correct some of the worst injustices of what is known as section 8(b)(4)(B) of the National Labor Relations Act.

The bill is H.R. 9070.

I was very happy to have the privilege of introducing this bill. I wish to commend the very large majority of my distinguished colleagues on the Committee on Education and Labor for their wisdom and understanding in reporting this bill. It is my hope that the House will follow this example set by the committee and will take prompt and favorable action on this bill when it comes time for a vote. When that time comes I will regard it as a pleasant duty, to help guide this bill on its legislative journey to the statute books.

At this time, Mr. Speaker, I am prompted to make a few advance remarks on the issues raised by this bill because of certain misimpressions as to this measure. I think that, in view of these misimpressions, it would be helpful to other members of this house to have a clear presentation on what this bill is about.

I repeat, Mr. Speaker, this is a simple bill, it adds a simple proviso to section 8(b)(4)(B)—no more than 10 new lines to the present law. It has a simple purpose; namely, to correct a legal technicality which outlaws a picket line appealing to all building tradesmen working together on a common construction project to protest substandard conditions maintained by any one of the contractors on the job.

Some time ago, in 1951, it was ruled by the Supreme Court that, because building tradesmen jointly engaged in a construction job at the very same site were technically employed by separate contractors, then these men could not picket in protest when nonunior workers were brought on the job by one of the contractors to work side by side with union men at substandard wages and substandard hours of work. This ruling came in what is known as the *Denver Building Trades Case* (341 U.S. 675).

This decision came as a distinct shock to every union member in the construction industry. A brief look at the realities of this industry will show why.

Buildings or projects are rarely designed and built by one firm or company. Instead, they are usually the combined product of many separate contractors in the same industry, working together as one team.

Very frequently it is the general contractor who must weld these contractors and their workers together into one smoothly functioning group, so that the whole project may be completed at the least possible cost and in the quickest possible time.

Despite these close relationships legal differences persist. Each contractor is a separate entity. Each separately employs his own labor. Workmen jointly engaged on the same project at the same time may be employed by as many as a dozen separate and distinct but functionally closely related employers. In the construction industry these conditions are due to what Mr. Justice Douglas aptly describes in the Denver case as "fortuitous business arrangements that have no significance so far as the evils of the secondary boycott are concerned."

Yet, Mr. Speaker, these fortuitous arrangements do have significance today as a direct result of the Denver case. Let us suppose, for a moment, that, instead of farming out the electrical work, the general contractor in the Denver case decided to do it himself.

As pointed out in the dissent in the Denver case:

> The picketing would undoubtedly have been legal if there had been no subcontractor involved—if the general contractor had put union men on the job. The presence of the subcontractor does not alter one whit the realities of the situation; the protest of the union is precisely the same.

In another sense these fortuitous arrangements of the construction industry are not fortuitous at all, that is, the choice of subcontractors is usually no accident. Before a general contractor can submit a bid on a construction job, he must secure bids on work he usually subcontracts, such as, plumbing, heating, and electrical installation. The success of the job may well depend upon the integrity and know-how of these subcontractors.

Who the subcontractor is, how he will do the job, and what he will charge are vital questions, to which not only the general contractor but often even the owner must have satisfying answers. In fact, the owner or architect frequently require the general contractor to list his subcontractors in submitting his bid. Frequently, the general contractor cannot change subcontractors without approval from the owner or architect.

One of the prime considerations in selecting a subcontractor is the nature and source of his labor supply. Does he employ skilled craftsmen? Can he get well qualified men to do the work? Does he secure men pursuant to an agreement with a building trades union? Here again the answers to these questions can mean the difference between success and failure on the job. The presence or absence of a collective agreement with a building trades union can mean the difference between stormy and harmonious industrial relations on the job.

In his turn, the subcontractor must also know the answers to these questions because they also affect his ability to perform.

Consequently, these contractors have made their commitments with their eyes open. Long before they move into the jobsite they know or have a full opportunity to know whether union and nonunion men are going to be thrown together on the jobsite, and whether trouble will be the product of this mixed marriage.

No one can be taken by surprise in these situations. No one can claim damage without advance warning and the chance to avoid damage. No one is neutral. No one is "an innocent bystander." Every one is well aware of the probable consequences of his own course of action.

Now, Mr. Speaker, an axiom in the law of secondary boycotts is that they are prohibited to protect neutrals and innocent bystanders, who may become the unwitting victims of industrial strife.

To take a clear case, a factory maintains fair working conditions under a union agreement. It has contracted to buy the products of another firm which also maintains good conditions under a union agreement. But times change. The second firm's labor policies change. Disputes arise. A strike breaks out. Then the union sends some of its striking members over to picket the factory, because it is installing the other firm's products. This is a classic secondary boycott.

When the Taft-Hartley Act became law, the late distinguished Senator who was one of its authors, Senator Taft, clearly stated that section 8(b)(4)(B) was to save innocent bystanders, such as the factory owner in this case, from harm in a dispute which he could not foresee or prevent or avoid without serious personal loss. Here is what the Senator said, at CONGRESSIONAL RECORD, volume 93, part 3, page 4198:

> This provision makes it unlawful to resort to a secondary boycott to injure the business of a third person who is wholly unconcerned in the disagreement between an employer and his employees.

And I also found, on going over the record in the Senate on that act debated 13 years ago, that almost every reference to boycotts involved plant and retail situations, one employer handling the products of another. None of the proponents of what is now section 8(b)(4)(B) talked about the construction industry or common situs picketing on construction jobs.

Contractors and subcontractors in the construction industry are never wholly unconcerned in a disagreement resulting from nonunion labor showing up at the construction project. In fact they have usually brought this very situation about and as joint venturers, they must share the burden of their own conduct. Yet despite these facts and the obvious purpose of the Taft Act's sponsors, the Denver case has removed this burden from their shoulders.

These and other injustices of the Denver case become all the more apparent when we compare construction work and manufacturing.

Contract construction and manufacturing are as different as night and day. Manufacturing is performed in a plant where workers are steadily and regularly employed at one place day after day. Contract construction is performed in any place where somebody wants something built. A contractor finds his workmen where he can. He employs them only when he needs them. He lets them go when the job is done. If a building trades journeyman is lucky, he then moves on to another job in another place for a different contractor. And when that job is over he gets let out again.

For most building tradesmen there is no such thing as steady employment, day in and day out, with one employer in one place.

This contrast with manufacturing has made all the difference in the world when it comes to organizing. For example, when factory workers want to band together in a union for their mutual aid and protection, their rights are protected. The law guarantees them an election if they want one. If they vote for a union then the union is certified as their representative. The employer then must bargain with that union. This is the Federal law today under the National Labor Relations Act.

But what about the construction industry? Can we protect the rights of construction workers by holding an election so they can choose their union? The answer is no.

Repeated attempts to hold representation elections in the construction industry have met with defeat. For a dozen years or so the National Labor Relations Board expressly refused to apply the law to this industry. No elections were permitted because the law was intended primarily to protect the rights of workers in the factory rather than on the construction site.

Then after the Taft-Hartley Act was passed the first General Counsel of the Board under that act, Mr. Robert N. Denham, made heroic efforts to apply the new law to the construction site. Even before he began, he recognized some of the difficulties he was bound to encounter. Here is what he said back in 1948:

> But, as we approach the construction industry and the trade unions and the contractors that are engaged in it, we find ourselves dealing with something which fits into none of the orthodox categories of industry or employment with which the Board is accustomed to dealing. The whole industry is unique in many ways and the mere pattern of employment differs wholly from that to which we have been accustomed. Neither the employee nor the employer stand on stable ground so far as either identity of the employer or the location of the work is concerned.

And a short time later Mr. Denham threw in the sponge. He found it was hopeless to try to define a bargaining unit in the construction industry both in terms of employers and employees. Except in cases where both employers and union could mutually agree on a bargaining unit for purposes of a consent election, no election was in any way possible. He quickly abandoned

his ambitious program to hold elections in this industry in every area across the country.

It is entirely clear that the election process of the Board is not an adequate means to permit a reasonable opportunity for legitimate organization by trades unions in the building and construction industry.

There is another fundamental difference between factory work and construction employment. Suppose a factory worker has chosen his union in a free, Government-supervised election and his union has negotiated a bargaining agreement covering all production and maintenance workers. Then suppose the plant management decides to exclude all maintenance men, all electricians, plumbers, and repairmen and the benefits of the collective bargaining agreement. Suppose he decides to cut their wage rates.

This could happen except for two very important things. First, this would violate Federal law. Second, every production and maintenance worker could legally walk out and stay home. Their union could put up a peaceful picket line and lawfully persuade every other union member to stay away—to refuse to make pickups and deliveries. The National Labor Relations Board could get a court order against the manufacturer who might try a trick like this, telling him to restore wage scales with backpay or else face charges of contempt of court.

But can the construction worker protest the same way when the same thing happens to him? Here again, the answer is "No, in most cases he can't," due to the peculiarities of the construction industry and the Denver Building Trades case.

These peculiarities of the construction industry, Mr. Speaker, were first recognized long ago by the building tradesmen themselves. Their only means of self protection was to band together and withhold their services from any contractors who refused to negotiate with them. Their only means of maintaining their organization and of protecting their wages and working conditions from nonunion competition was refusing to work alongside scab labor. No elections, no statutory guarantees could help these unions. Self-help alone would do.

As very aptly stated by Mr. Justice Douglas in his dissent from the Denver Building Trades decision:

> The employment of union and nonunion men on the same job is a basic protest in trade union history. That was the protest here. The union was not out to destroy the contractor because of his antiunion attitude. The union was not pursuing the contractor to other jobs. All the union asked was that union men not be compelled to work alongside nonunion men on the same job.

Until this Denver decision in 1951, the protest picket line had been the main way building tradesmen protected their working conditions, and their organizational strength from frontal attack.

Now they are deprived of this one basic means of self-defense and if anyone thinks for a moment that this isn't harming construction unions, let him take a close look at conditions in Baltimore, as shown by the hearings on this very bill.

Just before the Supreme Court decided the Denver case the Associated Builders and Contractors was incorporated in Baltimore. This group is frankly and openly nonunion from end to end. Today, after 10 years of growth, they can boast of 660 member firms.

What about the union contractors? How have they prospered during the same 10 years? In 1951 the Baltimore Building Trades Council listed 58 general contractors who used union subcontractors. In 1959 the same council listed only five general contractors who used union subcontractors exclusively. Twenty-two others were listed as using sometimes union and sometimes nonunion subcontractors.

How about wages and hours? Taking just a few trades shown by surveys of the city of Baltimore in 1951, the nonunion ABC wage rate ranged from 25 to 71 percent lower than union scales. Today these differentials still persist and the open shop worker puts in 50 or 60 hours a week at straight-time pay.

You might ask: What about the 40-hour week under the Federal Fair Labor Standards Act? Does not that apply? The answer is: No—not to most construction, which is strictly local in character. The construction worker is flatly denied the protection of his hours of work which the Federal law guarantees to the factory worker by requiring time-and-a-half pay for overtime after 40 hours.

Now these events in Baltimore undoubtedly have been reenacted in one locality after another across the face of the Nation. In the Denver case itself, for example, the union job was picketed because the union general contractor secured a nonunion electrical contractor who paid his electricians at a basic rate exactly 42½ cents less than the union scale.

Obviously, then, the Denver case is an open invitation to break down hard won wages and working conditions by using contractors who refuse to pay union rates.

Some may claim this bill is just an effort to enforce compulsory unionism.

Mr. Speaker, they could not be more wrong. This bill has nothing whatever to do with compulsory unionism, that is, it has nothing to do with forcing a man to join a union to get a job.

This is outlawed today, under at least two other provisions of the Taft-Hartley act, namely, sections 8(a)(3) and 8(b)(2). If we were to reverse the Denver case tomorrow by passing this bill—and I hope we do—then compulsory unionism—the closed shop—forcing a man to join a union to get a job would still be outlawed tomorrow. And any union trying to deprive or deny a qualified man employment because he is not a union member would be violating the law tomorrow just as it would be today.

No. Mr. Speaker, we have a bread-and-butter issue at stake here. This issue is whether the law will continue to deny a building tradesman his right to keep his union rates—whether we will continue to permit contractors to undermine these rates by employing men on the same job at wages which, the records show, can be 25 to 71 percent lower, without giving the building and construction unions an adequate opportunity to protect their wage standards.

For our only purpose in this bill is to permit the building tradesman to picket peacefully when someone else threatens to destroy his standard of living and working built by hard efforts over the years. Our simple desire is to make sure the Federal law realistically guarantees the construction worker the same rights the law now guarantees the factory worker.

So much for the merits of H.R. 9070. But before closing I wish to point out a few salient facts about this bill, to correct some erroneous impressions which some may have received.

First, the bill has had thorough consideration. It was proposed as early as 1954 by President Eisenhower whose administration had by then become aware of the harmful impact and basic unfairness of the Denver case. President Eisenhower then stated in a labor message to Congress:

> The true secondary boycott is indefensible and must not be permitted. The act must not, however, prohibit legitimate concerted activities against other than innocent third parties. I recommend that the act be clarified by making it explicit that concerted action against—an employer on a construction project who, together with other employers, is engaged in work on the site of the project, will not be treated as a secondary boycott.

In response to the President's request, Senator Smith of New Jersey, then chairman of the Senate Committee on Labor and Public Welfare, introduced S. 2650, containing omnibus amendments to the Taft-Hartley Act including a special exception to what was then 8(b)(4)(A). Much like H.R. 9070, this exception was confined to the construction industry and to job site disputes between employees of contractors in that industry.

After extensive hearings, S. 2650 was favorably reported—Senate Report No. 1211, 83d Congress, 2d session, Apr. 15, 1954, at page 19.

Next, the same proposal was repeated by President Eisenhower in 1956, and also in 1958, when it became part of a definite legislative program, contained in S. 3099, with language identical with my own bill, H.R. 9070.

In 1959 the same language was repeated in the Kearns bill, H.R. 3540, and was considered last year by the conferees on the Landrum-Griffin bill, and, but for a threatened point of order in the House, would have been included in the conference report.

I can assure the House that a majority of the conferees on the Senate side favored this specific proposal. May I also say that their support resulted from a careful check of the Senate which appeared to them to show a clear majority supporting this measure.

Finally, the Subcommittee on Labor-Management Relations, under the chairmanship of my distinguished colleague and friend, Representative PERKINS, of Kentucky, held extensive hearings in February of this year for 8 days, during which every interested person had a full opportunity to appear and testify on this bill. Now it has been reported by the full Committee on Education and Labor in a form to which no technical point of order can be raised.

Second, this bill is confined to the construction industry and to the construction industry alone.

Moreover the dispute must be neither unlawful under the National Labor Relations Act nor in violation of an existing collective bargaining agreement. These safeguards prevent use of the picket line for corrupt and dishonest objectives, which, by the way, may be adequately penalized under provisions of the Landrum-Griffin Act and other criminal statutes.

Therefore, Mr. Speaker, we should not consult false fears that this bill will unleash forces of iniquity upon the industrial world. Instead it is a simple agent of justice which would at last restore and revive a basic and traditional right which the law has taken away.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. KILDAY (at the request of Mr. IKARD) for today, on account of official business, being in attendance as a member of the Board of Visitors, U.S. Military Academy, West Point, N.Y.

Mr. RABAUT (at the request of Mrs. GRIFFITHS), for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to Mr. HALPERN, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. EVINS and to include extraneous matter.

Mr. RANDALL and to include extraneous matter.

Mr. PHILBIN and to include extraneous matter.

(At the request of Mr. MCCORMACK, and to include extraneous matter, the following:)

Mr. MACDONALD.

Mr. ROGERS of Florida.

Mr. BOGGS and to include extraneous matter.

(At the request of Mr. GRIFFIN, and to include extraneous matter, the following:)

Mr. CURTIS of Massachusetts.

Mr. BOW in two instances.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 743. An act to amend the Federal Coal Mine Safety Act in order to remove the exemption with respect to certain mines employing no more than 14 individuals; to the Committee on Education and Labor.

ADJOURNMENT

Mr. THOMPSON of New Jersey. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 26 minutes p.m.), under its previous order, the House adjourned until Monday, May 2, 1960, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred, as follows:

2099. A letter from the Assistant Comptroller General of the United States, transmitting a report on examination of the procurement of mobile air-conditioning carts for ground support of B–58 airplanes under Department of the Air Force prime contracts with Convair, a division of General Dynamics Corp., Fort Worth, Tex.; to the Committee on Government Operations.

2100. A letter from the Acting Secretary of the Interior, transmitting a report on the U.S. shrimp fisheries with respect to the specific topics enumerated in the Fish and Wildlife Act, pursuant to section 9(b) of the Fish and Wildlife Act of 1956; to the Committee on Merchant Marine and Fisheries.

2101. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated February 15, 1960, submitting a report, together with accompanying papers and illustrations, on a review of reports on Loyalhanna Creek at Latrobe, Pa., requested by a resolution of the Committee on Public Works, House of Representatives, adopted July 29, 1955 (H. Doc. No. 383); to the Committee on Public Works and ordered to be printed with two illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. PERKINS: Committee on Education and Labor. Part 2, additional views on H.R. 9070. A bill to amend section 8(b)(4) of the National Labor Relations Act, as amended (Rept. No. 1556). Referred to the House Calendar.

Mr. THORNBERRY: Committee on Rules. House Resolution No. 513. Resolution for consideration of H.R. 11713, a bill to authorize appropriations for the Atomic Energy Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and for other purposes; without amendment (Rept. No. 1559). Referred to the House Calendar.

Mr. SMITH of Virginia: Committee on Rules. House Resolution 514. Resolution for consideration of H.R. 7155, a bill to authorize the Secretary of the Interior to construct the San Luis unit of the Central Valley project, California, to enter into an agreement with the State of California with respect to the construction and operation of such unit, and for other purposes; without amendment (Rept. No. 1560). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANDERSON of Montana:

H.R. 11977. A bill to amend the Federal Trade Commission Act to provide for the issuance of temporary cease and desist orders to prevent certain acts and practices pending completion of Federal Trade Commission proceedings; to the Committee on Interstate and Foreign Commerce.

H.R. 11978. A bill to amend the Federal Trade Commission Act to strengthen independent competitive enterprise by providing for fair competitive acts, practices, and methods of competition, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. DURHAM (by request):

H.R. 11979. A bill to amend various sections of the Atomic Energy Act of 1954, as amended, and the Euratom Cooperation Act of 1958; to the Joint Committee on Atomic Energy.

H.R. 11980. A bill to amend section 143 of the Atomic Energy Act of 1954, as amended, to grant access to restricted data to Coast Guard personnel on the same basis as such access is granted to certain personnel of agencies of the Department of Defense, and for other purposes; to the Joint Committee on Atomic Energy.

By Mrs. DWYER:

H.R. 11981. A bill to establish and prescribe the duties of a Commission on Equal Job Opportunity Under Government Contracts; to the Committee on the Judiciary.

By Mr. HOGAN:

H.R. 11982. A bill to amend the Federal Trade Commission Act to provide for the issuance of temporary cease and desist orders to prevent certain acts and practices pending completion of Federal Trade Commission proceedings; to the Committee on Interstate and Foreign Commerce.

H.R. 11983. A bill to amend the Federal Trade Commission Act to strengthen independent competitive enterprise by providing for fair competitive acts, practices, and methods of competition, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. BARRY:

H.R. 11984. A bill to provide salary adjustments in the basic salary of postal field service employees in certain areas, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. BROOKS of Louisiana:

H.R. 11985. A bill to make American nationals eligible for scholarships and fellowships authorized by the National Science Foundation Act of 1950; to the Committee on Science and Astronautics.

By Mr. DIXON:

H.R. 11986. A bill to clarify the rights of States to select certain public lands subject to any outstanding mineral lease or permit; to the Committee on Interior and Insular Affairs.

By Mr. GREEN of Pennsylvania:

H.R. 11987. A bill to foster development of the use of a product of the United States by providing temporarily for the assessment of duty only on the cost of processing and added material when it is exported for intermediate processing and returned; to the Committee on Ways and Means.

By Mr. HALPERN:

H.R. 11988. A bill to extend the veterans' home loan program to February 1, 1965; to provide for direct loans to veterans in areas where housing credit is otherwise not generally available, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. JARMAN:

H.R. 11989. A bill to amend title 23 of the United States Code, relating to highways, with respect to certain projects constructed on the Federal-aid system by Federal agencies; to the Committee on Public Works.

By Mr. O'NEILL:

H.R. 11990. A bill to prohibit certain judicial acts affecting the internal affairs of labor organizations; to the Committee on the Judiciary.

By Mr. BATES:

H.J. Res. 701. Joint resolution designating the first Sunday in June of each year as Teacher's Day; to the Committee on the Judiciary.

By Mr. ASPINALL:

H. Con. Res. 661. Concurrent resolution to create a Joint Committee on a National Fuels Policy; to the Committee on Rules.

By Mr. SAYLOR:

H. Con. Res. 662. Concurrent resolution to create a Joint Committee on a National Fuels Policy; to the Committee on Rules.

By Mr. PHILBIN:

H. Con. Res. 663. Concurrent resolution relating to restoration of freedom to captive nations; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BURKE of Kentucky:

H.R. 11991. A bill for the relief of Pinghui Victor Liu; to the Committee on the Judiciary.

By Mr. DORN of New York:

H.R. 11992. A bill for the relief of Mrs. Margaret M. Kearney; to the Committee on the Judiciary.

By Mr. GOODELL:

H.R. 11993. A bill for the relief of Rosa Quattrocchi; to the Committee on the Judiciary.

By Mr. JOHNSON of California:

H.R. 11994. A bill for the relief of Edward T. How and others; to the Committee on the Judiciary.

By Mr. LESINSKI:

H.R. 11995. A bill for the relief of Manuail Asso Kallabat; to the Committee on the Judiciary.

By Mr. McDONOUGH:

H.R. 11996. A bill for the relief of Mrs. Sato Yasuda, Mr. Seiichi Yasuda, and Mrs. Tsuru Yasuda; to the Committee on the Judiciary.

By Mr. WAINWRIGHT:

H.R. 11997. A bill for the relief of the estates of certain former members of the U.S. Navy Band; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

444. By Mr. HOGAN: Petition of members of Teamsters Local Union No. 135 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen, and Helpers of America requesting a hearing on the denial of the right to elect their own officers; to the Committee on Education and Labor.

445. By the SPEAKER: Petition of William G. Suzore, city clerk, Lincoln Park, Mich., relative to affirming endorsement of the initial stage of the Trenton Channel improvement, and requesting enactment of the necessary authorizing legislation; to the Committee on Public Works.

EXTENSIONS OF REMARKS

A Most Extraordinary Teacher

EXTENSION OF REMARKS
OF
HON. WILLIAM J. RANDALL
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Thursday, April 28, 1960

Mr. RANDALL. Mr. Speaker, I have asked unanimous consent that some of my remarks be entered in the RECORD concerning a much out of the ordinary constituent, Mr. F. L. Stillions, of Blue Springs, Jackson County, Mo.

Mr. Stillions is a teacher by profession. He is not just an ordinary teacher, but one who is distinguished by having just completed 40 years of teaching in the public schools of Missouri; 25 years of which has been in continuous service in Blue Springs, Mo. Mr. Stillions further distinguished himself by being the first teacher in the entire area who insisted he continue in the teaching profession until he reached the mandatory retirement age of 70. Even more remarkable and in further distinguishing Mr. Stillions from so many others in his profession, he has never missed a day of regularly scheduled school during all these years.

Mr. Stillions was born on a small farm south of Palmyra, Mo., in 1890. He graduated from Palmyra High School and entered William Jewel College in Liberty, Mo. This is an institution of learning under the supervision of the Baptist Church. While a student at William Jewel, he became a part-time pastor in Forrest City, Mo. In 1912 he was ordained as a Baptist minister. After his graduation from William Jewel College in 1913, he commenced his service as the pastor of the Blue Springs Baptist Church which he continued to serve for 17 years.

During the years of his early life it should be remembered this great man served the people of his community as the pastor of their church and carried out an extensive building program in the construction of a new church. Yet not only was he a good minister, but during all these same years he was a teacher in the schools—and not simply was he a teacher of the academic subjects, but he also served as coach of both the boys' and girls' basketball teams. He will be particularly remembered for the fact that he provided transportation for the teams in his own car and at his own personal expense so that the teams he coached might enter competitive sports in other towns. For 2 consecutive years, 1935–36, his basketball team won the championship award.

Then in the year 1947 when most people of his age—age 57 at that time—are thinking of retiring, Mr. Stillions entered the University of Kansas City and completed work for his master's degree.

In his 40 years as a teacher, Mr. Stillions spent 27 years as a high school principal. It is refreshing to note that Mr. Stillions was not a specialist in that he confined his teaching activities to one bracket of subjects, but was a very versatile teacher in that he taught Latin, English history, algebra, geometry, and even chemistry in the field of the sciences.

When Mr. Stillion retires at the end of the current school year he will have the unusual distinction of having been teacher to three generations within one family, Mrs. Raymond W. (Maurine) Wyatt, her son, R. W. Wyatt, and her grandson, Donnie Wyatt, now a senior who will graduate this year.

Probably no other man has had such a profound effect on the lives of so many people in the Blue Springs community. As teacher, minister, husband, and father, he has given his unselfish devotion to each status. His efforts have helped thousands of young people to a better life and his influence has thus extended far beyond the community of Blue Springs.

In the presentation which will be made to Mr. Stillions, there will be the Latin inscription, "Exgisti monumentum aere perennius," meaning "You have completed a monument more enduring than bronze." Nothing could be more fitting to describe the life of this great teacher.

Payroll Study

EXTENSION OF REMARKS
OF
HON. FRANK T. BOW
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Thursday, April 28, 1960

Mr. BOW. Mr. Speaker, the proposal for a salary increase for postal workers appears to be heading toward a deadlock between those who believe circumstances require an immediate increase and those who wish to postpone action until we have the benefit of the BLS study of the entire Federal payroll structure.

In order to take care of the most pressing needs of the postal employees, while recognizing the wisdom of a general payroll revision, I suggest that we enact a

bill increasing postal salaries at once with a termination date of December 31, 1961.

Such a measure would assure that the next Congress will consider and act promptly upon recommendations for a general payroll revision which will then be available. I believe this assurance might overcome the steadfast opposition of those who now oppose a salary increase, and it may be the only way to avoid repetition of what occurred in 1957. The Congress will have ample time in 1961 to go into the pay structure thoroughly so that a sensible, fair, and equitable system can be established before the expiration date of the temporary increase I have recommended.

Old-Age Survivors and Disability Insurance—Past Major Changes in the Law

EXTENSION OF REMARKS
OF

HON. LAURENCE CURTIS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 28, 1960

Mr. CURTIS of Massachusetts. Mr. Speaker, in view of current proposals for changes in the social security law, I felt that Members and others might be interested in an excellent summary of past developments of this law as prepared for me by the Legislative Reference Service of the Library of Congress under the direction of Miss Helen E. Livingston of the Education and Public Welfare Division of that Service. I am therefore including it as part of my remarks.

BRIEF DESCRIPTION OF THE DEVELOPMENT OF THE OLD-AGE SURVIVORS AND DISABILITY INSURANCE LAW

The social security system provides two kinds of assistance for the aged, dependent children, and the severely disabled in this country: (1) a social insurance plan, commonly known as "social security," financed by tax contributions by workers and their employers and paying benefits on the basis of these contributions, and (2) Federal grants-in-aid for State plans for persons (including the blind) who can demonstrate need as defined by the State. This memo will be limited to a brief description of the development of the insurance, or social security plan.

In summary it could be said that three basic features of the social insurance program have remained unchanged since the system was established in 1935: (1) Benefits are paid as a matter of right to insured persons, without a need test; (2) the benefits are related to earnings, as contrasted with uniform or flat benefits to everyone; and (3) the system is financed entirely by equal payroll contributions for employers and employees (and related payments by the self-employed) as contrasted to systems financed from the general revenues. The system has always been on a self-supporting contributory basis (a requirement of the law since the 1950 amendments) without a general subsidy from the Federal Government.

The three major policy changes made by the Congress since 1935 were: (1) The shift of emphasis in 1939 from the private insurance principle based on individual equity to a family program through the payment of benefits to dependents and survivors rather than exclusively to the individual worker; (2) the change in 1950 from a plan primarily for workers in commerce and industry moving toward a universal plan for practically all individuals and families in the country dependent upon earnings of any kind; and (3) the addition of a new program for the severely disabled, accomplished by the disability freeze (a form of waiver of premium) in 1954, and by authorizing benefits for disabled persons aged 50 and over in 1956. Attached is a résumé of major features of the Social Security (OASI) Act showing changes made by the Congress since the system was first established in 1935.

MAJOR FEATURES OF THE SOCIAL SECURITY (OASI) PLAN SHOWING CHANGES MADE BY CONGRESS

Social Security Act of 1935 (Public Law 271, 74th Cong.)

Coverage: Workers under age 65 in commerce and industry (about 3 out of 5 of the labor force).

Type of benefit: Old-age benefits to the worker when he retired at or after age 65 together with cash-contribution refunds to survivors when the wage earner died and to living workers aged 65 who had not been in covered employment long enough to qualify for benefits.

Benefit amount: Weighted in favor of the worker with short service or low wages but increased for those who had contributed for many years.

Contribution rate: 1 percent each for employers and employees on wages up to $3,000 a year. [The original tax rate was scheduled to increase, by steps, to 3 percent each by 1949 but, through so-called tax freeze legislation by the Congress it was held at the 1-percent rate until 1950.]

Retirement test:[1] Benefits canceled by any earnings from regular employment.

Nineteen thirty-nine amendments (Public Law 379, 76th Cong.)

Coverage: Extend to workers over 65.

Type of benefit: Extended to certain dependents of retired workers (aged wives, children under 18) and survivors (widows and children under 18) of deceased workers.

Benefit amount: Revised to reduce emphasis on length of contributions but still gave credit for each year of service. "Money back" guarantee eliminated. [In effect deemphasizing these features in favor of dependent and survivor—or "family"—benefits.]

Average primary benefit at the end of 1941 (first year benefits were paid), $22.60.

Contribution rate: The change did not ultimately become effective because of the "tax freeze" noted above.

Retirement test:[1] Allowed earnings of $14.99 per month from covered employment with no loss of benefit.

Nineteen hundred and fifty amendments (Public Law 734, 81st Cong.)

Coverage: Considerably extended to some 10 million jobs, chiefly the nonfarm self-employed (except members of specified professions), regularly employed farm and domestic workers, employees of nonprofit institutions (on a group elective basis), and State and local government employees not covered by a retirement system (at the option of the employer).

Type of benefit: Extended to aged dependent husbands of women workers.

Benefit amount: Roughly doubled through a revised benefit formula (still weighted in favor of low-income workers), with a related increase for beneficiaries already retired. Repealed provision giving credit for each year of service, and related benefit to more recent earnings.

Average primary benefit prior to amendments was $43.86.

Contribution rate: 1½ percent each for employers and employees on wages up to $3,600; to rise, by steps to 3¼ percent each in 1970 and thereafter.[2]

Retirement test: Allowed earnings of $50 or less per month with no reduction in benefits, but benefit deducted for each month earnings exceeded this amount.

Nineteen hundred and fifty two amendments (Public Law 590, 82d Cong.)

Coverage: No change.

Type of benefit: No change.

Benefit amount: Increased benefits by about 15 percent (around $5). Average benefit in 1952: $49.25.

Contribution rate: No change.

Retirement test: Allowed earnings of $75 or less per month with no reduction in benefits, but benefit deducted for each month earnings exceeded this amount.

Nineteen hundred and fifty-four amendments (Public Law 761, 83d Cong.)

Coverage: Extended to another 10 million workers in the course of a year, including self-employed farmers, more domestic and farm workers, State and local government employees under retirement systems (at the option of the employer and the election of the group covered), ministers, and all self-employed professional groups previously excluded except lawyers, dentists, doctors, and other medical groups. (About 9 out of 10 workers in the labor force now covered.)

Type of benefit: The "disability freeze" provision—essentially a "waiver of premium" clause was adopted to maintain both the insured status of severely disabled workers at any age, and their benefit amount.

Benefit amounts: Increased by about 15 percent by a change in the benefit formula. Average old-age benefit: $59.14 at end of 1954.

Contribution rates: Increased to 2 percent each for employers and employees on wages up to $4,200 to increase to a maximum of 4 percent in 1975 and thereafter.

Retirement test: Allowed earnings of $1,200 a year, with one benefit deducted for each $80 or fraction thereof above this amount, except that no earnings could be deducted for any month in which earnings were $80 or less.

Nineteen hundred and fifty-six amendments (Public Law 880, 84th Cong.)

Coverage: Self-employed lawyers, dentists, and all medical groups (except physicians) and members of the uniformed services.

Type of benefit: Provided benefits for severely disabled persons aged 50 and over; age for women lowered to 62 paying full benefits for widows at that age but actuarially reduced benefits for widows and women workers unless they delay retirement to age 65.

Benefit amounts: No change.

Contribution rate: Increased to 2¼ percent each for employers and employees (the additional one-fourth percent to finance the disability benefits plan through a separate trust fund) to increase to a maximum of 4¼ percent in 1975 and thereafter.

Retirement test: No change.

Nineteen hundred and fifty-eight amendments (Public Law 85–840)

Coverage: Minor extensions.

Type of benefit: Provided benefits for the dependents of severely disabled persons aged 50 to 64, inclusive.

Benefit amounts: Increased by 7 percent. Average old-age benefit: $66.04 in late 1958.

Contribution rate: Increased to 2½ percent each for employer and employees on

[1] Also known as "work test" or "income limitation."

[2] The rate for the self-employed is 1½ times the employee rate.

wages up to $4,800 to increase, by steps, to 4½ percent in 1969 and thereafter.

Retirement test: No change except that no earnings can be deducted for any month in which earnings were $100 (formerly $80) or less.

Thirty-nine Thousand Two Hundred and Fifteen Floridians Answer Rogers' Questionnaire

EXTENSION OF REMARKS
OF
HON. PAUL G. ROGERS
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Thursday, April 28, 1960

Mr. ROGERS of Florida. Mr. Speaker, this year, as in the past, I sent out a questionnaire to the people of the Sixth District of Florida to seek their views on some of the issues expected to come before this session of Congress.

The results of this questionnaire should be of interest to all Members, and for that reason I ask that they be included in the RECORD today.

The questionnaire is printed in each newspaper in the district, and some direct mailing is done. It has grown during the last 6 years from an initial response of 3,000 to today's total of 39,215.

The poll represents the views of people in the 11 south Florida counties making up the sixth district.

On the gulf coast the fishing industry, farming, and cattle raising are chief occupations along with tourism. In this area there are several large developments of retired people from all over the country.

The central portion of the district includes Lake Okeechobee and the sugar producing area of Florida, in addition to some of her finest cattle ranches and truck farms.

Along the east coast of Florida the district includes citrus producing lands, tourist centers, and one of the Nation's chief sources of winter vegetables and flowers.

In addition to farming, cattle, citrus, and tourism the district has industry of all kinds from the manufacture of boats to heavy jet and rocket engines. Deep water ports handle imports and exports to many areas of the world.

With these facts in mind I believe that the poll represents a good cross section of thinking of the American people throughout the country, represented by business, labor, farmers, ranchers, and the retired.

The results of the poll this year are as follows:

RESULTS OF CONGRESSMAN PAUL G. ROGERS' ANNUAL QUESTIONNAIRE—TOTAL ANSWERS RECEIVED: 39,215

1. Do you favor a Federal fair trade bill which would authorize manufacturers of brand name merchandise to set minimum resale prices on such goods at the retail level? No, 22,747, 60 percent; yes, 15,165, 40 percent.

2. A Senate committee is presently investigating drug prices. Do you think the Federal Government should take action in this field? Yes, 32,699, 85 percent; no, 5,780, 15 percent.

3. Should the interest ceiling on long-term Government bonds be raised? Yes, 19,302, 54 percent; no, 16,442, 46 percent.

4. Proposals have been offered to raise the minimum wage from $1 to $1.25 and extend the coverage of the present law. Do you favor such a proposal? Yes, 23,903, 63 percent; no, 14,039, 37 percent.

5. Do you favor elimination of Federal price supports to farmers? Yes, 31,030, 83 percent; no, 6,597, 17 percent.

6. Do you favor a cut in foreign aid spending? Yes, 32,046, 85 percent; no, 5,655, 15 percent.

7. Do you favor using Federal funds for: (a) school construction: No, 19,375, 51 percent; yes, 18,616, 49 percent; (b) teachers' salaries: No, 24,718, 66 percent; yes, 12,736, 34 percent.

8. Do you favor my proposal by which our national debt would be reduced by not less than 1 percent each year? Yes, 36,545, 97 percent; no, 1,130, 3 percent.

Mundt Resolution Would Curtail Sheep and Lamb Imports

EXTENSION OF REMARKS
OF
HON. KARL E. MUNDT
OF SOUTH DAKOTA
IN THE SENATE OF THE UNITED STATES
Thursday, April 28, 1960

Mr. MUNDT. Mr. President, yesterday the Senate Committee on Agriculture and Forestry overwhelmingly approved a resolution which I introduced to convey to the U.S. Tariff Commission the sentiment of our committee that the American sheep and lamb industry is entitled to adequate protection against ruinous foreign imports.

For the information of the Congress and the country, I ask unanimous consent that my resolution be printed in the CONGRESSIONAL RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

COMMITTEE RESOLUTION AGREED TO APRIL 27, 1960, BY SENATE COMMITTEE ON AGRICULTURE AND FORESTRY FOR SUBMISSION TO THE U.S. TARIFF COMMISSION REGARDING LAMB AND MUTTON IMPORTS

Whereas this committee in 1954 and in 1958 reported out bills which were enacted by Congress to encourage the domestic production of 300 million pounds of shorn wool annually; and

Whereas this legislation provides for incentive payments on wool in order to encourage increased production and to meet costs of such production; and

Whereas in the enactment of this legislation this committee assumed that the lamb phase of the sheep industry would be operating in a free market without price supports; and

Whereas imports have shown a rapid increase in volume during the past 3 years growing from .81 million pounds of dressed lamb in 1956 to 9.5 million pounds of dressed lamb in 1959, and growing from .56 million pounds of dressed mutton in 1956 to 47.3 million pounds in 1959; and

Whereas imports have risen from practically 0 percent of our commercial lamb and mutton slaughter to 7.78 percent in only 3 years, which displays a trend that could become disastrous; and

Whereas live sheep and lamb imports in 1959 totaled 75,073 head including 27,000 head from Canada and approximately 48,000 head from Australia, the latter being the beginning of a regular movement of live lambs from that country; and

Whereas this greatly increased volume of imports is arriving here at prices considerably under those for domestic lamb and mutton, raised in countries where production costs are much lower than ours and with the majority of imports coming into the sensitive lamb price setting areas of New York, Chicago, and Los Angeles; and

Whereas this undue market pressure from imports has affected prices received by the American producers of lamb and mutton; and

Whereas there is abundant red meat production in the United States for domestic needs: Now, therefore, be it

Resolved, That it is the sense of this committee that remedial action should be taken under the escape clause of the Reciprocal Trade Agreements Act to provide adequate protection for, and to avert injury to, the domestic sheep industry.

The Businessman's Responsibility in Economic Growth

EXTENSION OF REMARKS
OF
HON. FRANK T. BOW
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Thursday, April 28, 1960

Mr. BOW. Mr. Speaker, it was my pleasure on Monday to accompany Hon. Frederick H. Mueller, the Secretary of Commerce, to Alliance where he addressed some 500 members of the Alliance Chamber of Commerce at a banquet. Both the Secretary and I were gratified by the large attendance in Alliance, and all present were impressed with his excellent address, the text of which I include with my remarks:

THE BUSINESSMAN'S RESPONSIBILITY IN ECONOMIC GROWTH

(By Secretary of Commerce Frederick H. Mueller)

This year marks the opening of the 1960–70 decade, fraught with potentials for the greatest era of good times in the annals of mankind and also clouded by the worry that civilization itself could perish in the disaster of nuclear ashes.

We stand at an unmarked junction of history. We must choose the right course. Yet, we have only experience, logic and faith as our roadmap.

Problems and opportunities—all affecting us in one way or another—are multiplying all over the globe. Every morning we ask, what next?

As economic power is the generator of our modern technological society, the Nation makes earnest demand on business for wise and courageous leadership. Not only in private industry, but also in public affairs.

Businessmen are wanted in government administration. But they also are urgently needed to keep tabs on government, to create better public understanding of the priceless value of free enterprise, and then to make such resulting public opinion heard in city hall, State house and in the National Capitol.

Public policies are being designed in this commencement year of the decade that might well decide the success of our economic system for the next 10 years. Our very survival as a nation depends on the

current might and growth of our free enterprise economy.

For members of a chamber of commerce or other businessmen to keep mum on vital public issues this year would be to abandon the defense of business and to desert civic responsibility.

What are some of the hazards that business should point out to the public?

One is concealed in the word growth. We all want growth; the danger is in artificial, inflation-fed growth.

Let me illustrate from history: Not so many years ago, the nearsighted complained that the last frontier had been reached and, therefore, economic growth no longer was possible. Their solution was to distribute the leftover wealth. But this stagnation theory was not in the American tradition of dynamic enterprise—and the people rejected such defeatism.

So a new set of dreamers concocted a new panacea, using a few socialistic drugs in the dose. They admitted that, after all, growth was necessary. But, they said, the way to achieve it was through government action. They argued that private initiative was washed up and that the businessman must step down and be replaced by the bureaucrat. Only big government, they claimed, could supply the power thrust of economic growth.

That false doctrine is being repeated on the stump in this election year. Some people with short memories are being fooled. They forget that the sky's-the-limit spending theories were tried before but history exposed their fallacy. Despite every pep pill in the medicine kit, unemployment in 1939 was more than 17 percent of the labor force. The 1930–40 decade was the only decade in our economic history that failed to grow. Only the outbreak of war with its war production saved the witch doctor prescription from complete repudiation.

Why should we swap the free initiative of free enterprise for Government interference with private action and Government burdens heaped on taxpayers?

I am proud to be here as a representative of the Eisenhower administration that endeavors to maintain a climate favorable to private enterprise. During the last 7 years, the American people have had more jobs, more new homes, new schools, new hospitals and higher income than in any previous 7 years.

And that unprecedented prosperity continues. Due to a strong surge of production, the gross national product for the first 3 months of this year at an annual rate hit the $500 billion alltime record mark, a rise of nearly $17 billion over the last quarter of 1959.

A very significant point is that although inventory accumulation after the steel strike was a factor, more than half of the overall gain went into consumption, fixed investment and other final uses, and represents basic growth. So, right now, we are actually in that half-a-trillion-dollar economy which we all have been anticipating so eagerly.

This is a solid foundation, characterized by stable prices, on which to build during the rest of the year.

New plant and equipment outlays, consumer spending and other indicators justify a realistic, down-to-earth mood of calm confidence for the rest of 1960. My forecast is this: Not an inflation-fed boom, but a record year—the best year so far.

The administration will do everything within its power to advance prosperity by striving to maintain a climate favorable to private enterprise.

We shall continue to alert the public to the necessity of keeping the budget in balance, with the surplus used to reduce the $290 billion national debt. We shall continue to oppose unnecessary projects financed through deficit spending, which would indefinitely postpone tax cuts. We shall never quit in our opposition to those who would rather satisfy well-meaning or grasping pressure groups than save the entire people from the terrible disaster of inflation that would be followed by the universal misery of depression.

We welcome, as always, congressional bipartisan support for fiscal integrity, and we are getting it.

We will not play partisan politics with public duty.

So much for the current situation. Where do we go from here?

Let us look ahead to some of the possibilities of economic growth in the 1960–70 decade.

We are enjoying the bounties of the technological revolution, still in its infancy. It required millions of years for anthropoids to evolve into cavemen. The stone age lasted about 500,000 years. The age of steam began less than 200 years ago. The age of petroleum and electricity started in the last century. Yet crowded into this 20th century have come the electronic, nuclear, and space ages—all three.

If you should list the names of every scientist since the dawn of time you would find that 9 out of every 10 named belong to our generation. Within the lifespan of persons now living have arrived more technological marvels than in all previous history. And as the explorations of man range from the minuscule subatomic particles to the vast reaches of the universe, marvels beyond imagination will be born and utilized for the benefit of mankind.

As Secretary of Commerce I am a constant eyewitness of man's creative genius. Our Patent Office has issued and now has on file around 3 million patents, developed since the system was inaugurated in the days of George Washington. Right now it is receiving 350 patent applications every working day. We are experimenting with electronic memory disks to speed patent search and grant.

Heading toward our Patent Office are the fruits of research. As the last decade began, only $2.8 billion were spent on research and development. Today the private sector and the Government are investing annually more than $12 billion, which will be transformed into new and better tools and products.

The great technological agencies of the Commerce Department are initiating many significant modern improvements for sound growth. We are completing the world's first nuclear-powered merchant ship. We are translating the messages and reproducing the photography of manmade satellites to find ways to improve weather forecasting. We are bouncing radio rays off meteor trails to develop better broadcasting. We are probing the ocean depths for ideas to reclaim long lost dust of precious minerals.

In discussing future research and invention, one of our bright young scientists at the National Bureau of Standards said, "When the decade of the sixties has passed into history, we will perhaps wonder why we were so timid in not predicting even greater things."

Such expectations should thrill the imagination. But such responsibility also should stir our sense of duty.

We are the promoters of a technology which can further enrich the economy. We are also custodians of an economy that can create tremendous technological progress. One factor cannot exist in modern life without the other. They are interdependent. Wreck the economy and the act also wrecks the science developed and financed by the economy.

Let us guard both precious blessings.

I can conceive of no more important duty this year than for businessmen not only to mind the store but also to mind the Government.

Advancing upon business are forces that could cause serious trouble for all private enterprise unless all its defendants quit the solo dancing, pool their resources, and act together in the common cause.

"Eternal vigilance," said Thomas Jefferson, "is the price of liberty."

All of us together must pay that price if we are to save our free market system. You and I and all who believe in a sound economy must do more to alert the general public to the measureless value of private enterprise.

We must do more to expose and refute false economic doctrines.

We must fight harder, longer, and better to protect sound economic growth from the knockout drops of leftwing theorists and the squanderlust of spendthrifts.

We must be wise, active, and dedicated in doing a better job in building a stronger and better America for ourselves and the coming generation.

National Defense Education Act

EXTENSION OF REMARKS
OF

HON. TORBERT H. MACDONALD

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 28, 1960

Mr. MACDONALD. Mr. Speaker, I have introduced today a bill which would amend the National Defense Education Act in order to give added incentive and educational opportunity to those young men and women in this country who plan to serve the Federal Government as members of the U.S. Foreign Service and related agencies.

The National Defense Education Act serves the worthwhile purpose of helping to meet the needs of our country in this period of international tension. The act presently provides for the expansion of educational facilities and scholarship assistance in the sciences and teacher training.

The state of international tension demands these expanded facilities and the resulting means to secure a greater number of qualified scientists and teachers. But the same international tension certainly demands the expansion and continued development of a qualified personnel to conduct our foreign relations. These needs can be met by the existing private educational institutions in the field of international relations and through our encouragement and support for those institutions.

I am pleased to represent the district of one of the foremost institutions in this field—the world famous Fletcher School of Law and Diplomacy, a graduate school in international affairs at Tufts University in Medford, Mass. The Fletcher School has for 26 years provided the State Department and other Government departments and agencies with highly qualified graduates who today ably help to conduct our foreign relations.

The bill I have introduced today would amend title IV of the National Defense Education Act. Title IV presently provides for scholarship assistance to graduate students who are pursuing a graduate course of study leading toward a

teaching career. The amendment I have introduced would provide for scholarship assistance to graduate students who are pursuing a course of study leading toward enrollment in our Foreign Service.

The provisions of my bill encourage those highly capable students who have decided on a career in the foreign relations agencies after having concentrated in other fields on the undergraduate level. Through aid and encouragement to the present private educational institutions in this field the need which is so apparent for qualified personnel to formulate and execute our foreign policy can and will be met. It is, therefore, my hope that this bill will soon be enacted into law.

Ways and Means Committee Amendments to H.R. 5

EXTENSION OF REMARKS
OF

HON. HALE BOGGS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 28, 1960

Mr. BOGGS. Mr. Speaker, under leave to extend my remarks, I wish to bring to the attention of the House that the Committee on Ways and Means has today adopted two amendments to H.R. 5, the Foreign Investment Incentive Tax Act. The committee proposes to offer these amendments to the House when the House resumes consideration of H.R. 5. In view of the fact that it is expected that the House will resume consideration of H.R. 5 in the very near future, I am submitting the text of these amendments as well as the text of a press release issued by Chairman WILBUR D. MILLS in explanation of the committee amendments. I expect to submit at an early date a full, technical discussion of these amendments.

As pointed out in the press release, the major amendment would limit the provisions of the bill to the less developed countries. This amendment follows the recommendation of the Treasury Department and of the President in his budget message this year.

The text of the committee amendments and Chairman MILLS' press release follows:

Chairman WILBUR D. MILLS, Democrat, of Arkansas, Committee on Ways and Means, House of Representatives, today announced that the Committee on Ways and Means had adopted two amendments to H.R. 5, the Foreign Investment Incentive Tax Act, introduced by the Honorable HALE BOGGS, Democrat, of Louisiana. Chairman MILLS said that the committee would offer these amendments to the House when the House resumes consideration of H.R. 5.

The first amendment would limit the provisions of H.R. 5 to income earned and reinvested in less developed countries and would also eliminate the so-called gross-up with respect to the dividend income of the Foreign Business Corporation. The second amendment would require corporations to meet the labor standards of the foreign country in which they are operating in order to qualify under the provisions of H.R. 5.

An explanation of the committee amendments follows:

1. (a) Limitation to less developed countries.

The committee amendment limiting the provisions of H.R. 5 to income earned in less developed countries follows the recommendation of the Treasury Department. Under the amendment, in order for a corporation to qualify as a Foreign Business Corporation and in order for a subsidiary of the Foreign Business Corporation to qualify, 90 percent or more of the gross income must be from sources within less developed countries. The term "less developed country" is defined as any foreign country, other than any area within the Sino-Soviet bloc, which the President of the United States has designated as a less developed country, except that the President is not permitted to designate any of the following countries as a less developed country: Austria, Belgium, Canada, Denmark, France, Federal Republic of Germany, Italy, Japan, Luxembourg, Monaco, Netherlands, Norway, Portugal, Sweden, Switzerland, United Kingdom of Great Britain and Northern Ireland. The term "less developed country" is defined so it may include oversea territories, departments, provinces or possessions without including the mother country.

The committee amendment also provides that the distribution rules relating to investment and payroll situated outside the United States and to prohibited investments in the United States are amended to refer to investment and payroll situated in the less developed countries and to prohibited investments outside of the less developed countries.

(b) Elimination of gross-up.

This committee amendment also provided for the elimination of the gross-up with respect to the dividend income received by foreign business corporations from foreign subsidiaries. The committee has before it a bill, H.R. 10859, on which public hearings have been held, which would provide for the gross-up with respect to the dividend income received by domestic corporations generally. The committee's decision, therefore, was to treat the foreign business corporation on a comparable basis, with respect to the "gross-up," with all other domestic corporations earning dividend income from foreign sources.

2. Substandard labor conditions.

This amendment provides that a foreign business corporation or a qualified subsidiary of the foreign business corporation will be disqualified for any taxable year for which the Secretary of Labor has determined that the corporation has operated in any less developed country under substandard labor conditions. Any such determination by the Secretary of Labor is reviewable by the courts.

The concept of substandard labor conditions is defined in the amendment as a situation in which the corporation's aggregate remuneration (including remuneration other than in money) for employment is below the minimum standards required under the laws of the country concerned. If there are no such minimum standards, the amendment provides alternative tests. The first alternative test is the average standards prevailing for other employers in the same industry in such country or, if there are no other employers in the same industry, the average standards prevailing for other employers in similar industries. If the first alternative test is not available, then the second alternative test will be used by the Secretary of Labor, namely, where the remuneration is substantially below the standards generally prevailing in the industries of the country concerned.

The amendment provides that an investigation can be instituted by the Secretary of Labor on his own initiative or on application by any affected domestic party.

AMENDMENTS TO H.R. 5 (LESS DEVELOPED COUNTRIES AND ELIMINATION OF GROSS-UP)

Page 23, strike out the period at the end of the first line after line 17 and insert: ", etc."

Page 24, strike out the period at the end of line 1 and insert: ", ETC."

Page 24, strike out lines 7 and 8 and insert:

"(1) It derives 90 percent or more of its gross income from sources within less developed countries (within the meaning of subsection (e))."

Page 24, lines 23 and 24, strike out "without the United States" and insert: "within less developed countries".

Page 25, line 2, strike out "without the United States" and insert: "within less developed countries".

Page 27, line 13, strike out "without the United States" and insert: "within less developed countries".

Page 27, lines 22 and 23, strike out "FOREIGN" and insert: "LESS DEVELOPED COUNTRY".

Page 29, after line 8, insert:

"(e) LESS DEVELOPED COUNTRY DEFINED; ALLOCATION OF ITEMS TO SOURCES WITHIN OR WITHOUT LESS DEVELOPED COUNTRIES.—For purposes of this subpart—

"(1) LESS DEVELOPED COUNTRY DEFINED.—A less developed country is any foreign country (other than an area within the Sino-Soviet bloc) or any possession of the United States with respect to which, on the first day of the taxable year, there is in effect an Executive order by the President of the United States designating such country or possession as an economically less developed country for purposes of this subpart. For purposes of the preceding sentence, an overseas territory, department, province, or possession may be treated as a separate country.

"(2) CERTAIN COUNTRIES EXCLUDED.—No designation shall be made under paragraph (1) with respect to—Austria, Belgium, Canada, Denmark, France, Federal Republic of Germany, Italy, Japan, Luxembourg, Monaco, Netherlands, Norway, Portugal, Sweden, Switzerland, United Kingdom of Great Britain and Northern Ireland.

"(3) SOURCE RULES.—Items of gross income, expenses, losses, and deductions shall be allocated to sources within or without less developed countries under regulations prescribed by the Secretary or his delegate. Such regulations shall, to the extent the Secretary or his delegate finds practicable, be consistent with the principles of part I of this subchapter (relating to determination of sources of income)."

Page 29, strike out lines 20 and 21 and insert:

"(A) the gross income from sources without less developed countries, and".

Page 30, strike out line 3 and all that follows through line 4 on page 31, and insert:

"(2) The taxable income of a foreign business corporation shall be the amount determined under paragraph (1), minus the sum of the deductions allowed by this chapter which are allocable to sources without less developed countries.

"(b) REINVESTED FOREIGN INCOME DEFINED.—

"(1) IN GENERAL.—For purposes of this subpart, the term 'reinvested foreign income' means the taxable income from sources within less developed countries.

"(2) SPECIAL RULES.—In determining the reinvested foreign income for any taxable year—

"(A) No deduction shall be allowed for income, war profits, and excess profits taxes

which are allocable to sources within less developed countries and which are paid or accrued to any foreign country or to any possession of the United States.

"(B) If the net long-term capital gain from sources within less developed countries exceeds the net".

Page 33, strike out lines 4 through 8, and insert:

"(ii) the ratable portion of the income, war profits, and excess profits taxes which are allocable to sources within less developed countries and which are paid or accrued to foreign countries and possessions of the United States during the taxable year of the addition out of which the subtraction is made."

Page 34, strike out lines 14 and 15, and insert:

"(b) DISTRIBUTION BY REASON OF INVESTMENT AND PAYROLL WITHOUT LESS DEVELOPED COUNTRIES.—"

Page 34, line 25, strike out "within the United States" and insert: "without less developed countries".

Page 35, line 3, strike out "within the United States" and insert: "without less developed countries".

Page 37, line 20, strike out "without the United States" and insert: "within less developed countries".

Page 42, strike out lines 16 through 22 and insert:

"(A) any income, war profits, and excess profits taxes which are allocable to sources within less developed countries and which are paid or accrued during any taxable year to any foreign country or to any possession of the United States by a foreign business corporation shall not (except as otherwise provided by this subsection) be taken into account for such taxable year, and".

Page 43, beginning in line 1, strike out "such taxes paid or accrued to foreign countries and possessions of the United States" and insert: "such taxes so allocable and so paid or accrued".

Page 44, after line 3, insert:

"For purposes of paragraph (2), the taxable income from sources without the United States shall be determined by including the amount subtracted from the reinvested foreign income account for the taxable year and, if the corporation is a foreign business corporation for the taxable year, by excluding the items referred to in section 952(b) (relating to definition of reinvestment foreign income)."

Page 44, strike out line 10 and all that follows through line 2 on page 45, and insert:

"(c) FOREIGN TAXES INCLUDE DEEMED TAXES.—For purposes of this subpart, any reference to income, war profits, and excess profits taxes paid or accrued to any foreign country or to any possession of the United States shall be treated as including such taxes deemed paid under section 902."

Page 46, line 17, strike out "without the United States" and insert: "within less developed countries".

Page 47, lines 6 and 7, strike out "without the United States" and insert: "within less developed countries".

Page 48, line 1, strike out "a foreign country" and insert: "a less developed country".

Page 48, line 13, strike out "without the United States" and insert: "within less developed countries".

Page 50, strike out "foreign" in lines 5, 14, and 19, and insert: "less developed".

Page 52, line 15, strike out "paid" and insert: "which are allocable to sources within less developed countries and which are paid".

Page 54, lines 12 and 13, strike out "without the United States" and insert: "within less developed countries (within the meaning of section 951(e))".

Page 58, line 19, strike out "without the United States" and insert: "within less developed countries (within the meaning of section 951(e))".

AMENDMENT TO H.R. 5 (SUBSTANDARD LABOR CONDITIONS)

Page 29, after line 8, insert:

"(f) DISQUALIFICATION FOR SUBSTANDARD LABOR CONDITIONS—

"(1) IN GENERAL.—For purposes of this subpart, a corporation referred to in subsection (a) or (c) shall be treated as an ineligible corporation within the meaning of subsection (d) for any taxable year during which it operates in any less developed country under substandard labor conditions. Any determination that this paragraph applies to any corporation for any taxable year shall be made by the Secretary of Labor. Any such determination shall be final, except that it shall be subject to review by the courts (including the Tax Court of the United States) in a proceeding for the recovery of income tax or for a redetermination of a deficiency in respect of income tax.

"(2) SUBSTANDARD LABOR CONDITIONS.—For purposes of this subsection, the term 'substandard labor conditions' means aggregate remuneration (including remuneration other than in money) for employment which is—

"(A) below the minimum standards required under the laws of the country concerned, or

"(B) if there are no such minimum standards—

"(i) below the average standards prevailing for other employers in the same industry in such country or (if there are no other employers in the same industry) for other employers in similar industries in such country, or

"(ii) where there are no average standards referred to in clause (i), substantially below the standards generally prevailing in the industries of such country.

"(3) DETERMINATION AND CERTIFICATION BY SECRETARY OF LABOR.—

"(A) INVESTIGATIONS.—On application of any affected domestic party (if the Secretary of Labor has reason to believe that the conditions described in this subparagraph exist), or on his own initiative, the Secretary of Labor shall make an investigation to determine whether any corporation referred to in subsection (a) or (c) has operated in any less developed country under substandard labor conditions.

"(B) ATTENDANCE OF WITNESSES; PRODUCTION OF DOCUMENTS.—For the purpose of any investigation under subparagraph (A), the provisions of sections 9 and 10 (relating to the attendance of witnesses and the production of books, papers, and documents) of the Federal Trade Commission Act of September 16, 1914, as amended (15 U.S.C., secs. 49 and 50), are hereby made applicable to the jurisdiction, powers, and duties of the Secretary of Labor or any officers designated by him.

"(C) CERTIFICATION.—If, pursuant to any investigation under subparagraph (A), the Secretary of Labor determines that a corporation has operated in any less developed country under substandard labor conditions during any taxable year, he shall promptly certify such determination to the Secretary of the Treasury or his delegate.

"(D) ADMINISTRATIVE PROCEDURE ACT INAPPLICABLE.—The Administrative Procedure Act shall not apply with respect to investigations and determinations by the Secretary of Labor under this subsection.

"(E) TAXABLE YEARS AFFECTED.—No determination shall be made by the Secretary of Labor with respect to any corporation for any taxable year unless, during such taxable year, the taxpayer has been notified that an investigation under subparagraph (A) has begun, or is continuing, with respect to such corporation for such year.

"(F) REGULATIONS.—The Secretary of Labor may prescribe such regulations as may be necessary to the performance of his functions under this subsection.

"(4) CROSS REFERENCES.—

"For provisions relating to the authority of the Secretary or his delegate to require the taxpayer to furnish information, see subsection (a)(5) and the last sentence of subsection (c)(1)."

Flood Control—Blackstone River Basin

EXTENSION OF REMARKS

OF

HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 28, 1960

Mr. PHILBIN. Mr. Speaker, with reference to the general flood control project in the Blackstone River Basin in my district, I am informed that Gen. Alden K. Sibley, able and distinguished head of the Boston office of the Corps of Engineers, held recent hearings, March 29, 1960, at Uxbridge, Mass.

The purpose of the hearings was to determine the needs and desires of local interests relative to further measures for flood control and allied purposes in the Blackstone River Basin, in addition to the currently authorized and recommended projects.

I might mention at this time that the latter projects include West Hill Dam and Reservoir now under construction, the Woonsocket local protection project and Worcester diversion tunnel which are essentially completed, the Pawtucket flood wall which is presently in an inactive status, and protection for the lower section of Woonsocket which is currently being considered for authorization by the Congress.

I may also state that these projects and current studies are part of an overall program for the area which was inaugurated after the catastrophic 1955 floods, the basic projects of which have already been completed, or are under construction.

The additional projects projected at the hearing, and contemplated by those of us who have been interested in the completion of flood control for this area, include additional work protection projects, clearing, widening, and deepening the Blackstone River in several localities, and construction of additional reservoirs.

Channel improvement projects were suggested for the Blackstone River from the Rice City Dam in Uxbridge to the Rhode Island State line, the Rockdale and Riverdale sections of Northbridge, the Skull Rock Bridge area in Uxbridge, and in the vicinity of the drive-in theater in Lonsdale, R.I.

Suggestions and proposals also included installation of crest gates at the Rice City Dam in Uxbridge and the Kupfer Bros. Dam in Northbridge, enlargement of the storage capacity behind the Kupfer Bros. Dam and con-

struction of a floodwall to protect the mill at that point.

Increased bridge capacity at Millville Road and Mendon Street in Uxbridge was also recommended. Additional flood control reservoirs in the Mumford River and tributary brooks in Uxbridge and Douglas were also requested.

In my capacity as chairman of the Massachusetts Delegation Subcommittee on Flood Control and Protection established after the 1955 floods, I have given most careful attention to the overall program and proposed new projects which, we hope, will, in effect, provide necessary safeguards against future floods.

In that connection, General Sibley of the Engineers has given extended and most effective attention to all these problems, and has assured me that the suggestions for additional improvements will be given careful consideration in his report on the Blackstone River which is scheduled for completion this year.

I may state again, as I have done so many times before, that without the cooperation and invaluable aid of the Army Engineers these tremendously vital projects could not have been completed in such a timely and effective manner, and I am privileged indeed to extend once more, in behalf of my constituency, as well as other people in our State and area, and I am sure for the Massachusetts delegation, our profound gratitude.

Certainly an overriding factor in the completion of the general flood control program in the area has been the consideration and timely assistance rendered by the House Appropriations Committee, as well as its counterpart in the other body, and I am proud indeed that the Members of the House and the Congress have expressed their confidence in the overall program and have given us assistance and unwavering support, thus making possible the great progress that has been made in protecting our State and neighboring States from the ravages of floodwaters that periodically visit the area.

It is my hope and expectation that, with continuing cooperation by all of the agencies and officials concerned at local, State, and Federal levels, we will continue to make substantial headway toward maximum protection for the entire area, and that is surely an end which will not only have the wholehearted approval of our people, but will be very deeply appreciated by them.

Amendments to Small Business Investment Act of 1958

EXTENSION OF REMARKS
OF
HON. JOE L. EVINS
OF TENNESSEE
IN THE HOUSE OF REPRESENTATIVES
Thursday, April 28, 1960

Mr. EVINS. Mr. Speaker, earlier this year, a subcommittee of the Committee on Banking and Currency, under the chairmanship of the Honorable WRIGHT PATMAN, held hearings on proposed amendments to the Small Business Investment Act of 1958 with particular reference to S. 2611 and various House bills, including H.R. 8096 which I introduced on this subject. The experience achieved under the act indicates that certain amendments are necessary in order that the program may be properly effectuated. During these hearings extensive testimony was given by Senator JOHN SPARKMAN, the very able chairman of the Senate Small Business Committee; and as chairman of Subcommittee No. 1 of the House Small Business Committee I also presented a statement.

Because of the importance of this program I include, under leave granted, Senator SPARKMAN'S and my own statement in the CONGRESSIONAL RECORD. The statements follow:

TESTIMONY OF SENATOR JOHN SPARKMAN, DEMOCRAT, OF ALABAMA, CHAIRMAN, SENATE SMALL BUSINESS COMMITTEE BEFORE SUBCOMMITTEE NO. 3, HOUSE BANKING AND CURRENCY COMMITTEE ON S. 2611

Mr. Chairman and members of this subcommittee, thank you for your kind invitation to appear before you today to discuss amendments to the Small Business Investment Act of 1958. It is always a pleasure to take part in the continuing cooperative efforts involving the Banking and Currency Committees and the Small Business Committees of the House of Representatives and the Senate.

Mr. Chairman, you and I have long been ardent advocates of the capital bank or investment company concept and I am hopeful that the hearings held 2 weeks ago by our Small Business Committee and these hearings this week by your subcommittee will inject a new burst of enthusiasm and activity in the 18-month-old small business investment company program.

The honeymoon is over on this program, and has been for about 6 months. Bitter and disillusioned attacks on the administration of the act have emanated from leading financial writers since that time, replacing an area of hopeful good feeling which occurred during most of the year following the enactment of the legislation in August, 1958. The program has been called an appalling flop, strangling in redtape.

About 6 months ago, the Senate Small Business Committee decided to conduct a field study of the program to check on this criticism. In addition to discussions with the Administrator and his aids, our counsel have traveled over most of the country discussing the act and its administration with the small business investment companies licensed under the act, prospective organizers of the SBIC's and with the regional personnel of the Small Business Administration, and particularly with its investment division officers in each region.

During our hearings last month, a broad cross section of the small business investment companies and the proponents testified, together with the Administrator and his aids. The committee presently has a report in an advanced stage of preparation, but it, as well as printed copies of the testimony, will not be available for another week or so.

Consequently, my testimony here represents my own views at this time, although I believe that most of the members, at least, of my committee, will share these views after they have had an opportunity to review the hearings, staff field memorandums and the draft report.

May I say just a word with respect to our findings on the charges that redtape is ruining the new program and that it is an appalling flop.

The caution displayed in late 1958 because of fears the "fast buck" boys would invade the program was not only understandable, but also commendable, to my way of thinking. But, as I said at our hearings, this caution has tended to degenerate into an ultraconservative approach to administration as conditions now stand. There is now no phalanx of shady operators trying to knock down the gates. A high type of men, of great vision and courage, are, generally speaking, in control of the SBIC's.

Obstacles have been placed in their way needlessly. The law has been strictly construed; the rules adopted by the SBA have been similarly stringent. Worse than that, however, these rules, or redtape, have not been "currently published in the Federal Register" as required by law.

This failure to publish the rules of the game, as much as the restrictive contents of the regulations themselves, has created an undercurrent of resentment and has produced unnecessary delays.

Turning to the overall state of the program, I feel it is no longer quite fair to characterize it as a complete failure. A hopeful beginning has been made. On the other hand, it is certainly not yet the outstanding success we all visualized and desired when we passed the act. It needs both legislative shoring-up and courageous, flexible, and imaginative administration.

Therefore, I am sure that our committee will make it clear that we expect those responsible for officially guiding the program to proceed with both diligence and aggressiveness. If your group reaches similar conclusions, I hope you will join with us in making the legislative intent crystal clear.

S. 2611

Our committee strongly believes that the enactment of S. 2611 will mark real progress in removing some of the most obvious bugs in this new mechanism. We were delighted when the Senate passed it last September, and I wish to urge upon you the favorable consideration of the two major and two minor provisions contained in the bill.

During our entire study, we found no opposition at all to S. 2611. On the contrary, everyone was united in the belief that these changes would improve the program. The added flexibility given to SBIC's to negotiate any form of equity investment with small businesses and the removal of the requirement for companies receiving funds to purchase stock in the SBIC are both important, noncontroversial first steps in our legislative campaign to make the 1958 act live up to its full promise.

Further amendments to S. 2611

I am convinced, however, that the changes presently embodied in S. 2611 are in themselves not sufficient to spur any vast new activity in this most important program. At first blush, the figures on the first year and a half of the Small Business Investment Act seem significant; studied more carefully, however, the $40 million of private funds now invested in SBIC's shrinks to Lilliputian dimensions when measured against the $800 million of section 7 loans SBA has made and against the $6 billion which, according to the Federal Reserve Board, has been invested in the 1 million new businesses added to the business population since the end of World War II.

In the pages to follow, I shall spell out five specific recommendations which, I strongly believe, will convince small business investment companies and their organizers of the financial soundness of the program and give them every incentive to

bend their efforts to closing the critical equity capital and long-term credit gap which has for so long hobbled successful and worthy small businesses. I shall also make one legislative proposal designed to keep usury out of the program.

Briefly, I recommend these positive steps:

1. The leverage of SBIC's should be bettered through increasing the amount of SBA funds available under sections 302 and 303.

2. Restricted stock options should be allowed by law so SBIC's may attract and keep the highly qualified managers they require.

3. The inherent risks in this program should be recognized through a statutory tax deductible bad debt reserve allowing a measure of tax deferral.

4. As is the case for mutual funds, SBIC's should be allowed to pass through capital gains.

5. Perhaps SBIC's should be enabled to utilize their skills and offset administrative and fixed costs by participation in SBA loans.

These changes should make it easier and more profitable to organize and operate small business investment companies. Therefore, I strongly urge legislative action to remove the taint of usury from the program. SBA now allows investment companies to charge up to 15 percent interest from small business borrowers. I cry out against such unconscionable rates and propose to set a legal maximum.

STATEMENT OF HON. JOE L. EVINS, A REPRESENTATIVE IN CONGRESS FROM THE STATE OF TENNESSEE

Mr. Chairman and members of the committee, I appreciate the opportunity to appear before you and to testify in regard to amendments to the Small Business Investment Act which the committee has under consideration.

As you know, I have the honor to serve as chairman of Subcommittee No. 1 of the House Select Committee on Small Business which is charged with the responsibility of reviewing the operations of the Small Business Administration. I have been asked to appear and present a statement before you in my capacity as chairman of Subcommittee No. 1.

During May and August of last year, extensive hearings were held by Subcommittee No. 1 on the organization and operation of the Small Business Administration with especial attention being given to the administration of the Small Business Investment Act of 1958. As a result of those hearings and subsequent investigation by the subcommittee staff, our subcommittee issued a report (H. Rept. 1252), which was unanimously approved by the subcommittee and by the full committee and submitted by our chairman—Chairman PATMAN—to the Speaker on February 8, 1960. Chapter II of this report deals completely with the Small Business Investment Act of 1958 and contains the conclusions and recommendations of the subcommittee.

I wish to discuss our committee's recommendations pertaining to amendments to the act as set out in the report. It is my understanding that this committee has before it S. 2611 and other bills to amend the Small Business Investment Act of 1958. I understand that one of these bills is H.R. 8096, which I was pleased to introduce on July 6, 1959, subsequent to our first hearings on these matters.

Let me state at the outset that, although the report of Subcommittee No. 1 of the House Small Business Committee and this statement will contain recommendations for some changes in the act, it is my feeling and it was the conclusion of Subcommittee No. 1 that there was nothing in the original act itself, if properly implemented which would have prevented this program from progressing as intended by Congress. The Small Business Investment Act of 1958 was and is a good bill. The purpose and intent of the act is good. It offered and still offers an opportunity for great aid to the small business economy of the Nation. The authors of the bill used imagination and a sound basic philosophy in sponsoring this legislation.

As this committee knows this act is not working out quite as most of us imagined and hoped. I think that when this legislation was introduced in the first place, we thought that groups of small businessmen or local development companies might take advantage of this legislation to organize investment companies using their own funds partly and partly using SBA funds as provided in the legislation. Such an investment company would have been sort of a small business cooperative and all of the small businesses involved undoubtedly would have been pleased to own stock in it. Furthermore, these purchasers of stock would have served to provide an influx of working capital and would have guaranteed that they would have always operated with small business in mind.

As we know, the SBA did not see fit to encourage this type of what are called pro bono publico companies. Instead, it has encouraged the formation of these banker type investment companies. Some of them are completely owned by banks. I am advised that 29 of the first 79 licensed investment companies are owned wholly or in part by banks. The SBA advises that 12 of these are actually owned by banks and the remainder of the 29 are tied in with banks through common top officials and, of course, this number does not take into consideration those which might be tied in with banks through other common interests.

Now, I still think and believe that the pro bono publico type of investment company should be encouraged and I certainly hope that we will see the development of some of these kinds of investment companies yet. Meanwhile, we are faced with the fact that we have established now a number of these private investment companies and we are also faced with the problem of trying to make them work effectively. I think it must now be realized that with the type of companies that have been organized the major incentive is profitmaking and these companies will have to make money if they are going to be of any benefit to the small business economy of the Nation.

The testimony we have received from these investment companies and the SBA is unanimous that they need certain changes to be effective. Our subcommittee has, therefore, in order to supply the SBA and the investment companies with the tools they say they require, made some 10 recommendations pertaining to the Small Business Investment Act—3 or 4 relate to administrative changes. Our committee is recommending some six changes affecting amendments to the act.

Recommendation I is solely administrative and as a result, I will pass over it.

"Recommendation II: The Investment Company Act of 1940 and filings with the SEC: Consideration should be given to amending section 307 of the Small Business Investment Act of 1958 in order that subsection (c), which provides for certain exemptions under the Investment Company Act of 1940, be deleted and a provision inserted therein providing that these small business investment companies are not to be construed by law as being subject to the Investment Company Act of 1940.

"Meanwhile, the SBA and the Securities and Exchange Commission should continue efforts to coordinate their jurisdictional and administrative functions in such a way as will eliminate redtape and duplications of effort in order to facilitate the purposes of the act in the public interest."

It is recognized that the Security Act of 1933 with its disclosure mandate is a necessary control over the investment companies. But the Investment Company Act of 1940 is essentially a regulatory act and it is felt that it was not the original intent that it should apply to the type of investment companies which are created under the Small Business Investment Act of 1958. The constant day-to-day control that the SBA has over the investment companies should be sufficient regulation, the type which would be provided by the Investment Company Act of 1940.

H.R. 8096, which is now before you, contains an amendment which would exclude these small business investment companies from the Investment Company Act of 1940. S. 2611 does not contain such a provision.

"Recommendation III: Financing under section 302(a) and 303(b)—interest rate: The SBA should discard any policy it might have which would give preference to the licensing of small business investment companies which do not request Government funds for initial capitalization; and further that the SBA discontinue discouraging the furnishing of Government funds, authorized and appropriated by Congress, to these investment companies as expressed in the Small Business Act and the Small Business Investment Act.

"Consideration should also be given to amending section 302(a) and section 303(b) of the Small Business Investment Act to provide that the funds advanced by the SBA to small business investment companies should be furnished at a rate equal to the rate charged the Small Business Administration by the U.S. Treasury for said funds, plus a fraction of 1 percent for overhead cost. It is recognized that this would probably entail a change in the bookkeeping method by which the SBA is financed through the Treasury Department.

"It is further recommended that the SBA not consider the increasing of the interest rate on section 302(a) and section 303(b) funds because of the increased market. It is the opinion of the subcommittee that since the rate was set at 5 percent when the cost from the Treasury was 2⅜ percent, the initial and interim increase should be sufficient and the line held if the provisions of the act are to be meaningful and effective."

Concerning this matter of interest rates on funds supplied to investment companies by the SBA, the present rate of 5 percent is not now out of line. But, at the time this rate was first established by SBA the situation was somewhat different—the interest rate being paid the Treasury by SBA under section 4(c) of the act was set at 2⅜ percent for fiscal year 1959. As we all know, with the drastic jump of interest rates during the past year and with the Treasury now charging the SBA 4⅜ percent for the money it obtains during the fiscal year, the 5-percent rate now charged by SBA is now more realistic and the provision in H.R. 8096 which would provide for pinning the rate the SBA would charge down to one-half of 1 percent above the cost from the Treasury is no longer of great concern; that is assuming that the SBA will not raise the rate of interest which is charged the small business investment companies. But, it is feared by some that if the SBA would set that rate at 5 percent when the cost of the money from the Treasury was 2⅜ percent, then they might increase this 5-percent rate since the rate charged now by the Treasury is 4⅜ percent. It is hoped that this will not be done. Also it is hoped that the interest rates will decline sometime within the near future and when they do so if the SBA still insists on maintaining a 5-percent rate then the principle incorporated in this proposed amend-

ment (H.R. 8096) would then again become of extreme importance. In short, the need of the amendment is no longer immediately necessary, but the principle on which it is based still exists.

"Recommendation IV: Provision of equity capital for small business concerns under section 304: Section 304 should be amended in such a manner as to give the investment companies more flexibility in supplying equity capital to the small business concerns. An acceptable method should be sought whereby a small business concern might repurchase its equity from the investment companies.

"Consideration should be given to amending section 304(c)(2) in order to provide that the small business concerns will agree not to incur any additional indebtedness except open account or short-term indebtedness without first securing the approval of the investment company and giving this company the first opportunity to finance this indebtedness. The only change that this entails would be the insertion of the word 'additional' and the phrase 'except open account or short term,' in the appropriate section of the act."

Much testimony was adduced before our subcommittee to the effect that in addition to convertible debentures, the investment companies should be allowed to purchase from the small business concerns debentures with stock purchase warrants and perhaps even preferred or common stock. As you know, S. 2611 contains a provision which would amend section 304 to delete the portion concerning convertible debentures and to provide that the investment company should supply equity capital to the small business concerns "in such manner and under such terms as the small business investment company may fix with the approval or otherwise of the administration." This would place the matter of equity financing on open negotiation between the investment company and the business concern. I am advised that this would provide for greater flexibility and marketability.

But, when giving consideration to this suggested change, there are other things to be considered; more especially the interest of the small business concerns and their attitude of giving up partial ownership and perhaps control of their company. At the present time, under section 304(b), the business concern can at least cause the investment company to make a decision as to whether it will convert its stock now rather than holding it over the head of the concern for a number of years. This can be done by calling the debentures on 3 months notice. Under the proposed change this would be deleted from the act and would be left to open negotiations. Of course, open negotiations in the marketplace are a desirable factor, but many feel that when a concern must have money and there is but one place to get it, there is no real open market and the negotiations are unilateral. It is the feeling of our subcommittee that an acceptable method should be sought whereby a small business concern might repurchase its equity from the investment companies. Of course, this is a very difficult field in which to legislate. Caution is desired because no change would be better than a change which would curtail the flow of equity capital into these business concerns. Repurchase provisions or other redemption factors could damage the marketability of this stock and a secondary market is certainly desired. On the other hand, the lack of repurchase options might well prevent small business from securing the equity financing needed. Fortunately, the testimony at our hearings indicates that some type of repurchase provision could be worked out that would be acceptable to both the small business and the investment companies. It should be pointed out here that there is nothing in the law at the present time to prevent repurchase options. In fact, testimony at our hearings indicated that some of these investment companies will be giving repurchase options.

The new section 304 proposed in H.R. 8096 contains such a repurchase provision. S. 2611 does not.

"Recommendation V: Compulsory purchase of stock in investment companies by the small business concerns: Section 304(d) of the Small Business Investment Act should be amended to provide that the small business concerns may have an opportunity to become stockholder-proprietors of the company by investing in the capital stock of the company in an amount equal to not less than 2 percent nor more than 5 percent of the amount of capital received from the investment company. This proposed change would make this stock purchase optional rather than mandatory.

"It is further the opinion of our subcommittee that at the time the act was passed it was the intent of Congress that the small business concerns should invest in the investment companies, and that the regulation adopted by the SBA which allows the investment companies to have a 30-day repurchase option on this stock was a modification of the act. That portion of section 107.304–1(h) of the regulations which provides for this repurchase option should be deleted and discontinued in practice by the SBA. It is the opinion of our subcommittee that if the Congress desires to amend the compulsory stock purchase requirements it will do so, but as long as it remains in the law it should be complied with fully. The SBA should give the appropriate committees of Congress its recommendation concerning the effect of this provision of the law in the operation of the program."

The testimony at the hearings before our subcommittee was unanimous that the present requirement which makes it mandatory for a small business concern to buy stock in the investment companies when they obtain capital from the investment companies is a handicap.

On one hand, it was testified that the small business concerns see in this provision just an added cost. I understand that the cost of financing through these investment companies is often well in excess of 10 percent and if the small business concern also buys stock in the investment companies the effective total cost very often will be increased to 15 or 20 percent. On the other hand, the investment companies themselves, of course, do not want their own ownership of the investment company diluted; and they say that more investment companies would be organized if this provision were removed. Our subcommittee has recommended that the present mandatory requirement be removed. However, we do feel that the small business should have the option or opportunity to buy stock in the investment company if they desire to do so. Subcommittee No. 1 feels that this compromise is a realistic one which will, to some extent, preserve the basic philosophy upon which this act was based and at the same time help to make the present investment companies operate more effectively.

As you know, S. 2611 would completely eliminate this stock purchase provision whereby H.R. 8096 would eliminate the mandatory requirement but would retain in this stock purchase provision a requirement that the small business concern should be given an opportunity to purchase stock in the investment company.

"Recommendation VI: Direct loans to small business concerns and aid to unincorporated small business: Section 305(a) of the act should be amended in such a manner as to indicate that the making of loans to small business concerns is also a 'primary' function of these investment companies just as is that portion of the act that provides they will supply equity capital.

"The subcommittee is of the opinion that the SBA should change its policy which prohibits the participation by the SBA with the small business investment companies in making loans. It is felt that, as the act is presently worded, there is nothing to prohibit this participation. Participation by SBA is provided with banks in its financial assistance program. A deferred or immediate participation by the SBA would have the practical effect of supplying a source of supporting funds for these investment companies and should encourage the making of loans to sound small business enterprises."

Section 304 of the Small Business Investment Act provides that it should be a "primary" function to provide equity capital and section 305 of the act provides for direct loans, failing to indicate that this was "primary."

Subcommittee No. 1 feels that the loan program under section 305 of the act is a vital and important function and should be on an equal plane with the equity financing portion under section 304.

S. 2611 would eliminate the word "primary" from section 304. I believe it would be preferable to leave it in and add to section 305 that it would also be a "primary" function to provide direct loans.

"Recommendation VII: Rediscounting agency: Consideration should be given by Congress and the SBA to the establishment of a rediscounting agency or refinancing arrangement for the purpose of rediscounting loans made by the small business investment companies and creating a secondary market for convertible debentures or stocks obtained from small business concerns by the small business investment companies."

A readily available secondary market or rediscounting agency is a necessity if the small business companies are going to survive and prosper as intended by Congress. There is some evidence that the investment companies will be in danger of becoming "locked in" unless a readily available secondary market is open to them. It is, of course, hoped and expected that private funding sources will be available to these investment companies but it is also felt that it would be an error to provide machinery for establishing equity capital and long-term credit for small businesses unless consideration is given to providing facilities for the necessary financing with which to culminate or effectuate the program. The creation of a rediscounting agency similar to the Federal National Mortgage Association or the Federal Intermediate Credit Bank might be desired.

"Recommendation VIII: Geographical limitation of the act: The Small Business Investment Act of 1958 should be amended to provide that the geographical limits of the act would include the territory of Guam.

"This could be provided for by an amendment to section 103(4) of the Small Business Investment Act to provide that the term 'United States' include, in addition to the Commonwealth of Puerto Rico and the District of Columbia, the territories of the United States."

Other recommendations pertain to administrative matters.

Mr. Chairman and members of the committee, this completes my statement. These matters are dealt with more extensively in the text of chapter II of our report, a copy of which has been made available to each of you.

SENATE

FRIDAY, APRIL 29, 1960

The Senate met at 12 o'clock meridian, and was called to order by the President pro tempore.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

God of light unclouded, in whom is no darkness at all: With gratitude we lift our hearts to Thee for the daily sacrament of beauty, as the splendor of the dawn has once more awakened the earth to newness of life.

As day so swiftly follows day, the hurrying pace of time amazes and solemnizes us. May we lengthen our brief hours of labor by intensity of living. Let us hasten to speak that which is within us, lest we be called away with our story untold. If there is any kindness we can show, may we not neglect or defer it, seeing that we pass this way but once.

This day may we not fail to find the wells of living water whose elixir alone can restore our jaded spirits, saving us from spiritual impoverishment and from all bitterness of heart.

We ask it in the dear Redeemer's name. Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the reading of the Journal of the proceedings of Thursday, April 28, 1960, was dispensed with.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed a bill (H.R. 10213) to amend the National Housing Act to halt the serious slump in residential construction, to increase both onsite and offsite job opportunities, to help achieve an expanding full employment economy, and to broaden homeownership opportunities for the American people in which it requested the concurrence of the Senate.

HOUSE BILL REFERRED

The bill (H.R. 10213) to amend the National Housing Act to halt the serious slump in residential construction, to increase both onsite and offsite job opportunities, to help achieve an expanding full employment economy, and to broaden homeownership opportunities for the American people, was read twice by its title and referred to the Committee on Banking and Currency.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. JOHNSON of Texas. Mr. President, under the rule, there will be the usual morning hour; and I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to consider executive business, to pass on the postmaster nominations on the Executive Calendar.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE REPORTS OF A COMMITTEE

The following favorable reports of nominations were submitted:

By Mr. CHAVEZ, from the Committee on Public Works:

Col. John A. Morrison, Corps of Engineers, to be a member of the California Debris Commission; and

Maj. Gen. Thomas A. Lane, Corps of Engineers, to be a member and president of the Mississippi River Commission.

The PRESIDENT pro tempore. If there be no further reports of committees, the postmaster nominations will be stated.

POSTMASTERS

The Chief Clerk proceeded to read sundry nominations of postmasters.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that these nominations be considered and confirmed en bloc.

The PRESIDENT pro tempore. Without objection, the postmaster nominations will be considered en bloc; and, without objection, they are confirmed.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDENT pro tempore. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

LEGISLATIVE PROGRAM — ORDER FOR ADJOURNMENT TO MONDAY, AT 10 A.M.

Mr. JOHNSON of Texas. Mr. President, I should like to inform the Senate that, under the agreement entered into, today there is a time limitation on amendments; and, following the morning hour, that time limitation will go into effect. Am I correct in that assumption?

The PRESIDENT pro tempore. That is correct.

Mr. JOHNSON of Texas. I should like to inform the Senate that I am agreeable to having the Senate remain in session as late this evening as may be necessary in order that each Senator may have adequate opportunity to offer any amendment he may desire to offer, and to discuss it, under the provisions of the time limitation, bearing in mind that if, today, we do not conclude with the offering of amendments and the debate on them, under the time limitation, we shall meet tomorrow and shall have a Saturday session, in order to accommodate Senators.

I believe the Senate should meet early on Monday. Therefore I ask unanimous consent that at the conclusion of the session today, the Senate adjourn to Monday at 10 o'clock a.m. If, later today, it is found necessary to have the Senate meet tomorrow, Saturday, I shall then change that order, in order to have the Senate meet on Saturday.

The PRESIDENT pro tempore. Is there objection to the unanimous-consent request? Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I should like to remind Senators that each Senator who submits an amendment and obtains an order for the yeas and nays to be taken on it will have an opportunity to speak for 5 minutes in favor of the amendment, and there will be available 5 minutes for debate by those who may oppose the amendment, under the time limitation, on Monday. I am hopeful that we can send the bill to conference late on Monday.

We expect to take up the space authorization bill, involving approximately $1 billion, immediately following our action on the mutual security bill.

In addition, I have given notice that we expect to take up any other bills which may be on the calendar.

I should like to have all Senators prepared, between now and July, as I shall be prepared, to be in attendance in the Senate on Saturdays, or else be prepared to miss votes. We also wish to give adequate notice that we may hold evening sessions.

We have now come close to the 1st of May, and we expect to get out of here early in July. We have been very considerate of all Members, and from time to time we have adjusted the schedule of the Senate in order to suit the convenience of one individual Senator. But now, with only 2 months remaining, and inasmuch as the President is very anxious to have a good deal of the proposed legislation passed, we shall have to adjust our schedule accordingly.

HEARINGS ON THE STATE, JUSTICE, AND COMMERCE DEPARTMENTS APPROPRIATION BILL

Mr. JOHNSON of Texas. Mr. President, I should also like to announce that, due to the fact that the Attorney General is in Africa, and the fact that the Secretary of State is preparing for the summit conference, with the result that they are not able to testify at the hearings previously scheduled for the State,

Justice, and Commerce appropriation bill, those hearings will not be held until sometime in June. I hope to be able to conduct the hearings personally, and to have both the Secretary of State and the Attorney General carefully review their budget estimates, because I am very anxious to save every penny we can save, particularly in the case of the old line departments, as to which the security or defense of the Nation is not involved.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

DEFENSE PRODUCTION ACT AMENDMENTS OF 1960

A letter from the Director, Office of Civil and Defense Mobilization, Executive Office of the President, transmitting a draft of proposed legislation to extend the Defense Production Act of 1960, as amended, and for other purposes (with an accompanying paper); to the Committee on Banking and Currency.

REPORT ON EXAMINATION OF PROCUREMENT OF MOBILE AIR-CONDITIONING CARTS UNDER DEPARTMENT OF THE AIR FORCE PRIME CONTRACTS WITH CONVAIR

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the examination of procurement of mobile air-conditioning carts for ground support of B–58 airplanes under Department of the Air Force prime contracts with Convair, a division of General Dynamics Corp., Fort Worth, Tex., dated April 1960 (with an accompanying report); to the Committee on Government Operations.

CLAIM OF CERTAIN INDIANS *v.* THE UNITED STATES

A letter from the Associate Commissioners, Indian Claims Commission, Washington, D.C., reporting, pursuant to law, that proceedings have been finally concluded with respect to the claim of *The Confederated Tribes of the Colville Reservation, as the representatives of the Colville, Lake, San Poeils, Nespelem, Okanogan, and Methow Tribes, Louie Camille and Peter J. Gunn, as the representatives of the Colville Tribe, Pete Lemery and Florence Quill, as the representatives of the Lake Tribe, Alex L. Covington and Lewis H. Runnels, as the representatives of the San Poeils Tribe, Eddie Yeracostchin and Ed Hilakahn, as the representatives of the Nespelem Tribe, Alex Nicholson and Narcisse Brooks, as the representatives of the Okanogan Tribe, Sam Miller and Michel Charley, as the representatives of the Methow Tribe, and The Confederated Tribes of The Colville Reservation as successor to the claims of the Colville, Lake, San Poeils, Nespelem, Okanogan, and Methow Tribe, Petitioners,* v. *The United States of America, Defendant,* Docket No. 181 (with accompanying papers); to the Committee on Interior and Insular Affairs.

REPORT ON FRESH, FROZEN, AND PROCESSED SHRIMP

A letter from the Acting Secretary of the Interior, transmitting, pursuant to law, a report on fresh, frozen, and processed shrimp, dated April 1960 (with an accompanying report); to the Committee on Interstate and Foreign Commerce.

AMENDMENT OF SECTION 376 OF TITLE 28, UNITED STATES CODE

A letter from the Director, Administrative Office of the U.S. Courts, Washington, D.C., transmitting a draft of proposed legislation to amend section 376 of title 28, United States Code (with accompanying papers); to the Committee on the Judiciary.

ELIGIBILITY OF AMERICAN NATIONALS FOR SCHOLARSHIPS AND FELLOWSHIPS AUTHORIZED BY NATIONAL SCIENCE FOUNDATION ACT OF 1950

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to make American nationals eligible for scholarships and fellowships authorized by the National Science Foundation Act of 1950 (with an accompanying paper); to the Committee on Labor and Public Welfare.

KLEBERG COUNTY (TEX.) BAR ASSOCIATION APPROVES A JUDGE ADVOCATE CORPS FOR NAVY

Mr. YARBOROUGH. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution adopted by the Kleberg County Bar Association favoring passage of legislation "to establish a Judge Advocate General's Corps in the Navy."

The Army has a separate Judge Advocate General's Corps; the Air Force has a separate Judge Advocate General's Corps; the Navy needs, wants, has requested, and should have a separate Judge Advocate General's Corps also. It would give professional status to Navy lawyers now doing fine work under temporary assignment.

I am in agreement with the Kleberg County Bar Association and others advocating passage of this legislation.

The resolution of this organization was forwarded to me by the Honorable Robert H. Alcorn, secretary of the Kleberg County Bar Association.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

At a meeting of the Kleberg County Bar Association in Kingsville, Tex., on the 19th day of April 1960, a study was made of a "bill to establish a Judge Advocate General's Corps in the Navy." The provisions of the bill were discussed and it was decided that this legislation was specifically beneficial to the U.S. Navy, and generally beneficial to the overall defense effort.

It was resolved that the Kleberg County Bar Association would be placed on record as favoring expeditious enactment of this legislation.

ROBERT H. ALCORN, Esq.,
Secretary of the Kleberg County Bar Association.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. STENNIS, from the Committee on Aeronautical and Space Sciences, with amendments:

H.R. 10809. An act to authorize appropriations to the National Aeronautics and Space Administration for salaries and expenses, research and development, construction and equipment, and for other purposes (Rept. No. 1300).

By Mr. CHAVEZ, from the Committee on Public Works, without amendment:

H.R. 5349. An act to provide for the conveyance to Orange County, Calif., of all right, title, and interest of the United States in and to certain real property situated in Orange County, Calif. (Rept. No. 1301).

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CARLSON:

S. 3445. A bill to provide for the issuance of a special postage stamp honoring apprenticeship as a sustaining force in our economic life; to the Committee on Post Office and Civil Service.

By Mr. CASE of South Dakota:

S. 3446. A bill to amend the act of July 3, 1952, as amended relating to research and development and utilization of saline water; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. CASE of South Dakota, when he introduced the above bill, which appears under a separate heading.)

By Mr. YARBOROUGH:

S. 3447. A bill for the relief of Daniel H. Fischer; to the Committee on Finance.

By Mr. SCHOEPPEL:

S. 3448. A bill for the relief of Col. Samuel Hale; to the Committee on the Judiciary.

By Mr. HARTKE (for himself, Mr. MANSFIELD, Mr. GREEN, Mr. DOUGLAS, and Mr. RANDOLPH):

S. 3449. A bill to amend title X of the Social Security Act to enable the States to provide more adequate financial assistance to needy individuals who are blind and to encourage and stimulate needy blind individuals to become self-supporting; to the Committee on Finance.

(See the remarks of Mr. HARTKE when he introduced the above bill, which appear under a separate heading.)

By Mr. ELLENDER (by request):

S. 3450. A bill to amend section 22 (relating to the endowment and support of colleges of agriculture and the mechanic arts) of the act of June 29, 1935, to increase the authorized appropriation for resident teaching grants to land grant institutions; to the Committee on Agriculture and Forestry.

By Mr. EASTLAND:

S. 3451. A bill for the relief of Mrs. Mildred H. Horne and her children, Faye Horne, Frances Horne, Floyce Horne, Patricia Horne, and Brenda Sue Horne; to the Committee on the Judiciary.

By Mr. HARTKE:

S. 3452. A bill for the relief of Vladimir (Talevic) Talevski; and

S. 3453. A bill for the relief of Chrysostomos Pascali (Paschalis); to the Committee on the Judiciary.

By Mr. HILL (for himself and Mr. MCNAMARA):
